From: Don Meyer
Topic: 1 Message: 1

Here is what I am thinking ... have all the reflectors go to haveing just there members on there reflector and then have this reflector for a joint refector ...so you send a email to your reflector and to this reflector if you want everone to see it then we get rid of the junk going on in the mcares and ocec and so forth .... What do you think .... Don

2. Welcome Mark

Yahoo group: WestMichiganHams (2006 — 2008)

From: K8MHZ
Topic: 2 Message: 3

Want to try linking the two reflectors together until the transition is made? Just put mcares@yahoogroups.com as a member of WestMichiganHams and see what happens. After a period of time we will remove the link.

I think it's at least worth a try.

Thanks for taking the effort to start a new reflector.

Mark K8MHZ

4. NEW Reflector

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-13 23:47:51 UTC
From: K8MHZ
Topic: 4 Message: 4

Hello Everyone,

It is my understanding that the new Reflector, WestMichiganHams, will be for general amateur topics with a bit of an em comm twist while the original reflectors will try to keep their content specific to their individual groups.

This is a great move and I thank Don for taking the initiative to start the new list (list / reflector are one and the same). I see that there are already 12 members, myself included.

I urge all members of MCARES to join the WestMichiganHams Reflector. At some time in the future, the MCARES list will be reviewing it's membership and those without an interest in MCARES will be removed. We hope that everyone gets on the new, improved WestMichiganHams Reflector before we start paring down the MCARES list.

Thanks and 73,

Mark K8MHZ

Attachments: 1 described; binary payloads are missing from this source WARC

To those of you getting this on the MCARES Reflector, please note that this is one of the last posts of general amateur interest that will be made to that reflector.

In the very near future, all posts of this nature will be placed on the fast growing, wildly popular WestMichiganHams Reflector.

If you are not a member yet, I urge you to join ASAP. We don't want anyone to get lost in the shuffle when we finally make the MCARES Reflector restricted only to MCARES messages.

Here is the form again to join:

Now on with the story....

Waxing Poetic

Finally, after over a decade in the hobby, I feel like a real ham. Not to say that I felt less than a ham before but since I joined the amateur radio hobby to get into emergency services I centered my interests around what it took to perform emergency communications. Last Fall, after having a license for over a decade, I decided to upgrade in order to take advantage of amateur HF privileges. I bought an HF rig and made some antennas.

Once I started not only hearing distant stations, but making contact with them, I soon wondered if I could improve my station's performance without sinking a ton of money into it. I originally just wanted a marginal station, one that would work if I needed it. I really had no interest in chatting with strangers. But to think that I could actually measure my skill as an antenna builder and erector by making contacts farther and farther away intrigued me. I was very surprised to see that my home made antennas were sufficient to make contacts in Florida, Texas, the Virginias....as far away as Calgary, Alberta. My radio is pretty average, it puts out 100 watts. A pair of car headlights puts more power into the air than my radio does. I was amazed to think that such a small signal could be heard that far away....but could it be better? I might not be able to shine my car's headlights on the QTH's that I have contacted, but I sure could drive my car there in a few hours.

I wanted to expand my horizons. I wanted to do it in a manner that I enjoy, making the most of what I had. I was not satisfied with the height of my home made bazooka antenna. So on Kid's day my 12 year old daughter KØLEY and I managed to gain about 12 feet of height by re-rigging the antenna to it's supporting tree. I also was not happy with my makeshift ground. It took punching a hole in the block in the basement wall to get the short connection I needed, but I managed to cut 10 feet or so out of my grounding electrode conductor making a very nice RF ground, with the length of the conductor to the earth itself now only 20 or so inches long. The result was a very quiet system. The static level

on all bands was reduced with 40 meters showing the best improvement.

But it was 20 meters that was really stretched out. I was now hearing stations in South America and Europe coming in...and actually moving the needle on my S-meter. What were the chances that any of them could hear me?

The voice coming in on 20 meters the day before yesterday was distinctly British. I listened as he spoke with a 9 call here in the states. They finished their QSO, said their 73's and I was wondering if there was a chance to make a contact. I called MØRAD and to my surprise he answered back.

It was that QSO that made me realize the true romance of HF communications. In a way that really is quite unforgettable. You see, the gentleman that answered my call was in England. Stratford-upon-Avon to be precise. The home of William Shakespeare, he said, writer of the most well known romance of all, Romeo and Juliet.

Michael, MØRAD and I had a very short QSO, most of which was getting my call to him correctly. He did manage to tell me about William Shakespeare. He also told me that it was one thing to make a long distance contact using a 1.5 kilowatt station and large beams, but doing it with a stock radio and a home brew antenna was part of the art of ham radio. The romance, if you will. The romance of HF radio had been presented to me from the home of the world's most famous romance itself, Stratford-upon-Avon, England. He also told me that he would 'give his right arm' to have a call like mine. That put a big smile on my face...they must not have vanity calls in England.

Others will use different measures, but making that trans-oceanic contact using an antenna that was built, tuned and hung by my ham daughter and myself was what made me feel like a real ham. The antenna was made from scrap pieces of coax, the radio was not connected to an amplifier and was powered by two car batteries being charged by a small power supply given to me by another ham, W8AMZ. I am sure smaller stations have made farther contacts, but this one, 3000 miles or so on less than an ampere of current was remarkable to me.

Although I don't have a home brew rig, I did get a taste of the accomplishment felt by those that do build their own. I think it is safe to say that the happiest hams go the farthest with the least.

The bands will start to open up soon. If you don't have an HF rig, it might be fun to get a small short-wave receiver and listen to what is out there. I am also planning on working HF into emergency communications. More on that later.

73,

Mark K8MHZ

9. New poll for WestMichiganHams

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-15 16:13:52 UTC
From: WestMichiganHams@yahoogroups.com
Topic: 9 Message: 9

Enter your vote today! A new poll has been created for the
WestMichiganHams group:

Amateur radio operators in times of emergency have stepped up and provided communication were they were needed. When it comes to volunteering our skills as hams how do you feel ?.

o I do not want to volunteer for anything
o I am a communicator and should only do communications
o I am limited on what I can do and do not feel I would be of help
o I know all I need to know and will help when the time comes
o I will train for some things but I have very limited time to participate
o I want to train for as much as I can and help were I am trained
o I seen the poll but will not vote

To vote, please visit the following web page:
http://groups.yahoo.com/group/WestMichiganHams/surveys?id=1462968

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

If you have a power supply with an adjustable output, you can probably get away with adjusting it to about 13 volts. I am using 13.8 volts in my shack and it doesn't overheat my gel cell batteries that I keep connected in parallel with it.

If your charger puts out 14 volts, a diode will drop the voltage by about 0.7 volts, but I recommend putting a resistor in line to keep from burning out the diode if the battery needs a lot of charge.

Of course, a trickle charger specifically designed for the purpose is better.

From: Andrew Young
Topic: 20 Message: 20

This is what I did. It's for Outlook Express:

1. Go to tools, choose Message Rules, and choose Mail.
2. Create a new rule by clicking NEW...
3. Choose "for All Messages." in the top window.
4. Choose "Move to the specified folder." in the second window.
5. Click on the word Specified in the third window.
6. Create a new folder and name it SPAM
7. Choose the new folder.
8. Click on OK.

The next thing to do is create rules that allow your desired incoming messages to stay in your inbox without being moved to the SPAM folder. This one gets most of them all at once:

1. Go to tools, choose Message Rules, and choose Mail.
2. Create a new rule by clicking NEW...
3. Choose "Where the From Line contains People." in the top window.
4. Choose "Stop Processing More Rules."
5. Click on the word "People" in the third window.
6. Add your entire address book to the list. You can do it all at once by clicking on the Address Book button. Click on the first entry, hold the shift key and scroll down to the last entry. Continue to hold the shift button and click on the last entry. They should all be highlighted. Click the Add button.
7. Click on OK.

IMPORTANT: Notice on the Mail Rules screen there are some Move Up and Move Down buttons. Make sure the first rule you created that moves everything to your SPAM folder is the last rule in the list. Use the buttons to move it there.

As you add people to your address book, you can edit the list in the applicable rule or add more rules. If you experiment with other types of rules, keep in mind exactly what you are telling the system to do and in what order.

The nice thing with this way is you don't lose any e-mails if they are rejected. They just go to another folder where you'll find them eventually.

21. Another suggestion for cleaning up the e-mails

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-16 03:10:16 UTC
From: Andrew
Topic: 21 Message: 21

I made a PDF copy of the instructions from my last post and uploaded it to the Files section.

Sorry for being such a know-it-all web hog here, but I just had another thought (just trying to be helpful):

When you reply to a thread using e-mail, the program usually leaves the previous e-mail(s) appended at the end of your message. While this is helpful if you're only reading one copy, it kind of makes for a very long e-mail by the time it is passed around a few times.

This also causes multiple copies of the same text in the "daily Digest" if several people have replied to a topic.

I would like to suggest we make a practice of deleting all the information below the reply except for the post to which you are replying. It will sure save space in our inboxes as well as speeding up download times for those with dial-up connections.

Andrew

Tom, I was using a program called Spamfighter (http://www.spamfighter.com/). If you look at my emails from last year you will see
Spamfighter?s little blurb at the end of my emails (you can get rid of the blurb by paying them $$). This program imbeds itself
into Outlook or Outlook Express and creates a folder named Spam. It ties via the net to a database of known spam. As you receive
emails, it puts known spam emails into the Spam Folder. You tell the program if a spam email makes it into your inbox and that
information is sent to their database via the net so other people don?t get the spam.

What is nice about this is that if email is sent to the Spam folder in error, you can simply move it to your inbox before you clear
out the Spam folder.

At the first of the year I stopped using the program and went back to another program that ?massages? my email and gives me the
option of ?bouncing? the email back to the sender. Removing Spamfighter was a snap.

With the amount of spam that you are getting, it seems to me that Spamfigher would be a better ?match? for you.

From: Laryn Lohman
Topic: 11 Message: 25

Any of the methods mentioned here will work, with proper application. The so-called trickle chargers may or may not properly trickle charge a battery for long periods of time. A battery requires the proper VOLTAGE, not a specific current, to be properly maintained. For gel bateries, it is typically 13.5-13.8 volts. For wet batteries, just a little lower, 13.4-13.6 volts. These trickle chargers are often no more than a transformer and a diode, and will work, but probably will kill your battery if left on for more than a few days because the voltage is too high.

I've had good luck with floating batteries across a regulated supply. Some of the repeater stuff in service here is powered this way.
1. the supply must be regulated, with the voltage adjusted to the above values
2. a diode, capable of carrying the full output of the supply, is put in series with the + output, which then feeds the battery and whatever you are powering, to prevent a fault within the supply from shorting the battery out, with resulting smoke emissions and maybe a fire
3. and I like a fuse on the battery + lead, rated somewhat above the supply output rating

A downside of this setup is that the supply will be very busy feeding a hungry battery after a power outage. If current regulated, the output voltage will fall to whatever is needed to regulate the current according to Ohm's law. Your connected equipment will have to deal with somewhat or much lower voltage during that time, until the battery charges to some level.

There are numerous ways to maintain batteries. This is one. I've floated deep-cycle marine-type batteries for 8-10 years this way. No matter which method, just watch the voltage across the battery during those long periods of <trickle> charge.

While on the subject of 12V charging, here is something I've been wanting to do, but my research has so far come up blank. So any ideas would be welcome.

I would like to use a system of 3x 6V golf cart deep cycle batteies in series, total 18V, to be regulated down to 13.8V during a power failure. I use the normal 13.8V power supply until a power failure occurs. I need some way to automatically switch to the 18/13.8 back up. Also need a float charger for the 18V and a heavy duty charger for the 18V to use when running a generator. Anybody ever hear of such a thing?

For a long time now I've been using e-mail programs from the Mozilla project. Currently using Thunderbird 1.5, which is available for many different operating systems and has smart "trainable" spam filters: you mark as "junk" what you consider to be junk, and the program gradually learns what *you* consider to be junk -- unlike some over-enthusiastic filter that your ISP installs and will not let you turn off.

You decide what it should do with the "junk" messages: delete them automatically, move them to a specified folder for further processing, or leave them where they are.

It misses a few and very occasionally marks as "junk" a message that I actually wanted, but I am very satisfied with it.

Tom,

You will need a pay service. This one costs 2 or 3 dollars a month and is the best I have seen. I tried many, but most of them also blocked mail I wanted to come into my Inbox. http://www.thespameater.com/

You can pay by the year or the month and they have a 30 day free trial.

Since we are in the testing phase, I'll send something (this) to see if it gets copied to my "General Hams" folder in Outlook.

If anyone wants to know how to set their Outlook Express up for sending individual groups to certain folders, I can send instructions. It's great for weeding through all the Rolex, Cialis, and Viagra ads.

By the way, General Hams is a Brigadier General- Only one star.

Both of the anti-spam methods I mentioned do not automatically delete anything. You always need to check the spam folders for good
email, some always squeaks thru the filters. Since I have SBC DSL, most of my email comes in from Yahoo Mail. Yahoo has pretty
good filtering, BUT good emails still get caught by the filters once in a while. I always browse the spam folder, especially the
sender?s name before emptying the spam folder.

Missing Legitimate e-mails:

That's why I opted for the manual method. For example, my method blocked two e-mails directed to me today. I simply added a rule for each sender to allow them through. They won't be blocked in the future. This approach is easier to manage than blocking 50 spammers a day.

All I have to do is scan through the "SPAM" folder for familiar addresses or subjects, not unlike what I was doing before with my inbox every time I checked my e-mail.

Nothing is deleted until I choose to delete it.

Andrew

Tom,

You will need a pay service. This one costs 2 or 3 dollars a month and is the best I have seen. I tried many, but most of them also blocked mail I wanted to come into my Inbox.
http://www.thespameater.com/

You can pay by the year or the month and they have a 30 day free trial.

Check out the emitter-follower regulator I uploaded to the Files section. With a big enough transistor, it should do what you're asking about as far as regulating it.

While on the subject of 12V charging, here is something I've been wanting to do, but my research has so far come up blank. So any ideas would be welcome.

I would like to use a system of 3x 6V golf cart deep cycle batteies in series, total 18V, to be regulated down to 13.8V during a power failure. I use the normal 13.8V power supply until a power failure occurs. I need some way to automatically switch to the 18/13.8 back up. Also need a float charger for the 18V and a heavy duty charger for the 18V to use when running a generator. Anybody ever hear of such a thing?

Gordon:

At that cw speed I'd suggest computer software. There are lots of options.

Also, how fast does W1AW send? The ARRL may not be an option at those speeds.

Nosebleed!

Yes, forty is flying. At that rate you hear words. And I thought I was having problems with individual letters. Now you need to get to hearing words and common phrases?!

There are great stories of fast cw types doing amazing things with and involving fast code. Hard to believe when I'm struggling with fifteen words in a minute.

Practice, practice, practice.

Joe:

Yes, getting "certified" by LoTW is sometimes painful. You should be very careful in how you apply and make sure you follow the steps faithfully. After this amount of time (from 12/24) I would suggest a quick e-mail to LoTW for clarification. They get busy and maybe things got misplaced.

The good news is that my previous certificate was good for a year (very short!). The recent renewal was for some three years (much more reasonable).

QSLs on LoTW are depressingly sparse. 1200 QSOs and only 220 QSLs. It took thousands of QSOs for a huge contest station to earn DXCC using only LoTW. So it's no panacea.

I had something like that going once. I used relays. Simple and reliable.
Switch the unregulated source, whether from the rectifier or 18V string,
which then feeds the regulator. Power the relay coil from the rectifier.

49. No 2M PSK31 net tonight

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-19 12:35:09 UTC
From: Joe Veldhuis
Topic: 49 Message: 49

The wildly successful Thursday night 2 meter PSK31 net will not be held tonight, as I have other engagements. It will also be skipped next week due to the NOARC meeting. Actually, the net is gone for good.

I've decided that, as I'm doing it now, it's not going to work out, so beginning in February, the following changes will be made:

* New time: Wednesdays, 2000h (8 PM) eastern time
* New mode: FM
* It will be done through a repeater. Probably the NOARC 145.490 machine, if N8ARY gives me the "disable timeout" command...

-Joe, KD8ATU

Joe
Any new nets on a repeater should be OKed with the club or the owner of the repeater. You may want to bring it up at the NOARC meeting and make sure they want that. The Tuesday night net has been down in numbers from what I understand. Just some thoughts. Tom KB8VEE

52. Old programs can act like spyware

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-20 18:28:13 UTC
From: K8MHZ
Topic: 52 Message: 52

Hi All,

After fighting with a difficult problem with my computer I would like to share some information.

The problem I was having was intermittent. My computer's Internet access would just stop. No error codes or nothing. Sometimes it would just start up again, but more often than not I would have to re-boot.

The problem turned out to be part of a program, MusicMatch, that I thought I had un-installed. The part left wanted to check the Internet for updates, but was damaged when I removed MusicMatch. What was happenning was that this broken part of MusicMatch was taking over my Internet connection but could do nothing more and just sat there, blocking anything else from happenning.

I found it by locating a scheduler file, mmtask.tsk, that would appear under system information but not in the add/remove window.

Since this was not spyware nor a virus, it was not detected by any software.

I would hazard to guess that this could happen with other programs as well. I think the tell tale sign would be that the problem exists after many updates of the best spyware and virus protection out is run.

I hope this helps someone with a hard to find access problem.

73,

Mark K8MHZ

Use a relay with a drop out voaltge at around 11.5V. that will switch to the set of batteries. I have found that some 24Vdc relay will drop out close to that. You could also set up a relay system that would put the batteries in parallel and have them attached to a 12V float charger. When AC Power fails, The charger could be dropped from the system, the batteries put into seires for 19VDC and us a regulator to drop the power back down to 13.8VDC. I will look on the web, I know there is a voltage regulator circiut on the web that will drop 24VDC to 13.8VDC at 35 AMPS. I fond it.
www.mitedu.freeserve.co.uk/Circuits/Power/1230psu.htm
Sound like a fun project and a good idea. I will get my pendil out and see about putting togeather a circuit drawing. I my self use 3 deep cycle batteries in parallel but do not have a switcing circiut. I use them for all operations and when the voltage drops to about 11.5V. (when radio has a problem) I manualy switch to a power supply and charge the batteries.
There are many other projects on the web site.

I just uploaded a file to the group called "RegCleaner." It allows you to view the programs in your registry and remove the entries if you don't need them anymore. It also has an uninstall function and a utility to remove programs from your installed programs list.

It's quite useful for solving problems like Mark's.

55. QMN MI - Snowfall reporting

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-20 21:43:27 UTC
From: Tom VanderMel
Topic: 55 Message: 55

All Hams in Western Michigan
Please lets all help Jim and the NWS out with this storm snowfall reports Thanks Tom KB8VEE

Heavy Snow expected throughout much of Lower Michigan.

Radio Amateurs are encouraged to report snowfall via the Michigan Net, QMN. The schedule of observations is as follows:

Routine Observation: 7:00 PM EST Friday

12-hour update: 7:00 AM EST Saturday

Routine Observation: 7:00 PM Saturday

Observations may be taken within a half hour of the scheduled time to accommodate the usual variables.

Reports may be transmitted via any one of the following CW/SSB nets:

MITN 3952 KHz 7:00 PM Friday (NWS rep present about ten minutes early)

QMN 3663 KHz 7:30 PM Friday

QMN 3663 KHz 8:00 AM Saturday

QMN-SSB 3932 KHz 8:15 AM Saturday

MITN 3952 KHz 7:00 PM Saturday

QMN 3663 KHz 7:30 PM Saturday

Packet Radio:

Reports may be posted to the K8QMN-14 PBBS at Moline (near Grand Rapids). Please follow these procedures:

1.. At command prompt, type "ST K8QMN."
2.. For subject line type "QTC 1 NWS (or other quantity)
3.. At message prompt, type in your snowfall report in "all caps."

Some digipeaters/nodes providing extended connections include:

W8IHX (KA-Node W8IHX-7) at Muskegon

K8QMN-9 (digipeater) at Grand Haven

W8VY-7 (KA-Node) at Kalamazoo

Sample messages:

Typical routine (24-hour) reports

4 R W8IHX 3 HASTINGS MI 0001Z JAN 21

NWS-GRR

BARRY SNOW 100/100

W8IHX

a.. Message indicates time of observation: 0100Z
b.. Observation made at Hastings in Barry County (please use your city/ township and not your mailing address.
c.. 1.00 inch of snow has fallen in the past 24 hours.
d.. 1.00 inch of snow is on the ground.

Typical 12-hour update report:

5 R W8IHX 3 HASTINGS ME 1200Z JAN 21

NWS-GRR

BARRY 12 HOUR SNOW 600/700/700

W8IHX

a.. Message indicates time of observation: 1200Z
b.. Observation made at Hastings in Barry County
c.. 6.00 inches of snow has fallen in the past 12-hours.
d.. 7.00 inches of snow on the ground.
e.. Storm total is 7.00 inches.

AREA FORECAST DISCUSSION

NATIONAL WEATHER SERVICE GRAND RAPIDS MI

347 PM EST FRI JAN 20 2006

.SHORT TERM...

WILL MAINTAIN CURRENT SET OF HEADLINES. UPSTREAM HEAVY SNOW HAS BEEN DEVELOPING IN IA WITH SOME THUNDERSTORMS INTO MO. RADAR FROM DSM SHOWS IMPRESSIVE BANDING GOING ON WITH THE STRONGEST BAND NEAR DSM. THIS BAND LINES UP WELL WITH THE 700 MB FGEN. AS FAR AS THE RAIN SNOW LINE...925 MB -1 DEG C WET BULB VALUES ARE WORKING OUT.

THE 18Z NAM SUGGESTS THE RAIN SNOW LINE WILL RUN THROUGH BEH TO NEAR LAN AT 00Z...MIGRATING TO JXN AFTER 06Z. 18Z NAM ALSO IMPLIES SOME ZR LAN ON SOUTH PRIOR TO 06Z. CONSIDERING THE NAM HAD INITIALIZATION ISSUES AT 850 MB WITH THE 12Z RUN...I DID NOT FORECAST ZR. ALSO TEMPS SOUTH OF LAN ARE IN THE LOW 40S...NOT TYPICAL OF WEATHER LEADING UP TO ZR EVENTS. THIS WILL BE SOMETHING WE NEED TO MONITOR THROUGH THE EVENING THOUGH. BASED ON THE DEEP UPRIGHT FGEN...WEAKNESS IN STABILITY AND FAVORABLE SOUNDINGS...COUNTIES WITHIN THE WARNING AREA SHOULD SEE A MINIMUM OF

6 INCHES. AM INCREASINGLY CONCERNED ABOUT MKG TO MOP BASED ON CURRENT TRENDS OF THE RADAR. WE HAVE ADVISORIES IN PLACE BUT STRONGER FGEN DOES CLIP THESE COUNTIES AND WE MAY NEED TO UPGRADE THEM. WILL CONTINUE TO MONITOR TRENDS THROUGH THE REST OF THE LATE AFTERNOON CLOSELY.

BETWEEN 09Z AND 15Z THE SNOW WILL PULL RAPIDLY AWAY FORM THE AREA.

KEPT SOME SNOW IN THE FORECAST FOR SAT AM. MOISTURE DEPTH REALLY PLUMMETS BEHIND THE LOW FOR SATURDAY AFTERNOON...WILL TREND THE FORECAST TOWARD PARTLY SUNNY. LITTLE OR NO MOISTURE AROUND FOR SATURDAY EVENING THUS MOSTLY CLEAR SHOULD WORK ANOTHER WAVE APPROACHES FROM THE WEST SUNDAY...WARM AIR ADVECTION HERE. WE SHOULD SEE TEMPS CLIMBING ABOVE FREEZING. WEAK COLD FRONT PUSHES THROUGH FOR SUNDAY NIGHT. WILL KEEP IT DRY AS THIS SYSTEM WILL BE LACKING MOISTURE.

.LONG TERM...

MON STARTS OUT THE LONG TERM PORTION OF THE FORECAST WITH A RIDGE OF HIGH PRESSURE IN PLACE OVER LOWER MICHIGAN. THIS RIDGE WILL BE INBETWEEN A NRN STREAM SYSTEM THAT EXPECTED TO REMAIN JUST NORTH OF CWFA OVER UPPER MI...AND A SRN STREAM SYSTEM THAT IS EXPECTED TO REMAIN MAINLY SOUTH OF THE OHIO RIVER. DRY CONDITIONS AND SLIGHTLY ABOVE NORMAL TEMPS CAN BE EXPECTED FOR MON.

A NRN STREAM WAVE IS STILL EXPECTED TO BRING A FRONTAL SYSTEM INTO THE STATE DURING THE DAY ON TUE. THE THREAT OF SOME LIGHT SNOW WILL BE FOUND AS THIS SYSTEM MOVES THROUGH TUE AFTERNOON INTO TUE EVENING. THE MODELS HAVE BEEN TRENDING THE AIR BEHIND THIS FRONT A LITTLE COLDER...AS H850 TEMPS ARE NOW EXPECTED TO FALL TO OR BELOW -10C FOR TUE NIGHT THROUGH EARLY WED. THIS SHOULD BE COLD ENOUGH TO BRING AT LEAST A THREAT OF LAKE EFFECT TO THE CWFA.

FOR THE REMAINDER OF THE WEEK...THE LAST COUPLE RUNS OF MOST MEDIUM RANGE GUIDANCE SEEMS TO BE TRENDING FURTHER SOUTH WITH THE NRN STREAM JET. THIS IN TURN IS EXPECTED TO ALLOW NRN STREAM SYSTEMS TO HAVE MORE OF AN IMPACT ON LOWER MI. A BRIEF MODERATION IN TEMPS IS POSSIBLE WED NIGHT AND THU AS THE FLOW OUT AHEAD OF THE NEXT WAVE BRINGS IN A LITTLE MILDER AIR. THIS LOOKS TO BE TEMPORARY IN NATURE FOR NOW AS THE NEXT FRONT IS EXPECTED TO MOVE THROUGH DURING THE DAY ON THU. H850 TEMPS ARE EXPECTED TO DROP ONCE AGAIN TO AROUND AT LEAST -8C TO -10C BY FRI MORNING...ALLOWING FOR THE POTENTIAL OF AT LEAST A LITTLE LAKE EFFECT. WITH THIS TREND EXPECTED NOW...WE HAVE SHAVED A FEW DEGREES OFF OF THE PREVIOUS FORECAST...AND FUTURE SHIFTS MAY HAVE TO CONTINUE THIS TREND.

&&

.GRR WATCHES/WARNINGS/ADVISORIES...WINTER WEATHER HEADLINES IN EFFECT FOR ENTIRE FORECAST AREA TONIGHT.

&&

I just uploaded a file to the group called "RegCleaner." It allows you to view the programs in your registry and remove the entries if you don't need them anymore. It also has an uninstall function and a utility to remove programs from your installed programs list.

It's quite useful for solving problems like Mark's.

Subject: [WestMichiganHams] Old programs can act like spyware

Hi All,

After fighting with a difficult problem with my computer I would like to share some information.

The problem I was having was intermittent. My computer's Internet access would just stop. No error codes or nothing. Sometimes it would just start up again, but more often than not I would have to re-boot.

The problem turned out to be part of a program, MusicMatch, that I thought I had un-installed. The part left wanted to check the Internet for updates, but was damaged when I removed MusicMatch. What was happenning was that this broken part of MusicMatch was taking over my Internet connection but could do nothing more and just sat there, blocking anything else from happenning.

I found it by locating a scheduler file, mmtask.tsk, that would appear under system information but not in the add/remove window.

Since this was not spyware nor a virus, it was not detected by any software.

I would hazard to guess that this could happen with other programs as well. I think the tell tale sign would be that the problem exists after many updates of the best spyware and virus protection out is run.

I hope this helps someone with a hard to find access problem.

73,

Mark K8MHZ

Hi Mark

The file mmtask.tsk is actually a Microsoft file. It is a multi-media task scheduler module. You can find out by doing a right click on the file, and clicking properties. In your case it may also be a damaged file. The original problem might be that something was damaged while an internet update, or music information request was scheduled and now it is looking for the program to run that is no longer there. I don't have much of a fix, but you might try doing a search on the internet for the offending filename to see what shows up.

That's up to you. You can view what is installed to load when your Windows starts. You can probably remove a lot of items from that part since you aren't really removing anything from the computer.

If there are entries from anything you once had but know you've removed, you can remove those.

You should be careful about removing things you aren't sure about, but you can undo a removals because they get put into the Backups tab.

The following WestMichiganHams poll is now closed. Here are the
final results:

POLL QUESTION: Amateur radio operators in times of emergency have stepped up and provided communication were they were needed. When it comes to volunteering our skills as hams how do you feel ?.

CHOICES AND RESULTS
- I do not want to volunteer for anything, 0 votes, 0.00%
- I am a communicator and should only do communications, 2 votes, 13.33%
- I am limited on what I can do and do not feel I would be of help, 0 votes, 0.00%
- I know all I need to know and will help when the time comes , 1 votes, 6.67%
- I will train for some things but I have very limited time to participate , 2 votes, 13.33%
- I want to train for as much as I can and help were I am trained, 10 votes, 66.67%
- I seen the poll but will not vote, 0 votes, 0.00%

Mark,

I have had problems similar to that with other programs, particularly Norton Antivirus. I tried removing it from my machine this past June when I got broadband and wanted to start using ZoneAlarm Security Suite for my antivirus software. It ended up corrupting the registry, so I ended up wiping the drive and starting over again. Up to that point I have never been a fan of doing that, but now must say it is true that the machine will run much better once it is done. Also, I no longer believe in backing up my data on optical. Instead, I went out and bought an external internal hard drive enclosure kit and a new internal drive and periodically back up all of my music, photos, and other personal stuff I don't want to lose. I have found this to be the answer to a lot of problems. Hard drive backup is more reliable than optical backup, plus, since I have 3 machines, I can take the drive from computer to computer and do file transfers and backups. I haven't set up home networking because every person I know who has has had a nightmare with it.

Someone jinxed me. After all the discussion about malware/spyware, my computer rebooted with the "blue screen of death." I couldn't even get it into safe mode.

After spending the morning reloading it, I am probably better off. There were a few things that weren't working right anyway.

I only lost what I couldn't remember I had. The rest was on my d:\ partition, fortunately.

Paul:

There must be tons of stuff on the internet, but I don't know the exact locations. There are folks in the radio club who enjoy boat anchors. I'm sure that they will surface here and drop a few hints. You could also visit a club meeting and get connected with these folks. Boat anchors are great fun. I was a SWL in the early 1980s using a Hallicrafters rig. Love the QSL cards, too. We even have a couple boat anchors at the clubhouse shack. The Drake twins are ready to be used but have not been powered up in an embarrassing number of years.

FYI, the next club meeting is February 2, 7:00 pm at the clubhouse, 2888 Scenic Drive in Muskegon. Check online for maps, give a call on the '94 repeater, or follow your nose to the log cabin in the woods.

I'm not sure if Tom is sharing his searches. He has found a possible project keyer for our effort. It's basic, $20, kit, and, with a few tweaks might fit the bill.

On another subject, the club is doing a fox hunting antenna building seminar on Feb 18. Tape measure antenna, antenna analyzer, run the thing through a few tests, use it on a known source. Stuff like that.

Jim:

I'm not sure if Tom is sharing his searches. He has found a possible project keyer for our effort. It's basic, $20, kit, and, with a few tweaks might fit the bill.

From: Jeff's Lists
Topic: 74 Message: 74

All I am helping a fellow ham get rid of some gear..

Last items I have are:

VX7RB - 225.00
TM-261A - 100.00
Dual Band Mobile antenna - Comet SBB5 - 25.00
Optima Yellow Top Battery 100.00
Byonics Pocket Tracker with GPS 125.00
Dual band Mobile antenna Comet B-10 25.00
Heavy Duty Magnet Mount 15.00
LED Emergency Light Amber 75.00
LED Emergency Light Red 50.00
Code 3 Halogen Amber Dual Light Beacon (also have Red Filters I believe)
50.00
UHF Motorola Maxtrac 125.00
Astro Flight 12.5 Amp 13 Volt AC / DC power supply 25.00
Light duty Magnet mount.. Short Coax 10.00
Garmin GPS 76? Gotta check # 150.00
2 - HP Jornada 540 includes 1 Compact Flash Wireless Network Card 100.00
for it all

If you have any interest please contact me as I am handling the sale..

Thanx
Jeff

79. Crossband Radios

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-27 02:03:24 UTC
From: Randy
Topic: 79 Message: 79

Hi all, I am considering upgrading my mobile radio with a new dual bander. I have been looking at crossband radios and think that is the way I'm going. I have been looking hard at the Kenwood TM-V708A and the Icom 2720H. The Icom 2720H looks to me as the better radio as far as what it will for the money. I

I am looking for your input on these radios and comments on crossbanding in general. The pro's and con's.

Thanks and I will be looking forward to reading your vast wealth of knowlegde on these subjects.

From: Andrew Young (N8ARY)
Topic: 79 Message: 80

Is the Kenwood TM-V7A still available? It's a very nice radio. It's probably similar to the Kenwood you're looking at. I use a Kenwood TM-733, which has been out of production for some time. The Alinco radios also seem to work fine. I haven't tried any Icoms for crossbanding.

Having crossband capability is very useful, especially in an emergency comms situation when you might be quite a distance from the repeater but not so far from your car.

I would recommend lots of practice with the crossbander before using it at an event or emergency.

PROS:
Extended range
Impress your friends
Convenience
You will learn a lot about repeaters and how they work.

CONS:
More expensive
Can get you into trouble during events if not used properly

==========

One thing you might not know but ought to check out-

Both of Grand Haven's repeaters transmit a CTCSS tone ONLY while the input frequency has a signal on it. This enhances the crossband experience because you don't have to wait for the carrier to drop if you use tone on both TX/RX (Encode/Decode) or however you want to say it on the crossbanding rig. This was done to improve the performance of the Echolink and IRLP stations but it is nice if you decide to crossband into them.

It's also nice for monitoring if you don't want to hear the time and ID announcements.

82. RE: [WestMichiganHams] Crossband Radios

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-27 03:54:43 UTC
From: Laryn Lohman
Topic: 79 Message: 82

> Also, Kenwood seems
>to be the only company that makes true legal crossbanders, those which
>the control operator can be at an HT and not sitting in the car near
>the crossbander. Kenwoods have a full remote control feature.

Mark, that's interesting. What specifically does Kenwood do to make it a legal crossbander??

Also, Andrew had good advice--practice and rehearse with possible frequencies that you might be using during a real communications event. Sometimes you find frequency combinations that are not compatible.

Also, these guidelines come to mind for crossbanding--

1. use low power on your crossbander or you'll find it in ashes in a very short time
2. use tone squelch on BOTH sides, preferably DIFFERENT tones for each side

Also, someone mentioned that the GH repeaters transmit tone only during signal on the input. That's not a bad idea, and I will probably do the same thing for the Holland repeaters...

Laryn K8TVZ

85. Re: [FWD: Crossbanders]

From: Laryn Lohman
Topic: 83 Message: 85

OK Mark, I understand. That would be the ideal and proper way to operate the crossbander. As far as IDing, what's wrong with IDing it yourself with voice?

Laryn K8TVZ

87. Re: Crossbanders

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-27 05:22:46 UTC
From: Laryn Lohman
Topic: 84 Message: 87

Mark, further thoughts on the legality of crossbanding with radios other than the Kenwood you speak about.

I don't think there is anything wrong with crossbanding (legally) if I am controlling (transmitting to) the crossbander on 222mc and above. This would be considered an Auxiliary station under the rules in 97.201. Remote control of another Amateur station is allowed there.

Having said that, we could discuss 97.205a:

(a) Any amateur station licensed to a holder of a Technician, General, Advanced or Amateur Extra Class operator license may be a repeater. A holder of a Technician, General, Advanced or Amateur Extra Class operator license may be the control operator of a repeater, subject to the privileges of the class of operator license held.

Maybe I'm over-simplifying, but as long as I stay in the legal repeater sub-bands with my crossbanding radio and associated handheld, I'm OK. Being careful, I could pick a clear repeater sub-band frequency and operate, no?

Laryn K8TVZ

88. Re: [FWD: Crossbanders]

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-27 05:28:57 UTC
From: Laryn Lohman
Topic: 83 Message: 88

Mark, for some reason my <reply> box doesn't contain the earlier postings....

Anyway, it is perfectly legal to ID an ordinary repeater with the user's radio. For example, "This is K8TVZ, through the K8DAA repeater". Repeaters didn't always ID by themselves, especially in the 50s and 60s when all control circuits were homebrew. There's nothing in the rules that state that a repeater must ID itself.

Laryn K8TVZ

89. Re: [WestMichiganHams] Crossband Radios

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-27 14:14:21 UTC
From: Andrew Young (N8ARY)
Topic: 79 Message: 89

I have to take part of my statement back. The V7A isn't so much a nice radio, but the crossbanding features are very convenient. The display wasn't so good if I remember right. It's blue, which looks really neat in the dark, but in sunlight, you can't see it. That's why I got rid of it and fixed my TM-733, which is also a Kenwood and I like it.

If you want to test different radios, eBay is a good place to get them at reduced cost, and you can resell them if you don't like them. That's how I have had so many radios.

Topic: 83 Message: 92

As long as we don't end up not being able to use them (like a recent over-illumination we had of a certain state law). Crossbanders are too useful for us to lose them. They're way more cool than frequency-controlled oscillating visible-spectrum electromagnetic wave signalling devices.

I do think this will fall under the "prudent use" category if it is a gray area because it is normally not even noticed by the other users. Mark- how many crossbanders did we have in use at the last AirFair? How many participants could even tell they were there? What would communications have been like without them?

All stations must ID to be legal. There are special rules for cross banders. If I can dig up something on this I will post it to the group.

All that being said, I use mine and don't worry too much about having it ID itself. I do plan on getting the digital CW id'er this year though.

This is a good topic. I will try to post some rulings if I can find them.

Mark, for some reason my <reply> box doesn't contain the earlier
postings....

Anyway, it is perfectly legal to ID an ordinary repeater with the
user's radio. For example, "This is K8TVZ, through the K8DAA
repeater". Repeaters didn't always ID by themselves, especially in
the 50s and 60s when all control circuits were homebrew. There's
nothing in the rules that state that a repeater must ID itself.

Subject: [WestMichiganHams] Crossband Radios

Hi all, I am considering upgrading my mobile radio with a new dual bander. I have been looking at crossband radios and think that is the way I'm going. I have been looking hard at the Kenwood TM-V708A and the Icom 2720H. The Icom 2720H looks to me as the better radio as far as what it will for the money. I

I am looking for your input on these radios and comments on crossbanding in general. The pro's and con's.

Thanks and I will be looking forward to reading your vast wealth of knowlegde on these subjects.

73, Randy Miller-

OK- so the station is controlled (not unattended) if you are resonably close and can intervene in a timely manner- This isn't the same as a full-time repeater, which I am sure there are times it is "unattended." It also isn't the same as letting an unlicensed person use your radio, so things wouldn't get out of hand very quickly.

You would normally be actively using the crossbander, and as such, be in control of it. If this means taking a minute or so to get to the controls, I think it's still OK, unless there's a smaller time limit.

A normal scenario would be having your vehicle in the area and operating with an HT. Most of the time, I'll bet you'd have your repeater within sight.

Like I said before, make sure you practice before going live with a net.

Good article, Mark. It has pretty good illustrations. I would say it might be a good learning tool for the next tech class.

98. 2m digital net - Wed nights @ 8pm on 5.49

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-27 23:17:11 UTC
From: Joe Veldhuis
Topic: 98 Message: 98

It's back, and hopefully better than ever. Starting this coming
Wednesday, February 1st at 8 PM, the 2 meter digital net will now be
held using FM, since very few people seem to have 2m SSB gear and that
was probably it failed before.

It will be done using the NOARC 145.490 +94.8 repeater in Grand Haven.
There is also a remote receiver in Grand Rapids with a PL of 91.5, and
an Echolink node (N8ARY-L).

This week's net will be done with PSK31, but in the future I do intend
to use other modes. MFSK16, RTTY, Olivia and any other modes that anyone
wants to try will have their nights. Also, at least once a month (and
possibly more), I want to use SSTV, or perhaps even HD-SSTV. Currently I
plan to do SSTV on the third Wednesday of each month.

A few things must be done differently due to the use of a repeater:

* Since it will timeout after 3 minutes, transmissions need to be kept
brief. PSK31 and MFSK16 should be kept to 500 words or less, faster
modes will permit more verbose transmissions.

* I will make a voice announcement every so often stating what's going on.

* A second or 2 should be left between transmissions on the off chance
that someone needs to make an emergency call.

Anyway, to get in on it, you need software and a soundcard interface.

For software I recommend:
Windoze:
- MixW (www.mixw.net) does everything but costs $50
- Free single-mode apps:
- PSK31/63: Digipan (www.digipan.net)
- RTTY: MMTTY (mmhamsoft.ham-radio.ch/mmtty)

Real OS's:
- gMFSK -hkj fork (www.w1hkj.com), free, does almost everything

The soundcard interface is just a simple device to carry audio between
the rig and soundcard. A simple one can be made by running a straight
cable from your rig's speaker jack to your soundcard's line-in jack,
cutting the cord off of a pair of headphones and connecting it to the
rig's mic or data in pins, and using a transistor switch for keying
(google "PTT interface"). If you can't find something to harvest them
out of I can send you the needed transistor, resistor and diode, I've
got a box of them. If you don't want to homebrew one, tons of
commercially-made ones are available, such as the Rigblaster or Rascal.

They go for around $50.

Some rigs might have an explicit "packet" mode, which causes them to use their data jack instead of the mic jack. If your rig has such a setting, and you are using the data jack, you should set it to this. If you are using an HF+VHF rig, it might also have a "digital" or "RTTY" setting. Don't use this setting, since that will put the rig in sideband mode. "Packet" will put it in FM mode. Most FM-only rigs, whether or not they have a data jack, probably do not have a "packet mode" setting, instead monitoring both the mic and data jacks all the time, and automatically taking audio from whichever side the PTT signal came from.

Hopefully I've supplied enough information here to get everyone started. I certainly hope to see everyone there!

73 de Joe KD8ATU SK . .

Attachments: 1 described; binary payloads are missing from this source WARC

Attached in Adobe format is a good homemade interface circuit for HT's with
excellent isolation if needed.

Let's give it a try if you have time.

If you're using soundcard packet, you're already set up besides the
software.

I know there are quite a few packet guys in Muskegon who could get into
this.

Please join in and let Joe exercise his gear.

Andrew

From: Laryn Lohman
Topic: 83 Message: 102

Mark, just some further thoughts woven in below--

>The snag with cross banders is that the
control operator has to be in reach of the controls...pretty hard when you
are a half mile away on an HT. No prob when the controls have been
>transferred to your HT!

There's not a specific amount of time that a control operator must be
able to reach the controls if needed and take action, although
certainly a "reasonable" amount of time comes to mind, whatever that
might mean... And certainly, the sooner the better, but I don't
necessarily think that one must be sitting in front of the radio at
all times for that purpose. Repeaters are allowed to operate under
"automatic control" which means that procedures must be in place to
assure compliance with the rules without the control operator being
present. Often, a part of that is having the 3 minute timer in place
on a repeater. (Although there is no specific rule that a repeater
must have a 3 minute timer...) That point is that INSTANT access for
the purpose of controlling a transmitter is not necessary. Having
said that, most crossbanders are not capable of automatic control
without modifications. (I'm not saying that xbanders are repeaters,
but maybe... more on that later.)

>There is a feature (not in the manual except for the addendum) that
allows
the TMV7A to be controlled by an HT set up with the proper digital tones.
All functions of the TMV7A can be controlled by an HT. Kenwood touts this
as part of their Skycommand (FCC denied the technology) controls and says
>that only Kenwood HTs can control Kenwood mobile rigs.

The Skycommand features sound like a good way to go. What did you
mean that the "FCC denied the technology"?

>I think it has something to do with the cross banders re-transmission
of it's recieved signal back to you.

I agree that IDing that side of the operation is a problem...

>First, transmitting to a repeater is not the same as controlling it.

Agreed. I guess that comment was aimed more at the crossbanding
radio, where if you are transmitting above 222.15mc you could operate
as an Auxiliary station while transmitting TO your crossbander, but
that really doesn't address the <other> side of crossband operation.

>Also, with the exception of digital vs. phone, band plans are not
part of FCC law, they are voluntary agreements meant to reduce

interference between stations.

True, but ther are segments of the 2M band for example where repeaters are not allowed. 97.205b. One could make a case that these xbanders are repeaters, according to the Definitions in the rules. 97.3a

>All stations must ID to be legal. There are special rules for cross banders.

Where are the special rules?

>Kenwood was working on a system called Sky Command that allowed an HT to go through a mobile to control an HF rig. If I was at a picnic a half mile from my car, which was 10 miles from my home, I could do HF DX through the system with my HT on low power. The FCC for some reason did not allow it. Too bad, I thought it was a cool idea.

Hmmm... I think it is out there. One of the local hams was just last week talking about being able to control his HF rig via his handheld.

Mark, good link that you posted <http://www.qsl.net/wb3gck/cbr.htm>

Good discussion too.

From: Dennis Harriss
Topic: 107 Message: 107

Hi All,

The Muskegon Area Amateur Radio Council (M.A.A.R.C.) VE Team will be holding tests of all elements for all classes of license this Saturday February 4, 2006 Starting at 9:00AM at the American Red Cross, 313 W Webster Ave., (Corner of 3rd & Webster) in Muskegon.

For those that need direction talkin will be on the 146.940 Repeater with a PL of 94.8.

The following items are required for testing:

a.. A valid form of ID.

b.. A copy of your current license (if any). This must be sent in with your paperwork.

c.. A copy of any CSCE (Certificate of Successful Completion of Examination). This copy must also be sent in with your paperwork.
d.. Calculator (if needed) and 2 pencils.
e.. $14 cash. We are unable to accept checks or any form of payment other than cash. Correct change is appreciated.
Please check the M.A.A.R.C. website for further information.
http://www.qsl.net/w8zho/ve.html

Any questions contact me either at my e-mail of 231-744-4522 (home) or 231-670-1284(cell)

Denny N8CTT A proud member of the M.A.A.R.C. VE Team

Mark, I was not aware that the Skycommand system used 2M. That definitely tells the story, as explained very well in the segment in your last post. I suppose it might not be illegal to sell the radios, just illegal to use them.

>Unlike a phone patch, we have not personal control over who keys up on VHF with the proper tones. None of the access tones, even DTCSS, can be encrypted or hidden.

It would be a good idea to use an unusual tone (not 94.8 in this area if possible) or DCS from your handheld to the xbander. Using different tones for each side of the xbander also reduces the chance of intermod locking up your xbander, which is of course what you don't want. As mentioned before, I believe that CTCSS is very important, even mandatory for use during Emcomms.

> The timer on my cross bander was timing out while I was in the store and had no control over it.

Too bad you can't disable the TOT in your rig. Maybe you'll find how. My IC2350 has that option. It works very well for xbanding.

Yes, there are numerous ways to use these things. I've not personally tried the back to back in-band repeater trick. You'll have to separate the two rigs perhaps by several hundred feet or more, depending on the in/out frequency separation, to prevent desense.

These things are fun. I like the basement idea.

Laryn K8TVZ

109. Re: [WestMichiganHams] Re: [FWD: Crossbanders]

I would like to see the repeaters get more cross band friendly.

If they are set up so the tone comes from the rigs transmitting into the repeater and drops when those rigs un key they are easier to work with cross banders. Some are and some aren't. I good test would be to see which repeaters hang the cross banders and which ones let them drop. Even if the TOT can be turned off, the extra heat building up in our crosss banders is not warranted.

Tone manipulation on the cross banders can help operations too, same as with the remote rigs we use. Many of us (I am one) forget that we can use the tones coming from the repeaters if we want to keep unwanted noise and other repeaters from opening up the squelch. They can also be tweaked to get the cross banders to drop out long enough to satisfy the TOTs.

It would be nice to have a list of repeaters that are already 'cross band friendly'

73,

Mark K8MHZ

110. RE: [WestMichiganHams] Re: [FWD: Crossbanders]

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-01-30 16:21:37 UTC
From: Bill Fries
Topic: 83 Message: 110

All:

I agree that repeaters should "pass" the CTCSS tone. From my perspective this might be handy if I want my personal radio to only open the squelch when called by someone who has the proper CTCSS to send. This way I can filter the chatter on a repeater to those who have the CTCSS tone coordinated with my personal radio. I do not use this feature in my radios right now. There is always the future.

Perhaps a group could put CTCSS tone squelch on their group's radios. Then all in the group could continuously monitor the repeater. When others in the group key the repeater all in the group have their squelch opened. I believe that there are other features associated with CTCSS or similar tones to allow simple paging?

So, using this with a cross band repeater is great. Using this to filter users on the repeater is also possible. Some food for thought. Today's radios have many features of interest.

The tones allow for a whole passle of cool features.

A read of our HT manuals about paging and tones will illustrate that. My Yaesu has not only the ability to use tones for privacy, but can use them as a sort of caller ID. The radio beeps, you look at the display to see which tone is being used, and then decide to take the call or not.

Too much for me, but I can see some may like the feature.

This has been done on the commercial two-way repeaters for 40+ years.
The repeaters don't really pass the tones, but decode a tone (if
enabled by the owner) then send "new" tone out, usually the same tone,
but can be configured for a different tone than the one received.
That way Joe's Plumbing doesn't bother Ray's Construction, sharing the
same repeater.

Obviously, most ham repeaters are not set up this way. But it is
quite possible.

All:

I agree that repeaters should "pass" the CTCSS tone. From my perspective this might be handy if I want my personal radio to only open the squelch when called by someone who has the proper CTCSS to send. This way I can filter the chatter on a repeater to those who have the CTCSS tone coordinated with my personal radio. I do not use this feature in my radios right now. There is always the future.

I asked Jim K8COP if the 82 and or 94 repeater put out a CTCSS ton and told that they both "pass through" the same same tone (94.8) that is required to bring up the repeater. Therefore, as Mark said, we can set up of receivers to only "open up" when the correct tone, in this case 94.8, is received. This would reduce or eleminate most of the "interference" we experence from the WI or Benton Harbor repeaters on 82 and the WI or Lansing repeater on the 94.

Perhaps a group could put CTCSS tone squelch on their group's radios. Then all in the group could continuously monitor the repeater. When others in the group key the repeater all in the group have their squelch opened. I believe that there are other features associated with CTCSS or similar tones to allow simple paging?

So, using this with a cross band repeater is great. Using this to filter users on the repeater is also possible. Some food for thought. Today's radios have many features of interest.

This will only work if the repeater does not require a tone to activate it. As far as I know our radios are only capable of sending out my tone at a time, which would be required to activate the repeaters receiver. This can be used on simplex frequencies with the only requirement, being to not interfere with an ongoing QSO.

Bill, AB8SC

All
Lets help support this Swap in Holland. Tom

YOU'RE INVITED TO HOLLAND AMATEUR RADIO CLUBS FIRST MONTHLY MINI -
SWAP.

Come join us at our new Technology and Training building in downtown
Holland. Bring the family and friends for a fun day. Parking
available. All
welcome.

DATE : SAT FEB 4th 2006 (Talk in : 147.060 94.8pl)
SET UP TIME : SAT 10 - 10:30
SWAP TIME : SAT 10:30 to 2:00pm
VENUE : 280 East 8th Street, Holland.

a.. HARC will provide * FREE table space
b.. FREE trunk swap parking space (weather permitting)
c.. FREE parking
d.. FREE entry
e.. FREE coffee
f.. 50/50 Draw
(To offset our new buildings upkeep, donations from
sellers /visitors
would
however be very much appreciated!)

YOU need to bring what ever surplus equipment to sell / swap.

"Both my cars aren't worth that much combined."

Then I would not combine them.

What did they cost NEW?

Anyway...

13 grand for the most expensive rig in our hobby.

Compare that to the most expensive rigs in other hobbies. Drag racing? 50 k and up. Heck, I know guys that spend $60,000 on a Harley. There are skeet guns in the 25 k range. How many friends in Lithuania can you make with a $25,000 skeet gun? And what of poker? 13 grand? One hand!

The cool thing about this hobby is the price range. Free (like my Swan 350) to 13+ grand. And anywhere inbetween.

73,

Hi All,

The Muskegon Area Amateur Radio Council (M.A.A.R.C.) VE Team will be holding tests of all elements for all classes of license this Saturday February 4, 2006 Starting at 9:00AM at the American Red Cross, 313 W Webster Ave., (Corner of 3rd & Webster) in Muskegon.

For those that need direction talkin will be on the 146.940 Repeater with a PL of 94.8.

The following items are required for testing:

a.. A valid form of ID.

b.. A copy of your current license (if any). This must be sent in with your paperwork.

c.. A copy of any CSCE (Certificate of Successful Completion of Examination). This copy must also be sent in with your paperwork.
d.. Calculator (if needed) and 2 pencils.
e.. $14 cash. We are unable to accept checks or any form of payment other than cash. Correct change is appreciated.
Please check the M.A.A.R.C. website for further information.
http://www.qsl.net/w8zho/ve.html

Any questions contact me either at my e-mail of 231-744-4522 (home) or 231-670-1284(cell)

Hi All, here ar some more links for suitsat...

Thought you might find this interesting...

Here is a "cut" from the latest issue of "NASA
Tech Briefs INSIDER" 02/02/06 issue... wherein,
more and more Amateur Radio is again being
mentioned quite a bit in the different
scientific journals.....

Tom KB8VEE 73......

SUIT SATELLITE
Currently aboard the International Space Station is an extra Russian
Orlan
space suit, which has reached the end of its lifespan and can no
longer be
worn. To dispose of it, the crew of the space station will send it
on one
final mission. During a spacewalk scheduled for tomorrow, the extra
suit will
be pushed into space, where it will become an independent satellite -
-
Suitsat-1.

Suitsat-1 will carry a radio transmitter, sensors, and materials
created by
students around the world, including voice recordings and artwork.
The suit
will broadcast on amateur radio frequencies, which are above the FM
broadcast
band. While Suitsat-1 remains in orbit, students, scouts, teachers,
ham radio
operators, and the general public are encouraged to tune into the
signal,
which will include the student recordings, information about the
condition
of the suit, and a special commemorative picture.

For photos and to listen to Suitsat-1, visit:
http://link.abpi.net/l.php?20060202A2

For the full story, visit:

Doc:

If I were getting that much coax I'd mail order it from Texas Towers or similar. There is a hamfest this weekend in Holland and another one in Traverse City next weekend. And if you can wait there surely will be lots of options in Marshall in late March.

If you mail order I would put the intention out here on the list and see if others would like coax, too. Seems you never have too much of the good stuff and I'd wager that you could easily get the order up to four or five hundred feet without too much trouble. McARES purchased five hundred feet, used a hundred, and sold the rest in about fifty-four seconds at a club meeting. It's popular!

That said, I have not heard of any locally available 9913. And don't forget the PL-259 connectors while you are ordering.

I'm not familiar with RG-8U but have a couple hundred feet of 9913 in use, currently. I really like the 9913 and use it on VHF and HF. A little stiff but great stuff, low loss, decent size to work with the connectors, etc.

I think it was WI8W who told me that he bought a 500' roll of Belden coax (don't know what variety) from a distributor in Grand Rapids, but I don't recall the name nor do I know whether they sell lesser quantities.

I am planning to buy Davis 9914F "Bury-Flex"

130. Fw: Radar Update

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-03 19:24:10 UTC
From: Tom VanderMel
Topic: 130 Message: 130

The National Oceanic and Atmospheric Administration (NOAA) Brings New Weather Radar Graphics to the Internet:

On February 21, NOAA's National Weather Service introduced new weather radar graphics on its web pages. These graphics, called RIDGE (Radar Integrated Display with Geospatial Elements), allow the displayed radar image to be combined with geospatially referenced elements such as topography maps, highways, and county boundaries, along with polygons for Tornado, Severe Thunderstorm, Flash Flood, and Special Marine warnings. The graphics also allow users to turn different data layers on and off, adding city labels and political boundaries, for example. Users are now more easily able to identify their location in relation to severe weather threats. The new graphics are currently in a testing and public comment stage. The new graphics are on display at http://www.srh.noaa.gov/ridge/.

The frequency is also the International Space Station (ISS) uplink frequency. I bet you could listen to 145.800 in addition to 145.99 and hear it if the ISS is overhead but not suitsat. For those who don't know what I am talking about, the ISS carries a digipeater with 145.99 uplink and 145.800 downlink, meaning you need to offset your radio as if you are using a repeater. Tx on uplink, Rx on downlink.

Check out http://www.rac.ca/ariss/faqariss.htm for more information.

KOLEY and I got to watch the launch. It was too cool!

Ham radio has to be the greatest of hobbies! I hope to be able to copy a transmission on 145.990 as the suit passes over Michigan.

I still can't get over it. Pun intended, but to be a part of a hobby that gets the attention of the greatest adventurers of our time is phenomenal. And to bridge the gap of space, attitudes and politics makes it even more incredible.

73 to all,

Mark K8MHZ

All:

If Jim, KC8PCJ is able to copy the Suit Sat signal and record the message I would really enjoy hearing the transmission on the Sunday evening two meter net.

Agreement?

The suit's deployment was wonderfully presented on the NASA web television broadcast. Wow!

My radio is permanently tuned to the frequency while I fervently hope for success. This is way beyond cool.

This signal from Suit Sat is phone. Actually, a greeting in several languages. Some key words in each language can be "collected" by listeners and special recognition (wallpaper?) is available. There will be telemetry (suit sat temp., voltage, and mission time) transmitted in English. And there is a special slow scan image transmitted. It's all on a tape loop running nine or so minutes. An optimum pass lasts around ten minutes?

I would hope that nobody tries to mask the signal with other transmissions. Let's keep the frequency clear for the listeners. Reports, on suitsat.org are that the received signal strength is very light. Sounds like a good time to turn down the squelch control. Personally I'm hoping the signal strength will improve.

Bill, AB8SC

145.990 is the packet uplink freq for the iss digi. My station was beaconing untill 4pm today it was then turned off. There may be other station that try to beacon the ISS, and that may be what you here. I have tuned my packet recieve to the 5.99. I will see if I can here the station.

> ==>LEAGUE URGES NEW YORK MEMBERS TO PROTEST STATE GRANT TO TROUBLESOME BPL
> TRIAL
>
> ARRL Directors Frank Fallon, N2FF, of the Hudson Division and Bill Edgar,
> N3LLR, of the Atlantic Division have called on the League's New York
> membership to protest a state grant to help fund a problematic BPL pilot
> project. ARRL learned this week that the New York State Energy Research
> and
> Development Authority (NYSERDA) has contracted with electric utility
> Consolidated Edison (ConEd) and BPL manufacturer Ambient to provide up to
> $200,000 in funding for a BPL pilot in the Westchester County community of
> Briarcliff Manor.
>
> "If you share our dismay that NYSERDA's funds are being used to support a
> known source of radio spectrum pollution, write to Gov Pataki and NYSERDA
> President Peter Smith to demand that the State of New York use its
> influence
> to ensure that the Briarcliff Manor BPL project is either brought into
> compliance with the FCC rules immediately or shut down," Fallon and Edgar
> said in a joint statement to New York ARRL members.
>
> The Briarcliff Manor project has been the subject of a string of
> complaints
> to the FCC, including several requests from the ARRL--the last filed just
> last month--to shut down the project until it complies with FCC rules.
>
> Fallon and Edgar called on ARRL members in the Empire State to write Gov
> George E. Pataki, State Capitol, Albany, NY 12224 and Peter R. Smith,
> President, NYSERDA, 17 Columbia Circle, Albany, NY 12203-6399. Pataki is a
> former Amateur Radio licensee, K2ZCZ (since reissued).
>
> ARRL CEO David Sumner, K1ZZ, points out that the League's concerns
> regarding
> the public grant have been on record with NYSERDA since June 2004, when
> Ambient prematurely announced a funding grant. Sumner said John Love, the
> NYSERDA project manager for the BPL grant, this week confirmed that a
> contract had been signed.
>
> "I shared with him our disappointment at Ambient's involvement, given
> their
> miserable track record in Briarcliff Manor," Sumner said. In his
> conversation with Love, Sumner said he explained that Ambient was
> violating

> FCC rules in Briarcliff Manor by exceeding Part 15 emission limits,
> causing
> harmful interference in the amateur bands and failing to post required
> information in the public BPL system database.
>
> Love "clearly didn't know much about the interference issue," Sumner said,
> adding that the official indicated NYSERDA's interest in BPL was as a
> means
> to improve the quality of electric power delivery. "However, he said the
> contract requires the parties to monitor and report on interference and
> its
> mitigation," Sumner noted. "I offered ARRL's technical resources to
> educate
> him."
>
> On January 5, citing FCC inaction in response to previous complaints, the
> ARRL renewed its complaint to the Commission about the Ambient Corporation
> BPL project in Briarcliff Manor. The BPL system uses power lines owned and
> operated by ConEd under a Part 5 Experimental FCC authorization. The
> League
> requested that the FCC instruct the BPL facility's operators to shut it
> down
> immediately and not resume operation until it can demonstrate full
> compliance with all applicable FCC rules.
>
> ==>NASA, INTERNATIONAL PARTNERS TAP TWO HAMS AS NEXT SPACE STATION CREW
>
> NASA and its International Space Station partners have announced that
> astronaut Jeff Williams, KD5TVQ, and cosmonaut Pavel Vinogradov, RV3BS,
> will
> be the ISS Expedition 13 crew. They'll arrive aboard the orbiting outpost
> in
> early April to relieve the current crew of ISS Commander Bill McArthur,
> KC5ACR, and Valery Tokarev. Vinogradov will be the Expedition 13
> commander,
> while Williams, a US Army colonel who's logged one space flight, will
> serve
> as ISS flight engineer and NASA ISS science officer.
>
> Brazilian astronaut Marcos Pontes will join Williams and Vinogradov aboard
> the Russian Soyuz spacecraft that will transport the new crew to the ISS.
> Vinogradov and Williams will spend six months on the station, while Pontes
> will spend eight days conducting research under a commercial agreement
> between the Brazilian Space Agency and the Russian Federal Space Agency.
> Brazilian telecommunications authorities have granted Pontes the call sign
> PY0AEB for use on his space journey, and there are plans for him to do
> Amateur Radio on the International Space Station (ARISS) school group
> contacts during his mission. He will return to Earth in April with
> McArthur
> and Tokarev, who have been in orbit since last October.

>
> Scheduled to fly on the next NASA space shuttle mission is German
> astronaut
> Thomas Reiter, DF4TR. If NASA clears the shuttle for flight by June,
> Reiter
> would join Williams and Vinogradov aboard the ISS for the remainder of
> Expedition 13. It's considered likely that Reiter, who had been scheduled
> to
> be aboard the ISS for Expedition 12, will be active on Amateur Radio.
>
> Williams flew aboard the shuttle Atlantis in May 2000 on a 10-day space
> station assembly mission. During that mission, he performed a spacewalk
> lasting almost seven hours.
>
> Vinogradov, a veteran of one long-duration spaceflight, flew aboard a
> Soyuz
> spacecraft to the Russian Mir space station as flight engineer for the
> 24th
> resident crew in 1997. During the 198-day mission he performed five
> spacewalks.
>
> ISS veteran Mike Fincke, KB5UAC, and Russian cosmonaut Fyodor Yurchikhin,
> RN3FI, have been designated as the Expedition 13 back-up crew.
>
> ==>LEAGUE CALLS ON FCC TO DENY PART 15 RULE WAIVER REQUEST FOR 902-928 MHZ
>
> Expressing concerns about interference potential and increased noise
> levels,
> the ARRL this week asked the FCC to deny an industry request to waive
> three
> sections of its Part 15 rules. Octatron Inc and Chang Industry Inc sought
> the waivers last November to accommodate unlicensed analog video and audio
> surveillance products they're developing that would operate in the 902-928
> MHz band--an Amateur Radio allocation. The FCC opened the proceeding, ET
> Docket 05-356, for comments in late December.
>
> "The manufacturer here has made a choice as to how to engineer its
> product,"
> the League said in comments filed January 30. "It now seeks to avoid a
> series of rules specifically intended to limit interference potential of
> analog devices in a band allocated to various licensed radio services
> simply
> because it deliberately engineered the device in a particular manner."
>
> The decision by Octatron and Chang Industry to employ analog, rather than
> digital, emissions at 1 W is at the heart of the waiver request. Section
> 15.247(b)(3) permits a 1 W power level for digital and spread-spectrum
> devices, but not for analog. The companies say they need 1 W to ensure
> reliable transmission. Digital devices still must meet the Part 15 power
> spectral density limitation, the League pointed out.

>
> "Neither can either device meet the power spectral density requirement of
> Section 15.247(e), applicable to digital intentional radiators which
> engage
> in continuous transmissions," the League contended. "Finally, the devices
> cannot meet the specifications for high-power, point-to-point operation in
> certain bands using highly directional antennas set forth in Section
> 15.249
> of the Commission's rules."
>
> The League took issue with the manufacturers' unsupported assertion that
> the
> surveillance systems "will not create significant interference."
>
> "Since the petitioners have apparently failed to determine, much less
> explain, the interference potential of their devices, it cannot be
> determined whether or not the underlying purposes of the rules limiting
> power and power spectral density for analog and digital devices in the
> 902-928 MHz band would be frustrated by a grant of the proposed waiver in
> this case," the League continued. "A waiver cannot be granted without such
> a
> finding."
>
> The ARRL argued that given their potential to interfere with licensed
> services in the 902 to 928 MHz band, they should instead be operated in a
> Public Safety allocation, such as 2450 to 2483.5 MHz, and on a licensed
> basis.
>
> "The precise purpose of the rules sought to be waived here was to preclude
> interference before it arises," the League said. "The purpose of this rule
> would be directly frustrated by permitting, without rulemaking, high-power
> analog devices that cannot meet the power spectral density limitation of
> Section 15.247(e)."
>
> The petitioners fail to show that the devices could not have been designed
> to meet FCC rules, the League said, adding that it appears the lower cost
> of
> manufacturing analog devices is apparently the reason why they're seeking
> the waivers. "This is not a valid basis for a waiver grant," the ARRL
> said.
>
> Granting "repeated waivers" for Part 15 analog devices that don't meet the
> fundamental interference-avoidance requirement of the power spectral
> density
> limit, the League concluded, "adds to the aggregate noise levels in the
> subject bands and contributes to the already prevalent 'tragedy of the
> commons' interference problems" in bands such as 902-928 MHz.
>
> ==>AMATEUR RADIO ANTENNA BILLS IN PLAY IN MISSISSIPPI, VERMONT
>

> Legislation is under consideration in Mississippi and Vermont to
> incorporate
> the essence of the limited federal preemption known as PRB-1
> <http://www.arrl.org/FandES/field/regulations/PRB-1_Pkg/prb-1.pdf> into
> the
> statutes of those two states. Echoing the language of PRB-1, the measures
> call on localities establishing ordinances regulating antenna placement,
> screening or height to reasonably accommodate Amateur Radio communication
> and impose the minimum practicable regulation to accomplish the
> municipality's legitimate purposes. ARRL Mississippi Section Manager
> Malcolm
> Keown, W5XX, reports similar bills were introduced this session in the
> House
> and Senate. The Senate version has already passed and been sent on to the
> House.
>
> "Since 2001, Mississippi hams have been trying to get a bill through the
> Mississippi Legislature to provide for 'reasonable accommodation for the
> erection of antenna structures' by local zoning boards and to separate us
> from the cellular telephone tower interests," Keown says. The Senate
> version
> of the PRB-1 legislation, SB 2709, cleared the County Affairs and
> Municipalities committees January 31, and it passed the full Senate
> February
> 1. The House version, HB 736, is on the House General Calendar for a vote
> there by February 9.
>
> "We now have two horses in this race," Keown said this week, urging
> Mississippi ARRL members to urge their state senators and representatives
> to
> support the measures. "Keep your fingers crossed!" Assuming one of the
> PRB-1
> measures succeeds in the House, minor differences in wording would be
> worked
> out in committee, Keown speculates. In past years, he says, a PRB-1 bill
> has
> made it through one legislative chamber only to die in committee in the
> other.
>
> Both Mississippi PRB-1 bills leave it up to local governing authorities to
> determine "the types of reasonable accommodation to be made and the
> minimum
> practicable regulation necessary . . . within the parameters of the law."
> The House version includes an additional sentence: "This legislation
> supports the Amateur Radio Service in preparing for and providing
> emergency
> communications for the State of Mississippi and local emergency management
> agencies."
>
> In Vermont, meanwhile, the House Government Operations Committee on

> February
> 2 heard public testimony on a PRB-1 bill introduced in the House, H.12.
> Several Amateur Radio operators attended the session along with
> representatives from the Vermont League of Cities and Towns, which opposes
> such legislation, and several public safety officials.
>
> The proposed Vermont antenna bill not only calls for community regulators
> to
> "reasonably accommodate" Amateur Radio communication, it includes a
> schedule
> of minimum regulatory heights, below which localities could not impose
> restrictions.
>
> On lots smaller than one acre, municipalities could not restrict the
> overall
> height of an Amateur Radio antenna and associated support structure to
> less
> than 75 feet above ground level "nor restrict the number of support
> structures."
>
> On parcels of one acre or larger, the bill, as written, would prohibit
> municipalities from restricting the height of an Amateur Radio antenna "to
> less than that specified in 47 CFR ?97.15(a) nor restrict the number of
> support structures." That section of the Amateur Service rules actually
> does
> not specify a height, but it does require antenna structures more than 200
> feet above ground to notify the Federal Aviation Administration and
> register
> the structure with the FCC.
>
> In historic or design control districts, the Vermont bill would permit
> localities to restrict the height of antennas and associated support
> structures to less than 75 feet but would not allow them to prohibit
> Amateur
> Radio antennas and support structures altogether nor to limit their height
> to less than that of the tallest permitted structure within such a
> district.
>
> The measure would grandfather existing Amateur radio antennas and support
> structures and provide for their repair or replacement "with comparable
> components" without further permitting or review.
>
> To date, 21 states have enacted Amateur Radio antenna bills that reflect
> the
> PRB-1 limited federal preemption.
>
> ==>NOMINATIONS INVITED FOR 2005 ARRL TECHNICAL AWARDS
>
> The League is accepting nominations from ARRL members and affiliated clubs
> for its three technical awards for the year 2005. The deadline is March 31

> to submit nominations for the ARRL Technical Service Award, the ARRL
> Technical Innovation Award and the ARRL Microwave Development Award.
>
> The ARRL Technical Service Award goes annually to a radio amateur whose
> service to the amateur community and/or society at large is of the most
> exemplary nature within the framework of Amateur Radio technical
> activities.
> These include, but are not limited to:
>
> * Leadership or participation in technically oriented organizational
> affairs at the local or national level.
>
> * Service as an ARRL technical volunteer.
>
> * Service as a technical advisor to clubs sponsoring classes to obtain
> or upgrade amateur licenses.
>
> The Technical Service Award winner receives an engraved plaque. In
> addition,
> the winner may request ARRL publications of a value of up to $100.
>
> The ARRL Technical Innovation Award is presented each year to an Amateur
> Radio licensee whose accomplishments and contributions are the most
> exemplary nature within the framework of technical research, development
> and
> application of new ideas and future systems. These include, but are not
> limited to:
>
> * Development of higher speed modems and improved protocols.
>
> * Promotion of personal computers in Amateur Radio applications.
>
> * Activities to increase efficient use of the amateur spectrum.
>
> * Digital voice experimentation
>
> The technical innovation award winner receives a cash award of $500 and an
> engraved plaque.
>
> The ARRL Microwave Development Award is given each year to an individual
> radio amateur or group conducting research and activity and applying new
> and
> refined uses in the amateur microwave bands. This includes adaptation of
> new
> modes both in terrestrial formats and satellite techniques.
>
> The Microwave Development Award winner receives an engraved plaque. In
> addition, the winner may request ARRL publications of a value of up to
> $100.
>

> Full information on these awards appears on the ARRL Technical Awards page
> <http://www.arrl.org/FandES/ead/instructor/instructor/awards.html>.
>
> Nominations should thoroughly document the nominee's record of technical
> service and accomplishments. Include basic contact information for both
> you
> and the nominee when making nominations for any of these technical awards.
> Submit all supporting documentation or information along with a letter of
> nomination that includes endorsements of ARRL affiliated clubs and League
> officials.
>
> Nomination forms for all three technical awards are available on the ARRL
> Web site <http://www.arrl.org/FandES/ead/award/application.html>. Send
> completed forms to ARRL Technical Awards, 225 Main St, Newington, CT
> 06111.
> Nominations must be received at ARRL Headquarters by March 31, 2006.
> Supporting information must be received at ARRL Headquarters by April 15.
>
> For more information, contact Norm Fusaro, W3IZ, <w3iz@...> at ARRL
> Headquarters.

> ==>SOLAR UPDATE
>
> Propagation prognosticator Tad "Don't Let the Sun Go Down on Me" Cook,
> K7RA,
> Seattle, Washington, reports: Solar activity is very low! Average daily
> sunspot numbers for the week were down by more than 40 points to 9.1.
> Average daily solar flux dropped nearly 11 points to 80.6. Geomagnetic
> conditions, with the exception of January 26, were stable and quiet. On
> January 26 the interplanetary magnetic field, which can shield Earth from
> solar wind if it is pointing north, turned south, and the mid-latitudes
> experienced some moderate geomagnetic activity, with the A index for the
> day
> at 15. Polar regions saw a lot more activity, with the College A index in
> Alaska going to 36.
>
> The sun has been spotless since January 29, and daily readings of zero
> sunspots could continue for another week. We will observe more and longer
> periods such as this as we head toward the solar minimum, still expected
> about to occur about a year from now. Geomagnetic conditions should remain
> quiet and solar flux at around 77. It may not begin to rise again until
> February 10.
>
> Sunspot numbers for January 26 through February 1 were 24, 29, 11, 0, 0, 0
> and 0, with a mean of 9.1. The 10.7 cm flux was 86.9, 83.5, 80, 79.5,
> 78.8,
> 77.6, and 77.6, with a mean of 80.6. Estimated planetary A indices were
> 29,
> 8, 6, 3, 1, 2 and 4, with a mean of 7.6. Estimated mid-latitude A indices
> were 15, 7, 4, 1, 0, 1 and 3, with a mean of 4.4.

Subject: [W8ZHO] VE Test Session

What a great day at this morning's VE session at the Muskegon Red Cross!
Two Tech plus to General candidates from Ludington - passed!
Two new Technician hopefuls from Holland - passed!
Two other new Tech hopefuls - passed!
One pre-1987 Tech grandfathered in for General!

As VE's, it's sometimes hard to convince a test candidate that we really are there to help them, not to keep them out. It's a real drag having to tell anyone that they didn't make it - just ask WB8OQT. It's days like this that really make being a VE fun.

Also, this is a good opportunity to thank all of you that take part in licensing classes and elmering. The time and expertise you put into helping others is greatly appreciated and admired. Thank you!

Hi Paul,

You need to be more specific. i.e. equipment and your ultimate goal.
AGW allows multiple packet engines to run simultaneously using a single
serial port. AGWTERM is a simple packet program that can be one instance
running in under AGW.

As far as the "test, test" we need the entire line that you monitored to
determine if your station or some other station sent the text.

152. simplex repeater

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-06 13:06:57 UTC
From: Deater, Tim
Topic: 152 Message: 152

Good morning everyone. I am looking for one of those simplex repeaters that you would connect to a hand held radio. I have some experimenting I want to do with one if I can find one for the right price. Anyone got one lying in the closet you want to get rid of?

Thanks!

73

From: kc8pcj@verizon.net
Topic: 155 Message: 155

Here is an update on suitsat from the amsat site.

SuitSat Status 4 February
Paraphrasing Mark Twain....the demise of SuitSat-1 is highly exaggerated!!

It is now nearly 24 hours since the successful deployment of the SuitSat-1 experiment. These past 24 hours have been a wild ride of emotions...tremendous highs...deep lows when people reported no signals and said SuitSat-1 was dead and now....some optimism.
Su
It is absolutely clear that SuitSat-1 is alive. It was successfully turned on by the ISS crew prior to deploy and the timing, micro-controller functions and audio appear to be operating nominally. The prime issue appears to be an extremely weak signal.

I have heard several recordings and have monitored two passes today. When the signal is above the noise level, you can clearly hear partials of the student voices, the station ID and the SSTV signal. One of the complicating factors in reception is the very deep fades that occur due to the spin of SuitSat.

Based on the information we know thus far, one can narrow down the issue to the antenna, the feedline, the transmitter output power and/or any of the connections in between. Through your help, we would like to narrow down the issue further and also gather some internal telemetry from the Suit.

If the transmitter is running at full power, we would expect the Suit to end operations in the next few days to a week. If it is not, then it will operate much longer. Since we do not know how long this experiment will last, we ask for those with powerful receive stations to listen for Suitsat---especially during direct overhead passes when the Suit is closest to your area. If you can record these passes and send the audio to us, it would be most appreciated. We will continue to be optimistic that this issue will right itself before the batteries are depleted. So please KEEP LISTENING!

Based on what we have learned, we would like to provide the following guidelines to save you time and facilitate gathering information:

1) You need as high a gain antenna as possible with mast mounted pre-amps. An arrow is the minimal set...it provides very brief snipets of the communications. HTs and scanners won't cut it.

2) I would not waste your time on passes below 40 degrees elevation. SuitSat is too far from your station to receive a reliable signal. We have found that closest approach provides several seconds of SuitSat communication with 22 element yagis.

3) The "gold" we are looking for right now is the telemetry information and how long the vehicle stays operational. So if you hear any of the telemetry, please let us know.

We are also working to get the voice repeater set up on ISS to downlink SuitSat audio on 437.80 in the event that the ISS Kenwood radio can receive the SuitSat transmissions. The

repeater may be operational as early as mid-day Sunday. Please do NOT transmit on 145.99, voice or packet, until we have confirmed that SuitSat is no longer transmitting. These transmissions interfere with our ability to hear SuitSat.

While the transmission part of the SuitSat experiment has not been stellar, SuitSat-1 has been tremendously successful in several areas. Some of these successes include:

- We have captured the imagination of students and the general public worldwide through this unique experiment.

- The media attention to the SuitSat project represents one of the biggest ever for amateur radio.

- We have had well over 2 million internet hits on http://www.suitsat.org today.

- Our student's creative artwork, signatures and voices have been carried in space and are on-board the spacesuit---the students are now space travelers as the Suit rotates and orbits the Earth.

- Carried in the spacesuit CD are pictures of Roy Neal, K6DUE, and Thomas Kieselbach, DL2MDE, two of our colleagues who have contributed to the ARISS program and have since passed away.

- We successfully deployed an amateur radio satellite in a Spacesuit from the ISS, demonstrating to the space agencies that this can be safely done.

- This ARISS international team was able to fabricate, test and deliver a safe ham radio system to the ISS team 3 weeks after the international space agencies agreed to allow SuitSat to happen. This was a tremendous feat in of itself.

SuitSat-1/Radioskaf is a space pioneering effort. Pioneering efforts are challenging. Risk is high. But the future payoff is tremendous. As you have seen, we have not had total success. But we have captured the imagination of the students and the general public. And we have already learned a lot from this activity. This will help us and others grow from this experience.

Keep your spirits up and let's continue to be optimistic. And please keep monitoring!!

73, Frank H. Bauer, KA3HDO
ARISS International Chairman
AMSAT-NA VP for Human Spaceflight Programs

All HAMS
Please pass on to your other groups and list

[Reply to: k8je@.... Do not click on REPLY.]

IF YOU CARE NOTHING ABOUT AMATEUR RADIO, DELETE THIS MESSAGE. IF YOU CARE ABOUT IT, READ ON, PLEASE.

Dear member,

A few days ago, I asked you to write to your US Representative (i.e. your member of the US House of Representatives, not your US Senators) urging them to co-sponsor H.Res. (this is a US House Resolution; not a H.R. which signifies a House bill) 230. This resolution calls on the FCC to review in depth the issues related to interference to police, fire, safety and Amateur radio communication and take appropriate action to safeguard these licensed services from QRM.

Many of you have written. Huge numbers of others of you have not. Very frankly, if we stick together and act together in asking our US Representatives to co-sponsor the resolution, we will get it passed and the FCC will be put into a position it cannot ignore. Writing is something that supports Amateur Radio . . . and your privilege to use your hard-earned Amateur Radio license. If you care about your license; if you care about the future of Amateur Radio; if you care about fair play from the FCC, you will send a letter. Amateur Radio needs you . . . now.

With your help and the help of all members in this Division, we can get the job done. The question comes down to a simple, "Do you care?"

I offer two ways for you to get the letter. You can go to: http://www.arrl.org/tis/info/HTML/plc/filings/hres230/HRes230-SampleLtr.doc and download it. Or you can copy it from this message (below).

Put in the name and address of your US Representative as well as your name, address (include your call sign) and send it. PLEASE BE CERTAIN to send me a COPY OF THE LETTER you send so I can forward this copy to our lobbyist in Washington, DC. Doing this will enable us to nearly double the value of the letter you send.

How should you send the letter? It makes little difference PROVIDED you send me a copy of it. Send it by snail mail to the Representative at his Washington office or at his home office, send it by FAX, send it by E-mail (if he/she has a working E-mail (send it by special courier, send it by carrier pigeon?). The main thing is to SEND IT and to SEND

ME a copy.

Who is your US Representative? Go to arrl.org, click on MEMBERS ONLY in the top banner and you'll see the names and addresses of your US Representative and your US Senators. Ignore the Senators at this time (the resolution is in the House, not the Senate; therefore, your Senators probably don't even know a thing about it).

Thanks for your help. The 10 minutes you spend in following through on this action will be well worth your effort.

73,

Jim

Jim Weaver, K8JE, Director

E-mail: k8je@...; Tel: 513-459-0142
ARRL Great Lakes Division
ARRL, the Reason Amateur Radio is!
Members, the Reason ARRL is!

SAMPLE LETTER TO CONGRESS

Rep. _____
Street address
City/State/ZIP

Dear Rep. _____

As a federally licensed Amateur Radio operator in your district and as a member of ARRL -- the national association for Amateur Radio, I ask you to support House Resolution 230. This resolution urges the Federal Communications Commission (FCC) to conduct a comprehensive evaluation of the potential of "broadband over power line" (BPL) systems to interfere with public safety and other licensed radio services.

BPL utilizes electric power lines to serve as the conductors of the broadband signals. Unfortunately, because the power lines are not shielded, they also act as antennas and radiate the signals into the air. These radiated signals will interfere with radio receivers tuned to the same frequency range. BPL has only been deployed to a very limited extent, but Amateur Radio already is experiencing severe BPL interference that the FCC has been unable or unwilling to correct. Unlike BPL, other methods of providing broadband Internet services to consumers, such as cable, DSL, wireless and Fiber to the Home, do not pollute the radio spectrum.

Last October 14, the FCC ignored the evidence that BPL systems will cause widespread interference and adopted rules for BPL deployment that provide inadequate protection to radio communication by First Responders and others who need reliable radio communication to ensure

our security. The FCC needs to do what it should have done in the first place: fairly and carefully review this evidence and adopt rules that will keep interference from BPL within reasonable bounds.

Because we need no infrastructure in order to communicate, the Amateur Radio Service is the only 100-percent fail-safe emergency communication capability in the world. Interference from BPL emissions will significantly disrupt this capability. Please cosponsor H. Res. 230 as soon as possible to express your concern over the interference potential of BPL to Amateur Radio operators and to public safety licensees.

Sincerely,

I had one but sold it when the price on e-bay exceeded what they were going for new.
If you're testing a radio on Amateur bands, you could download Echolink and connect to node 9999 in Sysop mode. It does the same thing.

Denny and Tom
Thanks for the information on the exam testing. I am going to GR 6:30pm this friday and and test for upgrade, in the event that I am not successfull. These other options may be of use. Thank you for the extra effort on the letting me know about other exam times.

Here is a short audio clip I recorded Jan 21, 06 when Bill Mcartuhur (KB5ACR) was making contacts from NA1SS (International Space Station). I listened to this pass for over 10 min. Using a 10 el yagi with 0 elevation. This can be done with a J-pole. The trick is to be heard by him. He is an active ham. I have heard him on 3 different passes in the last 4 weeks. He has acquired his work all continents award. If we could all be so lucky to have our ham shacks fly over each continent for a contact.

168. Wed. night digital net - now with 75% more procedure

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-08 01:23:32 UTC
From: Joe Veldhuis
Topic: 168 Message: 168

Well, last week I held the 2 meter digital net on the 145.49 repeater for the first time. I had one checkin (John KC8UNY), making this net infinitely more successful than the sideband nets I did last month.

Based on the experience, I've come up with a new procedure for the net:

Conversation modes (PSK31, RTTY and the like):
First, I will announce the net and ask for checkins using FM voice. When checking in with voice, be sure to specify whether or not you are equipped for the mode of the night. After that, I will switch to digital and ask for checkins from those who aren't able to use voice. With all the checkins taken, I will begin calling each station for a comment.

After that, I will switch back to voice, repeat the net announcement and ask for more voice checkins, then I will switch back to digital and ask for additional digital checkins. The calls for comments will then be repeated for any newly checked-in stations. That cycle repeats until there are no new checkins.

Image modes (slow-scan TV and related modes):
Pretty much the same as an HF SSTV net. I call for checkins with voice, then ask each station to make a voice comment and/or send an image. I will then offer advice as to any timing corrections that may need to be made.

One thing worth noting: keep your drive levels low. You should probably use considerably less drive for FM than you do with sideband. After last week's net, Skip K8RRA mentioned that the digital signals were an order of magnitude louder than the voice signals. If you don't have a deviation meter, just listen to your transmitted audio with another receiver to get an idea of how loud your signal is.

The next net is tomorrow (Feb 8) at 8 PM eastern, on the 145.49 -94.8 repeater. The mode will be PSK31. Next week I plan to do SSTV!

Questions? Comments? Complaints?
-Joe, KD8ATU

Note: To protect against computer viruses, e-mail programs may prevent sending or receiving certain types of file attachments. Check your e-mail security settings to determine how attachments are handled.

170. More on xband repeating

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-08 03:27:49 UTC
From: Laryn Lohman
Topic: 169 Message: 170

The Holland repeater .06 has been modified as of last week. It now transmits tone on 94.8 only until the courtesy tone is finished, then the tone goes away, with the carrier staying on another 4 seconds or so. Tone is also present on the output while DVR tracks are playing. This should be more user-friendly.

While on the subject, you should be aware that the GH .49 does not transmit ANY tone while someone is using the Grand Rapids receiver with PL91.5. KB8ODB is now aware of that quirk. Until changed, xbanders need to keep this in mind and not use tone decode on the .49 side.

Thanks for the tips and ideas. I have been playing with echo station a bit trying to make that work. Unfortunately most of the testing I will be doing is on a UHF Motorola HT1250ls+ radio on a commercial trunked radio system, so I don't think echo link would be a good idea. The echo station software will work if I can get an interface working.

Thanks again for the ideas!

Tim

radio. I have some experimenting I want to do with one if I can find
one for the right price. Anyone got one lying in the closet you want to
get rid of?

Thanks!

173. Weekly Hazardous Weather Discussion - 02/08/06]

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-08 20:50:54 UTC
From: Tom VanderMel
Topic: 173 Message: 173

This is right from the NWS.For all of you weather buffs We may get some snow in the next week. Tom KB8VEECentral Region Summary
Weekly Hazards Conference Call
Week of February 8, 2006
Valid for the assessment period: Saturday, February 11, through
Wednesday, February 22, 2006.

CPC began the discussion with the general weather pattern past and expected. CPC noted the lack of precipitation in the past seven days in the central part of the country as well as the retrograding ridge pattern expected during the assessment period.

CPC noted a couple short waves moving across the Great Lakes early in the assessment period, Saturday, February 11, through Tuesday, February 14. Given that cold air will be in place and parts of the Great Lakes remain unfrozen, CPC looks for periods of heavy lake effect snow at some locations in the Great Lakes area during this time.

CPC indicated they are planning to expand the much below normal temperature area into Nebraska, Minnesota and northwest Wisconsin.

Central Region participants showed concern for a potential storm affecting parts of Central Region sometime during the period of Friday, February 17, through Thursday, February 23. With the ridge expected to retrograde west into the eastern Pacific and Alaska, a trough would set up over the western United States. This would be a good pattern for a Colorado low to develop and move northeast. With the cold air remaining over the central part of the country, Central Region participants were concerned for heavy snow from such a low pressure system to fall from the Central Plains to the Great Lakes. CPC, while agreeing with the situation, did not feel strong enough to put a hazard area on the map this far in advance. CPC did seem more receptive to more strongly worded text discussion on this potential.

For more information, look at the following URL:

175. Fox Hunting Antenna

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-08 22:46:43 UTC
From: Bill Fries
Topic: 167 Message: 175

All:

We are building a simple tape measure and pvc pipe yagi antenna for two meter fox hunting. This cheap and simple antenna can be used in transmitter hunts. The cost of the antenna is not yet set. It will be cheap because of the materials and the number of folks pitching in on the cost.

The event is scheduled for 10:00 am local time on Saturday February 18. We will construct the antennas at the MAARC clubhouse. Visit yahoo maps and insert the address, 2888 Scenic Drive in Muskegon. Basically the place is just south of the Red Rooster Restaurant and Tavern on Scenic, north of Muskegon and south of Whitehall.

We need a good head count so we don't end up short on, oh, say, tape measures. So please reply with an RSVP to let me count you in the head count.

It is suggested that we construct the antenna and attach a short length of coax. You will need to bring along the thingie that matches the coax to your radio. That thingie is the pl-259 or n connector or whatever.

We want to construct and tune the antenna. Then we want to use them to "find" a known fox location so you know how to actually use the antenna to do its designed job.

So, please pass this message around and let everyone know that all are welcome to enjoy this activity.

Bruce, WD8KPQ is heading this adventure. I am just passing the word, taking down participating names, and purchasing some of the material for the antenna. So, please come out and enjoy the event, bring along a friend, and we'll enjoy the day.

Let me know you will be participating. I need to purchase the material for all.

Bill, AB8SC
President of the Muskegon Radio Club

Bill, thats funny, we had one scheduled for the same night we canceled it because of the new hams dinner one of clubs is having..

We are sponsoring a Fox hunt every month this year.. Its gonna be a blast.

Jeff

I would also like to add that variations of these antennas, when protected by plastic conduit, can be used as permanent base station antennas.

A 3 element Yagi mounted at 20 feet should be able to work all the repeaters in your own and adjacent counties, most with an HT.

A great project.

73,

Mark K8MHZ

180. SuitSat Designated AMSAT-OSCAR-54

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-09 14:43:03 UTC
From: kc8pcj_1
Topic: 180 Message: 180

SuitSat Designated AMSAT-OSCAR-54
Bill Tynan, W3XO, former President of AMSAT-NA and the OSCAR number coordinator has issued this statement:

"From the information sent to me regarding the SuitSat project, it is clear that the SuitSat spacecraft IS qualified to receive an OSCAR number.

Therefore, by the authority vested in me by the AMSAT-NA President, I am pleased to issue this new amateur satellite the designation AMSAT-OSCAR-54, or AO-54.

Congratulations are in order to Frank Bauer, KA3HDO, Sergey Samburov, RV3DR and the entire Radioskaf/Suitsat team for mounting this exciting and attention-getting project. Seldom has an amateur radio event captured the public's imagination and evoked so much positive news media coverage as SuitSat has."

73,
Bill Tynan, W3XO

Speaking of Hazardous WX outlooks..

If anyone is interested we send out the HWO every day and anytime there updates through an automated system..

Its free and includes the Day 1 & 2 Graphics from the SPC..

Sign up here

http://lists.kcraces.net/mailman/listinfo/outlooks

The HWO comes out of the GRR NWS and covers anything in there CWA..

The SPC Graphics come from the SPC web site and covers the entire US..

183. Fox Hunt Antenna Seminar

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-09 17:01:04 UTC
From: Bill Fries
Topic: 180 Message: 183

All:

Just an update on the antenna building. Bruce, WD8KPQ is lining up all the things we need for this project. This includes the "thingie" to attach? the coax to your radio. We will have PL-259 "thingies" and N connectors. If your rig is different, you are building an antenna, and you don't have the "thingie" then you MUST let me know. Bruce is purchasing the connectors through AES and will have an adequate number. But YOU MUST let me know if the connector is unique. We will be ordering the items early next week and will put your request in with the order.

We will be making ten of these antennas. They will cost $20 or less each. So bring along the money you need to cover the cost of the antenna. The major expense is in the connector, so maybe your antenna will be a little more or a little less.

We MUST HAVE a hard head count. We will not build more than ten antennas without having a hard count ahead of time. So, if you're feeling lucky, want to build but don't want to let me know, or you?re ambivalent, then pass up this chance or show at the clubhouse with crossed fingers. Hi!

Ten in the morning a week from Saturday.

Questions? Drop me a line.

We may have five or so signed up for this class. Buy don?t count on your name being on the list. E-MAIL me, now, to ensure your RSVP.

Bill, AB8SC

Mark:

You don't know many rigs with N connectors and I don't know what each of the connectors look like. I'm struggling here. I have sent Bruce a jpg of the connectors on my radio and attenuator box. He recognizes these things. It's just difficult not knowing the "lingo."

Bruce is really knowledgeable on the subject and will be a great leader on this topic. He has successfully fox hunted with this antenna.

It will be a fun time, combining radio and learning.

Cheap Thingies:

Many HT's use BNC thingies.

Most use SMA; hovever,

Computers and More (Lakewood Dr. Holland) sells BNC connectors (RG58) for $.99 each- both crimp-on and twist-on.

They also sell other connectors- just not SMA or PL259.

You can then buy the appropriate adapter for your rig be it PL-259 or SMA.

Another good place for cheap connectors is wavehunter.com.

I put BNC's on a lot of my lines and use adapters everywhere.

The BNC's are very convenient for quick connect/disconnects and it saves my rig's connectors (I mean thingamabobs).

Hello fellow Radio Operators...
I am looking for an article from the old Ham Radio magazine "73", and was hoping someone might have it in their stack of treasures in the garage. It is the November 1972 issue of "73" that I am looking for, and I would gladly buy, borrow, or copy the article. The article in question is regarding modifications to the Heathkit HR-10 receiver.
My email is k8crc@..., or you can reach me on the Grand Haven 145.49 repeater. Thanks for your help...

All:

Has anyone gotten through the pile-up and gotten into the log for Peter I Island? They now have two days of logs uploaded to the site. There are also great pictures from Peter I on the site.

I've been pounding on the pile-up for three days without success. I'm starting to have second thoughts about my signal.

The upside is I've scored two new countries while hanging around looking for some joy.

Hope the word is better for you!

Bill, AB8SC

The best bet to find 3Y0X is to visit their www page. See peterone.com and you will find the list of frequencies. Then find the dx spots on either packet or the internet. There are thousands of spots with new ones spilling in by the minute. There really is not problem finding the dx.

They are operating cw, phone, and rtty. And they seem to be found more frequently on twenty, seventeen, and fifteen meters. Linda is trying now on fifteen phone. I'm hopeful that a female voice is worth an s unit or two. Wishful thinking? It has worked in the past.

One thing I have relearned in this experience is that there are other dx stations on the bands and their pile-ups are less severe. Seems Everyone is pounding on Peter I and leaving others with lots less attention. I got a FO and an A6 during moments of frustration on the 3Y0X. So, silver lining? Or just fodder for another Flashovers article? Win ? win? I'm trying to remain optimistic.

Bill, AB8SC

Tom,

Here are the freqs.

I think 15 is the best bet and during the day at that. Transmit on 21.300 and listen on 21.295.

Do not transmit on the frequencies below. Listen for the split and go there.

Put some fire in the wire!

BAND SSB CW Digital
10 28475 28023 28092 (Listening up!)
12 24987 24893 24928 (Listening down only!)
15 21295 21023 21102 (Listening down!)
17 18145 18073 18108 (listening down only!)
20 14190 14023 14084 (Listening up!)
30 n/a 10103 10135 (Listening up!)
40 7093 7023
80 3750 3523
160 1842.5 1822.5

> ==>HAM RADIO OPERATORS "TRUE HEROES," REP MIKE ROSS, WD5DVR, SAYS IN
> "SALUTE"
>
> US Rep Mike Ross, WD5DVR (D-AR), this week offered "A Salute to Ham Radio
> Operators" on the floor of the US House. Ross, one of two Amateur Radio
> licensees in the House of Representatives (the other is Rep Greg Walden,
> W7EQI, R-OR), addressed his colleagues February 8 to recognize the
> contributions of the Amateur Radio community in the wake of last year's
> devastating hurricane season.
>

> "Citizens throughout America dedicated to this hobby--a hobby that some
> people consider old fashioned or obsolete--were true heroes in the
> aftermath
> of Hurricane Katrina as they were often the only line of communication
> available into the storm ravaged areas," Ross said.
>
> He noted that while ham radio is often overlooked "in favor of flashier
> means of communication," Gulf Coast communities learned after the 2005
> hurricanes that technology can be "highly vulnerable" to storm damage.
> "Ham
> radios, entirely self- contained transmitters, require no cell towers or
> satellites, simply a battery and a strip of wire as an antenna," Ross
> explained.
>
> Because of the "critical intervention" of radio amateurs across the US,
> Ross
> said, many lives were saved following Hurricane Katrina.
>
> "The dedication displayed by ham radio operators in the aftermath of
> Hurricane Katrina sets a tremendous example for us all," Ross concluded,
> noting that "now more than ever" he's proud to be an Amateur Radio
> operator.
> "The people whose lives were rescued as a result of the tireless
> dedication
> of ham radio operators will forever be grateful to these selfless public
> servants."
>
> ==>VERY FULL SCHEDULE KEEPS SPACE STATION CREW HOPPING, CADETS TOLD
>
> International Space Station Expedition 12 Commander Bill McArthur, KC5ACR,
> spoke recently via ham radio with cadets at his alma mater, the US
> Military
> Academy at West Point, New York, and with high schoolers in Orlando,
> Florida. The Amateur Radio on the International Space Station (ARISS)
> program arranged both on-the-air events. During a January 26 direct VHF
> contact between NA1SS and W2KGY at West Point, one cadet asked McArthur's
> opinion regarding the most important design factors for a future lunar
> base.
> McArthur responded by expressing his frustration with the ISS crew's lack
> of
> control over its work schedule.
>
> "We have a daily list of tasks that we're scheduled out for," McArthur
> told
> the cadets. "The bottom line is the schedule is very full, and you really
> need to maintain the timeline." Unfortunately, he went on, various factors
> come into play that cause the crew to under-schedule the time needed for
> each task.
>
> "So, I think the most important thing to do," McArthur concluded, "is to

> give a crew on the lunar base more time to actually plan out their own
> activities, and give them adequate time to execute them."
>
> Answering another question, McArthur told the West Pointers that the crew
> sometimes finds itself wasting time on non-productive activities.
>
> "The things that waste most of our time on orbit are all related to
> stowage," he said. "We have limited stowage volume up here. Over time
> things
> migrate from place to place, and even though we have a fairly
> sophisticated
> inventory-management system, it's very frustrating--it takes a lot of
> time--to find the tools and supplies that you need."
>
> On a more mundane subject, McArthur discussed the art of shaving in space.
> He said he uses a safety razor and shaving gel, but since he cannot rinse
> off the razor, blades have to be replaced more frequently. He said he
> sometimes uses an electric razor but doesn't believe he gets as smooth a
> shave.
>
> Audio of the approximately six and one-half minute contact between NA1SS
> and
> W2KGY was fed via closed circuit to the academy's 4000 cadets could listen
> in. Seven cadets participated in the event. ARISS mentor Steve McFarlane,
> VE3BTD, provided equipment and antennas for the club station to undertake
> the contact, which McArthur had requested.
>
> On February 2, McArthur took questions via ham radio from students
> attending
> Timber Creek High School, located some 30 miles from Cape Canaveral--close
> enough to see shuttle launches. A number of the students have parents who
> work in the space industry. On hand for the occasion was Florida's
> Commissioner of Education John Winn.
>
> During the direct VHF contact between NA1SS and KC4IYO, McArthur told the
> students that crew members "launch healthy" as part of an overall effort
> to
> avoid problems with illness in space. He pointed out that bones need
> physical stress to maintain their density. Because there is hardly any
> physical stress in the microgravity environment of the ISS, the crew must
> exercise vigorously every day and take vitamins to fend off the risk of
> bone
> loss.
>
> Most of the students taking part in the interview were sophomores taking
> advanced placement biology, and many of their questions had to do with
> biology, physiology and botany. Some students from other classes also
> participated.
>
> McArthur said that since living and working in space is considered

> stressful, the body needs more energy to deal with it. So, crew members
> are
> provided with a high-calorie diet, whether they'll consume it or not.
>
> "We are provided more calories on orbit," McArthur explained. "At some
> point, though, I've found that I simply can't eat all the food that is
> provided for me. I just get too full."
>
> Fielding a question about getting ready for a space walk--something the
> crew
> was doing the week of the contact--McArthur said the crew spends the
> better
> part of a week preparing their spacesuits and equipment. "The thing we
> have
> to do is gather all the equipment, which may be stored in different
> locations of the space station," McArthur explained, "then actually
> install
> things such as the carbon dioxide scrubbing canisters, humidity
> separators--things like that in a spacesuit because they can't be
> installed
> for a long period of time."
>
> In terms of science aboard the ISS, McArthur said the crew is trying to
> learn how to do research in space. "We're actually maybe two generations
> away from things that have direct application," he added.
>
> As the Timber Creek contact got under way, McArthur took the opportunity
> to
> greet Coordinating Teacher Sarah Longino. "It's a delight to hear your
> voice," McArthur said, noting that he and Longino have been friends for
> more
> than four decades.
>
> John Rothert, KC4IYO, served as the Earth station control op for the
> contact
> between the ISS and the suburban high school, which boasts a student
> population of approximately 4000. Coordinating the radio contact was Joe
> Singer, N4IPV, and members of the Lake Monroe Amateur Radio Society
> assisted
> in setting up equipment for the contact. The ARISS mentor was Keith Pugh,
> W5IU.
>
> ARISS <http://www.rac.ca/ariss> is an international educational outreach,
> with US participation by ARRL, AMSAT and NASA.
>
> ==>WHITE HOUSE TO TAP VIRGINIAN AS FIFTH FCC MEMBER
>
> President George W. Bush has announced his intention to nominate
> Republican
> Robert M. McDowell of Virginia to serve on the FCC for the remainder of a

> five-year term expiring June 30, 2009. If confirmed by the US Senate,
> McDowell--a telecommunications attorney--would bring the Commission back
> to
> its statutory five-member complement. FCC Chairman Kevin J. Martin
> applauded
> the president's announcement.
>
> "If confirmed, Rob McDowell will be a great asset to the Commission,"
> Martin
> said. "He has a wealth of knowledge in the communications arena, and we
> will
> rely on his insight when evaluating the issues before us."
>
> When Martin took over as FCC chairman last year, the political balance on
> the Commission was split evenly between two Republicans and two Democrats.
> Republican Kathleen Abernathy departed in December, while Republican
> Deborah
> T. Tate officially came aboard January 3. Democrat Michael J. Copps was
> sworn in for another term the same day. The other Democrat is Jonathan
> Adelstein.
>
> McDowell currently serves as senior vice president and assistant general
> counsel for the Competitive Telecommunications Association (CompTel).
> Prior
> to that he served as executive vice president and general counsel for the
> America's Carriers Telecommunications Association. A cum laude graduate of
> Duke University, McDowell received his law degree from the College of
> William and Mary's Marshall-Wythe School of Law.
>
> ==>ARRL EXPO RETURNS AT DAYTON HAMVENTION 2006!
>
> With thanks to Dayton Hamvention and owing to its popularity among 2005
> Hamventioneers, ARRL EXPO will return to Dayton this year. Hamvention
> takes
> place Friday through Sunday, May 19-21, at Hara Arena near Dayton, Ohio.
>
> "Dayton Hamvention has generously agreed to partner again with ARRL to
> accommodate ARRL EXPO 2006," ARRL Marketing Manager Bob Inderbitzen, NQ1R,
> announced. "As we did during last year's National Convention, ARRL will
> organize its primary Hamvention exhibit in the Ballarena, which allows
> plenty of room to showcase a broad variety of ARRL programs and services.
> Our hope is to reprise the best elements of last year's very successful
> event."
>
> Inderbitzen notes that while some details remain in the development
> stages,
> current plans call for ARRL EXPO 2006 to feature a huge--and readily
> accessible--ARRL bookstore and retail products center. Those renewing
> their
> League memberships or joining for the first time will receive a gift.

>
> Individual exhibits and booths will highlight the League's various
> activities or focus on more specialized Amateur Radio interests. Also held
> over from last year's ARRL National Convention EXPO will be live, on-stage
> presentations and mini-forums by ARRL staff members and volunteers. DXCC
> card checking will be available on site.
>
> So will the Internet Caf?, which last year provided not only free access
> to
> Internet-ready computers to catch up on e-mail or surf the Web, but an
> open-access Wi-Fi "hot spot" for the laptop/notebook crowd.
>
> Also back this year: "ARRL Passport," the ultimate scavenger hunt. Collect
> ARRL Passport numbers at booths and concessions throughout Dayton
> Hamvention
> 2006 and win terrific prizes.
>
> Of course, ARRL EXPO will offer an opportunity for Hamvention visitors to
> meet ARRL staff members and authors and to learn more about the League's
> various activities and initiatives--from advocacy and development to
> technical and regulatory support and operating activities.
>
> Inderbitzen says various ARRL forums will be coordinated with the Dayton
> Hamvention program. Hamvention sponsor, the Dayton Amateur Radio
> Association, will sponsor Amateur Radio license examinations.
>
> Dayton Hamvention itself will offer some 500 indoor exhibit/concession
> spaces throughout Hara Arena, where visitors can feast their eyes on the
> latest Amateur Radio gear or touch bases with their favorite ham radio
> organizations and activity groups.
>
> The outdoor flea market--a huge favorite--will again have more than 2500
> spaces available. It's the largest of its kind and a great place to meet
> old
> friends or make new ones. And remember: "If you can't find it at Dayton,
> you'll never find it!"
>
> Watch this space <http://www.arrl.org/announce/nc/2006/> for ARRL EXPO
> 2006
> updates!
>
> ==>ARRL FIELD DAY 2006 PACKAGES, RULES NOW AVAILABLE
>
> The 2006 ARRL Field Day package
> <http://www.arrl.org/contests/forms/06-fd-packet.pdf> and rules (HTML
> version <http://www.arrl.org/contests/rules/2006/rules-fd-2006.html>) (PDF
> version <http://www.arrl.org/contests/forms/06-fd-rules.pdf>) now are
> available on the ARRL Web site.
>
> "The only rule change in 2006 involves the GOTA ('Get On The Air') station

> bonus-point structure," says ARRL Contest Branch Manager Dan Henderson,
> N1ND. "An individual operator may earn a 50-point bonus for completing 50
> QSOs at the GOTA station. They may earn an additional 50 bonus points when
> they reach 100 QSOs."
>
> Henderson notes there's a 100-QSO cap for bonus points per individual GOTA
> operator, but additional GOTA operators may earn the bonuses for the club,
> up to a maximum of 500 GOTA bonus points.
>
> "Additionally, Field Day operations can double their GOTA bonus points by
> having a designated GOTA Coach/Mentor supervise the station whenever it's
> on
> the air," Henderson notes. "The GOTA Coach/Mentor may talk the
> participants
> through the QSOs and serve as control operator, but GOTA participants must
> make and log all QSOs themselves."
>
> This means that if a Field Day group has a GOTA Coach/Mentor, the 50 and
> 100-point bonuses GOTA operators earn will double to 100 and 200 points
> respectively, while the maximum GOTA bonus increases to 1000 points.
>
> ARRL Field Day 2006 will be Saturday and Sunday, June 24-25.
>
> ==>PHIL SALAS, AD5X, NAMED 2005 ORR AWARD WINNER
>
> Acting on a recommendation from the QST editorial staff, the ARRL
> Foundation
> Board of Directors has voted unanimously to give the 2005 Bill Orr, W6SAI,
> Technical Writing Award to Phil Salas, AD5X. An ARRL Life Member from
> Richardson, Texas, Salas was recognized for "his excellence at making
> technical concepts understandable," said QST Editor Steve Ford, WB8IMY.
> The
> award is based on articles published in QST during 2005.
>
> "I've admired Bill Orr's technical writings over the years, so I am very
> pleased and honored to receive this award," said Salas. "I've enjoyed
> sharing my ideas with the ham community through my articles and plan on
> continuing to do so."
>
> Salas' oeuvre in QST during 2005 included "A Compact Battery Pack for the
> SG-2020" in the March "Workbench" section, "Input Voltage Conditioner--and
> More--for the FT-817" in the June "Workbench," and "Tuning Switch with
> Limit
> Indication for Screwdriver Antennas" in the December "Workbench." Salas
> also
> authored the article "The Ultimate Portable HF Vertical Antenna" in the
> July
> issue, and he contributed to "Hints & Kinks" and "Technical
> Correspondence."
>

> Salas is a past winner of the QST Cover Plaque Award, given to the author
> or
> authors of the best article in each issue as determined by a vote of ARRL
> members on the QST Cover Plaque Poll Web page. He captured a cover plaque
> in
> 2000 for his article "A Simple HF-Portable Antenna," which appeared in
> that
> year's December issue.
>
> The Orr Award pays tribute to the winning author's ability to explain
> technical topics in a manner that is easy for relatively non-technical
> people to understand. Bill Orr, W6SAI, the award's namesake, was best
> known
> for his voluminous publications for radio amateurs. From the 1940s through
> the 1980s, Orr was a frequent contributor to QST. In addition, he
> constructed some of the amplifiers once used at ARRL Maxim Memorial
> Station
> W1AW. Orr died in 2001.
>
> ARRL West Gulf Division Director Coy Day, N5OK, will present Salas with
> the
> 2005 Bill Orr Award plaque at HamCom this June in Dallas, Texas.
>
> ==>SOLAR UPDATE
>
> Propagation prognosticator Tad "When I Needed Sunspots, I Got None" Cook,
> K7RA, Seattle, Washington, reports: Our sun is very quiet. The daily
> sunspot
> reading was zero each day from January 29 through February 7! The last
> time
> we saw 10 consecutive days with a sunspot number of zero was way back on
> the
> other side of the solar cycle, from December 24, 1996 to January 3, 1997.
> Prior to that, from September 13, 1996 through October 20 1996 were 38
> days
> with a sunspot number of zero. Perhaps a year from now we'll again see a
> whole month with no sunspots.
>
> Compared with last week, the average sunspot number declined by more than
> 7
> points to 1.7. Average daily solar flux was down more than 4 points to 76.

This is a list of the freq's from their web site. From reading the 3y0x group, they are often running other TX frequencies as well, trying to keep up with calls from all over the world.

All:

Has anyone gotten through the pile-up and gotten into the log for Peter I Island? They now have two days of logs uploaded to the site. There are also great pictures from Peter I on the site.

I've been pounding on the pile-up for three days without success. I'm starting to have second thoughts about my signal.

The upside is I've scored two new countries while hanging around looking for some joy.

Hope the word is better for you!

Bill, AB8SC

All:

I just got word that Clarke, K8BP, was successful. I think he was on twenty meters cw. He used his Elecraft K2, five watts, beam antenna at thirty-five feet. A real nice score. Oh, and yes, he was in Phoenix.

Yes, the frequencies posted are plus or minus QRM. But really, they own that segment of the band just from having so many folks hopeful.

By the way, the YL advantage has yet to pay off. I'll try this weekend but I'm thinking that the real hope is in using the club's shack Monday afternoon. Anyone want to try from there? I sure wish there were more sunspots. Is there ALWAYS an excuse? Hi

Where are they listening?

15 meters shows 'listening down' but they never say where. Also, I hear stations 5 up calling them. They don't mention where they are listening on the air, either.

Anyone have an update on the frequencies they are listening on? The chart isn't helping much.

Mark:

Ah, the "magic" of working dx on a split! Where the heck are they listening?

The split will almost always be up. The down you reference is for data, most often rtty. If you try to get a qso using rtty you are on your own. Otherwise listen up and you can bet that the dx is listening in the pile-up. I will try and hear the station in qso with 3Y0X, but you have to be FAST. And I have not determined if they move the listen frequency after each qso. It makes is terribly tough when you cannot hear the stateside station for more than a single qso in a row. It's getting to be a real case of cross your fingers. I'll dial around looking for the stateside and instantly feel I dodged when the dx dove. Ships passing in the night.

Yesterday on seventeen meters I heard the dx Twice ask for the yl. And Linda was off walking and miles from the shack. Truly, a yl is worth at least a s unit.

The good news is the dx is full strength, meaning they have all radios staffed and on the air. So now we just need propagation and luck. If Clarke, K8BP can get them qrp phone on twenty then others should have a chance. But qrp success takes an inordinate amount of skill, luck, patience, antenna, divine intervention, or a combination of all of the above. Unbelievable.

Best of luck to you all. I, for one, will hit the pile-ups with vigor on Monday after the weekend warriors go back to their day jobs.

Bill,

How far up is up?

My 735 can work splits but the 400 watt Swan only does one at a time. I use the 735 for recieve and use the Swan to transmit. I have the best signal on 20 due to the antenna. 15 and 40 use a dipole with one leg lying on the garage roof. Oddly enough, I hear the best with an Antron 99 CB antenna! It even has a decent SWR on 160. Wierd.

I think 20 is my best bet but when I go to the frequency listed there is always other people on it, in fact 20 is almost no vacancy.

I will also be trying on Monday morning.

Ah, the "magic" of working dx on a split! Where the heck are they listening?

The split will almost always be up. The down you reference is for data, most often rtty. If you try to get a qso using rtty you are on your own. Otherwise listen up and you can bet that the dx is listening in the pile-up. I will try and hear the station in qso with 3Y0X, but you have to be FAST. And I have not determined if they move the listen frequency after each qso. It makes is terribly tough when you cannot hear the stateside station for more than a single qso in a row. It's getting to be a real case of cross your fingers. I'll dial around looking for the stateside and instantly feel I dodged when the dx dove. Ships passing in the night.

Yesterday on seventeen meters I heard the dx Twice ask for the yl. And Linda was off walking and miles from the shack. Truly, a yl is worth at least a s unit.

The good news is the dx is full strength, meaning they have all radios staffed and on the air. So now we just need propagation and luck. If Clarke, K8BP can get them qrp phone on twenty then others should have a chance. But qrp success takes an inordinate amount of skill, luck, patience, antenna, divine intervention, or a combination of all of the above. Unbelievable.

Best of luck to you all. I, for one, will hit the pile-ups with vigor on Monday after the weekend warriors go back to their day jobs.

73

Bill, AB8SC

Mark:

Well, the answer to the question, "Where is the dx listening?" is a tough problem. On twenty meters and phone the split could be just up five to ten or it could be in the general portion of the band around 14.240 to 14.250. I would suggest you use the dx spots for some direction. There are always going to be spots on 3Y0X and they are generally current. It helps get you started. See: http://oh2aq.kolumbus.com/dxs/

The whole reason for the split is so the dx has a clear transmit frequency (where you listen for your call sign) (NEVER transmit on the dx frequency, NEVER) and the pile-up spreads out and each station is less likely to qrm their competition. A marvelous solution to the problem. Well, marvelous if you can break the code. I have not proved this next statement but the dx is likely tuning around the frequencies looking for a call in the clear. They will often tune between each qso or they might listen on a frequency for a few calls. Don't worry about qrm and finding a clear transmit frequency. It just will not happen. Call real fast or delay a little or just scream at the microphone or try compression or get a girl to call or try all of these things. Luck of the draw? Be sure you send your call phonetically. I would suggest the traditional phonetics and not the cute ones that the dx might have difficulty understanding. Remember the reason you are calling and you want to make it easiest for the dx to hear and simultaneously instantly understand your call sign. Listen to the way a dx speaks the alphabet and try to mimic the phonetics. And listen to the dx as he may call a directed qrz asking for only Europe or only eights. Last Thursday I waited all the way through the ones and twos and . . . through the sixes only for the propagation to fade in the sevens. But, hey, it's a hobby.

Twenty meters is especially challenging since EVERY ham in California has full legal power and they use it to their advantage. Calling barefoot into a wire antenna is a decided disadvantage. Success will surely be a combination of many things and having fifteen hundred watts to pound the pile-up certainly has its advantages.

Now that Peter I is more or less full strength I would also encourage you to visit the propagation predictors. They will more or less tell you not to waste your time on twenty at three in the morning.

And, final insult to injury I have heard from older dxers that they already have Peter I in the log so they are not trying for a qso. Funny how having the dx in the log makes you smugly tolerant.

And, when you finally get through just send your call sign again (as an insurance) and 59 for signal report. The dx could care less your signal report or his. You only want to be certain you are accurately in the log

and contrary to some opinion the signal report is not accurate, a reflection of your signal, nor important to anyone associated with this wonderful hobby or the process of claiming a qso. The 59 is only there to separate the qso from the next qso. I once got a card from Ascension Island and the actual signal report was 41, which is terribly and perilously close to inaudible. Took four tries but I have the card and the contact. And MAKE SURE you log the details, especially UTC and date. The date one will deep six your qsl card since there will be literally thirty thousand cards going to the qsl manager and he will not waste time thumbing the log for your call sign. It just will not happen. So have your clock coordinated and watch the date, especially when you score the qso at eight in the evening (uh, that's local time) tomorrow. Insist on this detail or you are really operating at an insurmountable disadvantage. DO NOT use local time. You will not get the qsl card. Well, unless you already have the card.

I would also encourage you to check the on line log and if you are uncomfortable at all to try for an insurance qso. The dx is encouraging this and you might find the insurance contact on another band or mode. Makes five band DXCC all the more attainable. Hi! I cannot even imagine five band DXCC. What a distant mirage on the radio horizon. All my respect to those with the plaque.

From what I understand, "up" is usually in a range of 5k-15k above the listening frequency. In a note at the bottom of their chart, it says 3Y0X will be listening in the General bands as well. I know at least one of the frequencies they are transmitting on is the bottom of the Extra segment, so they will be listening considerably above that for General calls. Their is a 3y0x yahoo group, if you have a lot of spare time to spend looking through postings. An interesting part of it is the variety of ways people react - a few "wild-eyed" DX-ers show a high level of frustration... and a low level of patience. Anyhow, stick with it and, like Bill said, with a bit of luck you'll have logged one of the rarest of the DX entities. The last DXpedition to Peter I was 1994 - and I'm guessing it will be a while before we see another. Plans for this one are through February 19.

Last week while listening to the 3y0x group operate marine moblie as xr9a, I ran across another DX station in Diego Garcia. A sailor type ham stationed down there through March operating as VQ9JC. I ran into him on 14.190 - he was operating a steady split and listening on 14.193. Not sure where he might show up this week with the 3y0x group now on the island.

"The last DXpedition to Peter I was 1994 - and I'm guessing it will be a while before we see another. Plans for this one are through February 19"

Yes, I'm with you on this one, too, Jon. This one cost a half million dollars and something like twenty thousand dollars from each operator, participant, and that "Most Traveled Man" guy, too. Terribly expensive. And they planned it for at least two years. Remember last year was the target and the ship, helicopter, weather, and etc. conspired to postpone the event to this season.

It seems the issue with Dxpeditions to Peter I are the expense of travel and not the intricacies of getting a license or permission to land and operate. Contrast this with a relatively close island in the warmer latitudes, say, KP1. There the last group literally snuck in, pushed the transmit button, and were immediately tossed off the island by the Fish and Wildlife cops. Looks like KP1 will require an act of Congress.

And have you read the Don Miller, W9WNV stories? Now that is exotic dx. Some interesting stuff from the sixties.

So if you score a qso you should really try to make a donation. Buying souvenirs helps and Linda is already got her eye on a qsl coin.

Jon:

Yes, it is often times forgotten that the whole world is listening and hopeful of a qso with this particularly remote dx. That means that some juicy dx might be hanging around calling cq while the maddening crowds chase the elusive 3Y0X. I have three new countries just because of this. Or the other dx are gearing up and making sure their shacks are competitive before the opportunity of the rare dx presents them with the opportunity.

I even had a very close encounter with a C31 who was calling cq. Dx does not stop for one operation on a tiny island in a single corner of our globe.

Topic: 211 Message: 211

The next ARMAD is May 27, 2006. May is National Military Appreciation Month. Amateur Radio Operators from around the world team up during this joint effort to allow the people from our communities to gather at public locations such as shopping centers, parks, VA hospitals, and sporting events to express verbal positive support "LIVE" over two way radio for members of the Military, Veterans, Reserves, National Guard, and military support groups. Many of us have friends, relatives, and neighbors that are active duty, and past members of the armed forces. My wife was in the military and I myself am retired military. ARMAD gives us the chance to support one another, and to express our thanks and appreciation to those that sacrifice and serve in the Armed Forces.

I am thinking about setting up a special event station. Are there any clubs or groups that will be running an special event station for ARMAD this year?

I got up early today to try to snag 3x0y before I went off to work. The charts said the band would be opening just after 7 am be pretty stout by 8 am.

Well, I have been here listening for an hour and a half and the silence is deafening. Yesterday I could hear them fine on 15 meters. No sign of them anywhere. I have two HF rigs running and listening. All I hear is some European stations calling CQ DX. Since they are in the Extra segment I don't answer. For some reason 14.188 to 14.192 is full of DX, most of the rest of the Extra band is empty. If Peter 1 is there they are buried in the QRM.

Also Italy has a penchant for operating near .190 Right now Tony from Italy is on .188 making North American contacts.

I will keep trying. The Yahoo group is pretty neat.

Mark:

I will share the following e-mail from my friend, John, NA8M. His qth is in Maine. He sent this message to Clarke, K8BP which explains the "high power" 100 watts signal which contrasts with Clarke's qrp five watts.

Caught 3Y0X yesterday morning on 20 SSB for my first SSB 3Y0 QSO. Pretty pleased. It's in the on-line log this morning.

Boy, what a difference a day makes. This morning saw a spot for 3Y0X on 17 CW
(which I had from previous operation). Got him first call. Then saw him spotted on 17 SSB. Again, got him first call. Two QSOs, one minute apart.

As I write this I'm listening to him begging and calling CQ on 17 SSB with about
4 CQs per contact. Talk about easy!! But then I'm using a full 100 watts and
my 80 meter dipole.

Bet you have all bands by now :-)

John

217. Typical ham week?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-13 15:05:19 UTC
From: K8MHZ
Topic: 217 Message: 217

Hi All,

What have most of us done this week? Pretty typical week for most?

As I look back on the last few days I realize just what a remarkable and unique hobby amateur radio is. Just a few days ago I sat here in my shack with K0LEY and watched via NASA TV on my computer the deployment of a Russian space suit with an amateur radio on it. The signal was being fed into my computer via 2.4 gig WLAN on one of our SHF amateur bands. I was alerted to the deployment by Jim KC8PCJ via our local VHF repeater. Live feed from a camera mounted on the ISS provided us with a bird's eye view as the suit, called a RadioSkaf AKA Mr. Smith, was nudged into orbit behind the ISS. Other than the fact that Mr. Smith had no hands and an antenna on his helmet, he looked like an astronaut tumbling through space. For the next few days much of the amateur radio community will have their ears toward space, listening for the voices coming from Mr. Smith now orbiting some 220 miles above the earth. Mr. Smith, also known as the SuitSat, is the idea of the Russian astronauts, all amateur radio operators. Their American counterparts will be helping them get the bulky suit out of the ISS and into space. The American astronauts are amateur radio operators, too.

It is quite possible that Mr. Smith will pass over a small desolate island in Antarctica called Peter 1. It is said that more people have been in space than have been on Peter 1. I find it interesting both groups made sure they brought their ham radios with them. Not just to play with, either, but to give their fellow hams the opportunity to be a part of the most wondrous adventures of our time. No other hobby comes close to that provision. What puts the nobility of our hobby into perspective is the realization of the staggering amount of money and time put into making amateur radio transmissions from the most remote locations of Creation. If the money isn't enough, what of the risks the operators are taking? Just to survive in the harsh environments of space and the polar regions of Earth is rough and risky even for the toughest, best trained people on our planet, yet they make room for and take time to transmit back to the populous via amateur radio.

I have been an amateur for just over a decade and nearly every day I 'played radio' I learned something new or made a new friend. Now with HF in the shack I am making friends thousands of miles away. We have even come up with a way to bridge the vast expanses of the Earth without HF via the VOIP modes on the Internet.

This is just one reason we need to make certain we keep our privileges. We need to do so by representing ourselves to the public as worthy of our given treasure, the amateur radio bands. We need to demonstrate that the hobby is one of wisdom and awe, one of camaraderie and goodwill. We must keep our standards high and we must be looked up to without looking down upon those that do look up to us. Most of all, we need to show the younger folks this most incredible of all hobbies.

Thank you all for being part of the fun and passing on the bits and pieces of wisdom that makes my shack even have a chance to talk to space and Antarctica.

73 my friends,

Mark K8MHZ

All:

Linda and I both managed a qso with 3Y0X. We worked them on seventeen and again on fifteen. Today the operators were begging for a qso. It was unusual after days of pile-ups. Also the operators were a little more relaxed, joked a little, and were kibitzing about the weather and conditions. It was lots more fun to listen to the dx and his operating style.

At one point he did say that each qso was going to cost something like $5 each. Do the math and you understand. One hundred thousand QSOs at a cost of around Five hundred thousand dollars for the operation.

I for one am seriously looking at a way to send these folks some money. And Linda has her eye on a qsl coin.

I wish you luck and if I can be of any assistance please don't hesitate to ask any questions. I may not know everything but I'm willing to lend a hand.

Jon:

You have not HEARD the dx? Something is wrong. They were real strong around 2:00 to 4:00 pm local time on both seventeen and fifteen meters.

If you have the internet close by then check the dx spots on dx summit. Is your antenna properly tuned? Gotta believe something is wrong.

Also try them on seventeen when you get home from work in the morning. The dx is transmitting on about the posted frequencies, up or down a little. For example I have heard them more on 14.023 than on 14.025 but they have been transmitting on both. Just check the spots.

Gotta be something wrong. Hmmm

Bill

228. Tomorrow's digital net: first SSTV night!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-14 08:24:33 UTC
From: Joe Veldhuis
Topic: 228 Message: 228

Well, as mentioned in my earlier announcement, on the third week of each month, the Wednesday night digital net will use slow-scan TV. Check-ins will be taken the normal way (i.e. the same as a voice net), the only difference being that, instead of a general comment, each station will be asked to transmit a picture.

The need for an actual soundcard interface is even less for this than it is for the conversation modes (PSK, RTTY and so on), since you don't need to type while you're transmitting. Just use a 1/8" stereo patch cord (available at Meijer, Ratshack or anywhere that sells things like headphones) for RX audio, and hold your mic up to your speaker or headphones for TX.

Software: For Windows users, I suggest MMSSTV (http://mmhamsoft.ham-radio.ch/mmsstv/). For those using a real OS, try QSSTV (http://users.telenet.be/on4qz/qsstv/index.html). Both are free.

You will need to calibrate the software to match your soundcard rate. Do this by tuning to a time station (i.e. WWV (2.5, 5, 10, 15, 20 MHz) or CHU (3.33, 7.335, 14.67 MHz)) and setting the software to Fax mode, 60 lpm/256 colors. In QSSTV you have to force it to receive by clicking the "start" button twice. The second ticks will produce a vertical line. If the line slants to the right, decrease the rate setting a little. If it slants to the left, increase it. Repeat this until the line is perfectly straight. The needed value will most likely be within 2.5 Hz of the default 8000 Hz, or less than +/-200 PPM depending on which form your software expects.

If you don't have an HF receiver, contact me before the net (I'll be on about an hour before it starts) and I'll send a test signal you can calibrate against.

The most common modes are Scottie and Martin, both of which send images at a resolution of 320x256. This net will use the Scottie 1 mode. Since it takes close to 3 minutes to send the image with this mode, make sure to let the repeater reset before you send your image.

So, everyone find a picture and get ready for what might be the most entertaining digital net thus far. Like always, it's on Wednesday night at 8 PM eastern on the NOARC 145.49 -94.8 repeater. Hope to see everyone (literally this time) there!

-Joe, KD8ATU

229. MMSSTV soundcard calibration addendum

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-14 15:37:08 UTC
From: Joe Veldhuis
Topic: 229 Message: 229

Well, I set up MMSSTV and found a better procedure for rate calibration:

1. Option > Setup MMSSTV(O), then "Misc" tab, then "Adj" button
2. Tune to time station (WWV is easier to use here, though for QSSTV I find CHU to be better)
3. Wait for the window to fill with received data
4. Click the bottom of the line, then the top, as the window instructs
5. "OK", then repeat 1-3 to verify (right-click to move the green dashed reference line), make corrections as needed.

Hope that helps,
-Joe, KD8ATU

230. QSL Card Cooperation?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-14 16:34:59 UTC
From: Bill Fries
Topic: 216 Message: 230

All:

I believe that a number of folks in the area have now or will have a QSO with Peter I Island. This means that a number of folks will be sending QSL cards to the manager, N2OO. See the following for detailed directions: http://www.peterone.com/qsl.htm

The QSL manager is encouraging groups to send their cards to the manager in one envelope. This begs the question, "Do we want to cooperate and send our QSL cards to 3Y0X in one envelope?" I'm game and willing to coordinate this effort.

So, if you want, we can pool our cards and send them together in one envelope. Any takers? How about if you drop me a note (off the list?) and I'll figure how to collect the cards and get them to New Jersey.

The cards go to:

Bob Schenck, N2OO
QSL Manager for 3Y?X
P.O. Box 345
Tuckerton NJ 08087-0345

Try Mouser?

What are you trying to cross ref? Some components are prorietary and may
not have a cross ref part.

Howdy Bill.
If I can score one with Peter I Island I will be willing to go in on the sending a single envelope. I do not have any QSL cards so I will be buying one "off the rack" so to speak and sending that.

Where is a good place to get QSL cards made at?

Doc and Others:

If you do not have a QSL card you should find a way to create one. Linda first created her QSL card using a freeware program circulating on the web. Snoop around and you'll find the. There is one tremendously helpful resource, http://www.ac6v.com/ that must have Everything ham related. The answer is certainly there.

If it were to help I could upload my card. It's not copyrighted and might prove useful? But that might seem like I'm bragging and my card really is not that memorable.

My card was made in a fancy word processor and I print the card on an inkjet printer. I put four on a sheet, landscape. Cards are generally 3 1/2" by 5 1/2" but can be any size. Not too exotic. Linda also now uses a word processor to create her cards. I'd like to work with someone with a good publishing program to create a multi sided QSL card for W8ZHO which features photographs from Muskegon County. Any volunteers?

There might be something over on eqsl.org to help you out. I only visit there to see of a new country sends me an eqsl that I can print out, snail mail, and get a hard card back. I don't trade in eqsl "cards." They aren't good for the wallpaper I am chasing.

On the subject of eqsl cards I expect that the 3Y0X will not post their QSOs until after a year or better on the ARRL's LoTW logbook page. There just has to be a ton of money in those requests for hard cards that would certainly go wanting if they were to post LoTW QSLs right away. For example I got Rodriguez Island by card and LoTW. I cherish the card but used the LoTW for the wallpaper (DXCC).

Good luck to everyone on scoring a QSO with Peter I. They are definitely out there and the "Old Timer" says you should work them before the weekend when everyone realizes that the end is coming. Oh, check out the site. There is some very good video and photographs. I liked the old guy getting the QSO. He really is very near the top of the DXCC chart. Unbelievable that you can have very nearly 390 confirmed (even if some have been deleted) with a possible 335 which "count" toward DXCC. He looked pretty excited for an old guy. A real nice moment.

Paul,

I will see what I can scrounge up for you.

As for boat anchors, I am very happy with my Swan 350. They put out about 400 watts with new tubes and the book says 520 watts IPP or better.

They can be had for about 150 to 200 bucks working, around 40 bucks for ones that need work. My Swan gets reports of signals that are four times better than my IC-735 which is a great radio. I am thinking about getting some old Swans and getting them on the air.

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-15 14:45:00 UTC
From: K8MHZ
Topic: 243 Message: 243

Paul,

Looking at my log since I got the Swan on the air (with a home made bazooka antenna hanging in a tree) here are some contacts and the signal reports I was given:

Swan Valley, Idaho 5/9
Buena Park, California 5/9
St. Croix, Virgin Islands (No Report)
Mesa, Arizona (No Report)
Rowlette, Texas (No Report)
Whitehorse, Yukon Territories 5/5

(Now I am getting brave)

Central Ukraine 5/6
Gronau, Germany (No Report)
Sianliai, Lithuania 5/9
Tortola, British Virgin Islands 5/7
Zagreb, Croatia 5/9

UCLA, Los Angeles, California 5/8
Arizona State University, Tempe Arizona (No Report)

All of the above was SSB. Total invested in the station:

Swan 350 Free, given to me by W8JFB
117xc power supply Free, W8JFB
Bazooka antenna Free, made from coax given to my by K8COP from a teardown at the County Building.
Coax to connect antenna Free, from above teardown
Microphone $25 Sadelta power mike for a CB radio
Mike adaptor to use CB mikes with radio $6
Grounding buss Free, leftover 500 MCM cable from BC Cobb
Ground strap Free, made from coax from teardown

So, I have 31 bucks into my favorite station that puts out a half a kilowatt.

Compare that to my super automatic IC-735 with AT-150 auto tuner. In an instant, at the push of a button, any band I have antennas for will be automatically selected and tuned using information from the radio. Up to three antennas can be connected at a time. Digital display, noise filters, split VFO, memories and full coverage recieve. About 15 years old when purchased. $525 just for the rig and tuner for 100 watts. Also uses free, home brew antennas.

So, you can get an HF station running for less than 50 bucks if you are patient. Or you can spend 13 Grand on Yaesu's new flagship. (Even at 13 Gs, it is still 300 watts shy of the Swan)

73,

Mark K8MHZ

246. suitsat update from ARRL

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-15 19:17:29 UTC
From: kc8pcj@verizon.net
Topic: 246 Message: 246

SB SPACE @ ARL $ARLS001
ARLS001 "SuitSat-1" keeps on ticking; low power output eyed

ZCZC AS01
QST de W1AW
Space Bulletin 001 ARLS001
From ARRL Headquarters
Newington, CT February 14, 2006
To all radio amateurs

SB SPACE ARL ARLS001
ARLS001 ''SuitSat-1'' keeps on ticking; low power output eyed

''SuitSat-1''--a discarded Russian Orlan spacesuit equipped with ham radio gear--remains operational more than a week after being deployed from the International Space Station, but its 145.990 MHz FM signal continues to be extremely weak copy on Earth. Speculation now is focusing on extremely low transmitter output power as one explanation for the faint signal. SuitSat-1's sponsor--the Amateur Radio on the International Space Station (ARISS) program--continues to seek voice telemetry reports as part of an effort to pin down what might have gone awry.

''The battery life is a big question mark,'' explains ARISS Ham Radio Project Engineer Kenneth Ransom, N5VHO. ''We still do not know if the radio is pulling the normal power and losing it before the antenna or not pulling as much due to lower output. If the latter is true, the batteries will last much longer. That is one reason the battery telemetry is so important. It will help us plot the power consumption.''

Ransom notes that the voice telemetry transmission order is: DTMF tone, CW ID, SSTV image, 30 seconds of silence, voice identification, mission time, temperature and battery voltage. The voice messages, telemetry and SSTV image are being sent on a nine-minute repeating cycle. Post telemetry reports or recordings to SuitSat@.... Late reports showed the battery voltage holding at 26.7 out of a nominal 28 V. The transmitter, albeit likely at much-reduced output, and the controller appear to be functioning.

AMSAT-NA reports its calculations indicate SuitSat-1's transmitter power likely is in the range of 1-10 mW. The onboard transmitter was supposed to put out 500 mW and produce a signal that could be copied on Earth using modest receiving gear and antennas.

The novel SuitSat-1 Amateur Radio transmit-only spacesuit turned satellite has been heard around the globe since its February 3 launch. Those hoping to get clean copy of SuitSat-1's signal should possess excellent VHF receiving equipment and high-gain antennas. AMSAT-NA has designated SuitSat-1 as AMSAT OSCAR 54 (AO-54).

ARRL ARISS Program Manager Rosalie White, K1STO, said the weekend brought a few reports from teachers who've integrated SuitSat-1 monitoring into their classroom lessons. White notes that the SuitSat Web site has logged some 5 million hits since the beginning of February, and media interest in the project remains high.

Packet mode aboard the ISS has been turned off for the duration of the SuitSat-1 project. Earth stations are advised not to transmit any packet or voice data on the 145.990 MHz SuitSat downlink frequency.

More information on the SuitSat-1 project, including QSL information, is available on the AMSAT Web site http://www.amsat.org/amsat-new/index.php .

I got them! 23.44 UTC on 20
Still trying for some of the other bands, but at least I'm in there once!
That is so cool, after listening to them returning all the other calls, to hear your own come back. What a rush! One more card to add to your envelope, Bill.

You have not HEARD the dx? Something is wrong. They were real strong around 2:00 to 4:00 pm local time on both seventeen and fifteen meters.

If you have the internet close by then check the dx spots on dx summit. Is your antenna properly tuned? Gotta believe something is wrong.

Also try them on seventeen when you get home from work in the morning. The dx is transmitting on about the posted frequencies, up or down a little. For example I have heard them more on 14.023 than on 14.025 but they have been transmitting on both. Just check the spots.

Gotta be something wrong. Hmmm

Bill

Congratulations!!! Excellent!

Did you ever try to explain a QSO with a dx station to someone who has no background in radio? I think it is just so cool but you get such a blank wondering look from the uninitiated.

Most excellent! And we'll save a place for your QSL card.

Bill

Mark,
I was listening on SSB 14.190, transmitting on 14.208. He was picking them up between 12.200 and 14.215. 14.208 was quiet when I checked it, so I sat on it and called for about 30-40 minutes until he picked it up. Just gave my call phonetically once or twice each time he called QRZ until he came back asking for the Bravo-8 call... and I was in! Time of the contact was 18:44 EST, but I was hearing him clearly from the time I got on about 18:00. After all the frustration that felt like I was calling a deaf person, it suddenly seemed so easy. My experience: find a quiet spot in his listening range and sit on it till he comes to you. That, and make sure you're NOT transmitting on 14.190 - oops! :-)

Keep an ear open for them. The other day when I was listening, they were working their split at 14.240. That was earlier in the day, about 9 or 10 AM our time, I think. I was trying to catch them then, but 240 ended up being about 1k above another conversation. Stick in there and good luck!

Jon,

The time stamp is not assigned an am or a pm so it reads 11 am and some change in the -6 zone. That would be about 10 am here. Be advised that the time stamp comes from the sender's computer and if it is wrong it means nothing.

The only time I have heard them was on 15 meters. 20 seems to always have people on top of the frequencies listed. Anyway, I have not heard them in the last few days and don't know why...I get good reports from Europe, Central America and Swan Valley, I just can't hop the equator.

Actually, with the meager antennas I have to think that there is even a chance of a contact amazes me. When I put them up I knew that they would be low and also low gain. I just wanted to see what HF was like and get to work my radios. The thought when I put up the antennas was that I would be stretching it with contacts to Florida or so. Well, Florida is in the back yard and the Ukraine seems to be my limit so far. That is about 5 times what I hoped for when I hung the antennas. If I can't get 3Y I will be a bit sad, but the 'trophies' I have snagged trying are far more than I imagined. And the thrill of the hunt is with me, and will remain, successful or not. One thing for sure, I have got the DXpedition bug and can't say enough in the way of thanks for the hardy souls that are down there just so a tenth of a million hams can get a few more square inches of wallpaper.

Fine business to all that made the connect. I would like a picture of all of you holding the QSL cards when you get them. A good subject to submit to the Chronicle. Will I be with you.....time will tell. We have four more days.

I will keep trying and appreciate all the tips.

73,

Mark K8MHZ

This may be of interest to you. I noticed last night that folks in the US were making 3y0x contacts on 10m. Seems like they even had some on USB Wednesday early evening (5-6pm EST) I'm not sure if the time stamp is UTC or Central on this email.

For anyone interested I am hearing 3Y0X in NTX (EM12) at
about an S-3 on 28.023.2 and it seems to be building
slowly as it fluctuates over time. The northern us
stations (areas 8,0,3,2) I hear well.

Hello West Michigan Hams
We now boost 59 members and have had over 250 posts to our website. There have been a lot of interesting topics passed and maybe a few problems solved. I want to thank everyone for joining up and participating. I am looking for someone to take care of the calendar for posting to it the hamfests, club meetings, Emergency Service meetings and other events that are important to Michigan Hams. It will probably take more then one person to do this so if you would be will to do this for your club, organization, or county send a e-mail to me and I will set you up so you can post to the calendar and help you get started if needed. I will also post your e-mail so you can be sent the information of events from other members.

If you know a ham that is not a member ask them to join in on the Fun.

Reading the postings in the 3y0x yahoo group has been interesting (well, some of the postings anyhow). One guy in Hastings threw up a quick antenna for 30m and worked them yesterday. You're a step ahead of me on 15m - so far the only place I've heard them has been on 20m. Matthew was trying to get them this evening (Thurs eve), but the were working the people at 14.205 and not working into the General segments. Looks like we have our work cut out for us for Friday night and Saturday. One of the pilots said Sunday will be split between operating and some tear down.

K8MHZ <k8mhz@...> wrote:
Jon,

The time stamp is not assigned an am or a pm so it reads 11 am and some change in the -6 zone. That would be about 10 am here. Be advised that the time stamp comes from the sender's computer and if it is wrong it means nothing.

The only time I have heard them was on 15 meters. 20 seems to always have people on top of the frequencies listed. Anyway, I have not heard them in the last few days and don't know why...I get good reports from Europe, Central America and Swan Valley, I just can't hop the equator.

Actually, with the meager antennas I have to think that there is even a chance of a contact amazes me. When I put them up I knew that they would be low and also low gain. I just wanted to see what HF was like and get to work my radios. The thought when I put up the antennas was that I would be stretching it with contacts to Florida or so. Well, Florida is in the back yard and the Ukraine seems to be my limit so far. That is about 5 times what I hoped for when I hung the antennas. If I can't get 3Y I will be a bit sad, but the 'trophies' I have snagged trying are far more than I imagined. And the thrill of the hunt is with me, and will remain, successful or not. All:

Saturday we are having an antenna building seminar at the clubhouse. There is a really great shack with nice antennas at our facility. Some of the folks there to build antennas are surely qualified to work the radio and lend some direction.

If you want, we can hang around after the event and see if we can hear Peter I on the shack radio. Might be a fun experience?

A thought.

Bill, AB8SC

>
> ==>LEAGUE COMPLAINS TO FCC ABOUT BPL DATABASE IRREGULARITIES
>
> Describing the FCC-mandated BPL Interference Resolution Web site
> <http://www.bpldatabase.org/> as "woefully incomplete and improperly
> managed," the ARRL has called on the FCC to order database manager United
> Telecomm Council (UTC) to fix it immediately or appoint "a competent
> database manager" to repair the problems.
>
> "The database management is either shamefully incompetent on the part of
> UTC
> or simply nonexistent," the ARRL said in a complaint this week to the
> FCC's
> Office of Engineering and Technology (OET). "The database is merely
> 'garbage
> in, garbage out,' and in its present form cannot serve any useful purpose
> at
> all, much less a 'sufficient' means of addressing BPL interference."
>
> In a related development, UTC has terminated the ARRL's access to the BPL
> Interference Resolution Web site, and the League plans to file a separate
> complaint to the FCC on that issue. League efforts to access the database
> yielded this error message: "The system has determined that this line of
> searching constitues [sic] unauthorized use of the database. Cease
> operations immediately."
>
> The BPL database should be accessible from other ISPs, however, and the
> ARRL
> wants to hear from anyone else spotting discrepancies as well as from
> those
> whose database access has been curtailed or cut off.
>
> The ARRL already has complained about the UTC database's use of ZIP codes

> as
> a sole database access key. To simplify searches, the League has requested
> that the FCC require UTC to provide a list of ZIP codes where BPL systems
> are on line or pending.
>
> The FCC ordered creation of the BPL Interference Resolution database to
> provide licensed spectrum users a central, public information source on
> local BPL operations to help resolve incidents of harmful interference.
> Commission rules require BPL operators to provide the name of the BPL
> provider, frequencies of operation, postal ZIP codes served, manufacturer
> and type of BPL equipment, a point-of-contact telephone number and e-mail
> address for interference inquiries and resolution, and the proposed or
> actual date the system will start operation.
>
> Having correct and up-to-date information in the BPL Interference
> Resolution
> Database benefits both BPL providers and licensed services, the League has
> pointed out. For example, a radio amateur suspecting BPL interference
> might
> be able to rule out the possibility by consulting the database.
>
> ARRL Laboratory Manager Ed Hare, W1RFI--the League's point man on BPL
> technical issues--says that while the BPL database has its shortcomings,
> ARRL staff have until now made extensive use of it to help radio amateurs
> deal appropriately with interference issues.
>
> "In the past, when amateurs have reported BPL interference, one industry
> response has been to claim that the amateur station is hearing some other
> noise and thinking that it's BPL," Hare said. The BPL database makes it
> possible to baseline noise levels in advance of a BPL deployment and can
> even help to prevent erroneous interference reports, he pointed out.
>
> "The UTC's escalating restrictions on access to the database will serve
> little other purpose than to make it harder for amateurs to identify BPL
> interference correctly," Hare remarked.
>
> The ARRL complaint said the FCC should require UTC "to revisit every entry
> in the database and verify independently the information provided."
> Alternatively, the League requested that the FCC relieve UTC as database
> manager and appoint a new one that will supervise it properly.
>
> "The fox, therefore, should be withdrawn from the henhouse," the League
> said.
>
> Attached to the League's letter of complaint was a compilation of BPL
> database errors and omissions the ARRL discovered between January 27 and
> February 14, 2006. "There may be others," the ARRL noted. The League said
> the FCC is obliged under Part 15 to apply sanctions on BPL providers not
> complying with the database requirements.
>

> Most noteworthy among the alleged violators are the Briarcliff Manor, New
> York, and Allentown, Pennsylvania-area BPL systems that have been the
> cause
> of substantial interference to Amateur Radio stations. The League recently
> asked the FCC to shut down the Briarcliff Manor system because of
> longstanding interference complaints. Such BPL operators have no incentive
> to comply with the database requirements because "their scofflaw
> attitudes"
> toward the few BPL regulations in place have been rewarded by FCC
> inaction,
> the ARRL complaint said.
>
> A copy of the League's complaint is on the ARRL Web site
> <http://www.arrl.org/tis/info/HTML/plc/filings/BPL-Database-Content-Complain
> t.pdf>.
>
> ==>3Y0X AND NA1SS LOG HISTORIC QSO
>
> Completing an overhaul of the International Space Station's exercise
> treadmill cut into Expedition 12 Commander Bill McArthur's ham radio time
> from NA1SS. But when he did get on the radio February 13, he made
> excellent
> use of the time remaining.
>
> "Only one contact," McArthur reported. "3Y0X! Thanks!" The 2-meter contact
> between the space station and the Peter I Island DXpedition
> <http://www.peterone.com/main.htm> near Antarctica occurred during a
> barely
> viable 2-degree pass. The 3Y0X QSO pushed McArthur's count of DXCC
> entities
> worked from space to 104. McArthur already has worked all states and all
> continents during his duty tour aboard the ISS.
>
> On the Peter I Island end of the contact was 3Y0X DXpedition team member
> Gordon Hardman, W0RUN. McArthur, who's KC5ACR, reports he and Hardman
> enjoyed "a brief, but nice chat."
>
> Because the Amateur Radio on the International Space Station (ARISS) Phase
> 2
> gear is in crossband repeater mode for SuitSat-1, McArthur used the
> lower-power Phase 1 Ericsson 2-meter gear for the contact. He reported
> good
> copy on 3Y0X, which was using its moonbounce equipment and array for the
> event. The 3Y0X team already was celebrating the nine moonbounce contacts
> it
> had made over the previous weekend.
>
> Operating as RS0ISS, McArthur's crewmate Valeri Tokarev also got in a QSO
> this week with a Russian member of the 3Y0X DXpedition team.
>

> Topping the Peter I Web site I is the comment, "More people have flown in
> outer space than have set foot on Peter I Island!" ARISS Ham Radio Project
> Engineer Kenneth Ransom, N5VHO, notes that the 3Y0X DXpedition is the
> first
> to work someone in space from that location.
>
> McArthur earlier worked the 3Y0X DXpedition team while it was still en
> route
> and operating as XR9A/mm. Previous tries at a 3Y0X-NA1SS contact were
> unsuccessful, but Ransom thinks a recent change in the space station's
> orientation may have contributed to this week's success.
>
> ==>HELP SUPPORT W1AW . . . MORE THAN AN AMATEUR RADIO TRADITION!
>
> Since its dedication in 1938, ARRL Maxim Memorial Station W1AW has served
> as
> a beacon for the Amateur Radio community in the US and around the world.
> While a symbol of the past, W1AW continues to play an active role in

A pity, *perhaps*: they still did carry one or two items of use to radio amateurs, and without requiring a long drive or paying more for shipping than for the item.

Surely at least one of the two RS stores in Holland will be a candidate for closure.

I called the RS store here in Muskegon and they had no idea what RS corporate was planning. Could that be part of the problem? Customers learning of corporate decisions before store managers are informed seems to be a bit contradictory to a successful business structure.

73,

Mark

271. Long antennas

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-18 20:01:17 UTC
From: Andrew Young
Topic: 271 Message: 271

I think it was Mark who suggested cutting a 102" whip to an odd multiple of wavelengths for use as a 2 meter antenna.

I gave it an unscientific try and clipped off about 6 inches, giving me an antenna that is 5 quarter-wavelengths on 2 meters and about 15 Quarters on 70 cm.

My SWR is very good on both bands, but the receive sensitivity is very low compared to a 1/4-wave vertical (about 5 S-units).

I am guessing that my impedance is not 50 ohms and I don't have maximum power transfer.

Does anyone know a good length below 8 feet (besides the obvious 19.25 inches) that would be 50 ohms as well as a good SWR? I am going to try and borrow an analyzer, but I would be glad to cheat and stand on someone else's experience.

Andrew

272. Antenna Seminar Report

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-18 22:56:17 UTC
From: Bill Fries
Topic: 268 Message: 272

All:

We had a really great fox hunting antenna seminar at our clubhouse today. We constructed and tuned nine antennas. We are now ready for a real fox hunt!

I want to thank Bruce, WD8KPQ and Char, WD8LGN for doing such a wonderful job of hosting our seminar. They did such a wonderful job of handling all the details. Very well done.

We did make a single antenna for auction at the upcoming club meeting. So if you need a nice antenna for this activity then be ready to bid on it at the next club meeting!

Thanks to everyone for making this a wonderful day.

Now, let's do a fox hunt!

Bill, AB8SC
Pres of club

DARN!

Talk about leveling the playing field.

Thanks a lot, guys!

:)

Actually, I bet a lot of people learned a few things and had fun at it.

I am sorry I missed it.

Andrew,

Many a wise ham knows that dummy loads also have very good SWR's.

Question, the whip is only one part of the antenna, which is the other? Is it mounted on a vehicle? If not, you will have to provide for some sort of counterpoise. A counterpoise effective at 1/4 wave won't do much for a 2 wave or better antenna. One issue may be the 2.25 wave attempted radiator. If you have some material to play with, perhaps a full wave would be a better starting point. You will also need a counterpoise. If you are playing with this as a base application, how about 2 full wave whips made into a dipole and positioned vertically? If this is for a vehicle, the recycled metal in the body should suffice.

So, let's do some math...we need 300 divided by the freq for a full wave plus some velocity factoring. Since you have to guess at the velocity factor, go long and cut back. Use .75 as a starting VF. Copper is .68 So we would have an antenna about 5 feet long to start. If you have an analzyer cool, otherwise check SWR at top and bottom of band to see if you are too long or too short. One clue that you have a dummy load is that the SWR is the same for a long, long stretch of the bands. Not to be confused with a good broadband antenna like a large diameter wire dipole or a Bazooka.

I have read that 5/8 wave antennas outperform full waves due to the issue of radiation angles. With VHF all above the horizon radiation is pretty much wasted. 5/8 appear to put more RF at antenna level.

Good luck,

Mark K8MHZ

My SWR is very good on both bands, but the receive sensitivity is very low compared to a 1/4-wave vertical (about 5 S-units).

I am guessing that my impedance is not 50 ohms and I don't have maximum power transfer.

Does anyone know a good length below 8 feet (besides the obvious 19.25 inches) that would be 50 ohms as well as a good SWR? I am going to try and borrow an analyzer, but I would be glad to cheat and stand on someone else's experience.

Andrew

275. Fox Hunt suggestion

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-19 02:12:10 UTC
From: K8MHZ
Topic: 275 Message: 275

Future Fox Hunt suggestion:

Hi All,

Most that know me are aware of the fact that I am and always have been against the use of clues in a Fox Hunt. The clues always give an unfair advantage to those most familiar with the area and directly detract from the effort of radio direction finding, our sole purpose (other than fun) for the hunts.

Instead of using clues, I propose the following: The fox communicates with an operator at a known location. The person at the known location quizzes the fox on either General or Extra licensing questions. In the beginning of the hunt, questions can be spaced at intervals of say 2 to 5 minutes. After some time passes the intervals become shorter to the point of becoming an ongoing exchange. This will allow for more RDF and less BS. An added benefit is hearing the test questions and their answers, discussions about the answers, etc. This way, everyone is a winner. We all leave the hunt with more info in our neurological hard drives than we started.

Now, if there are still folks that insist on clues....how about we throw them out in CW?

Let the hunts begin.

73,

Mark K8MHZ

I have a large counterpoise in both places I tried it. One is a 25-foot tall cast-iron sewer vent pipe (basically a tower extending through the center of my house). The other was a 4-foot tripod on the roof with some random-length ground radials on it. Both had about the same SWR. My goal is not necessarily to keep all the RF at antenna level because I might want to hear Suitsat or the ISS with it. I want to make it as long as possible so I don't trim my long whip down to less than half its original length. I'll keep you posted if I make any progress.

Andrew,

Many a wise ham knows that dummy loads also have very good SWR's.

Question, the whip is only one part of the antenna, which is the other? Is it mounted on a vehicle? If not, you will have to provide for some sort of counterpoise. A counterpoise effective at 1/4 wave won't do much for a 2 wave or better antenna. One issue may be the 2.25 wave attempted radiator. If you have some material to play with, perhaps a full wave would be a better starting point. You will also need a counterpoise. If you are playing with this as a base application, how about 2 full wave whips made into a dipole and positioned vertically? If this is for a vehicle, the recycled metal in the body should suffice.

So, let's do some math...we need 300 divided by the freq for a full wave plus some velocity factoring. Since you have to guess at the velocity factor, go long and cut back. Use .75 as a starting VF. Copper is .68 So we would have an antenna about 5 feet long to start. If you have an analzyer cool, otherwise check SWR at top and bottom of band to see if you are too long or too short. One clue that you have a dummy load is that the SWR is the same for a long, long stretch of the bands. Not to be confused with a good broadband antenna like a large diameter wire dipole or a Bazooka.

I have read that 5/8 wave antennas outperform full waves due to the issue of radiation angles. With VHF all above the horizon radiation is pretty much wasted. 5/8 appear to put more RF at antenna level.

Good luck,

Mark K8MHZ

From: K8MHZ
Topic: 271 Message: 277

My main concern is the low SWR accompanied by poor receive. Me thinks that either your lobes be shootin' skyward or you have a nice electric heater.

Any change in receive if you tilt, turn or otherwise change the angle of the antenna?

I have a couple of those whips lyin' around. I know they can be used for mobile HF so they have not hit the bin yet. I also know from a CB'er, uh, not me, uh, just some guy that I used to know, that the good ol' Rat Shack 5/8 wave base loaded mag mount was far superior to the 1/4 wave 102" whip from most angles, unless the whip was mounted directly on top of the vehicle and the vehicle remained stationary, something most CB'ers could find hazardous to their health.

Could we be better served with stacked 1/4s or 5/8s? Is a 2-element half wave collinear hotter than a full wave dipole? It seems to be so. If the desired effect is gain for 2 meters I don't think much will be had with a single element whip. Better to load the puppy up and use it for HF if my sparse dusting of antenna knowledge serves me right. My experience is that a little 16 inch mag mount is not much worse off than a collinear on 2 meters. I think that 3 db is all I could get by installing even the best antenna, which would not fit into the garage. Bigger is not better in VHF mobile, could it be also true for base apps? I do know that a 3 element collinear is about 17 feet tall and kicks derrière but consists of stacked 5/8 wave elements. Omni gain in all directions equal to a 3 element Yagi. What is considered gain is also a function of the location of your target. A tall repeater antenna likes a rather high take off angle, where a low mobile or base prefers an angle just above horizontal. We don't want to hit either the dirt or the clouds for most uses but a cloud burner may just be the ticket for ISS or AMSAT apps. Just remember that the high take off angle is usually in stereo. As much as the astronauts get so doth the sidewalk.

If you find a way to use these things let me know. No, you won't see one on my Caravan or my Z-28. Chances are better that I would mount one on my bicycle or my helmet.

If you need a signal report let me know.

73,

Mark K8MHZ

Yup, a long (in terms of wavelength) whip will work. Odd multiples of 1/4 wavelength are required to get somewhere near 50 ohms. Many hams have used their 40 meter dipole on 15 meters. Odd multiple. I have a 19 inch whip on both of my vehicles which I use regularly on both 2M and 70CM with good results. The "gain" on 70cm is somewhere around -2 to -4db compared to a 6 inch whip. Not a big deal, considering the price for two bands and hard-to-beat performance on 2M.

The loss on 70cm with a 19 inch whip is to be expected, and is what you are finding with your long whip, Andrew. Only yours is probably far worse since yours is so long.

What happens when you make an antenna longer than 5/8 wave is that the radiation pattern starts to split into more and more lobes, separated by nulls. These lobes start moving more and more parallel with the whip as you make it longer and longer. So if your antenna is vertical, you end up with less and less signal at the horizon and more and more going up to the clouds where it does no good on 2m.

The same thing happens when the antenna is horizontal as in the 40M antenna used on 15M, except now these lobes give you "gain" to certain parts of the world, and less signal to others. There is no free food.

Gain verticals require one or more sections usually no longer than 5/8 wave stacked vertically, AND properly spaced and phased. That's so the signals from the sections add together at the horizon. The radiation pattern is flattened/squished to put more of the signal where the other stations are. Make sense??

Laryn,

Don't you mean odd multiples of 1/2 wavelengths?

A dipole is a 1/2 wave antenna. You get 1 1/2 waves on 15 meters using a 40 dipole. 1 1/2 waves (3 half waves) turns out to be an even multiple of 1/4 waves.. (6 for those of you without a calculator)

282. I think we could do this ...73

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-19 16:22:36 UTC
From: Don Meyer
Topic: 282 Message: 282

Hello Everyone .
Muskegon Club did a good job with there DF Antenna
Seminar and now I think its time to kick it up one notch with a
weekend Fox Hunt open to all West Michigan Hams.
Set up at a place we can meet to start maybe have some
displays on hand and get instructions with a wider area to hunt for
the Fox an automatic transmitter for a fox, pre-registration and
prizes.
Maybe the Muskegon Club would be will to make another DF
antenna and the Grand Haven Club a Te-Nee Key just as ideas. Move
the center point over by Nunica or Coopersville so we are not
limited by the Lake Michigan and have Hotdogs and chips or something
for lunch a small fee to sign up like $5 just to cover lunch and
coffee and pop. A old trophy someone has laying around from bowling
that can be modified to pass from the winning DF team to the
next.
We could start the fox out transmitting ever 20 minutes
for 30 seconds and change during the day to transmitting ever 30
seconds for 20 minutes. Just an Idea

Anyone game to help out and make it happen
drop me a email kb8odb@...

73 Don Meyer

283. New poll for WestMichiganHams

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-19 16:35:30 UTC
From: WestMichiganHams@yahoogroups.com
Topic: 9 Message: 283

Enter your vote today! A new poll has been created for the
WestMichiganHams group:

Would you like to see a West Michigan DF contest this Spring. Please take time to fill out
thanks ?Don

o Yes ... I would participate if possible.
o No ... not interested
o Yes .. and I would help put it on if I can

To vote, please visit the following web page:
http://groups.yahoo.com/group/WestMichiganHams/surveys?id=1499592

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

From: Bill Fries
Topic: 282 Message: 284

Don:

I think there is growing interest in fox hunting. The seminar in Muskegon, yesterday, netted eight new antennas.

I would also like to see a traveling trophy. I was thinking of a stuffed fox toy from a gratuitous daughter's collection (I don't have any kids so this is just an idea). I like the light lunch afterward. There was a group that did fox hunts monthly and the winner hosted the next fox hunt. They were pot luck affairs.;

There is a board of directors meeting on Monday evening and I'll pitch the idea to that group. This should be an event done more than one time a season.

Anyone else on board?

Bill, AB8SC

I am going to try (gasp) an antenna tuner for two meters and compare the signals with my 5/8 wave antenna. I am curious if more wire up there amounts to a better or at least similar signal (like a longwire antenna).

Height is better than gain on 2 meters anyway.

I could move the antenna inside and save on my gas bill, I guess.

I wouldn't throw the whips away. 304 stainless steel is about $.45 a pound. Ypu can still make a 1/4-wave whip for anything under 10 meters. Heck- cut it to 52 inches and use it to hit K8COP's repeater. I use the one on the cast iron pipe with an antenna tuner and get acceptable signals on 80 to 10 meters.

Andrew,

Many a wise ham knows that dummy loads also have very good SWR's.

Question, the whip is only one part of the antenna, which is the other? Is it mounted on a vehicle? If not, you will have to provide for some sort of counterpoise. A counterpoise effective at 1/4 wave won't do much for a 2 wave or better antenna. One issue may be the 2.25 wave attempted radiator. If you have some material to play with, perhaps a full wave would be a better starting point. You will also need a counterpoise. If you are playing with this as a base application, how about 2 full wave whips made into a dipole and positioned vertically? If this is for a vehicle, the recycled metal in the body should suffice.

So, let's do some math...we need 300 divided by the freq for a full wave plus some velocity factoring. Since you have to guess at the velocity factor, go long and cut back. Use .75 as a starting VF. Copper is .68 So we would have an antenna about 5 feet long to start. If you have an analzyer cool, otherwise check SWR at top and bottom of band to see if you are too long or too short. One clue that you have a dummy load is that the SWR is the same for a long, long stretch of the bands. Not to be confused with a good broadband antenna like a large diameter wire dipole or a Bazooka.

I have read that 5/8 wave antennas outperform full waves due to the issue of radiation angles. With VHF all above the horizon radiation is pretty much wasted. 5/8 appear to put more RF at antenna level.

Good luck,

Mark K8MHZ

I think it was Mark who suggested cutting a 102" whip to an odd multiple of wavelengths for use as a 2 meter antenna.

I gave it an unscientific try and clipped off about 6 inches, giving me an antenna that is 5 quarter-wavelengths on 2 meters and about 15 Quarters on 70 cm.

My SWR is very good on both bands, but the receive sensitivity is very low compared to a 1/4-wave vertical (about 5 S-units).

I am guessing that my impedance is not 50 ohms and I don't have maximum power transfer.

Does anyone know a good length below 8 feet (besides the obvious 19.25 inches) that would be 50 ohms as well as a good SWR? I am going to try and borrow an analyzer, but I would be glad to cheat and stand on someone else's experience.

Andrew

How about a new toy at each foxhunt? I have enough toys in my basement for years to come :)

Don:

I think there is growing interest in fox hunting. The seminar in Muskegon, yesterday, netted eight new antennas.

I would also like to see a traveling trophy. I was thinking of a stuffed fox toy from a gratuitous daughter's collection (I don't have any kids so this is just an idea). I like the light lunch afterward. There was a group that did fox hunts monthly and the winner hosted the next fox hunt. They were pot luck affairs.;

There is a board of directors meeting on Monday evening and I'll pitch the idea to that group. This should be an event done more than one time a season.

Anyone else on board?

Bill, AB8SC

No. Consider the 19in whip example. It is a 1/4 wave on 2m and 3/4 wave on 70cm. When talking about a dipole, yes it is 1/2 wave overall (at its fundamental frequency). A 1/2 wave antenna is around 72 ohms impedance at the center, and a 1/4 wave whip is around half that, or 36 ohms. Surroundings change those values in the real world. With the 1/4 wave whip, the <other half> of the antenna is the ground system, or the metal it is mounted on. So, a vertical of odd multiples of 1/4 wave, such as 3/4, 5/4, 7/4, and so on will be somewhere near 50 ohms also. But, the longer, the more RF is wasted into the blue sky.

<I am guessing that my impedance is not 50 ohms and I don't have
<maximum power transfer.

<Does anyone know a good length below 8 feet (besides the obvious
<19.25 inches) that would be 50 ohms as well as a good SWR? I am
<going to try and borrow an analyzer, but I would be glad to cheat and
<stand on someone else's experience.

<Andrew

Andrew, the impedance is probably near 50 ohms as stated above, or a good wattmeter would indicate high reflected power.

As far as a good length below 8 feet, you could go to 3*19, or 57 inches roughly, or 5*19, or 95 inches, but why? I don't see a good reason, unless you are wanting to use your 6 meter 1/4 wave vertical on 2m, which would probably work reasonable well, just like my 2m/70cm whip. Extra "height" in this case, is not the kind of height needed to make an antenna work better. Length and height are different here.

My thanks as well - Bruce and Char did an exceptional job of having all the parts ready to go so that we could understand the process without having to duplicate all of the details. I wish Matthew, Samuel, and I could have stayed a bit longer to play around with the antennas a bit.
Thanks again for a great Saturday of fun!

All:

We had a really great fox hunting antenna seminar at our clubhouse today. We constructed and tuned nine antennas. We are now ready for a real fox hunt!

I want to thank Bruce, WD8KPQ and Char, WD8LGN for doing such a wonderful job of hosting our seminar. They did such a wonderful job of handling all the details. Very well done.

We did make a single antenna for auction at the upcoming club meeting. So if you need a nice antenna for this activity then be ready to bid on it at the next club meeting!

Thanks to everyone for making this a wonderful day.

Now, let's do a fox hunt!

Bill, AB8SC
Pres of club

The mystery of antennas....

So I'm minding my own business, licking my wounds after not getting to shake hands with the 3y0x expedition, when I hear a call on 15 meters that sounds like it could be distant. Now, the chase I made for 3y was not a total disappointment. I worked different bands and made contacts with many different countries. What I did notice is that all my contacts were north of the Equator. 3y was not only half a world away but it was way south of the big E. The call on 30 is wrought with QSB, a bit in the mud, but no one is answering. I hit the button on the IC-735 and throw out my call. Al, LU1ALF comes back and we have a rough time of it, but on this last day of the 3y expo I finally crossed the Equator and got a new country, this time in the city of Buenos Aires, Argentina, practically next door to Peter 1. It seems my limit was just north of my mark. We struggled to get our calls correct but made the connection, my best ever on the Icom.

A few minutes later I hook up with a station in California on 15, this time right on the Atlantic Ocean. Twice he remarked about the quality of my signal, very strong and very clear, he said. Puzzled I was. I have no 15 meter antenna. The best I have is a 40 dipole which can play on 15 with a tuner. He also had a strong signal. I wanted to play a little with my antennas and checked the switches....lo and behold I was working 15 meters on a CB antenna! I had my Antron 99 connected to my tuner for use on 10 meters and it actually had the best signal.

An Antron 99 is sold as a 10/11 meter 1/2 wave vertical with no need for a ground plane. It is similar to a marine antenna.

But on 15 meters? Into Argentina with 100 watts at the bottom of the solar cycle? Sideband?

I switched to my 40 dipole and quickly switched back to the vertical. The dipole didn't get it on 15 like I would have thought.

Oddly enough, this is one of the things I love about the hobby!

Mark K8MHZ

292. eQSL

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-20 02:04:38 UTC
From: K8MHZ
Topic: 292 Message: 292

I ran across a site yesterday called eQSL. Just for giggles I type in my call and there is a card! Sure enough, the QSO is in my log and I print out a QSL card from Arizona.

Today I am yakking with a guy in Germany. We hang up and just about 20 minutes later my computer beeps. It is a QSL card from Horst in Germany. Just to think that we can now get cards in minutes 24/7/365 is amazing!

What is also unique is that the cost of printing is now on the recieve end. Unlike regular QSLing where the sender bears all the cost and only hopes for a return, eQSL lets the senders get a free ride.

There are lots of other features. There is a free account, like mine, where you can recieve anyone's cards but have limits on the design of the card you can send and limits on access to the site's features. Pay accounts get more glitzy.

So now we have the ability to actually get a QSL card while we are still engaged in a QSO!

Check them out at www.eQSL.cc There may be a card there for you. A quick free registration and you will be e-mailed when cards get sent to you.

73,

Mark K8MHZ

Mark:

Yes, eQSL is interesting. I have gotten a new country or two there and not by traditional hard card. This type of qsl card swapping seems to appeal to the computer literate and those comfortable in the instant gratification arena.

These cards are not valid for my type of wallpaper chase so I don't chase these "cards" like the traditional paper card. Isn't the world great with so many options?

Along these lines I'll put in a plug for the ARRL's own LoTW site. Their "cards" so count for their wallpaper and they are cheap, too. I personally used about fifty LoTW cards for my DXCC which numbered 123 countries. It is a "paint by numbers" process that is a little tedious but my last certification on the site is good for three years. And they are going to be using LoTW for WAS.

Different strokes, different folks.

Good day/evening everyone. I was on the Red Cross Communicator net tonight and chatted with a guy that used to live in Grand Haven. His name is Jack Cook, amateur call sign N8RRL. He said he is a former Ottawa County EC and former DEC as well. He asked me to pass along his greetings to all and hope that everyone is doing well after the storms. He said even in Las Vegas (where he now lives) they get ice storms. He was very pleased to hear someone from West Michigan on the Red Cross Communicator Net and hopes more will join in.

Valid or not valid?

Well, I would like to know more about the LoTW thing. If a card matches your log, some don't consider it valid? I wonder why?

I would rather have a real card that was actually touched by the person on the other end, but the electronic ones are cool too. If they keep a standard format for size they should count as a card. I got a cert from Skywarn Recognition Day yesterday for my QSO with them. It is 8 1/2 x 11. No card, though. And a letter, really neat wallpaper in itself.

I see the art of QSL cards has not caught on with hams not active on HF. Too bad, having cards from your friends, no matter if near or far, makes for great collectables. It seems to me that HF QSL cards are more of a trophy than a mere collectable item. You can't buy a real QSL card from 12,000 miles away, you have to earn it. Nonetheless, I would really like to see more hams, regardless of license class, get into QSL exchanges.

Subject: [WestMichiganHams] Fox Hunt suggestion

Future Fox Hunt suggestion:

Hi All,

Most that know me are aware of the fact that I am and always have been against the use of clues in a Fox Hunt. The clues always give an unfair advantage to those most familiar with the area and directly detract from the effort of radio direction finding, our sole purpose (other than fun) for the hunts.

Instead of using clues, I propose the following: The fox communicates with an operator at a known location. The person at the known location quizzes the fox on either General or Extra licensing questions. In the beginning of the hunt, questions can be spaced at intervals of say 2 to 5 minutes. After some time passes the intervals become shorter to the point of becoming an ongoing exchange. This will allow for more RDF and less BS. An added benefit is hearing the test questions and their answers, discussions about the answers, etc. This way, everyone is a winner. We all leave the hunt with more info in our neurological hard drives than we started.

Now, if there are still folks that insist on clues....how about we throw them out in CW?

Let the hunts begin.

73,

Mark K8MHZ

I suppose that there are different camps on the topic.

My logging program interfaces easily with LoTW and I really like this feature. I use LoTW extensively. LoTW QSLs work for my wallpaper chase.

I will not use eQSL and I only visit there infrequently to check for a new country. If one shows there I'll send the DX a hard card and request for his hard card. But my awards chase requires LoTW or hard cards. EQSL "cards" are not good for my use. Someone else might not even chase wallpaper and the entire subject is irrelevant.

I believe that CQ Magazine is encouraging contacts using the internet as a part of the QSO. Perhaps this wallpaper can be applied for using a combination of card formats? I wonder.

There are so many awards. Did anyone chase the Japanese Cities award?

From: Joe Veldhuis
Topic: 307 Message: 307

Since PSK31 is the most popular mode by far, most nights I will use that mode for the net; however, as I've mentioned before, I want to provide a chance for everyone to try the other modes out there as well. Here's what I plan on doing over the next month:

Feb 22: PSK31
Mar 01: MFSK16
Mar 08: PSK31
Mar 15: SSTV
Mar 22: PSK31
MAr 29: RTTY

How's that sound? Anyone have any other stuff they want to try on the net some time?

Also, as a footnote: MFSK16 supports sending images, however due to the way the HF bands are allocated in the US (there is no place where both "data" and "image" modes are allowed), we can't use that feature there. However, that segregation does not exist on the VHF bands (see your band chart), so we can use it on the net. And I intend to.

OK,

So what I have deciphered is that if you are doing awards and are only interested in one piece of paper then LoTW is the way to go as QSL cards are not part of the deal in any format.

On the other hand if it is QSL cards you want, eQSL and hard copy is the way to go.

If you want BOTH the awards as and the cards, hard copy is the only way to go.

I would like to see a new contest. A QSL speed contest where you see how fast you can get a QSL card to travel. For instance, the time would start as soon as both calls have been exchanged. Let's say you are having a QSO with a ham 4,000 miles away. 20 minutes after the 'timer' started your QSL card is printed out. So that's 4,000 miles in 20 minutes or 12,000 miles per hour.

Soon, hand typing would be replaced by information stored in your computer's memory and much like an electronic keyer with a memory one button would replace many keystrokes. Within seconds you could have the info on the card filled out and the button hit. Shortcuts would be stored in the hard cores' computers that would fire off the printer as soon as the card hit the Inbox. Hams would soon find out ways to make their printers print faster by connecting them to 145 volt 120hz AC 'cheater' transformers. Times would soon be down into the seconds and speeds in the hundreds of thousands of miles per hour.

It would only be a matter of time before we interfaced our radios directly with our printers, taking us out of the picture altogether. We could soon just turn the sound down and watch as our printer's spit out QSL cards from lands far away as we watched TV.

Maybe I will just stick to hard copy for a while.

73,

Mark K8MHZ

Subject: RE: [WestMichiganHams] eQSL

I suppose that there are different camps on the topic.

My logging program interfaces easily with LoTW and I really like this feature. I use LoTW extensively. LoTW QSLs work for my wallpaper chase.

I will not use eQSL and I only visit there infrequently to check for a new country. If one shows there I'll send the DX a hard card and request for his hard card. But my awards chase requires LoTW or hard cards. EQSL "cards" are not good for my use. Someone else might not even chase wallpaper and the entire subject is irrelevant.

I believe that CQ Magazine is encouraging contacts using the internet as a part of the QSO. Perhaps this wallpaper can be applied for using a combination of card formats? I wonder.

There are so many awards. Did anyone chase the Japanese Cities award?

Bill

OK- so I had 18 eQSLs on there I was not aware of.

Some satellite contacts, even.

Cool.

The dollar store by my house has 6 x 4 glossy photo paper, 20 count.

Kind of tricky to get set up but the price is right.

From: Bill Fries
Topic: 292 Message: 312

Mark:

The award will dictate the QSL required. Decide if you are chasing an individual wallpaper and then see what the requirements for QSL credit are.

I would say that LoTW and hard cards are equally beneficial when it comes to credit for well known awards.

If you get an eQSL and you print that card you are fine until you use that printed card for credit for an ARRL award. ARRL will not give you credit toward their awards using the eQSL card in any format, electronic or hard paper. If you insist on this you will print the card and then snail mail the card to the DX. The DX will sign or acknowledge the validity of the card and return the authenticated card. THEN you can use the eQSL card for ARRL credit. But, then, it is not a whole lot different from a traditional hard card. What did you gain? Check the award's requirements.

It really is not that hard to understand. Decide upon an award, get their requirements or proof of QSO and proceed from there. The eQSL awards are just as nice as the ARRL awards. Maybe they are not as well known, since the ARRL wallpaper has been around since 1946, give or take.

To anyone interested.
Where I work we are getting rid of a desk that accepts 19" rack mount equipment installation. It is on casters and has electric outlets with a main power switch. Equipment can be rack mounted in the front and rear. This unit is FREE to the first person who claims it at the shop during normal weekday business hours. Photos of this unit are at:

I think I gotcha.

As things now stand, traditional hard snail mail card and a matching log entry works for all, correct?

Other forms have come about to facilitate ease in different targeted awards, but all still accept a snailer, yes?

Now, what of this question....I use a program to print out snailers that I send out called QSL Maker. The info can either be printed in the text blocks, which I do, or handwritten. I see no reason why printed info, which is legible, would invalidate a card, if so, please enlighten me. So, what it the difference if I send a card I print on my computer using QSL Maker or if I sent the file I print via e-mail to someone else using the same program so they can print out the card? They would get the exact same card that I would have sent.

Are we to think that with cards that computers print instead of the print shop, if the info (station, rpt, freq) is printed by the computer that we should also sign them for authenticity? If we don't, then what? Have I been sending out snailers that are not valid?

Clear that up for me and I think the rest can be figured out.

73,

mhz

"As things now stand, traditional hard snail mail card and a matching log entry works for all, correct?"

No, you do not send your log together with any QSL card in any format. Nobody cares about your station log. They want to see the proof of QSO which is generally the QSL card in the format requested by the awards organization. Does that always mean a hard card? No. It might be a LoTW credit. Or an eQSL. Depends on the outfit you want the wallpaper from. It is way too simple.

When you send a card you can use a preprinted card or a card you print for each QSO. The QSO information is the important thing on the card. And it does not matter if the QSO data is hand written, put on there by the printer, pasted on there in a "mailing label" format or whatever. The card must be legitimate. Some DX will often stamp a "verified by DX1DX" stamp but this is not necessary. Each station's call sign, your address, frequency and mode, stuff like that. When you send your collection of QSL cards in for verification the award granting organization will verify the authenticity of the QSL card.

I would not get in the habit of sending a QSL card via e-mail to the DX. They may not have the fancy computer program that you use, they may not be as familiar with our English language, they may barely be able to get a signal on the air and into your QTH. Don't count on DX having the ability or desire to print your card for their use. If cost is an issue then learn to use the bureau or only have QSOs with stations who will confirm on eQSL or LoTW or whatever method endorsed by the award granting organization uses.

And if you only want to have a QSO with a station that confirms on LoTW there is a web page that shows All the call signs of stations who have verified on LoTW. There are thousands of them. And there are hams who have qualified for DXCC? using only LoTW QSL credits. It takes one heck of a lot of QSOs to get there.

I believe that it is not necessary to sign your cards to indicate some authenticity. The awards organization will pass judgment on the authenticity of any QSL card submitted for the award. They have seen some really great forgeries. They have likely seen everything that you might dream up to scam the awards organization. And think of it, if you want to pass a bogus QSL card for credit and the organization buys your forgery then what is the ultimate award worth to you? And, if that DX is using your card for credit and your card is deemed a forgery don't you think he as fifteen more K8 QSL cards he can swap in for credit? Those of us in eight land are not really rare DX for anybody. Unless you are chasing townships or something tiny like that.

Don't worry about it! Hams have been swapping QSL cards for decades. It's simple, generally foolproof, fun, and works.

Bill

My preference is the snailers. In fact, I try to take the time to scratch a note on the back of each one but don't do it 100% of the time. A bit of handwriting, to me, makes a more valuable card.

I don't, however, think I would feel comfortable actually sending in all the cards. Especially if I were new to the hobby and the cards were trophies in and of themselves. Of course, If there were shoe boxes full of cards strewn about, sending in a few for verification would be less than traumatic.

So far, every card I have sent has been through the mail. I have three from eQSL so far, one from Germany. I returned a snailer. Saved a buck on that one but for the life of me could not get it to print out right. The cool thing is that I got it on a Sunday just a few minutes after the QSO ended.

I also have an ulterior motive for sending snailers to DX stations. The hope that they will use my self addressed envelope and put a stamp on it. My dad has been collecting stamps for 60 years. I want to add to his collection not only some foriegn stamps, but foriegn ones on envelopes with my name on them, each with a part of my hobby melding with his to produce the best catches for both.

I am playing with PhotoShop to make some designs. QSL Maker is great, but lacks the flexibility for some of the photos I am working with. For example, the card that I am working on for W8ZHO can't use the text block on QSL Maker due to the layout of the photo. Instead, I am going to use Photo Shop to cut up the boxes and place them where I want them. I also have better fonts and the ability to use transparancies with PhotoShop.

Look for some samples here in the reflector soon.

73,

Mark K8MHZ

If cost is an issue then learn to use the bureau or only have QSOs with stations who will confirm on eQSL or LoTW or whatever method endorsed by the award granting organization uses.

And if you only want to have a QSO with a station that confirms on LoTW there is a web page that shows All the call signs of stations who have verified on LoTW. There are thousands of them. And there are hams who have qualified for DXCC® using only LoTW QSL credits. It takes one heck of a lot of QSOs to get there.

I believe that it is not necessary to sign your cards to indicate some authenticity. The awards organization will pass judgment on the authenticity of any QSL card submitted for the award. They have seen some really great forgeries. They have likely seen everything that you might dream up to scam the awards organization. And think of it, if you want to pass a bogus QSL card for credit and the organization buys your forgery then what is the ultimate award worth to you? And, if that DX is using your card for credit and your card is deemed a forgery don't you think he as fifteen more K8 QSL cards he can swap in for credit? Those of us in eight land are not really rare DX for anybody. Unless you are chasing townships or something tiny like that.

Don't worry about it! Hams have been swapping QSL cards for decades. It's simple, generally foolproof, fun, and works.

Bill

You need to teach your local Post Office clerk how to sell you an IRC.

And, the ARRL will only accept your original QSL cards. And they are just as fussy about returning ALL your cards in exactly the condition they were submitted. That's why I spent something like $40 when I submitted my cards for DXCC?.

I like sending that ?, it is easy.

It's not the ARRL I don't trust. I can tell you horror stories about the USPS, and some minor suspense tales about UPS.

IRC, Internet Relay Connection?

The 40 bucks really confuses me. One at a time 100 should have cost less than that.

BTW, I got a hard card in the mail today. Cool.

International Reply Coupon or postage from anywhere that cooperates back to the States and your QTH. $1.85 They are "ham currency" and are often combined with a green stamp ($1) to entice the DX to send a card.

The cards were sent to HQ registered and insured. They were returned from HQ registered, return receipt requested, and anything but "Delivery unconditionally guaranteed!" Maybe $40 was a little high. But the cards made the round trip and are safely back on display.

Bill, a Question for someone who would like to know what LoTW is?
----- Original Message -----
From: Bill Fries
To: WestMichiganHams@yahoogroups.com
Sent: Tuesday, February 21, 2006 2:09 PM
Subject: RE: [WestMichiganHams] eQSL

"As things now stand, traditional hard snail mail card and a matching log entry works for all, correct?"

No, you do not send your log together with any QSL card in any format. Nobody cares about your station log. They want to see the proof of QSO which is generally the QSL card in the format requested by the awards organization. Does that always mean a hard card? No. It might be a LoTW credit. Or an eQSL. Depends on the outfit you want the wallpaper from. It is way too simple.

When you send a card you can use a preprinted card or a card you print for each QSO. The QSO information is the important thing on the card. And it does not matter if the QSO data is hand written, put on there by the printer, pasted on there in a "mailing label" format or whatever. The card must be legitimate. Some DX will often stamp a "verified by DX1DX" stamp but this is not necessary. Each station's call sign, your address, frequency and mode, stuff like that. When you send your collection of QSL cards in for verification the award granting organization will verify the authenticity of the QSL card.

I would not get in the habit of sending a QSL card via e-mail to the DX. They may not have the fancy computer program that you use, they may not be as familiar with our English language, they may barely be able to get a signal on the air and into your QTH. Don't count on DX having the ability or desire to print your card for their use. If cost is an issue then learn to use the bureau or only have QSOs with stations who will confirm on eQSL or LoTW or whatever method endorsed by the award granting organization uses.

And if you only want to have a QSO with a station that confirms on LoTW there is a web page that shows All the call signs of stations who have verified on LoTW. There are thousands of them. 323. What is LoTW?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-21 23:40:48 UTC
From: Bill Fries
Topic: 292 Message: 323

Logbook of The World, often abbreviated LoTW. This is the electronic QSL service provided to the world through the ARRL. You enroll by carefully following several steps involving e-mail and snail mail. After you get through the process your QSOs are posted in the LoTW database and when another ham's QSO matches your QSO you can use the resulting electronic QSL type credit for awards. Right now the awards are singular and only DXCC? but they will eventually include Worked All States and Worked All Continents. Some other awards may use LoTW QSL credits for their awards. Check with the organization.

>From one person's perspective, I have 1300 QSOs in LoTW and have 225 QSL credits. Some of these credits may be for duplicate call signs. For example the huge contest outfits in the Caribbean will be on LoTW and I'll get several QSL credits from a, say, P40. But a LoTW credit is as good as a QSL card and a whole lot cheaper when you apply for an award and use LoTW credits toward the award.

Hope this helps. My QSO logging software helps me upload QSO data and QSL data. I do not do this task manually. However, Linda will perform this task manually.

My experience with IRC:

I will visit two post offices for these IRCs. At both they know me and will more or less start searching for the IRC when I hit the window. I keep a rough inventory in my head and right now I know that the Hesperia post office is out of stock while the Fremont post office has more than enough of the $1.75 model IRC. I will also gently remind the clerk of the steps required to get a good IRC into my envelope.

The postmaster will order the IRCs for you if you request this service. They want to sell them and it is not a problem to get them to cooperate. Also they do not mind keeping these IRCs in stock for your random use. They do not go stale nor are a problem for their book keeping system. Before you purchase your first IRC I suggest you drop me a note and I'll give you the two cent directions to make sure you get the right product properly endorsed. You can find a clerk who will sell you an IRC which won't do your DX friend much good on the other end. It is three easy steps and the clerk will do a little search on the computer screen.

Yes, they are a different animal but so is our hobby. And I need to take in some representative QSL cards to share with the clerks who will sell me these IRCs and postage to Romania or wherever. They don't know how valuable an IRC really becomes or why I ask for so many of them at times.

Bill

Cool!

Fessenden, like Tesla, is one of the many pioneers of radio that the history books only touched on.

Their contributions were 'assumed' by others more notable in our elementary teachings.

Thanks and 73,

That may well work fine as a float charger, but once you've actually used the battery and need to put a lot back into it, this thing isn't going to do the job.

I took advantage of a Meijer sale on battery chargers combined with an extra 15% discount either for using my Meijer card or for being an "oldie" and bought a "Vector" VEC1089A microprocessor-controlled charger that has settings for 2A/10A/15A charge rates and also for Wet/Gel/AGM battery types. I use this to maintain my 115AH deep-cycle battery (approx. $65 from Sam's Club). Once the battery is fully charged, the charger cuts off altogether but kicks in again when the voltage falls off.

Hi All,

My research indicates that a power supply is the way to go, but may need some mods.

First, you never know if float chargers are really what they say. If they have a voltage higher than 13.5 with no load they will burn up batteries. I have seen batteries brought to 16 volts with just a few milliamps, so I don't trust them.

On the other hand, I have a 25 amp regulated PS that went soft and only puts out about 9 amps. The voltage reg still works, though. I just set it at 13.8 and connect my batteries across it. When the power goes out, instant battery power. I can leave the PS on all the time and it never overcharges the batteries. Also, when the batteries start to deplete and I do have power, I get 9 amps of battery charging current without having to do anything.

Some PSs don't like batteries hooked up to them. If so, a diode rated at the max output of the supply should be connected. A cheap way is to use a couple leads of a heavy duty bridge rectifier.

If you want to back up your back up, or don't use the shack for long periods of time, connect a 2 amp charger to the battery set controlled by a timer. Check your voltages for a few days and adjust the voltage by using the timer. Back off on the time as it approaches over-charging. To be safe, even float chargers should have timers and allow the batteries to rest for a couple hours each day.

I found that the batterys seem to have more punch if they are kept at 13.5 volts all the time. I don't know why, but they seemed weaker (they are pulls from my cars) if I charged them up with a charger and cycled them.

The ideal set-up will operate just like a UPS. The radios shouldn't know that mains power was lost. Also, a means to keep the batteries charged should be included in the design. I am working on some adaptors that will enable a 120 V extension cord to be used as 12 volt jumper cables. The voltage drop through the extension cord will be at maximum while charging hard, and will level out as the internal resistance of the batteries decrease. Resistance in an extension cord will only slow down the process, not make it impossible. In short, it is possible to use a 100 foot extension cord to charge 12 volt batteries. It will just take longer than using 10 feet of 1/0 welding cable.

Want to get fancy (not really needed)? Keep the voltage drop at bay by using an inverter. Now our current is 1/10th that at 12 V and a 100 foot long extension cord is no big deal, right. Do the math. Look at the

decrease in effeciency by using an inverter and a charger to shuttle current from your car to those batteries. Better to have just used the extension cord.

Also, perhaps the most important, is circuit protection. Use fuses in any conductor that carries a load. Having multiple power supplies and high current batteries are fire hazards of an extent most do not realize. 12 volts can start a fire using 10 amps or less. Realize that when you are using a battery back up system, the batteries are both loads and supplies and have to be treated as such. There should be fuses at each charging point and in the leads coming off the batteries. If you are using a battery case, do NOT put the fuses in the case. Hydrogen is produced by charging batteries and a spark from a fuse that just blew could ignite the hydrogen. If fuses are needed in the cases, make sure they sealed. Glass fuses are safer than plastic ones as far as ignition goes.

Have fun and 73,

Mark

From: Alan NV8A
Topic: 334 Message: 338

I have it sitting on a shelf not far from the radio and about 20ft or so
below the fed end (via an Icom AH-4 autotuner) of the wire antenna, and
I can't hear anything I can attribute to the charger. I do have RF
chokes on both input and output leads.

The "Vector" 350W DC/AC inverter is a different story, but I can shift
its frequency by altering the load on it.

QSL on the fire hazard. I overcharged a small 12-volt sealed lead-acid battery and came close to starting a fire with it.

Lots of Hydrogen smell in the basement.

340. Re: [WestMichiganHams] gel cell float charger project

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-24 22:08:30 UTC
From: K8MHZ
Topic: 334 Message: 340

I am embarrased to say that I learned by experience.

I was using a jump pack and charging it with a charger. Something in the pack shorted out and it caught fire.

Now I know why it is a code requirment to interconnect all the fire alarms. When I came in the house I heard the smoke detector in the basement going off and went and put the fire out.

"I wondered what that beeping was." said the YL. Had it been loud enough to hurt I may have heard it outside and saved some equipment.

73,

Mark K8MHZ

I use a charger by A&A Engineering. http://www.a-aengineering.com/

From their site:

This is a low RF noise linear (not a switching) charger, well suited for radio use. Ham Radio Operators have used this charger in many applications. Both standard (everyday) use or in emergency backup power applications. A 5 Amp Smart Charger, in conjunction with a deep cycle battery, provides the power for many Ham Radio Stations. If switching regulated power supplies are a problem, consider this method of powering your RIG(s).

True but I have 5 smaller Gel cells that I use with my HT in a belt pack. Must of the time the are not being use. This should maintain them better than a rapid charge because they sat to long. I have a larger automatic charger for the bigger batteries. That charger at Meijers does sound like a very useful charger though. Is that something they have on the shelf know?

> ==>NO LOLLIES ON SPACE STATION, COMMANDER TELLS YOUNGSTERS IN SPACE QSO
>
> International Space Station Expedition 12 Commander Bill McArthur, KC5ACR,
> this month educated and inspired youngsters in Florida and the Australian
> outback during separate Amateur Radio contacts. McArthur spoke from NA1SS
> with youngsters attending Collier County, Florida, public schools on
> February 8, and at the Charleville Cosmos Centre in Queensland on February
> 17. The Amateur Radio on the International Space Station (ARISS) program
> arranged both events. Students at Florida's Pine Ridge and Immokalee
> middle
> schools posed several questions on the subject of robotics aboard the ISS,
> and McArthur discussed use of the space station's robotic arm, Canadarm 2.
>
> "We use the robotic arm only occasionally onboard the ISS," McArthur
> explained. "It's used to either relocate people or equipment on the
> outside,
> which happens only occasionally. Also, we will sometimes use the cameras
> installed on the robotic arm to do video surveys of the exterior of the
> station."
>
> McArthur told the students that it took extensive training to learn how to
> properly manipulate the Canadarm 2, used mostly to move equipment and
> cargo
> that's too large for the astronauts to handle during space walks.
>
> Twice during the contact, McArthur offered some words of inspiration and
> encouragement to those contemplating careers as astronauts. "Do not be
> afraid to follow your dreams," he advised. "Reach high, because even if
> you
> fall a little bit short you will have accomplished so much more than if
> you're afraid to even try."
>
> Members of the Amateur Radio Association of Southwest Florida (ARASWF) set
> up and operated the equipment necessary for the direct VHF contact between
> NA1SS and K4YHB at Pine Ridge Middle School, a NASA Explorer School.
> Coordinating Teacher Sharon Lea, who once met McArthur, took a moment at
> the

> end of the QSO to express gratitude on behalf of the schools for making
> the
> contact possible. "This was a wonderful experience for us all," she said.
>
> Some 150 school officials, teachers, parents and students were on hand,
> and
> two TV stations, a local radio station and the Naples Daily News reported
> on
> the space contact.
>
> Nine days later, youngsters attending the Charleville School of Distance
> Education gathered at the Cosmos Centre in the Australian outback to hook
> up
> with McArthur via ham radio and a Verizon Conferencing teleconferencing
> link
> from WH6PN at Sacred Hearts Academy in Honolulu to the Queensland
> facility.
>
> McArthur told the students that he's been an astronaut for 15 years, and
> his
> duty tour aboard the ISS marked his fourth flight into space. "Prior to
> this, my longest mission was 14 days--two weeks," McArthur responded to
> one
> question, noting that he enjoyed being in space very much. "This one will
> be
> a little more than a half-year, and, to me, it's the difference between
> visiting a wonderful place and living there."
>
> Looking ahead to longer-duration space flights, one student wanted to know
> how long it would take to get to Mars. "It would take somewhere between
> six
> and nine months depending on the technology used and also depending on how
> the planets are aligned," McArthur replied.
>
> "Do you eat chocolate bars and lollies?" another student wanted to know.
> "Well, we have no lollies," McArthur answered, "but that's only because
> Valeri [Tokarev] and I didn't ask for them. Yes, we do have chocolate
> bars,
> chocolate candy, other candy, and if a crew wanted lollies they could ask
> for them, and they would have them up here."
>
> Beyond that, McArthur said, the cuisine aboard the ISS largely consisted
> of
> foods familiar on Earth, although all meals come already prepared and
> usually dehydrated.
>
> The school waited nearly two years for its contact to be scheduled, and
> just
> 12 hours before the event a thunderstorm knocked out telephone service
> throughout the town. Earth station operator and ARISS veteran Tony

> Hutchison, VK5ZAI, said a repair crew managed to get the telephone system
> back up with only two hours to spare.
>
> National TV and radio and local media joined the audience on hand to
> report
> on the contact. The Charleville Cosmos Center is an observatory in outback
> Queensland some 800 km west of Brisbane.
>
> ARISS <http://www.rac.ca/ariss> is an international educational outreach
> with US participation from ARRL, AMSAT and NASA.
>
> ==>ARISS MAKES IT OFFICIAL: "TREMENDOUSLY SUCCESSFUL" SUITSAT-1 IS SK
>
> SuitSat-1 is now a confirmed "Silent Key." So says its sponsor, the
> Amateur
> Radio on the International Space Station (ARISS) program. In operation for
> more than two weeks, SuitSat-1--designated AO-54--easily outlasted initial
> predictions that it would transmit for about one week. ARISS International
> Chairman Frank Bauer, KA3HDO, says the mission captured imaginations
> around
> the world, despite a much-lower-than-expected signal strength.
>
> "The outreach, press requests and visibility of SuitSat were absolutely
> amazing and appear to be unprecedented for a ham radio event," Bauer said.
> "While the press requests are just now starting to wane, we expect that
> you
> will continue to see SuitSat status reports and pictures in magazines, Web
> sites and other literature over the next few months." The more than nine
> million hits at the SuitSat Web site attest to the level of interest in
> the
> SuitSat-1 experiment, Bauer noted, calling the tally "quite impressive
> indeed!"
>
> Bob King, VE6BLD, in Alberta posted the last confirmed reception of
> SuitSat-1's voice audio, Saturday, February 18, at 0332 UTC. Richard Crow,
> N2SPI, in New York received the last confirmed telemetry, which indicated
> the battery voltage dropping precipitously to a low of 18.3 V before the
> novel satellite ceased to transmit.
>
> Hearing SuitSat-1's puny signal strength generally required gain antennas,
> but Bauer says he heard SuitSat with a 3-element Arrow antenna and a
> handheld radio. Bauer's daughter Michelle recorded the English-language
> voice identification. Another challenge to signal reception, he said, was
> the very deep fading due to the suit's rotation in orbit.
>
> "One great positive that came from these issues is that it challenged the
> ham radio community worldwide to improve their station receive
> capabilities
> so that they could pull every bit of signal from SuitSat," Bauer remarked.
>

> Bauer says reports that SuitSat-1 was non-operational and that the battery
> was frozen shortly after deployment are false. "This never occurred," he
> stressed. "As the telemetry has shown, temperatures within the suit were a
> somewhat comfortable 12-16 degrees C during the entire mission."
>
> So, he adds, is the tale of SuitSat-1's early demise and resurrection. "It
> was alive and operated flawlessly, except the signal strength issue, from
> the time the crew flipped the switches until the battery power was used
> up,"
> he said.
>
> Bauer says he's also not ready to buy into an AMSAT calculation that the
> transmitter may have been putting out between 1 and 10 mW. "It is entirely
> possible that the radio output could have been at 500 mW, and the feed
> line,
> connector or the antenna caused the problem," he said, adding that the
> SuitSat team has only just begun studying what might have caused the weak
> signal.
>
> The AMSAT/ARISS team already is looking forward to a SuitSat-2.
> "Correcting
> the signal strength issue would be a top priority for this flight," Bauer
> said. "So would be a longer-term power generation device, like solar
> arrays."
>
> Although no longer transmitting, SuitSat-1 could continue orbiting Earth
> for
> another 70 to 120 days, depending on atmospheric drag, Bauer said.
>
> More information on the SuitSat-1 project, including QSL information, is
> available on the AMSAT Web site <http://www.amsat.org/> and on the SuitSat
> Web site <http://www.suitsat.org/>.
>
> ==>VIRGINIA MEMBERS ELECT NEW SECTION MANAGER IN CONTESTED RACE
>
> In the only contested Section Manager race this winter, Glen Sage, W4GHS,
> outpolled incumbent Virginia SM Carl Clements, W4CAC, 720 to 656. Ballots
> were counted February 21 at ARRL Headquarters. Clements has served as
> Virginia's SM since May 2001.
>
> Sage, who lives in Hillsville, has been licensed since 1976 and has a
> strong
> interest in--and commitment to--emergency communication, teaching
> licensing
> classes and serving as a volunteer examiner.
>
> Three other ARRL sections are getting new SMs. In North Carolina, Tim
> Slay,
> N4IB, of Mooresville, was the only candidate to succeed John Covington,
> W4CC, who decided not to run for another term after serving for six years.

>
> Bob Schneider, AH6J, of Keaau, Hawaii, will return to the Pacific SM post
> when he takes over the reins from Kevin Bogan, AH6QO, who did not seek a
> new
> term. Schneider has served three separate, earlier terms as Pacific SM,
> beginning in 1992.
>
> Tuck Miller, NZ6T, will once again become San Diego SM, a post he'd held
> previously for nearly two terms. Incumbent Pat Bunsold, WA6MHZ, decided
> not
> to run again.
>
> Four incumbent ARRL SMs faced no opposition and were declared re-elected.
> They are Pete Cecere, N2YJZ, Eastern New York; Eric Olena, WB3FPL, Eastern
> Pennsylvania; Mickey Cox, K5MC, Louisiana, and Richard Beebe, N0PV, South
> Dakota.
>
> New two-year terms for all successful candidates begin April 1.
>
> ==>REVISED ITU RECOMMENDATION ON USE OF AMATEUR RADIO IN DISASTERS IN
> EFFECT
>
> A revised International Telecommunication Union (ITU) Telecommunication
> Development Sector (ITU-D) Recommendation is now in force to promote
> "effective utilization of the amateur services in disaster mitigation and
> relief operations." Initially developed in 2001, the document, known as
> Recommendation ITU-D 13, was brought up to date last year through the
> efforts of an ITU-D study group and circulated to administrations around
> the
> globe for adoption.
>
> "This is an updated version of a Recommendation that administrations
> include
> the amateur services in their national disaster plans, reduce barriers to
> effective use of the amateur services for disaster communications, and
> develop memoranda of understanding with amateur and disaster relief
> organizations," explained ARRL CEO David Sumner, K1ZZ. ITU-D 13 further
> advises cooperation among all parties in making available model agreements
> and "best practices" in disaster telecommunications.
>
> The revised Recommendation takes into account changes adopted at World
> Radiocommunication Conference 2003 (WRC-03) to Article 25 of the
> international Radio Regulations. One change provides that Amateur Radio
> stations may be used to transmit international communications on behalf of
> third parties in case of emergencies or for disaster relief. Another
> encourages administrations "to take the necessary steps to allow amateur
> stations to prepare for and meet communication needs in support of
> disaster
> relief." The FCC recently adopted changes to its Part 97 Amateur Service
> rules to reflect these and other WRC-03 actions.

>
> The revised Recommendation ITU-D 13 recognizes that effective Amateur
> Radio
> disaster communication depends "largely on the availability of amateur
> operators located throughout a country," and that post-disaster
> international humanitarian assistance "often includes the provision of
> amateur operators and of equipment from an assisting country."
>

> ==>GREAT BRITAIN TO INSTITUTE LIFETIME AMATEUR RADIO LICENSES
>
> Telecommunications regulator Ofcom has unveiled plans to reform Amateur
> Radio licensing in Great Britain. The main change is that Amateur Radio
> licenses will be issued for life, although licensees will have to confirm
> their license details every five years. The Radio Society of Great Britain
> (RSGB) says it welcomes the Amateur Radio licensing reforms.
>
> "The RSGB are reasonably comfortable with Ofcom's recent announcement,"
> RSGB
> General Manager Peter Kirby, G0TWW, told ARRL. "We never had an argument
> with electronic delivery. We had a big argument with regards to a
> 'lifetime'
> license with no checks and balances. Our concerns have been satisfied
> inasmuch as it is a lifetime license that has to be effectively renewed
> every five years or it lapses."
>
> Paper licenses are going away too, for all intents and purposes, and Ofcom
> instead will provide an on-line service to issue electronic licenses.
> Hard-copy licenses will remain available for those lacking Internet
> access,
> but there will be an administrative charge. Starting October 1, Ofcom will

> take over from the Royal Mail the role of issuing, renewing and amending
> Amateur Radio licenses.
>
> The RSGB's Kirby notes that while Ofcom announced it was deregulating the
> Amateur Radio license, the RSGB is quick to point out that the changes to
> the licensing system "do not add up to deregulation" of ham radio. "Ofcom
> continue to shoot themselves in the foot with the liberal use of the word
> 'deregulate'," Kirby said. "Every time it appears they get deluged with
> letters from angry hams and Members of Parliament, and even our Patron,
> the
> Duke of Edinburgh, has taken them to task in recent months."
>
> The RSGB last year went on record as being "strongly opposed" to any steps
> by Ofcom to deregulate Amateur Radio in Great Britain, fearing that it
> could
> lead to the elimination of amateur licensing altogether. "There is no
> doubt

From: Andrew Young
Topic: 334 Message: 345

If you're concerned about a quick charge, then a trickle charger is not what you need. Buy a car battery charger or connect the battery to a regulated 13.8 volt supply, then use the float charger to keep the battery topped off as needed. I use a 6 amp "smart" charger I bought a few years ago at Napa- overpriced at about $45.

I think the voltage regulator in the article cited is probably a good idea, but it's just a voltage regulator. There's really nothing special about it beyond that (except the LED) and I can build the same thing with a large transistor and a Zener diode for higher power. I uploaded a schematic to the files section a few weeks ago.

I'm not a battery expert, but would some sort of device with hysteresis built in do a better job for continuous charging? I mean a device that would switch on when the voltage dropped to a minimum, like say 11.5 volts and would run for a certain amount of time or until the battery voltage reached 13.8 volts. I know this is similar to the float charger, but I am saying something that would not come on until there was a pretty significant drop in voltage, not just a couple hundredths of a volt.

Andrew

If you have a 13.8 PS, why is a float charger needed?

Hysteresis?

My understanding of hysteresis is that, simply, it is used to describe a system that does not react immediately to it's input. Our seasons, for instance. The days are getting longer but the temperature will continue to drop for a while. The lag between the input and the desired reaction is called hysteresis. If the device you describe had hysteresis, it would not start charging for some time after it was initiated to do so. Hysteresis has nothing to do with fuzzy logic. It is more of a pain than a help, especially when designing systems. Hysteresis is also works the opposite way, causing a system to continue producing output after the command to do so was terminated.

I do like the idea of a voltage reg in a charging system. That would prevent overcharging no matter what was used. The quickest way to ruin a battery is to overcharge it.

The way I was using the word "hysteresis" was to describe a trait of "on/off" control like a thermostat. The temperature of the room drops for a certain amount before the furnace kicks on, such as one degree below the setting then it would run until the setpoint is reached. Maybe I should have said "deadband?" Unlike the voltage regulator, the furnace would continue to run for a period of time due to the lag in the blower circuit from the accumulated heat in the furnace. I guess that would be the way you define hysteresis.

So- Hysteresis is to infer as deadband is to imply?

I agree with you that 13.8 volts doesn't overheat a car battery, so it should be OK for most 12 volt batteries. Your idea of 13.5 volts or even 13 volts is probably even better if that's not too low for the application.

I think trickle chargers a just a cheap way to maintain a battery that's not used much without buying a nice charger. The power supply is a better idea.

Andrew

Fuzzy Logic: It's cold. Sweaters keep you warm. Sweaters are fuzzy. If it's cold, wear a fuzzy sweater?

The thing about hysteresis is that it is almost universally thought of as a problem. In fact, the word is from a latin word meaning defecient, same as the word hysteria was.

I think you are trying to describe "span and control" points. Hysteresis would be the devil made the device have a response lag once the set points are achieved. Like if you set the charger at 13.5 volts and it got to 15 before it decided to eventually go back to 13.5. Hysteresis causes the guy making the controls to have the labels lie to you in some instances. If a control is labeled in such a way that the set point levels are not concurrent with the control labels, chances are hysteresis is the reason.

Let's say we are charging our batteries with a generator. The batteries reach 13.5 volts and the generator is turned off. But, because it takes some time for the generator to come to a stop and the batteries are still being charged, they reach 14.2 volts for a few seconds. That is hysteresis. In this case it would not be much of an issue unless there was a reason, such as sensitive devices, to not go over 13.5 volts. If this were the case the control would be labeled 13.5 volts but the set point would probably be 12.8 or so.

The fun part is when you get someone not knowing about hysteresis trying to calibrate a device. From the above you can probably figure out what always happens.

ARISS has officially declared Suit Sat SK. It's last transmission was confirmed on Feb 18th.

This was much longer than expected, but we all know that the signal level was much lower than expected.

73 and Godspeed Mr. Smith, RS0RS de K8MHZ

Much of the Latin actually came from the Greek.

hys?ter?e?sis (h?s?te-r?s?s) noun
plural hys?ter?e?ses (-s?z)
The lagging of an effect behind its cause, as when the change in magnetism of a body lags behind changes in the magnetic field.

[Greek huster?sis, a shortcoming, from husterein, to come late, from husteros, late.]
? hys?ter?et?ic (-r?t??k) adjective

To: KC8UNY@...

Hello:

I'm sending the following to all the Michigan radio clubs with the hope that you will again help us get the word out about the 2006 Michigan QSO Party that will be held on April 15th from 12 noon to midnight local time. With your help, we can spread the word at the "grass roots" level and assure a great turn out for this year's event.

I ask that you help us spread the word by doing the following:

1. Please announce the event at your March and April club meetings and try to drum up some activity within your club. The MiQP can be a great club activity!

2. Please publish the attached "MIQP press release" and the "MiQP for First-Timers" in your club newsletter. (see Attachment MIQP Press Release.doc and MiQP for First-Timers.doc)

3. Post an announcement of the Michigan QSO Party on your club web page. Please include the link to the MIQP web site. The link is <http://www.miqp.org/> http://www.miqp.org

We thank you in advance for your help. If you should have any questions, please do not hesitate to contact me. <mailto:NU8Z-MiQP@...> NU8Z-MiQP@...

Hope to hear you and members of your club on the air during the QSO party on April 15th.

73 Mark NU8Z

see below press release

2006 Michigan QSO Party

Attention Michigan Hams. Do the low sunspot numbers and worsening HF conditions have you feeling down? Do you find it difficult to conjure up

the energy needed to get on the air and have some fun like in the old days? Do you shy away from participating in ham radio related group activities? If you have any one of, or all of the above symptoms, you may be suffering from Amateur Radio Dysfunction Syndrome, also know as "ARDS".

Fear not! "ARDS" is a condition that can be treated with proper corrective actions. It is a fact that 9 out of 10 doctors agree that the best treatment for "ARDS" is a good dose of "Radio Activity". Doctors also agree that the most efficient delivery method for "ARDS" treatment comes in the form of participation in the 2006 Michigan QSO Party. The number of ARDS patients seeking treatment in the MiQP has been growing every year. Remember, this is a yearly condition, and yearly treatments may be needed. Treatment may be administered in single exposure doses taken in the comfort of your home (Single Op), or when you travel in your car (Mobile). If you are apprehensive about taking the treatment when you are alone, you may be treated within a group session (Multi-op), or as single treatment member of a larger support group like your radio club. Your treatment support group can compete against other ARDS support groups.

Warning! Dosages should not exceed time periods of over 12 hour. Exposure times of less than 12 hours may be appropriate depending on the severity of your condition. Remember, even short exposures to MiQP ARDS treatment will be of benefit to you. If at any time during the MiQP treatment period you experience excessively high "fun" levels, you should consider terminating or reducing the level of treatment. In rare cases excessively high "Fun" levels have been known to last for days after the treatment. If these high levels should persist, see your family doctor.

The Michigan QSO Party ARDS treatment should only be taken as prescribed below.

Date /Time: Michigan QSO Party, sponsored by the Mad River Radio Club, from 1600Z April 15th until 0400Z April 16th. Stations may operate the full 12 hours. (12 noon to 12 midnight local Michigan time on April 15th)

Modes and Categories: Phone and CW on 80/40/20/15/10 meters. Single-op, multi-op, and mobile categories. Single-op entries are categorized by output power, QRP (5W or less), Low Power (100W or less), and High Power (greater than 100W)

Multipliers: Work stations once per band and mode. Work other states and Michigan Stations. MI to MI QSO's are allowed. Work portables and mobiles again as they change county, state or province.

Exchange: Exchange QSO number and location (county for MI stations, state/province or "DX" for others).

Scoring: One point per phone QSO, two points per CW QSO. Count multipliers once per mode. Multipliers are MI counties for all entries, plus states & provinces for MI entries only. Final score is total QSO points times total multipliers.

Freqs: Suggested frequencies: CW-3545, 7045, 14045, 21045, 28045; Phone-3850, 7225, 14250, 21300, 28450.

Log Submittal: Mail logs no later than 30 days after the contest to: Mad River Radio Club, c/o Dave Pruett, 2727 Harris Road, Ypsilanti, MI 48198 or via e-mail to <mailto:logs@...> logs@...

More Information: For complete rules, along with free logging software, log and summary sheets, see <http://www.miqp.org/> http://www.miqp.org

All kidding aside, the MiQP is a ton of fun. It has been growing in size every year. We expect this year to be even better! There will be stations on from all 83 counties. Consider making it a club event. This is a great way to get folks on the air. I also ask that you all help spread the word about the 2006 MiQP. Let's all make Michigan "Radio Active" on April 15th!!

73 Mark NU8Z

From: Andrew Young
Topic: 344 Message: 356

Should we attend the training for the county where we reside, or is that not a big deal? Muskegon is closer than Hudsonville for me.

Andrew

Andrew,
The program will probably be the same at either location. You are certainly welcome to attend the Muskegon training. However, there may be certain advantages to attending with the people that you will be working with on a Skywarn Net. As for Muskegon, we generally follow up the "Basic" Skywarn Training with a session we call "Advanced" Skywarn where, in addition to some more practice with understanding storm development, the purpose is to discuss the protocols that will be in place for the coming season. We deal with such questions as when to expect a Skywarn Net and what to do when watches or warnings are issued.
I hope this helps you to make a decision.
Tom Porritt
Muskegon County AEC Skywarn

Andrew and All
It is best to go to your Counties training you live in and spot in. You get a spotter card from the County you go to and Ottawa would be the county you would be spotting in most of the time. If you can not go on the Ottawa night it is OK to go to Muskegon, or like me I go to both. Tom

364. Boy Scout Radio Demonstration

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-02-28 07:11:16 UTC
From: Bill Fries
Topic: 361 Message: 364

All:

There will be an all day radio demonstration for Boy Scouts attending the two county wide Merit Badge Weekend event at Camp Gerber. The camp is on Owasippi Road about a mile east of Russell Road and up north near Big Blue Lake. The ARES MCV will be there with all its assets. Chuck, KC8MDL is heading the "charge" for this event. You can use the '94 repeater for a talk in, directions, and radio demonstration.

Everyone is welcome and all are invited to come out and help demonstrate radio. There will be a Big DX contest running on SSB and we hope to even have a few Scouts looking at radio.

The demonstration could start as early as 8:00 am and run through the afternoon until 5:00. We will use multiple hams so nobody will be "stuck" there for the entire time. Drop by and work the radio for an hour or ten!

No one has even hinted that they know the answer of the call sign of the first person to get a DXCC.

Speaking of hints, here are some. The tower and the bug in these pics were owned by him.

73,

Mark K8MHZ

Oh,

Don, here is another hint. The last name of the person that held the call
is the same as a company known among British automotive electricians as 'The
Prince of Darkness'

I remember seeing this notice in an ARRL Bulletin. I'm looking for this on my computer and at the ARRL site. I did find this interesting tidbit:

ARLB070: DXCC legend Bob White, W1CW, SK

SB QST @ ARL $ARLB070
ARLB070 DXCC legend Bob White, W1CW, SK

ZCZC AG70
QST de W1AW
ARRL Bulletin 70 ARLB070
>From ARRL Headquarters
Newington CT November 22, 2002
To all radio amateurs

SB QST ARL ARLB070
ARLB070 DXCC legend Bob White, W1CW, SK

Former ARRL Headquarters staff member Robert L. White, W1CW, of Seffner, Florida, died November 22 from complications arising from pneumonia. He was 83.

Known to many as ''Mr DXCC,'' White was the manager of the ARRL's DX Century Club program from 1952 until 1976, establishing the award--and its stringent standards--as Amateur Radio's premier DX achievement. White codified the rules for the DXCC program and oversaw the checking of some 250,000 QSL cards submitted yearly, often working as many as 90 hours a week to ensure that the job got done right. During his tenure at Headquarters, White also oversaw the ARRL QSL Service. He belonged to the ARRL for 62 years and was a Life Member.

''Dad was the guy who made DXCC what it was,'' said White's son, Jim, K4OJ, in a posting to the CQ Contest reflector. ''He didn't cut any corners--everyone was held to the same high standard--and this is what made holding DXCC meaningful.''

Introduced to Amateur Radio in his youth, White was first licensed in 1938. He served as a radio operator in the US Navy during World War II.

White was an avid DXer and CW enthusiast. Active in the First-Class CW Operators' Club, White was also inducted into the CQ DX Hall of Fame in 1998.

His wife Ellen, W1YL, and his son Jim, K4OJ, survive him; both are former ARRL staff members. Friends may send condolence messages via

e-mail to w1cw@... <mailto:w1cw@...> or to 6607
Flicker Ct, Seffner, FL
33584. The family invites memorial donations to the W1CW Memorial
Fund-Florida Contest Group, c/o Frederick M Perkins Jr, 3437 Lake
Josephine Dr, Lake Placid FL 33852. Per White's request, there will
be no public service.

Attachments: 1 described; binary payloads are missing from this source WARC

Found it:

Legendary DXer Charles Mellen, W1FH, SK

Charlie Mellen, W1FH, in his Boston ham shack . . . and his tower and Yagi, from a 1990 QST article, "W1FH--Role Model," by Ellen White, W1YL.
NEWINGTON, CT, Feb 2, 2006--DXing icon Charles Mellen, W1FH, of W Roxbury, Massachusetts, died January 21. He was 91. In 1947, the ARRL awarded Mellen with the first mixed-mode and phone DXCC certificates ever issued. Mellen's friend (and ARRL Rhode Island Section Manager) Bob Beaudet, W1YRC, says that if Mellen's declining health hadn't intervened in the early 1990s, he would have become the only DXer left to have worked and confirmed all 393 post-World War II DXCC entities.
"The great world of DX is a bit smaller today," said Beaudet, adding that Mellen was "one of the finest role models our DX fraternity has ever produced."
"Charlie personified the perfect model of what we hoped we could some day become as DXers," Beaudet continued. "A truly gentle person, always courteous and decent, he was a modest man who never sought the slightest personal recognition or acclaim. His joy in life beyond working a new entity seemed to be in helping others learn the skills he long before had mastered."
Licensed in 1930, Mellen was inducted into the CQ DX Hall of Fame in 1994. In addition to being an ARRL member, he also belonged to the First Class CW Operators Club (FOC).
Beaudet notes that Mellen was able to achieve his status as a world-class DXer despite having a "relatively modest setup" compared to others in the same league, such as Don Wallace, W6AM (SK), whose West Coast station boasted an unparalleled antenna farm and a shack full of equipment. Bruce Marshall, K1AJ, says that during the 1940s, 50s and 60s, Mellen was one of the best-known DXers in the US. "He and W6AM were constantly battling for the top of the Honor Roll list," he said.
Beaudet says Mellen was always able to snag the DX with his 75-foot self-supporting tower and 3-element Yagi, but according to those who knew him, Mellen's secret was something he never bragged about but taught by example: Operator skill, and especially knowing how to listen carefully.
"Charlie has been referred to as Elmer's role model," Beaudet said. "He certainly was my mentor and the person to whom I credit any DXing skill I possess."
Survivors include Mellen's wife, Mary, and a daughter. A service was held January24 in Boston. The family has invited memorial contributions to the Greek Orthodox Cathedral of New England, 514 Parker St, Boston, MA 02120, or to the MSPCA Development Office, 350 S Huntington Ave, Boston, MA 02130.--some information from The Daily DX <http://www.dailydx.com/> and

the Boston Globe

Nice try, no joy.

In fact, this guy didn't even have a license when the first DXCC was awarded.

Of the two calls, the first is the one that is unassigned. I can't believe that some DXCC buff has not grabbed the first call of the first person to get a DXCC award.

Keep trying!

73,

mhz

And, if you were asking of the first cw DXCC?:

A CW DXCC award was added in January 1975. A mere 6 months later Jesse Bieberman, W3KT, claimed CW DXCC #1.

But I still cannot find what call signs W1FH had. It is not listed on qrz.com

For those of you that don't know, DXCC stands for Distant Exchange Century Club. A person that belongs to the DXCC has proven that he or she has made contacts to 100 or more countries via amateur radio. The contacts must be verified. Until recently the only form of verification has been hard QSL cards. Now the Logbook of the World (LoTW) can be used as well.

If you think of how formidable DXCC is now, consider this. When the first DXCC was awarded, there was no phone (SSB) mode. CW was how it was done. This was a time before the V-8. Telephones were younger than most of it's users. I don't think commercially made ham rigs were even available. Home brew or nothing.

Anyone that has a DXCC knows how much work, luck, time and skill it takes with Internet charts, Yagis on towers, computer logging, contests, etc. One has to appreciate the fact that only a few weeks after the ARRL announced the availability of the DXCC a handful of amateurs had qualified with none of the aforementioned ammenities.

What amazes me is that with all the power of the Internet and it's archives, the call of DXCC #1 evades us.

I, for one, think that the call and it's holder should common knowledge for us hams.

So, give up on the Internet. Hit the BOOKS!

I didn't think this would be so hard.

73,

K8MHZ

379. Tulip Festival 2006

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-01 02:32:54 UTC
From: Steve Vander Hill
Topic: 379 Message: 379

Hello, it might not feel like Spring Time is just around the corner but it will be here very soon, with Spring's arrival comes the 2006 Tulip Time Festival. As in the past the Amateur Radio Operators and the American Red Cross will be providing support along the parade routes during the three Tulip Time parades.

The first parade is scheduled for Wednesday, May 10, which we will need twelve Amateur Radio Operators to work as a Team with two American Red Cross First Aid Responders in covering a one block section of the parade route. Along with two Net Control Operators, we will need a total of fourteen Amateur Radio Operators, during the time frame of approximately noon until 3:30pm.

The second parade is scheduled for Thursday, May 11, which we will need the same number of Amateur Radio Operators as the Wednesday parade, during the same approximate time frame. The rain date for this parade will be Friday, May 12, 2006.

The third, the largest, and the longest parade is schedule for Saturday, May 13, which we will need
twenty-four Amateur Radio Operators to cover a one-block section of the expanded parade route, along with two-three Net Control Operators. Also during this parade we need packet radio stations setup and operating at the Civic Center, Holland High School, and at Net Control.

Also for the Saturday parade, Amateur Radio Operators are needed to assist with parade lineup. This group will be working within their own net, and on a different frequency than the parade route Teams. We need approximately ten operators, six assigned to specific Division Parade Marshals, one to work with the floats, one to assist the TV Crew with their coverage, one to work with the cars, one to work directly with the Grand Marshal, and two Net Control Operators. Adding up the various activities on Saturday, we need approximately forty Amateur Radio Operators just to cover what we currently know needs to be covered.

As one can see, this is large operation in which one Club or Group can not handle on their own. Please we need your help in getting the word out to all area Amateur Radio Operators of this need. Many have done this festival for years and have their favorite spots to serve. If you are willing to serve, and have a favorite spot, please let me know I will to my best to assign you to that specific position. For those that are new to the hobby or those that have sat on the sidelines in the past years, please consider giving it a try. It is fun, and is a great way to brush up on your net operating procedures while providing a highly visible community service.

If your interested in volunteering, please provide me with you full name, call sign, physical limitations or special needs, contact phone number, email address, and any special assignments you would like to cover.

Thank you in advance!

Best regards,

Steve Vander Hill - N8UJD

Geez.

I sure thought someone would have come up with the answer by now.

Here is another hint. The call of the second person to get a DXCC was W1BUX.

I'm sure glad I didn't ask a hard question, like 'what was the first message sent from Taiwan via packet' or something like that.

Good luck

mhz

As I said, I am stumped and sent a message to HQ. I got a prompt reply which is duplicated here:

Hi Bill:

Thanks for your e-mail and I have given this a lot of thought over the past few years. I started compiling data from old QST's on the pre-war program and, while I have not finished, I have compiled a folder with a lot of both pre-war and post war data. And, you are correct, it is fascinating reading.

Thanks for the "push" and while I have some projects that are of a priority nature I hope some day soon to give you what you want!

Subject: First DXCC?

Sir:

There is Tons of information on the DXCC(r) award on the internet. Most of
it revolves around the "new" award begun after the Second World War.

However, is there any interest in the ancient history of the award? For example who received the very first award? What was it called? How many
awards were presented before amateur radio went silent for the Second World
War? Is there a list of these folks? There seems to be a list of entities
before and of course after the War.

I have found DeSoto's initial thoughts on the subject and they make fascinating reading. But finding information on this award on the internet
has not been a search with much success.

Am I in the minority looking for this history? Could you post a page on this subject and link it to the current award's page?

I thank you for your time to address the above questions.

That's because it was lost to history....until I found it!

So, keep digging, my friend. The name of (blank) and his call...(now what was his call again?) shall not be forgotten!

Pitiful.....I'll bet The Old Man is rolling in his grave now that we have forgot the name of the one of the greatest DXers of all time.

Think! Think! Who was this operator? He deserves more than this, check this out:

D.X.C.C. Certificate #l (Pre-war). The first great American DXer. (??Blank??) was also possessed of one of the greatest ears of all time-he was reportedly able to identify almost every DX call on the air during the late 30's by the fist, the impact of propagation on the signal, and other individual characteristics.

73,

K8MHZ

Nice Job!!!

Now, do you know what his SECOND call was and who holds it now?

I promised the gentleman that resides over that call to make favorable mention of same.

Ready for round 2?

Way to go Bill!

Doing a google search for "pre war dxcc" netted the answer:

--Frank Lucas, W8CRA. DXCC Certificate #1(Pre-war). The first great American DXer. Lucas was also possessed of one of the greatest ears of all time-he was reportedly able to identify almost every DX call on the air during the late 30's by the fist, the impact of propagation on the signal, and other individual characteristics.

It came from a site with lots of great reading:

From: Bill Fries
Topic: 393 Message: 397

All:

At this evening's club meeting we will be packaging a few QSL cards together for Peter I Island. They will all go to the QSL manager in New Jersey and all will be returned to AB8RD's QTH from the callbook.

Do you want to drop a card in there? The outgoing envelope will also have enough room for a greenstamp to help the QSL manager offset his expense.

Under separate cover we will gather donations for the actual Dxpedition. These donations will be sent directly to K4UEE together with a thank you card. I'm planning to drop $40 into this envelope. You might want to also donate?

Bill, AB8SC

Yes, there are other options. I bet if I buy $40 in merchandise they don?t get $40 in donations. And if I use Paypal they don't get $40 either. So I'll just send cash.

My personal opinion.

Bill, AB8SC

Attachments: 1 described; binary payloads are missing from this source WARC

Hi all, its time to start looking for radio operators to work the 2006 River Bank Run. We will be in need of approximately 60 radio operators for the main event!

Please check out the PDF file for all the pertinent details. Email me direct for any questions, to volunteer please goto the information below

Prepare for this exciting event by volunteering at smaller events prior to the River Bank Run.

We will hold a Pre-Event meeting on Friday May 11th at the American Red Cross West Central Michigan Chapter at 1050 Fuller Ave.

If you have a preference on a partner or must leave early from the event please specify in your email. Some positions close as early as 9:30 AM the day of the event.

To sign up please email rbr06@... and keep an eye on www.kcraces.net for more information!

As you all know, Bill AB8SC came through with the call we all sought. That call is W8CRA.

Later, Frank Lucas changed his call to W3CRA. W3CRA is now the call of the Collins Radio Association.

Got a Collins? Even if you don't and just like them, please take some time to visit www.collinsra.com. Collins owners may want to consider joining the Association.

From: Deater, Tim
Topic: 403 Message: 403

The new scanner law has been signed by the governor.

http://www.legislature.mi.gov/(5jndjy552wq451ftc5l20x45)/mileg.aspx?page
=BillStatus&objectname=2005-HB-4544

I can not tell when it goes into effect. It says both immediate effect
and takes effect 90 days after it is enacted on the same page. It is
predicted to be enacted on 3/7/06.

http://www.legislature.mi.gov/documents/2005-2006/billenrolled/House/pdf
/2005-HNB-4544.pdf

Thanks!

>
```

> When another disaster on the scale of Hurricane Katrina comes along, the
> League will be able to deploy "ham gear ready to go," thanks to
> manufacturers' donations of Amateur Radio gear, ARRL members' generous
> monetary contributions and a federal grant. The ARRL Ham Aid-sponsored "Go
> Kits" now being assembled at League Headquarters are the third leg of a
> program that's already reimbursed certain out-of-pocket expenses for ham
> radio hurricane zone volunteers and helped restore Amateur Radio backbone
> infrastructure along the US Gulf Coast.
>
> "To me, this is a first step in ramping up ARRL's ability to support
> Amateur
> Radio volunteers in the field before the next big disaster hits," says
> ARRL
> Chief Development Officer Mary Hobart, K1MMH. "It won't replace or
> supplant
> anything that's already on the ground and working well, but it will
> strengthen it and add flexibility to Amateur Radio's overall response
> capabilities." The equipment and cash donations, coupled with a grant from
> the Corporation for National and Community Service (CNCS), will mean
> Amateur
> Radio Emergency Service (ARES) field volunteers will never go without in
> terms of equipment. Hobart says $25,000 in Ham Aid funds have been set
> aside
> for the Go Kits.
>
> The Go Kits will enable the League to loan out needed equipment on a
> moment's notice. Emergency Communications Specialist Harry Abery, AB1ER,
> spends his days at ARRL Headquarters securely stowing various equipment
> complements in rugged, waterproof Pelican 1650 containers.
>
> "The idea is that this makes it easy to ship," explains Abery, "and since
> they're less than 50 pounds apiece, they'll be able to go by air if
> necessary." Flooding won't be an issue. "You can throw them in the water,
> and they'll float," he adds.
>
> So far, Abery says, there's an HF Kit, a VHF/UHF Kit, a Handheld
> Transceiver
> Kit and a Support Kit--seven of each, and more on the way. He and other
> League staffers consulted with volunteers who'd been in the field during
> Hurricane Katrina to find out what gear served them best or what they
> wished
> they'd had but didn't.
>
> The HF Kit contains a 100-W HF transceiver, a microphone and a power
> supply.
> The VHF/UHF Kit includes a dualband mobile transceiver, power supply,
> headset, 10 handheld transceivers and a supply of alkaline batteries. In
> the
> Handheld Transceiver Kit are eight dualband handheld transceivers and
> antennas plus a stock of extra batteries. The Support Kit includes a

> length
> of BuryFlex 213 coaxial cable, rope, 15-foot jumper cables with battery
> clamps at one end and an Anderson Powerpole on the other. The kit includes
> various fittings and adapters to connect to the power distribution unit
> and
> to make RF feed line connections. All kits contain any necessary manuals.
> Packed in a separate container, appropriate antennas and antenna
> accessories
> will accompany a given kit.
>
> More than two dozen members of the Amateur Radio industry and individual
> radio amateurs contributed equipment last year for use in the Hurricane
> Katrina relief effort <http://www.arrl.org/news/stories/2005/09/09/105/>.
>
> Citing Amateur Radio's favorable treatment in recent US House Subcommittee
> and White House reports on the Hurricane Katrina response (see below),
> Hobart said it's imperative to sustain and enhance ham radio's emergency
> communication capabilities for the future. "Disasters happen to be one
> place
> Amateur Radio can shine," she pointed out. "We need to maintain a high
> level
> of readiness to do those things that are second nature to ARES members but
> that the public is just coming to recognize."
>
> Making the Go Kits available to ARES teams, Hobart says, will help to
> cement
> Amateur Radio's position as a community resource. "We want to be able to
> ensure that we have the personnel and the equipment," she said. "With a
> disaster of this magnitude we need to be ready."
>
> ARRL continues to solicit Ham Aid donations to help maintain and sustain
> the
> League's ability to support Amateur Radio volunteers in the field. League
> members can contribute to Ham Aid via the secure ARRL Development Office
> donation Web site
> <https://www.arrl.org/forms/development/donations/basic/>.
> Simply click "Ham Aid" and complete the on-line form.
>
> ==>AMATEUR RADIO GETS FAVORABLE MENTIONS IN FEDERAL KATRINA REPORTS
>
> Ham radio received positive mentions in post-Katrina reports from the US
> House of Representatives and the White House. References to the Amateur
> Radio Emergency Service (ARES), the Military Affiliate Radio System (MARS)
> and the HF digital e-mail system Winlink 2000 appear in "A Failure of
> Initiative"--the final report of the Select Bipartisan Committee to
> investigate the preparation for and response to Hurricane Katrina (see
> <http://www.arrl.org/news/stories/2006/02/17/2/>).
>
> "Like all levels of government," noted the 364-page report released
> February

> 15, "the National Communication System (NCS) "was not able to address all
> aspects of the damage to the communications infrastructure of the Gulf
> States."
>
> MARS was cited for its role as part of the Shared Resources High Frequency
> Radio Program (SHARES), a federal emergency communication system. The
> report
> says that "within days" of Katrina's landfall, NCS called upon more than
> 430
> SHARES stations across the US to, among other things, assist first
> responders conducting search-and-rescue missions by relaying information
> to
> government agencies, by relaying logistical and operational information
> among FEMA EOCs in Georgia, Mississippi and Louisiana, and by handling
> health-and-welfare messages between volunteer agencies in Georgia and the
> American Red Cross national headquarters.
>
> "Additionally, the NCS coordinated the frequencies used by the nearly 1000
> Amateur Radio Emergency Service (ARES) volunteers across the nation who
> served in the Katrina stricken area providing communications for
> government
> agencies, the Red Cross and The Salvation Army," the report continued.
> "Emergency communications were conducted not only by voice, but also by
> high-speed data transmissions using state-of-the art digital
> communications
> software known as Winlink."
>
> The report further noted, "In Mississippi, FEMA dispatched Amateur Radio
> operators to hospitals, evacuation centers, and county EOCs to send
> emergency messaging 24 hours per day. Cited were comments by Bay St Louis
> Mayor Eddie Favre that Amateur Radio volunteers "were especially helpful
> in
> maintaining situational awareness and relaying Red Cross messages to and
> from the Hancock County EOC."
>
> According to the report, radio amateurs at airports in Texas and Louisiana
> "tracked evacuees and notified families of their whereabouts," while the
> Red
> Cross "deployed Amateur Radio volunteers at its 250 shelters and feeding
> stations, principally in Mississippi, Alabama and Florida."
>
> The Salvation Army, the report pointed out, operates its own system of
> Amateur Radio volunteers known as SATERN (Salvation Army Team Emergency
> Radio Network). "During the Hurricane Katrina response and recovery
> effort,
> SATERN joined forces with the SHARES program and received over 48,000
> requests for emergency communications assistance utilizing federal
> frequencies made available via the SHARES program," the report noted.
>
> "A Failure of Initiative" asserted that the loss of power and the failure

> at
> various levels of government "to adequately prepare for the ensuing and
> inevitable loss of communications" hindered the hurricane response "by
> compromising situational awareness and command and control operations."
>
> "Despite the devastation left by Katrina, this needn't have been the
> case,"
> the report stressed. "Catastrophic disasters may have some unpredictable
> consequences, but losing power and the dependent communications systems
> after a hurricane should not be one of them."
>
> The White House report, "The Federal Response to Hurricane Katrina:
> Lessons
> Learned" <http://www.whitehouse.gov/reports/katrina-lessons-learned.pdf>
> released February 22 also cast Amateur Radio in a favorable light--in its
> Appendix B, "What Went Right."
>
> "Amateur Radio Operators from both the Amateur Radio Emergency Service and
> the American Radio Relay League monitored distress calls and rerouted
> emergency requests for assistance throughout the US until messages were
> received by emergency response personnel," the report said. "A distress
> call
> made from a cell phone on a rooftop in New Orleans to Baton Rouge was
> relayed, via ham radio, from Louisiana to Oregon, then Utah, and finally
> back to emergency personnel in Louisiana, who rescued the 15 stranded
> victims."
>
> The report also points out that Amateur Radio volunteers were on duty at
> the
> National Hurricane Center, the Hurricane Watch Net, Waterway Net, SKYWARN
> and the Salvation Army Team Emergency Radio Network (SATERN).
>
> The report's Appendix B cites specific reports in the general news media
> about Amateur Radio activities following Hurricane Katrina and points to
> several news stories that appeared on the ARRL Web site.
>
> ==>SPACE QSOs A HIT IN DC, JAPAN
>
> Sixteen youngsters attending the Discover Engineering Family Day event
> February 18 in Washington, DC, had the rare opportunity of talking to
> International Space Station Commander Bill McArthur, KC5ACR, via ham
> radio.
> Operating from the space station's NA1SS a few days later, McArthur also
> answered a series of questions from pupils at Itaki Elementary School in
> Japan. The Amateur Radio on the International Space Station (ARISS)
> program
> arranged both events. During the Engineering Day contact, one participant
> wanted to know if the Expedition 12 crew had "learned anything really
> cool"
> during its science experiments.

>
> "One of the biggest experiments is just the crew members on board, just
> the
> human beings on board, so we learn how our bodies change in space,"
> McArthur
> said, noting that ISS research centers on finding out what's needed for a
> journey to Mars. On other fronts, he's growing crystals in space, while
> crewmate Valeri Tokarev is growing seeds.
>
> As for the really cool stuff: "I think the coolest thing I've learned is
> that living in space is a very pleasant, very nice thing to do," McArthur
> added.
>
> For the Discover Engineering Family Day contact, Verizon donated a two-way
> teleconferencing link between the Sacred Hearts Academy WH6PN Earth
> station
> operated by Dick Flagg, AH6NM, in Honolulu, and the National Building
> Museum
> in Washington. Children and questions for the contact were solicited via
> the
> museum's Web site.
>
> McArthur told the Engineering Day participants that it's possible to get
> headaches in space, especially when the carbon dioxide level gets too
> high.
> Crew members sometimes sneeze, too, he said, and the result in
> microgravity
> can illustrate Newton's Third Law.
>
> "I think a good sneeze really feels good, and it feels really good in
> space!" McArthur enthused. "Of course, if you're not holding yourself
> securely when you sneeze, y'know, just that kind of violent motion can
> send
> you spinning off in a strange direction."
>
> The contact got some publicity in the Washington Post and on local TV
> stations. Some 7000 people turned out for Discover Engineering Family Day,
> and an AMSAT team supported an ARISS booth during the event.
>
> On February 20, youngsters at the Itaki Elementary School Fathers' Club
> took
> part in a direct VHF contact between NA1SS and 8J4I in Japan. McArthur
> told
> them that he became an astronaut because he's an aerospace engineer and a
> pilot, "and being an astronaut seemed to be the most interesting way of
> doing both things." He said his current stint as commander of ISS
> Expedition
> 12 marked his fourth--and by far his longest--trip into space.
>
> "To me, space represents the ultimate challenge for mankind, to show that

> we
> can grow and eventually leave our home planet," McArthur told another
> young
> questioner.
>
> Asked which star was the most beautiful, McArthur replied, "our sun." But,
> he went on to say, he thinks all the stars in the sky are beautiful. "They
> are no bigger for us than they are for you," he explained, "but we do not
> have clouds or dust in the air to look through, so they are very clear."
>
> At the 8J4I controls was Kei Fujimura, JJ4RJE. In all, 13 students
> participated in the event, and McArthur answered 19 of their questions
> before the ISS went over the horizon and signal was lost. The event
> attracted media coverage from TV and newspapers. An audience of about 100
> people was on hand for the occasion.
>
> McArthur has completed 29 ARISS school contacts during his five months in
> space--far more than any previous ISS crew member. ARISS
> <http://www.rac.ca/ariss> is an international educational outreach, with
> US
> participation by ARRL, AMSAT and NASA.
>
> ==>PRESIDENT HARRISON NAMES ARRL NATIONAL EMERGENCY RESPONSE PLANNING
> COMMITTEE
>
> ARRL President Joel Harrison, W5ZN, has appointed 13 individuals to serve
> on
> the ARRL National Emergency Response Planning Committee. The League's
> Board
> of Directors resolved to establish the panel during its annual meeting in
> January "to appropriately prepare for future large-scale disasters." The
> committee will develop a comprehensive recommendation for ARRL responses
> to
> regional, national and international disasters.
>
> "This group reflects a nationwide assembly of individuals with direct
> field
> experience in all aspects of emergency communications at various levels
> with
> disasters such as hurricanes, earthquakes, wildfires, floods and terrorist
> activity to name a few," Harrison said. "There were many excellent
> recommendations for this committee, which is quite encouraging in itself
> and
> speaks highly of Amateur Radio's productive involvement in emergency
> communications."
>
> ARRL First Vice President Kay Craigie, N3KN, will chair the ad hoc
> committee. Appointed to serve on the committee were:
>
> Delta Division Director Henry Leggette, WD4Q, (Programs and Services

> Committee liaison); Pacific Division Vice Director Andy Oppel, N6AJO;
> Atlantic Division Vice Director Tom Abernethy, W3TOM; Alabama Section
> Manager Greg Sarratt, W4OZK; Western Washington Section Manager Ed
> Bruette,
> N7NVP; South Texas Section Emergency Coordinator Jerry Reimer, KK5CA;
> Southern Florida Section Emergency Coordinator Jeff Beals, WA4AW; NYC-Long
> Island Section Emergency Coordinator Tom Carrubba, KA2D; Mississippi
> Section
> District Emergency Coordinator Karl Bullock, WA5TMC; Colorado Net
> Manager/State Government Liaison Gene McGahey, AL7GQ; IARU Region II
> Emergency Coordinator Rick Palm, K1CE, (IARU liaison) and ARRL Field and
> Educational Services Manager Dave Patton, NN1N (ARRL staff liaison).
>
> Harrison said the committee will begin its work immediately under
> Craigie's
> direction. Among other things, the National Emergency Response Planning
> Committee will thoroughly evaluate the responses and actions of ARRL and
> the
> Amateur Radio Emergency Service (ARES) during Hurricane Katrina as well as
> lessons learned.
>
> The Board's resolution establishing the committee noted that the emergency
> communications resources and organization needed for national and
> international disasters "are markedly different" from what's required at
> the
> regional and local levels. Given the unprecedented scope and devastation
> of
> the 2005 hurricane season in general and of Hurricane Katrina in
> particular,
> ARRL Headquarters was placed into a leadership coordination role through
> national-level requests for help from served agencies such as the American
> Red Cross.
>
> The ARRL Board will consider the committee's recommendations at its 2007
> annual meeting next January.
>
> ==>"HELLO" CAMPAIGN TO PUT FRIENDLY, INVITING FACE ON AMATEUR RADIO
>
> A new ARRL public relations campaign set to launch this April will cast
> Amateur Radio in the light of the 21st century and focus on its universal
> appeal, even in today's already technology-rich society. At the same time,
> the "Hello" campaign will note the 100th anniversary of what many
> historians
> consider the first voice radio broadcast in 1906 by Reginald Fessenden.
>
> "It is quite simply the largest PR campaign that ham radio has ever
> attempted," says ARRL Media and Public Relations Manager Allen Pitts,
> W1AGP.
> Built around the word "Hello," the coordinated campaign will set "a
> positive, upbeat tone that highlights the international capabilities of

> Amateur Radio," he explained.
>
> One aim of the "Hello" campaign will be to reframe Amateur Radio within a
> contemporary context. "ARRL President Joel Harrison, W5ZN, was correct in
> stating that the Main Street of today is not the same as the Main Street
> of
> yesteryear," Pitts went on to say. "To reach out today, the very first
> requirement is that Amateur Radio operators be perceived as friendly and
> trustworthy. That's a true public relations goal and the prime focus of
> the
> campaign."
>
> Pitts says it's not helpful to lament the time in decades past when
> Amateur
> Radio grew pretty much on its own, without too much effort on the part of
> clubs and individuals. "Only our combined, effective action will do that
> today," Pitts says. "This campaign will give hams the tools they need to
> reach out in their communities to non-hams and influence their perception
> of
> Amateur Radio."
>
> The national "Hello" campaign can bring curious people into contact with
> ham
> radio groups, but it will be up to local radio amateurs to make them truly
> welcome, Pitts maintains.
>
> The "Hello" campaign is designed to gain momentum as the year progresses.
> Components will include the release of public service announcements for
> use
> by radio and TV broadcasters and a video for meetings, presentations and
> even broadcast. Other highlights will include a "Hello" campaign Web site
> and special operating events. The high point of the "Hello" campaign will
> come in December on the centennial of Fessenden's first radio broadcast.
>
> History recalls that the Canadian-born and educated Fessenden, using an
> early alternator, transmitted the first audio radio broadcast from his
> laboratory in Brant Rock, Massachusetts. Radio operators aboard ships at
> sea--tipped off in advance to be listening for something special--were
> astounded to hear Fessenden's broadcast that included the scientist and
> inventor playing "O Holy Night" on the violin and reading a Bible passage.
>
> The campaign will show that despite the Internet and other technologies,
> the
> possibility of being able to talk with everyday people around the world
> and
> sometimes in exotic locales--coupled with the surprise, art and
> uncertainty
> of DXing--remains a major attraction for Amateur Radio. The "Hello"
> campaign
> also will take advantage of likely FCC action this year to drop the Morse

> code requirement at least for General class applicants.
>
> "We all say we want to make a change for the better for Amateur Radio and
> get others interested," Pitts said. "This is the time, this is the chance.
> Stay tuned! More to come!"
>
> ==>INJURED MINER RANDY MCCLOY, KC8VKZ, TALKING, JOKING
>
> Randy McCloy, KC8VKZ--the lone survivor of the January 2 Sago Mine
> disaster
> in Upshur County, West Virginia--is continuing to recover. Speaking on The
> Early Show on CBS TV March 2, McCloy's wife Anna told co-anchor Hannah
> Storm
> that her husband is talking again and even telling jokes.
>
> "He'll listen to jokes and understand," Anna McCloy told Storm. "He'll
> talk
> to me and the kids--just regular conversation."
>
> She also said McCloy has told her he remembers "bits and pieces" of the
> mining disaster that left 12 of his co-workers dead of carbon monoxide
> poisoning. McCloy, 26, who's been in a rehabilitation facility since
> January
> 26, also answers questions appropriately, recognizes his family and can
> "move quite well," Anna McCloy said. She has remained at her husband's
> side
> since his rescue.
>
> McCloy eats with assistance and has expressed distaste for institutional
> cuisine, instead preferring the restaurant and fast food fare his wife
> supplies.
>
> Anna McCloy says she's "not quite sure" if her husband realizes he was the
> only survivor of the mine mishap. "I don't question him about it. When he
> wants to talk about it, I listen to him, but I don't push him, and I don't
> question him," she said.
>
> One of Randal McCloy's physicians, Dr Julian Bailes, told Storm that
> McCloy
> has "improved beyond our expectations" during rehabilitation. "I think we
> see his old personality coming back."
>
> Well-wishers have been sending cards and QSLs to McCloy at PO Box 223,
> Philippi, WV 26435. A fund has been set up to accept donations for
> McCloy's
> benefit: The Randal McCloy Jr Fund, c/o Clear Mountain Bank, 1889 Earl
> Core
> Rd, Morgantown, WV 26505.
>
> ==>SOLAR UPDATE

>
> Solar sage Tad "Fall Out Boy" Cook, K7RA, Seattle, Washington, reports:
> Low
> activity continues with another string of zero-sunspot days. Average daily
> sunspot numbers for this week were down by 4 points from the prior week to
> 3.1. Average solar flux declined by 1 point to 76.4.
>
> Average sunspot numbers plummeted in February--far below any other month
> in
> the second half of Cycle 23.
>
> This weekend is the ARRL INTERNATIONAL DX CONTEST (SSB)
> <http://www.arrl.org/contests/rules/2006/intldx.html>. Although solar
> activity is low, geomagnetic conditions should remain quiet, which is
> good.
> Sunday, March 5, could see some unsettled activity. The predicted
> planetary
> A index for March 3-7 is 8, 5, 12, 5 and 5. Sunspot and solar flux levels
> should remain very low.
>
> Sunspot numbers for February 23 through March 1 were 0, 0, 0, 0, 11, 11
> and
> 0, with a mean of 3.1. 10.7 cm flux was 75.1, 76, 76, 76.5, 77, 77.1, and
> 77, with a mean of 76.4. Estimated planetary A indices were 3, 6, 1, 5, 3,
> 5
> and 7, with a mean of 4.3. Estimated mid-latitude A indices were 4, 4, 1,
> 3,
> 2, 2 and 5, with a mean of 3.
>
> ----------
>
> ==>IN BRIEF:
>
> * This weekend on the radio: THE ARRL INTERNATIONAL DX CONTEST (SSB), the
> Wake-Up! QRP Sprint, the Open Ukraine RTTY Championship, the DARC 10-Meter
> Digital Contest are the weekend of March 4-5. The ARS Spartan Sprint and
> the
> AGCW YL-CW Party are March 7. JUST AHEAD: The North American Sprint
> (RTTY),
> the RSGB Commonwealth Contest, the Idaho, Oklahoma and Wisconsin QSO
> parties, the AGCW QRP Contest, the UBA Spring Contest (CW) and the NSARA
> Contest are the weekend of March 11-12. See the ARRL Contest Branch page
> <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar
> <http://www.hornucopia.com/contestcal/index.html> for more info. JUST
> AHEAD:
> See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the

> for more info.
>
> * ARRL Certification and Continuing Education course registration:

> Registration remains open through Sunday, March 19, for these ARRL
> Certification and Continuing Education (CCE). Program on-line courses:
> Amateur Radio Emergency Communication Level 1 (EC-001), Radio Frequency
> Interference (EC-006), Antenna Design and Construction (EC-009),
> Technician
> Licensing (EC-010), Analog Electronics (EC-012) and Digital Electronics
> (EC-013). Classes begin Friday, April 7. To learn more, visit the CCE
> Course
> Listing page <http://www.arrl.org/cce/courses.html> or contact the CCE
> Department <cce@...>.
>
> * Hams help following mud slide: The RSGB reports that radio amateurs
> helped
> coordinate rescue operations after a devastating mud slide on the
> Philippine
> island of Leyte buried an entire village February 17. More than 1800
> people
> are believed to have died when the village of Guinsaugon was engulfed by
> mud
> following a week of torrential rain and a small earthquake. The
> International Radio Emergency Support Coalition (IRESC)
> <http://www.iresc.org/> supported the relief effort by providing
> communication links between the disaster scene and the International Red
> Cross. The IRESC specializes in connecting traditional ham radio
> systems--HF
> transceivers and VHF/UHF repeaters--with Voice over Internet Protocol
> (VoIP)
> technology via EchoLink. The EchoLink net set up for the Leyte disaster
> reportedly went on the air within hours of the mudslide, and Philippine
> amateurs used it to pass lists of missing people and survivors. Other
> messages included requests for food, water, mats, clothing, stretchers,
> medical kits and digging tools.
>
> * W1AW 160-meter frequency change put on hold: QRX on that W1AW QSY! W1AW
> has rescinded plans to change its 160-meter CW frequency and will remain
> on
> 1817.5 kHz for the time being. An announced change to 1807.5 kHz was aimed
> at reducing the possibility of interfering with DX stations that have
> begun
> showing up in the vicinity of 1817.5 kHz. "Lately we have received more
> complaints about W1AW interfering with weak DX signals," said ARRL CEO and
> W1AW Trustee David Sumner, K1ZZ. "After what we thought was due diligence
> we
> decided that it made sense to shift below 1810 kHz, since that is the
> lower
> band edge in Region 1 and would pretty much eliminate the conflict with
> DXers." Monitoring showed that 1807.5 appeared to be generally clear.
> "Unfortunately," Sumner continued, "we failed to pick up the fact that
> PSK31
> operators appear to have adopted 1807 kHz as their 160-meter frequency,

> and
> we don't want to conflict with any established activity centers." Under a
> tight deadline to announce the W1AW operating schedule 30 days in advance,
> the League has called off the frequency shift for now. The question will
> be
> revisited over the summer.
>
> * David A. Rosenthal, N6TST, wins February QST Cover Plaque Award: The
> winner of the QST Cover Plaque Award for February is David A. Rosenthal,
> N6TST, for his article "Polar Bear Portable." Congratulations, David! The
> winner of the QST Cover Plaque award--given to the author or authors of
> the
> best article in each issue--is determined by a vote of ARRL members on the

> <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your
> favorite article in the March issue by Friday, March 31.
>
> * Dayton 2006 Contest Dinner tickets now available: The North Coast
> Contesters have announced that tickets now are on sale for the 14th annual
> Dayton Contest Dinner. DX Engineering is sponsoring the tickets. The
> dinner
> will take place Saturday, May 20, 6:30 PM, in the Van Cleve Ballroom of
> the
> Crowne Plaza Hotel, Fifth and Jefferson streets, next to the Convention
> Center in downtown Dayton. John Dorr, K1AR, will emcee the event, which
> will
> feature the 2006 CQ Contest Hall of Fame inductions. Tickets are $34. To
> obtain Contest Dinner tickets, contact Craig Clark, K1QX
> <jcclark@...>, Radioware and Radio Bookstore, PO Box 209, Rindge,
> NH 03461; call weekdays, 10 AM until 6 PM Eastern, 800-457-7373;
> 603-899-6957; fax (24/7) 603-899-6826. Credit card orders are welcome.
> Include name and call sign. Tickets will be mailed no later than May 10.
> No
> tickets will be available at the door.--Tim Duffy, K3LR
>
> * Tim Chen, BV2A, SK: Taiwan's first radio amateur, Tim Chen, BV2A,
> founder
> and first president of the Chinese Taipei Amateur Radio League (CTARL),
> died
> February 22. He was 92. ARRL President Joel Harrison, W5ZN, said Chen's
> passing was sad news. "Tim was always kind, friendly and willing to allow
> you to operate BV," said Harrison, who became acquainted with Chen when
> traveling frequently to Taiwan in the late 1980s and early 1990s. "I'll
> never forget our first meeting on a dark, rainy night in Taipei. Tim
> didn't
> know who I was, other than a fellow radio amateur, but he came out to meet
> me at the BV2B station." ARRL Field and Educational Services Manager Dave
> Patton, NN1N, said Chen--for years the only radio amateur on the air from
> Taiwan--was more famous than he knew. "He was the first BV QSO for most
> DXers who got their start between 1970 and about 1990 and was a guy you

> could count on to call in during contests--BV2A on CW and BV2B on phone,"
> he
> observed. A memorial service was held February 28 in Taipei. Chen was a
> long-time ARRL member. E-mail condolence messages to Chen's family via
> CTARL
> <bv2a@...>.
>
> * DXCC Desk approves operations for DXCC credit: The ARRL DXCC Desk has
> approved these operations for DXCC credit: TS3A, Tunisia, March 24-28,
> 2005;
> T6X, Afghanistan, current operation effective March 8, 2005; TT8PK, Chad,
> December 27, 2005 through February 11, 2006; XW1A, XW1LLR5, XW1X and XW1M,
> Laos, current operation effective October 29, 2005; D2DX, Angola, current
> operation effective December 15, 2004 (a previous announcement accredited

>
> STATE OF MICHIGAN
> 93RD LEGISLATURE
> REGULAR SESSION OF 2006
> Introduced by Reps. Elsenheimer, Jones, Newell, Nofs, David Law and
> Sheltrown
> ENROLLED HOUSE BILL No. 4544
> AN ACT to amend 1931 PA 328, entitled "An act to revise, consolidate,
> codify, and add to the statutes relating to crimes; to define crimes
> and prescribe the penalties and remedies; to provide for restitution
> under certain circumstances; to provide for the competency of evidence
> at the trial of persons accused of crime; to provide immunity from
> prosecution for certain witnesses appearing at such trials; and to
> repeal certain acts and parts of acts inconsistent with or contravening
> any of the provisions of this act," by amending section 508 (MCL
> 750.508), as amended by 2002 PA672.
> The People of the State of Michigan enact:
> Sec. 508. (1) A person who has been convicted of 1 or more felonies
> during the preceding 5 years shall not carry or have in his or her
> possession a radio receiving set that will receive signals sent on a
> frequency assigned by the federal communications commission of the
> United States for police or other law enforcement, fire fighting,
> emergency medical, federal, state, or local corrections, or homeland
> security purposes. This subsection does not apply to a person who is
> licensed as an amateur radio operator by the federal communications
> commission. A person who violates this subsection is guilty of a
> misdemeanor punishable by imprisonment for not more than 1 year or a
> fine of not more than $1,000.00, or both.
> (2) A person shall not carry or have in his or her possession in the

STATE OF MICHIGAN
93RD LEGISLATURE
REGULAR SESSION OF 2006
Introduced by Reps. Elsenheimer, Jones, Newell, Nofs, David Law and Sheltrown
ENROLLED HOUSE BILL No. 4544
AN ACT to amend 1931 PA 328, entitled "An act to revise, consolidate, codify, and add to the statutes relating to crimes; to define crimes and prescribe the penalties and remedies; to provide for restitution under certain circumstances; to provide for the competency of evidence at the trial of persons accused of crime; to provide immunity from prosecution for certain witnesses appearing at such trials; and to repeal certain acts and parts of acts inconsistent with or contravening any of the provisions of this act," by amending section 508 (MCL 750.508), as amended by 2002 PA672.
The People of the State of Michigan enact:
Sec. 508. (1) A person who has been convicted of 1 or more felonies during the preceding 5 years shall not carry or have in his or her possession a radio receiving set that will receive signals sent on a frequency assigned by the federal communications commission of the United States for police or other law enforcement, fire fighting, emergency medical, federal, state, or local corrections, or homeland security purposes. This subsection does not apply to a person who is licensed as an amateur radio operator by the federal communications commission. A person who violates this subsection is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not more than $1,000.00, or both.
(2) A person shall not carry or have in his or her possession in the commission or attempted commission of a crime a radio receiving set

that will receive signals sent on a frequency assigned by the federal communications commission of the United States for police or other law enforcement, fire fighting, emergency medical, federal, state, or local corrections, or homeland security purposes. A person who violates this subsection is guilty of a crime as follows:
(a) If this subsection is violated in the commission or attempted commission of a misdemeanor punishable by a maximum term of imprisonment of at least 93 days but less than 1 year, the person is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not more than $1,000.00, or both.
(b) If this subsection is violated in the commission or attempted commission of a misdemeanor or felony punishable by a maximum term of imprisonment of 1 year or more, the person is guilty of a felony punishable by imprisonment for not more than 2 years or a fine of not more than $2,000.00, or both.
(3) Subsection (2) does not apply to a person who carries or has in his or her possession a radio receiving set described in subsection (2) in the commission or attempted commission of a misdemeanor punishable by a maximum term of imprisonment of less than 93 days.
(4) This section does not apply to the use of radar detectors.
Enacting section 1. This amendatory act takes effect 90 days after the date it is enacted.
This act is ordered to take immediate effect.

408. RE: [WestMichiganHams] scanner law

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-06 23:25:37 UTC
From: Deater, Tim
Topic: 407 Message: 408

I would doubt that they will issue permits for scanners any more now that anyone can carry one unless you are convicted of a felony or are committing a crime. Of course this is after it takes effect. You will still want to carry a copy of the law with you for those officers that do not know about the change.

This subsection does not apply to a person who is licensed as an amateur radio operator by the federal communications commission. A person who violates this subsection is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not more than $1,000.00, or both.
(2) A person shall not carry or have in his or her possession in the commission or attempted commission of a crime a radio receiving set that will receive signals sent on a frequency assigned by the federal communications commission of the United States for police or other law enforcement, fire fighting, emergency medical, federal, state, or local corrections, or homeland security purposes. A person who violates this subsection is guilty of a crime as follows:
(a) If this subsection is violated in the commission or attempted commission of a misdemeanor punishable by a maximum term of imprisonment of at least 93 days but less than 1 year, the person is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not more than $1,000.00, or both.
(b) If this subsection is violated in the commission or attempted commission of a misdemeanor or felony punishable by a maximum term of imprisonment of 1 year or more, the person is guilty of a felony punishable by imprisonment for not more than 2 years or a fine of not more than $2,000.00, or both.
(3) Subsection (2) does not apply to a person who carries or has in his or her possession a radio receiving set described in subsection (2) in the commission or attempted commission of a misdemeanor punishable by a maximum term of imprisonment of less than 93 days.
(4) This section does not apply to the use of radar detectors.
Enacting section 1. This amendatory act takes effect 90 days after the date it is enacted.
This act is ordered to take immediate effect.
ss//Clerk of the House of Representatives
ss//Secretary of the Senate
Approved
ss//Governor

In the olden days, the western portion of Pennsylvania was in eight land and Frank had a call W8CRA. Then the FCC changed around the call sign districts and moved all of Pennsylvania into three land. All these Penna eights had to get new calls. In fact, in the olden days you got a new call whenever you moved to another call sign district. And your call sign did not just change in number but could have changed significantly. It is only recently that call signs have not been changed when you move. Now we don't know which state a ham lives in only from her call sign. Well, that is unless she signs portable four, for example.

It's only important when working for an award or something. Oh, and some DX will call by the numbers and those portable in a lightly populated area, seven land, might try to slip past the DX when he is calling by the numbers.

TMI?

Bill, AB8SC

As you all know, Bill AB8SC came through with the call we all sought. That call is W8CRA.

Later, Frank Lucas changed his call to W3CRA. W3CRA is now the call of the Collins Radio Association.

Got a Collins? Even if you don't and just like them, please take some time to visit www.collinsra.com <http://www.collinsra.com> . Collins owners may want to consider joining the Association.

The Meijer store on Riley in Holland has that charger on sale again for $36.00 instead of the usual $49.99. And if you're an "old fogey" and get there before midnight tonight (Monday), you can get another 15% off.

So what's the change- Exempting Advanced and Novice class operators in the law?? I think it read tech, general and Extra before.

I was (politely) confronted about my "scanner" in my vehicle last Tuesday by one of the officers who took the police report for my burned-up truck. He didn't realize I was a ham, but I explained that the "scanner" was a radio and that I was licensed to use it and he understood.

Hello Andrew,

The change is that anyone that does not have a recent felony conviction can have a scanner anywhere they want, including vehicles. If you are a recent (5 years and less past) felon you can't even have one in your house....unless you are an amateur radio operator. If you are a ham you can also be a felon and have a scanner.

The part of the new law that addresses the use of scanners while in the commission or planning of a crime is already covered by federal law.

I think I will start visiting the penitentiaries to recruit some of those fine folks for our upcoming tech classes. (Not)

Hi, all.

This should be a cleaner-looking version of the new Michigan sscanner legislation.

Thanks to Phil Marcotte (KC8QOV) for sending this along. and Tom Behler KB8TYJ for sending it to me

415. Sun's next 11-year cycle could be 50 pct stronger

All:

While strolling through Google's news headlines I saw, "Sun's next 11-year cycle could be 50 pct stronger"

You can read the text:

http://today.reuters.com/news/articlenews.aspx?type=scienceNews&storyid=2006-03-06T204858Z_01_N06327000_RTRUKOC_0_US-SPACE-SUN.xml

Isn't it still illegal to have one in a vehicle unless you have a permit or Amateur license? I think it just changes the wording so Novice and Advanced holders won't be prohobited from having them in vehicles.

I might be mistaken since I haven't read the scanner law as carefully as the last (ahem) law I read and discussed on a reflector.

I would doubt that they will issue permits for scanners any more now that anyone can carry one unless you are convicted of a felony or are committing a crime. Of course this is after it takes effect. You will still want to carry a copy of the law with you for those officers that do not know about the change.

Here is a copy of the new bill(law) always carry a copy of your radio license and or you can apply to the state for a permit for use of short wave recevier in vehicle it is free the form is avaiable online through thr state police . and you can also carry a copy of the law. 73 KC8UNY

I am pleased to report that Governor Granholm signed the attached legislation on March 2, 2006 and it became enacted on that date. These changes to Section 508 MCL will take effect 90 days from that date. The holders of all classes of amateur radio licenses will become totally exempt from the receiver restrictions. I suggest that anyone carrying a transceiver capable of receiving public safety frequencies also carry a copy of this Act along with your Amateur Radio License.
73,
Dale WA8EFK
ARRL Section Manager - Michigan

STATE OF MICHIGAN
93RD LEGISLATURE
REGULAR SESSION OF 2006
Introduced by Reps. Elsenheimer, Jones, Newell, Nofs, David Law and Sheltrown
ENROLLED HOUSE BILL No. 4544
AN ACT to amend 1931 PA 328, entitled "An act to revise, consolidate, codify, and add to the statutes relating to crimes; to define crimes and prescribe the penalties and remedies; to provide for restitution under certain circumstances; to provide for the competency of evidence at the trial of persons accused of crime; to provide immunity from prosecution for certain witnesses appearing at such trials; and to repeal certain acts and parts of acts inconsistent with or contravening any of the provisions of this act," by amending section 508 (MCL 750.508), as amended by 2002 PA672.
The People of the State of Michigan enact:
Sec. 508. (1) A person who has been convicted of 1 or more felonies during the preceding 5 years shall not carry or have in his or her possession a radio receiving set that will receive signals sent on a frequency assigned by the federal communications commission of the United States for police or other law enforcement, fire fighting, emergency medical, federal, state, or local corrections, or homeland security purposes. This subsection does not apply to a person who is licensed as an amateur radio operator by the federal communications commission. A person who violates this subsection is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not more than $1,000.00, or both.
(2) A person shall not carry or have in his or her possession in the commission or attempted commission of a crime a radio receiving set that will receive signals sent on a frequency assigned by the federal communications commission of the United States for police or other law enforcement, fire fighting, emergency medical, federal, state, or local corrections, or homeland security purposes. A person who violates this subsection is guilty of a crime as follows:
(a) If this subsection is violated in the commission or attempted commission of a misdemeanor punishable by a maximum term of imprisonment of at least 93 days but less than 1 year, the person is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not more than $1,000.00, or both.
(b) If this subsection is violated in the commission or attempted commission of a misdemeanor or felony punishable by a maximum term of imprisonment of 1 year or more, the person is guilty of a felony punishable by imprisonment for not more than 2 years or a fine of not more than $2,000.00, or both.
(3) Subsection (2) does not apply to a person who carries or has in his or her possession a radio receiving set described in subsection (2) in the commission or attempted commission of a misdemeanor punishable by a maximum term of imprisonment of less than 93 days.
(4) This section does not apply to the use of radar detectors.
Enacting section 1. This amendatory act takes effect 90 days after the date it is enacted.

This act is ordered to take immediate effect.
ss//Clerk of the House of Representatives
ss//Secretary of the Senate
Approved
ss//Governor

417. RE: [WestMichiganHams] scanner law

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-07 22:55:05 UTC
From: Deater, Tim
Topic: 407 Message: 417
Attachments: 1 described; binary payloads are missing from this source WARC

Once it takes effect in 90 days anyone can have a scanner, anywhere any time even in a vehicle, unless you have been convicted of a felony within the last 5 years or are committing a crime.

This eliminates the burden of doing scanner permits from the State Police communications people, and also helps Hams and race fans out. I don't know what the main driving force was, but in the summaries it mentions the problems Hams have had with getting things confiscated from officers that did not know the entire wording of the old law.

The new law was very simple when it was introduced. After going trough the house and senate it turned into this big complicated looking thing that more or less duplicates federal law.

Subject: [WestMichiganHams] scanner law

Here is a copy of the new bill(law) always carry a copy of your radio license and or you can apply to the state for a permit for use of short wave recevier in vehicle it is free the form is avaiable online through thr state police . and you can also carry a copy of the law. 73 KC8UNY

I am pleased to report that Governor Granholm signed the attached legislation on March 2, 2006 and it became enacted on that date. These changes to Section 508 MCL will take effect 90 days from that date. The holders of all classes of amateur radio licenses will become totally exempt from the receiver restrictions. I suggest that anyone carrying a transceiver capable of receiving public safety frequencies also carry a copy of this Act along with your Amateur Radio License.
73,
Dale WA8EFK
ARRL Section Manager - Michigan

STATE OF MICHIGAN
93RD LEGISLATURE
REGULAR SESSION OF 2006
Introduced by Reps. Elsenheimer, Jones, Newell, Nofs, David Law and Sheltrown
ENROLLED HOUSE BILL No. 4544
AN ACT to amend 1931 PA 328, entitled "An act to revise, consolidate, codify, and add to the statutes relating to crimes; to define crimes and prescribe the penalties and remedies; to provide for restitution under certain circumstances; to provide for the competency of evidence at the trial of persons accused of crime; to provide immunity from prosecution for certain witnesses appearing at such trials; and to repeal certain acts and parts of acts inconsistent with or contravening any of the provisions of this act," by amending section 508 (MCL 750.508), as amended by 2002 PA672.
The People of the State of Michigan enact:
Sec. 508. (1) A person who has been convicted of 1 or more felonies during the preceding 5 years shall not carry or have in his or her possession a radio receiving set that will receive signals sent on a frequency assigned by the federal communications commission of the United States for police or other law enforcement, fire fighting, emergency medical, federal, state, or local corrections, or homeland security purposes. This subsection does not apply to a person who is licensed as an amateur radio operator by the federal communications commission. A person who violates this subsection is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not more than $1,000.00, or both.
(2) A person shall not carry or have in his or her possession in the commission or attempted commission of a crime a radio receiving set that will receive signals sent on a frequency assigned by the federal

communications commission of the United States for police or other law enforcement, fire fighting, emergency medical, federal, state, or local corrections, or homeland security purposes. A person who violates this subsection is guilty of a crime as follows:
(a) If this subsection is violated in the commission or attempted commission of a misdemeanor punishable by a maximum term of imprisonment of at least 93 days but less than 1 year, the person is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not more than $1,000.00, or both.
(b) If this subsection is violated in the commission or attempted commission of a misdemeanor or felony punishable by a maximum term of imprisonment of 1 year or more, the person is guilty of a felony punishable by imprisonment for not more than 2 years or a fine of not more than $2,000.00, or both.
(3) Subsection (2) does not apply to a person who carries or has in his or her possession a radio receiving set described in subsection (2) in the commission or attempted commission of a misdemeanor punishable by a maximum term of imprisonment of less than 93 days.
(4) This section does not apply to the use of radar detectors.
Enacting section 1. This amendatory act takes effect 90 days after the date it is enacted.
This act is ordered to take immediate effect.
ss//Clerk of the House of Representatives
ss//Secretary of the Senate
Approved
ss//Governor

I think andrew is right if you have an amateur radio license or a permit from the state your all set from what i read of the law both past and present you still need one or the other to have a scanner in your car operating as for race fans in your trunk turned off your safe . as long you are not using it to plan a bank job or a crime it dosent change otherwise they would not have put the provision in there of haveing a amateur radio license. 73 kc8uny

I would doubt that they will issue permits for scanners any more now that anyone can carry one unless you are convicted of a felony or are committing a crime. Of course this is after it takes effect. You will still want to carry a copy of the law with you for those officers that do not know about the change.

Jon,

I finally got the 'go ahead'.

We are planning classes to start either on the 28th of March or the 4th of April at MTA. That is a Tuesday evening class, running 8 weeks. Class will run from 7pm to 9pm.

Right now we are still in the preliminary stage. I am looking for feedback. Is Tuesday OK for everyone? If not, please let me know.

The classes will be concurrent in content with the day classes held at the school. Some of the students may even join our night class. In addition to passing the FCC test, lessons will be given on operating skills, local repeater operation, overviews of the West Michigan amateur groups and hands on radio time.

This year, room is not an issue. I am now taking names for the class. The cost of the class has not yet been determined. If I can get free text and materials there will be NO COST for the class. We are also looking at ways to get the price of licensing to as close to free as possible.

Stay Tuned!!

The latest issue of "CQ" magazine (March 2006) includes an article about "A Compact and Effective 40-10 Meter Portable Station" by Phil Salas, AD5X. The article includes a very nice photo of his portable station, including his favorite portable key, the Te-Ne-Ke, which is his "portable key of choice". Congrats to Boyd Mason, NE8KE, for developing such a great product, and to all those at NOARC who work so hard to produce this fine amateur radio Morse Code key. The members of NOARC have been building these keys for many years, and hopefully will continue to have success with this fine club project. If you are not a subcriber to "CQ" magazine, it is avalible at Barnes & Noble bookstores.

> ==>FCC DIRECTS MANASSAS BPL SYSTEM TO ACT FOLLOWING HAM'S INTERFERENCE
> COMPLAINT
>
> The FCC this week directed the City of Manassas, Virginia, and its BPL
> system operator COMTek to conduct measurements to ensure its system
> complies
> with FCC Part 15 rules. FCC Spectrum Enforcement Division Chief Joseph P.
> Casey called on the city and COMTek March 7 to follow up on a report of

> suspected BPL interference filed January 19 by ARRL member Dwight Agnew,
> AI4II. The Commission also instructed the city to "resolve any continuing
> harmful interference." Agnew, who frequently travels through Manassas and
> operates mobile, alleges harmful BPL interference along Virginia Business
> Route 234.
>
> "I had been talking to a friend in Ohio while on my way home from work,"
> Agnew told Casey via e-mail. "I could no longer hear him over the
> interference on 40 meters (7.2 MHz) while driving through the city."
> Agnew,
> who says the interference went away once he left the city, characterized
> its
> effect as "like a giant, fuzzy mute."
>
> COMTek operates the Manassas BPL system using Main.net equipment on
> frequencies between 4 MHz and 30 MHz over a city-owned power grid. The FCC
> wants the city to take measurements during peak BPL usage hours at
> locations
> Agnew cited in his complaint and submit them within 30 days. Casey made it
> clear that the city "must either eliminate any continuing harmful
> interference" to Agnew's operations or reduce BPL emissions in the area to
> 20 dB below the Part 15 limit. The League challenges the assumption that
> this level of attenuation necessarily will resolve interference issues.
>
> To date, the FCC itself has not taken any measurements on any part of the
> Manassas BPL system. When radio amateurs have filed interference
> complaints
> involving BPL systems elsewhere, the Commission typically has tended
> instead
> to rely on measurements made by system operators.
>
> In January, after COMTek failed to meet its own commitment to resolve
> longstanding interference complaints from local radio amateurs dating back
> nearly two years, the ARRL again demanded the system's immediate shutdown.
> Agnew's complaint is a new one, however.
>
> In a separate letter March 7, Casey told four Manassas hams with
> complaints
> already on file that they must provide "further information" within 30
> days
> or the FCC "will take no further action" on their complaints. The FCC,
> which
> has yet to respond to any of the earlier ham radio complaints, concedes
> that
> it continues to receive reports of harmful interference.
>
> To expedite the information-gathering process, the ARRL on March 8 alerted
> all radio amateurs living in ZIP code 20110 (Manassas) that "now is the
> time" to submit harmful interference complaints relating to the city's BPL
> system. "The first step is to verify that BPL is actually the source of

> the
> interference," ARRL CEO David Sumner, K1ZZ, advised. He stressed, however,
> that the League does not want amateurs to file complaints unless they have
> actually experienced BPL interference.
>
> "With the FCC finally taking official notice of the presence of harmful
> interference in Manassas, the tide finally is beginning to turn," Sumner
> concluded.
>
> ==>VOLUNTEER RADIO AMATEURS "PART OF THE SOLUTION," FCC KATRINA PANEL TOLD
>
> Addressing the FCC independent panel reviewing Hurricane Katrina's impact
> on
> communication networks, ARRL Alabama Section Manager Greg Sarratt, W4OZK,
> praised Amateur Radio's ability to get the job done. Speaking before the
> panel March 7 in Jackson, Mississippi, Sarratt said Amateur Radio
> volunteers
> were tremendously effective in their ability to re-establish communication
> links using their own gear or by building systems from scratch.
>
> "Amateur Radio operators themselves were part of the solution, providing
> experienced communications operators to replace and supplement local
> public
> service communications personnel in the devastated area," Sarratt said.
> The
> volunteer radio amateurs and their equipment proved "very effective" in
> supporting emergency management, the Red Cross, the Southern Baptist
> Convention, The Salvation Army and many other organizations, he told the
> panel.
>
> For 37 days following Hurricane Katrina, Sarratt--working at an American
> Red
> Cross disaster relief staging area in Montgomery, Alabama--headed the
> volunteer effort to process Amateur Radio volunteers headed to the Gulf
> Coast to assist recovery operations. Sarratt told the FCC panel that his
> operation processed and deployed more than 200 ham radio volunteers from
> 35
> states and Canada to devastated communities in Mississippi. Volunteers set
> up communication facilities at kitchens, shelters, emergency operations
> centers, distribution centers, warehouses and various command and control
> centers, he said.
>
> "In each town we set up a high frequency (HF) Amateur Radio station to
> communicate out of the area to Montgomery and the outside world," Sarratt
> explained. "We also set up a communications network connecting every Red
> Cross facility in a town on a local short-range radio frequency. Our
> network
> included fixed and mobile disaster vehicle stations."
>
> Sarratt told the FCC panel that interoperability is the most important

> thing
> Amateur Radio can bring to the table in emergency and disaster
> communications. "Amateurs demonstrated their adaptability by communicating
> successfully with a multitude of amateur, commercial, public service, EMA,
> Salvation Army and Red Cross radio systems and personnel," he said.
>
> "Radio amateurs bring a wealth of resources to the public service and
> emergency communications table," Sarratt summed up. "The ARRL and Amateur
> Radio will continue to prepare, train, practice and test ourselves for the
> next event," he told the FCC panel. "Public service is a large component
> of
> the charter of the Amateur Radio Service." He suggested installing
> permanent
> Amateur Radio stations in federal, state and local emergency operations
> centers as well as at selected public service, Red Cross chapters and
> other
> served agencies.
>
> Sarratt offered some recommendations for the FCC panel to consider,
> suggesting that the Commission and the ARRL:
>
> * collaborate to issue FCC credentials to the ARRL for Amateur Radio
> responders.
>
> * be key partners in an Amateur Radio awareness program for multiple
> government agencies and the first-responder community.
>
> * continue working together on critical frequency spectrum protection and
> interference-avoidance issues.
>
> "The disasters of 2005 have proven the worth of Amateur Radio Service and
> its selfless cadre of operators; we were tested as never before," Sarratt
> concluded, adding "we must assume the next 'big one' is just around the
> corner."
>
> ARRL provided a written report to the independent FCC review panel. ARRL
> President Joel Harrison, W5ZN, recently named Sarratt to serve on the ARRL
> National Emergency Response Planning Committee.
>
> Dave Vincent, the station manager of WLOX-TV in Biloxi, Mississippi, also
> praised ham radio in his remarks before the FCC panel. He said WLOX was
> lucky to have a ham operator at its studio. Without the help of Amateur
> Radio, Vincent said, "it probably would have been a couple of days before
> we
> would have known whether the persons in our two bureaus had survived the
> storm."
>
> He said ham radio also enabled the station to contact EOCs in the three
> hardest-hit coastal counties. "Without this link we would not have had any
> way to communicate with officials along the coast," he said.

>
> ==>OHIO, NORTH CAROLINA YOUNGSTERS HELP ISS COMMANDER BOOST HIS QSO RECORD
>
> Speaking via NA1SS, Expedition 12 Commander Bill McArthur, KC5ACR, this
> month told youngsters in Ohio and North Carolina that he's been really
> been
> enjoying his International Space Station duty tour. The Amateur Radio on
> the
> International Space Station (ARISS) program arranged both contacts. During
> a
> March 1 QSO with students at Country Day School in suburban Cincinnati,
> Ohio, McArthur described his delight at being in space for his first
> long-term visit.
>
> "I think the biggest surprise was how much fun it was to be in space,"
> McArthur said. "I thought I would enjoy the work, but what I found was
> that
> everything about being in space is delightful."
>
> Lifting off from Earth also was "another really cool thing to experience,"
> McArthur explained in response to one student's question. "You're lying on
> your back, and then all of a sudden you're gone, and it's a very
> thrilling,
> exciting thing," he said. "When you come back, you realize how wonderful
> zero gravity is, because gravity is just a lot of work--you feel tired,
> you
> feel heavy and, very often, dizzy."
>
> Later in the contact, McArthur said the best part of being an astronaut is
> being able to tell people how exciting it is to explore space "and what an
> important thing that is for humankind." In all the third, fourth and fifth
> graders at Country Day managed 19 questions asked and answered during the
> approximately 10-minute pass. Science teacher John French led the effort.
>
> A few days later on March 3, McArthur chatted with youngsters at Harry
> Hallyburton Elementary School in Drexel, North Carolina--his home state.
> McArthur told the third graders in Deborah Childers' class that some of
> the
> ISS crew's scientific research could directly benefit people.
>
> "We're doing scientific research every day to help to understand the human
> body better, and that can lead to new discoveries in medicine," McArthur
> said. "But the real focus of our flight is to learn how people can live
> and
> work in space for a very long time, because we think someday, human beings
> will colonize other planets."
>
> Responding to another question, McArthur told the youngsters that brushing
> one's teeth in space does present a dilemma regarding what to do with "all
> the foamy toothpaste" when you're done.

>
> "We have two choices," he said. "We can either swallow it, which is what I
> usually do, or if you don't like to do that, then you just hold a towel up
> to your mouth and spit it directly into a towel."
>
> Tony Hutchison, VK5ZAI, served as the Earth station for both ARISS school
> group contacts, and Verizon Conferencing provided a two-way teleconference
> link between Australia and the schools.
>
> McArthur now has logged a record 30 ARISS school QSOs. ARISS is an
> international educational outreach with US participation by ARRL, AMSAT
> and
> NASA.
>
> ==>FCC OFFERS DEAL TO CALIFORNIA LICENSEE TO AVOID ENFORCEMENT ACTION,
> FINES
>
> The FCC has offered a California licensee a deal: Give up your Amateur
> Radio
> license for two years or face further enforcement action and possible
> fines.
> Special Counsel in the FCC Enforcement Bureau Riley Hollingsworth wrote
> Steve L. Wingate, KG6TXH (ex-AE6QD), of Corte Madera on February 22 to
> review a history of enforcement correspondence to Wingate dating back to
> April 2004.
>
> "The Enforcement Bureau has continued to receive complaints about the
> operation of your station since January 2005," Hollingsworth told Wingate.
> Conceding that while not all of the complaints were valid or recordings
> genuine, Hollingsworth said evidence the FCC determined was legitimate
> showed a pattern of similar alleged violations "for which you were warned
> twice, and for which you twice gave assurances of future compliance,"
> Hollingsworth pointed out.
>
> Complaints about Wingate's alleged misdeeds led the Wireless
> Telecommunications Bureau to set aside Wingate's vanity call sign and
> renewal applications, Hollingsworth noted, "and now warrant enforcement
> action against you." Sanctions could include license revocation and fines
> of
> from $7500 to $10,000 "or both," Hollingsworth warned.
>
> Wingate's responses to Enforcement Bureau letters coupled with continued
> complaints, including recordings, and telephone conversations between the
> FCC and Wingate "indicate that by your own admission you have a serious
> problem with an impairment that prevents you from maintaining control over
> your station," Hollingsworth said.
>
> Hollingsworth emphasized that if Wingate declines to "accept this
> opportunity to resolve this matter," the Commission would proceed with
> enforcement action against his Amateur Extra class license.

>
> Wingate has not yet taken the deal, Hollingsworth told ARRL this week, but
> he did request copies of recordings that accompanied complaints of his
> most
> recent alleged on-air behavior.
>
> ==>ARRL STAFF MEMBER JOHN C. HENNESSEE, N1KB, SK
>
> The ARRL and the wider Amateur Radio community are mourning the loss of
> long-time Headquarters staff member John Hennessee, N1KB (ex-KJ4KB), of
> Newington, who died March 2. He was 42. Hennessee was a regulatory
> information specialist in ARRL Field and Educational Services. In that
> role,
> he answered a seemingly never-ending stream of members' questions about
> FCC
> rules and regulations and other legal issues pertaining to ham radio. He
> also was the primary editor for The ARRL FCC Rule Book. ARRL CEO David
> Sumner, K1ZZ, described Hennessee as "a valued member of the Amateur Radio
> community far outside the walls of Headquarters" who achieved a lot in his
> brief lifetime.
>
> "John came to Newington 20 years ago, fresh out of college, and quickly
> became an expert in FCC rules and local land-use regulations affecting
> radio
> amateurs," Sumner commented. "His death leaves a hole in the fabric of the
> ARRL family."
>
> First licensed at age 14 as KA4AUR in his hometown of Cheraw, South
> Carolina, Hennessee joined the ARRL Headquarters staff as in 1986
> following
> graduation from Wingate College in North Carolina.
>
> To handle hundreds of questions each year regarding how to interpret the
> FCC
> rules required Hennessee to keep abreast of ongoing Amateur Radio legal
> and
> regulatory matters and proceedings. That task became increasingly
> difficult
> for him as his eyesight and general health continued to fail. Nonetheless,
> he persevered in keeping on top of what was happening in areas ranging
> from
> the PRB-1 limited federal pre-emption and covenants, conditions and
> restrictions (CC&Rs) affecting ham radio antennas to new Amateur Radio
> rules
> and privileges, license restructuring, reciprocal licensing and licensing
> rules and procedures in other countries. He also maintained the regulatory
> pages on the ARRL Web site
> <http://www.arrl.org/FandES/field/regulations/>.
>
> Earlier in his Headquarters tenure, Hennessee for several years edited the

> "Washington Mailbox" and "Happenings" columns in QST. He also contributed
> to
> The ARRL Handbook, the ARRL Operating Manual and Now You're Talking!
>
> Over the years, Hennessee was a Handi-Ham camp volunteer. "Campers loved
> his
> gentle Southern manner." said Handi-Ham Manager Patrick Tice, WA0TDA.
> "Unfailingly polite and ever so patient, John made each Handi-Ham member
> feel like a long-lost friend!"
>
> In addition to ARRL, Hennessee also belonged to the Quarter Century
> Wireless
> Association and was an active member of the Newington Amateur Radio
> League,
> where he was a Field Day regular. Over the years, he enjoyed operating
> various bands and modes, and he enjoyed CW and low-power operating (QRP).
>
> Those who knew or worked with Hennessee remember him as consistently
> friendly, selfless, loyal, gracious, upbeat, willing and eager to help
> whenever and wherever needed and, above all, as an asset to Amateur Radio
> in
> general and to the ARRL in particular.
>
> "The world is a better place because of John, and a sadder place without
> him," said Senior Assistant Technical Editor Larry Wolfgang, WR1B, who
> worked with Hennessee on numerous publications. Former ARRL Field and
> Educational Services Manager Rosalie White, K1STO, was Hennessee's
> supervisor during much of his HQ tenure. "John gave his all to ARRL
> Headquarters and to the League's members," she said.
>
> ARRL staff members gathered this week at Headquarters to reminisce about
> Hennessee. "I like to think ARRL provided him with an outlet to share his
> gifts with the world," Sumner observed. "Let's celebrate that this South
> Carolina boy improbably found a home in Connecticut."
>
> Survivors include his mother, Carole Hennessee, two sisters and his
> beloved
> cat, Darlene. A service was held March 9 in Cheraw.
>
> The family invites memorial gifts to the First United Methodist Church, PO
> Box 129, Cheraw, SC 29520. Condolences sent to ARRL, 225 Main St,
> Newington,
> CT 06111 will be forwarded to the family.
>
> ==>FCC CLARIFIES RENEWAL PROCEDURES FOR VANITY CALL SIGN HOLDERS
>
> With the renewal window about to open for the first Amateur Radio licenses
> assigned vanity call signs in 1996, the FCC's Wireless Telecommunications
> Bureau (WTB) has attempted to clarify filing procedures. The WTB says
> vanity

> call sign holders whose licenses expire on or after June 4, 2006, must
> file
> electronically or on paper via the Universal Licensing System (ULS)
> <http://wireless.fcc.gov/uls/> to renew their licenses. Amateur Radio
> renewal applications may only be filed within 90 days of the license
> expiration date.
>
> "Licensees of stations assigned vanity call signs have the option of
> keeping
> the vanity call sign or requesting that it be changed to a sequentially
> assigned call sign," the WTB points out. Those opting to keep their vanity
> call signs for the new 10-year license term must pay the current
> regulatory
> fee, now $21.90, when renewing (the vanity call sign regulatory fee may
> change in August or September). If the licensee no longer wants to keep a
> vanity call sign, no fee is required, and the applicant should request a
> sequentially assigned call sign instead.
>
> Amateur Radio licensees holding vanity call signs granted prior to 1996 do
> not have to pay a regulatory fee when renewing. This is because Congress
> did
> not begin requiring the FCC to annually recover its regulatory costs until
> 1993. Additionally, such licensees are not specifically tagged as vanity
> call sign holders in the ULS.
>
> To renew electronically via the ULS, licensees should log into ULS License
> Manager <http://wireless.fcc.gov/uls/> Online Filing (click on "Log In")
> using their FCC Registration Number (FRN) and Commission Registration
> System
> (CORES) password. Anyone doing business with the FCC must supply an FRN on
> any application.
>
> To keep a vanity call sign, licensees should select "Renew" under the
> "Work
> on this License" option. Fees for electronically filed applications may be
> paid online or mailed to Federal Communications Commission, Regulatory
> Fees,
> PO Box 358835, Pittsburgh, PA 15251-5835.
>
> Online filers choosing not to renew a vanity call sign should select the
> "Systematic Call Sign Change" option from the "Work on this License" list.
> To obtain a new call sign, licensees should answer "No" to the question
> "Your license is eligible for renewal. Renew call sign (vanity call
> sign)?"
> Doing this will result in the issuance of a renewed license bearing a
> sequentially assigned call sign.
>
> Licensees filing on paper must use FCC Form 605 (main form), and--if a fee
> is required--Form 159 (remittance advice). Licensees wishing to keep their
> vanity call signs should enter "Renew" under "Purpose" on Form 605 and

> enter
> the present call sign in item 5. Manual filers choosing not to renew their
> vanity call signs must file Form 605 (main form) Schedule D in order to
> obtain a new systematic call sign. The "Purpose" on the main form must be
> "Renewal/Modification," and the "Systematic Call Sign Change" question on
> Schedule D must be answered "Yes."
>
> If no FRN is provided on the main form, an FCC Form 160 (registration) is
> also required for manual filing. All forms are available via the FCC Forms
> page <http://www.fcc.gov/formpage.html>.
>
> For more information on how to renew an Amateur Radio vanity call sign,
> visit the FCC Help & Support page <http://esupport.fcc.gov/index.htm> or
> call the ULS Customer Support Hotline, 877-480-3201 (TTY 717-338-2824).
>
> The ARRL handles routine non-vanity renewals for members free of charge.
> At
> this time, it does not process renewal applications for post-1995 vanity
> call sign holders, but ARRL plans to add that capability in the near
> future.
>
> ==>SOLAR UPDATE
>
> Sun Gazer Tad "I'll Follow the Sun" Cook, K7RA, Seattle, Washington,
> reports: BIG news! A new computer model of solar dynamics produced by
> scientists at the National Center for Atmospheric Research (NCAR) predicts
> the next solar cycle to begin a bit later than previously thought, but to
> be
> as much as 30 to 50 percent more intense than the current solar cycle just
> ending. The model claimed to "predict" cycles 16-23 with 97 percent
> accuracy
> using earlier data.
>
> The NCAR news page has a report
> <http://www.ucar.edu/news/releases/2006/sunspot.shtml>. So does the NASA
> Web
> site
> <http://www.nasa.gov/centers/goddard/news/topstory/2006/solar_cycle.html>.
> Another article from Science@NASA claims the Cycle 23 solar minimum is
> already here
> <http://science.nasa.gov/headlines/y2006/06mar_solarminimum.htm>. A news
> story also appears on the ARRL Web site
> <http://www.arrl.org/news/stories/2006/03/07/5/>.
>
> Current propagation: Solar activity remains low, with many recent days of
> zero sunspots and even more ahead. March 10 could have unsettled to active
> geomagnetic conditions, with unsettled conditions March 11, quiet to
> unsettled March 12, and quiet March 13.
>
> Sunspot numbers for March 2 through March 8 were 0, 0, 13, 28, 27, 25 and

> 24, with a mean of 16.7. 10.7 cm flux was 76.1, 75.5, 75, 74.2, 73.6,
> 74.4,
> and 72.4, with a mean of 74.5. Estimated planetary A indices were 4, 4, 3,
> 2, 8, 12 and 4, with a mean of 5.3. Estimated mid-latitude A indices were
> 4,
> 2, 1, 1, 8, 6 and 3, with a mean of 3.6.

> * ARRL Certification and Continuing Education course registration:
> Registration remains open through Sunday, March 19, for these ARRL
> Certification and Continuing Education (CCE). Program on-line courses:
> Amateur Radio Emergency Communication Level 1 (EC-001), Radio Frequency
> Interference (EC-006), Antenna Design and Construction (EC-009),
> Technician
> Licensing (EC-010), Analog Electronics (EC-012) and Digital Electronics
> (EC-013). Classes begin Friday, April 7. To learn more, visit the CCE
> Course
> Listing page <http://www.arrl.org/cce/courses.html> or contact the CCE
> Department <cce@...>.
>
> * ARRL CCE program issues Technician Course advisory: The ARRL
> Certification
> and Continuing Education (CCE) program reminds prospective radio amateurs
> that a new Technician (Element 2) question pool goes into effect July 1.
> The
> two Technician License courses (EC-010) the CCE program will offer in
> April
> will reflect the current question pool. The first class begins April 7 and

> continues through June 2 (registration ends March 20); the second begins
> on
> April 28 and continues through June 23 (registration ends April 17).
> Because
> these online courses are based upon the current question pool, CCE advises
> students completing these April classes to take the FCC Technician class
> (Element 2) examination by June 30.For more information contact the CCE
> Department <cce@...>.
>
> * Motorola white paper epitomizes BPL-Amateur Radio rapprochement: A new
> Motorola white paper, "Practical, Proven Broadband over Power Line,"
> describes how its Powerline LV BPL system "passes muster with Amateur
> Radio
> operators." Motorola and ARRL have cooperated in tests of the system,
> which
> the League has cited in FCC filings as one that minimizes radio frequency
> interference--both from and to the system--by design. "Motorola's white
> paper bears out that the ARRL is not opposed to the deployment of
> well-engineered BPL systems designed with interference avoidance in mind,"
> ARRL CEO David Sumner, K1ZZ, commented. "We are opposed to BPL
> interference." Sumner said the League remains opposed to deployment of BPL
> technology having "an inherently high probability of causing harmful
> interference to radio communication." The Motorola white paper includes a
> summary of the company's experiences after installing a Powerline LV
> system
> at ARRL Headquarters and W1AW, as reported in November 2005 QST
> <http://www.arrl.org/tis/info/pdf/0511085.pdf>. The Powerline LV system
> avoids putting digital signals on medium-voltage power lines and
> incorporates enhanced ham band notching.
>
> * IARU represented at World Telecommunication Development Conference 2006:
> An International Amateur Radio Union (IARU) delegation is representing
> Amateur Radio at World Telecommunication Development Conference (WTDC)
> 2006.
> The International Telecommunication Union (ITU) conference got under way
> March 7 in Doha, Qatar. IARU Vice President Tim Ellam, VE6SH/G4HUA, IARU
> International Coordinator for Emergency Communications Hans Zimmermann,
> F5VKP/HB9AQS, and IARU Region 1 Vice Chairman Tafa Diop, 6W1KI, are
> attending. WTDC 2006 will focus on development priorities aimed at
> bridging
> the "digital divide." Following in the footsteps of the recently concluded
> World Summit on the Information Society, the resulting Doha Action Plan
> will
> focus on utilizing the full potential of information and communication
> technologies to "connect the unconnected and accelerate the pace of social
> and economic development," the ITU says. Approximately 1000 delegates from
> government, the private sector and international and regional
> organizations
> were expected to attend WTDC 2006, which continues through March 15. ARRL
> Technical Specialist Jon Siverling, WB3ERA, tracked US preparations for

> the
> conference.
>
> * DXCC Honor Roll deadline looms: The deadline for the next ARRL DXCC
> Honor
> Roll list is rapidly approaching. In order to appear in next list, which
> will be published in August 2006 QST, operators must be current on the
> DXCC
> Honor Roll as of March 31, 2006--the last day applications may be
> postmarked. To qualify for the DXCC Honor Roll, operators must be within
> the
> numerical top 10 of the overall entities on the DXCC List. Since there are
> 335 current entities on the DXCC List, the minimum level to make the Honor
> Roll is 326 current entities. Deleted entities do not count toward DXCC
> Honor Roll. Wall plaques remain available for those currently or
> previously
> on the Honor Roll. The DXCC Web site has the order form and more
> information
> <http://www.arrl.org/awards/dxcc/>.
>
> * DX still king for 90-year-old radio amateur: Veteran DXer and contester
> John Thompson, W1BIH, has been largely out of the game since disposing of
> his tower, antennas and linear and moving into a retirement community in
> Massachusetts last year. But the DXCC Honor Roll member held onto his
> transceiver and his desire to work the few rare ones he lacked. When the

All
More to come about this program and how they did it in Kent County. Stay tune. Tom

Subject: Ham in a Day..

Hi all, I would like to congratulate and welcome 23 new hams to the community..

In our very long Ham in a Day Session we were able to get a 100% success rate!!! We had 23 people take the class, 23 people take the test and 23 people pass it.

I will have another write up with more details on it very soon!

Now, since today was so successful we have already scheduled another class for April 15th 2006 it will run the same way..

30.00 Per person, including your testing fee and materials!

To sign up please email jeffnawrot@...

8AM until 5PM

435. Re: gel cell float charger project

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-13 17:55:38 UTC
From: Laryn Lohman
Topic: 334 Message: 435

The charger at Meijer's sounds like a decent deal. It will bring a discharged battery back to full charge much quicker than a float charger set at a regulated voltage (usually around 13.60 volts). A float charger will fully charge a battery, but it takes a lot longer because the charge rate falls off rapidly as the battery approaches the float voltage.

So use the Maijer's-type charger to charge after use, then move to a REGULATED VOLTAGE float charger to keep it there, or a type of <smart> charger to handle that for you. Charging a battery long-term with a so-called <trickle charger> available off the shelf somewhere is a good way to fry a good battery in a fairly short time.

Hope this helps...

Laryn K8TVZ

436. Girls on the Run

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-14 00:17:49 UTC
From: Andrew Young
Topic: 436 Message: 436

The Center for Women in Transition will be hosting the Girls on the Run 5K race at 8:00 (for volunteers) am on May 20th in Grand Haven. More details will follow. Please let me know if you plan on volunteering.

For those who participated last year, you should remember the magnitude of this event. There were nearly 1,000 runners including the students and coaches. It was a pretty exciting run with a lot of community support.

I will be sending a volunteer form approximating our count at 10-30 people, but more is better. The run has a lot of corners and uses part of a very busy street in Grand Haven. Please help keep the runners protected.

442. Fw: Monthly Michigan Section News Summary

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-16 22:39:15 UTC
From: Dennis Harriss
Topic: 442 Message: 442

----- Original Message -----
From: "ARRL Web site" <memberlist@...>
To: <n8ctt@...>
Sent: Thursday, March 16, 2006 16:50
Subject: Monthly Michigan Section News Summary

The Hiawatha ARA announces their Ham of the Year, Ralph Watters, N8HXZ. The
Lowell ARC, Grand Rapids ARA and Michigan Amateur Radio Alliance clubs have
jointly chosen their Ham of the Year who is Joe Bell WD8USA. Marinette and
Menominee Radio Club's Ham of the Year is Jim Pearson, KS8O. Congratulations
to all of these honored and deserving individuals from your staff of the
Michigan Section.

A reminder from the MiTN: This daily traffic net for the Michigan area meets
at 7:00PM and invites your participation. MiTN also encourages persons
interested in serving as Net Controls to join in and assist. Spreading this
effort among several persons really helps train new NCSs and keeps our skills
well honed.

Here is a special note from Mark NU8Z. As written, it simply defies any
editing and most importantly, it announces a fun annual event for everyone:

Attention Michigan Hams. Do the low sunspot numbers and worsening HF
conditions have you feeling down? Do you find it difficult to conjure up the
energy needed to get on the air and have some fun like in the old days? Do
you shy away from participating in ham radio related group activities? If
you have any one of, or all of the above symptoms, you may be suffering from
Amateur Radio Dysfunction Syndrome, also know as ARDS.

Fear not! ARDS is a condition that can be treated with proper corrective
actions. It is a fact that 9 out of 10 doctors agree that the best treatment
for ARDS is a good dose of Radio Activity. Doctors also agree that the most
efficient delivery method for ARDS treatment comes in the form of
participation in the 2006 Michigan QSO Party. The number of ARDS patients
seeking treatment in the MiQP has been growing every year. Remember, this is
a yearly condition, and yearly treatments may be needed. Treatment may be
administered in single exposure doses taken in the comfort of your home
(Single Op), or when you travel in your car (Mobile). If you are apprehensive
about taking the treatment when you are alone, you may be treated within a
group session (Multi-op), or as single treatment member of a larger support

group like your radio club. Your treatment support group can compete against other ARDS support groups.

Warning! Dosages should not exceed time periods of over 12 hour. Exposure
times of less than 12 hours may be appropriate depending on the severity of your condition. Remember, even short exposures to MiQP ARDS treatment will be
of benefit to you. If at any time during the MiQP treatment period you experience excessively high fun levels, you should consider terminating or reducing the level of treatment. In rare cases excessively high Fun levels have been known to last for days after the treatment. If these high levels should persist, see your family doctor.

The Michigan QSO Party ARDS treatment should only be taken as prescribed below.

Date /Time: Michigan QSO Party, sponsored by the Mad River Radio Club, from
1600Z April 15th until 0400Z April 16th. Stations may operate the full 12 hours. (12 noon to 12 midnight local Michigan time on April 15th)

Modes and Categories: Phone and CW on 80/40/20/15/10 meters. Single-op, multi-op, and mobile categories. Single-op entries are categorized by output power, QRP (5W or less), Low Power (100W or less), and High Power (greater than 100W)

Multipliers: Work stations once per band and mode. Work other states and
Michigan Stations. MI to MI QSO's are allowed. Work portables and mobiles again as they change county, state or province.

Exchange: Exchange QSO number and location (county for MI stations, state/province or "DX" for others).

Scoring: One point per phone QSO, two points per CW QSO. Count multipliers
once per mode. Multipliers are MI counties for all entries, plus states & provinces for MI entries only. Final score is total QSO points times total multipliers.

Freqs: Suggested frequencies: CW-3545, 7045, 14045, 21045, 28045; Phone-3850, 7225, 14250, 21300, 28450.

Log Submittal: Mail logs no later than 30 days after the contest to: Mad River Radio Club, c/o Dave Pruett, 2727 Harris Road, Ypsilanti, MI 48198 or via e-mail to logs@...

More Information: For complete rules, along with free logging software, log
and summary sheets, see http://www.miqp.org

All kidding aside, the MiQP is a ton of fun. It has been growing in size every year. We expect this year to be even better! There will be stations on
from all 83 counties. Consider making it a club event. This is a great way to get folks on the air. I also ask that you all help spread the word about the 2006 MiQP. Let's all make Michigan Radio Active on April 15th!! 73, Mark NU8Z.

Thanks to all who reported SARs for February, 2006: K8LJG 201, K8ZJU 140, KC8MLD 133, WD8USA 133, K8AE 124, AA8SN 71, K8AMR 69, WB8RCR 47, KV8Z 27, W8RNQ 27, KA8IXC 19, K8FE 18, WB8TKL 14, KD8BGQ 14, N8UN 10, KC8ZCF 9. PSHRs for January, 2006: K8AMR 347, KA8IXC 134, KD8BGQ 133, K8ZJU 120, K8AE
110, K8VFZ 90, WB8RCR 88, KV8Z 77.
OES reports came in from K8COP, KC8ULE, KC8ZCF, and W8RAE. PSHRs and SARs
should be filed monthly with WB8RCR and OES reports with WA8EFK.
<p> 73, Dale

> ==>AMATEUR RADIO POISED TO STAY WITHIN FCC WIRELESS TELECOMMUNICATIONS
> BUREAU
>
> The FCC approved a proposal March 17 to create a new Public Safety and
> Homeland Security Bureau (PS&HSB) that would assume some functions now
> under
> the umbrella of the Wireless Telecommunications Bureau (WTB). But it
```

> appears
> that the Amateur Radio Service--now within the WTB's Public Safety and
> Critical Infrastructure Division, headed by Michael J. Wilhelm,
> WS6BR--will
> remain within the WTB, according to Anthony Dale, Acting Director of the
> FCC's Office of Managing Director (OMD).
>
> "The Critical Infrastructure piece--that's things like taxi cabs, Amateur
> Radio, chemical plants, all that type of thing--those are not public
> safety-specific functions," Dale said in response to a reporter's question
> following the FCC open meeting. "The plan is to keep those in the Wireless
> Bureau."
>
> Creation of the new bureau was a topic of some discussion during a meeting
> earlier this month of the ARRL Executive Committee. With the complete
> details of the reorganization still uncertain, however, the League is
> adopting a wait-and-see attitude for now.
>
> Mika Savir, an attorney advisor within the FCC's OMD, presented the
> proposal
> to the Commission. "By this action, the Commission would take an important
> step to better address public safety, homeland security, national
> security,
> emergency management and preparedness and disaster management," she said.
> "As you know, the Commission has a statutory mandate to assist in
> promoting
> the safety of life and property, as well as the national defense, through
> the use of communications."
>
> An official document spelling out just which functions and services will
> end
> up where has not yet been made public, and even Dale did not appear to be
> entirely clear on specifics. He and others stressed that some PS&HSB
> functions may overlap those of other bureaus.
>
> The FCC said the changes are subject to Congressional notification before
> they become effective. In addition, the Commission must work with the
> National Treasury Employees Union Local 209 to secure its approval for
> issues affecting the Commission's workforce.
>
> The last changes affecting the functions of the WTB occurred in 2003. This
> reorganization has been several months in the planning. Some observers had
> speculated that Amateur Radio would be shifted to the PS&HSB, thus
> removing
> it from the WTB's market-based approach to regulation. Moving some of the
> WTB's current responsibilities to the new bureau, however, could speed up
> the process of moving Amateur Radio-related proceedings through the
> Commission.
>
> The PS&HSB will have three divisions: Policy, Public Communications

> Outreach
> & Operations, and Communications Systems Analysis. In addition, the bureau
> will have a front office consisting of senior leadership and management
> staff.
>
> The new bureau would be the seventh within the FCC. Commissioner Michael
> Copps said the proposed reorganization goes beyond "reshuffling" of the
> bureaucracy. He expressed the hope that creation of the new Public Safety
> and Homeland Security Bureau would be viewed as "the first step in putting
> the FCC out front--where it long should have been--in providing
> communications security for all Americans in this dangerous age."
>
> The Commission voted unanimously to approve creation of the new bureau.
>
> ==>"HELLO" CAMPAIGN PROVIDES RALLYING POINT TO PROMOTE AMATEUR RADIO
>
> The first components of the ARRL's "Hello" Amateur Radio public relations
> campaign now are available. "This campaign will give hams the tools they
> need to reach out in their communities to non-hams and influence their
> perception of Amateur Radio," says ARRL Media and Public Relations Manager
> Allen Pitts, W1AGP, who conceived the campaign and is its principal
> Headquarters contact. The "Hello" campaign is aimed at recasting Amateur
> Radio in the light of the 21st century and focusing on its universal
> appeal.
> At the same time, it will mark the 100th anniversary of what many
> historians
> consider the first voice radio broadcast in 1906 by Reginald Fessenden.
>
> "For years, ARRL public information officers (PIOs) and others interested
> in
> promoting Amateur Radio have been looking for leadership and a rallying
> point from which we can join together in a major promotion for ham radio,"
> Pitts said. This is it! Tools include a distinctive "Hello" Web site
> <http://www.hello-radio.org/> and radio and TV public service
> announcements.
>
> Based on the word "Hello," which Pitts calls "possibly the most pleasant
> word in any language," the coordinated campaign will set "a positive,
> upbeat
> tone that highlights the international capabilities of Amateur Radio," he
> explained. The "Hello" Web site is designed for non-hams to learn a little
> bit about Amateur Radio and to arouse more interest. The site points
> prospective Amateur Radio licensees to groups that have indicated they
> will
> provide a warm welcome to newcomers. The national "Hello" campaign can
> bring
> curious people into contact with ham radio groups, but it will be up to
> local radio amateurs to make them truly welcome, Pitts maintains.
>
> "The key to creating a new ham operator is to develop a relationship with

> a
> current ham operator," says Pitts. Behind the effort is "an army of
> dedicated, truly motivated PIOs and others who want to see ham radio
> flourish."
>
> A series of 30-second radio public service announcements (PSAs)
> <http://www.arrl.org/pio/pr.html> has been developed for the "Hello"
> campaign. "You can help by downloading the PSAs from the ARRL Web site
> onto
> a CD and taking it to your own local radio station," Pitts suggests.
>
> A broadcast-quality video for the "Hello" campaign will be available in
> April.
>
> Copies of the special four-page "Hello" brochure
> <http://www.arrl.org/pio/hello/Hello-Campaign-Brochure.pdf> are available
> from ARRL Headquarters for use during presentations to non-ham groups.
> (Full
> details on the "Hello" campaign plus a pull-out copy of the brochure are
> available in the April issue of QST.) The brochures are suitable for talks
> to schools, clubs, displays and other venues promoting Amateur Radio to
> the
> public. There is a space on the back page to add local club info.
>
> "For 100 years, the magic of the human voice over radio has brought
> imaginations to life. It opened a whole new era of human communication,"
> the
> brochure declares, urging, "It's your world. Get on the radio and say
> "Hello."
>
> To obtain copies, e-mail the "Hello" campaign <hello@...>. Donations
> are welcome (make checks out to "ARRL") to help cover return postage to
> ARRL, Public Relations, 225 Main St, Newington, CT 06111.
>
> "Hello" logo bumper stickers will be on sale through the ARRL on-line
> catalog <http://www.arrl.org/catalog/?item=9731>. Buttons for the "Hello"
> campaign will be available at Dayton Hamvention and at other major Amateur
> Radio events. Banners for the "Hello" campaign will be flying at Dayton
> Hamvention and at the National Association of Broadcasters convention in
> April. After that, they will be made available for use at major events in
> 2006.
>
> "ARRL President Joel Harrison, W5ZN, was correct in stating that the Main
> Street of today is not the same as the Main Street of yesteryear," Pitts
> says. "To reach out today, the very first requirement is that Amateur
> Radio
> operators be perceived as friendly and trustworthy. That's a true public
> relations goal and the primary focus of the campaign."
>
> ==>SPACE QSO HELPS INTRODUCE AMATEUR RADIO TO GERMAN STUDENTS

>
> Twenty-one soon-to-be radio amateurs attending the Evangelisches Gymnasium
> in Lippstadt, Germany, talked shop with ISS Expedition 12 Commander Bill
> McArthur, KC5ACR, on March 8. The Amateur Radio on the International Space
> Station (ARISS) program arranged the direct VHF QSO between DN2LP at the
> school and NA1SS in space. The school incorporated ARISS lesson plans into
> its curriculum, and all of the participating students had already passed
> their Amateur Radio exams and are awaiting their new call signs. One
> student
> wanted to know if McArthur had ever taken an insect into space by
> accident.
>
> "Yes, on shuttle missions we would very often see mosquitoes, because
> Florida is a place that has so many," McArthur responded. "They seem very
> confused and die very quickly."
>
> Other students at the school--which accommodates youngsters and youth
> between the ages of 10 and 19--were curious about the effects of
> microgravity. One girl wanted to know if it was possible to have a runny
> nose in zero G.
>
> "Fortunately, we don't get sick on orbit very much and therefore don't get
> runny noses," McArthur explained. "But we do experience head congestion
> because of the shift of fluids from our legs to our upper body and head."
>
> McArthur also told the students that a candle cannot burn in space because
> microgravity prevents the necessary convection currents from forming, and
> if
> you were to cry, tears would not be shed but gather around the eye
> instead.
>
> All of the students at the church-run school have been studying physics.
> One
> of the QSO participants asked how much of the ISS depends on electricity.
>
> "Everything we have onboard is electrical," McArthur replied. "The primary
> uses of electricity are heater and our fans and pumps." The solar arrays
> on
> the ISS can produce approximately 18 kW of power right now. When the space
> station is completed, its power production will jump to 110 kW.
>
> One student stumped McArthur with his question, "Which state law is
> recognized on the ISS?" Responded McArthur to the amusement of the
> students
> and the audience: "You got me on that one. I just don't have an answer."
>
> Some 900 students attend the school, located in the state of North
> Rhine-Westfalia. Control operator Ralf Karrasch, DF4DC, and teacher Daniel
> Ahrens, DO7DAN, supported the participating students in preparing to take
> their ham radio license examinations, reports ARISS Mentor Peter Kofler,

> IN3GHZ, noting that everyone who took the test passed. "Congratulation to
> the new members of our worldwide radio ham family!" he commented.
>
> A team of radio amateurs from local clubs set up the satellite station at
> the school that included automatic antenna tracking on the primary
> station,
> Kofler said. The station equipment was located in the huge assembly hall,
> where an audience of 400 students, parents and teachers followed the
> contact. The NA1SS signal was loud and clear throughout the nearly
> 10-minute
> contact, which drew cheers and applause from students and audience as it
> ended.
>
> The QSO attracted the attention of German news media. Westdeutscher
> Rundfunk
> (WDR) TV and radio and Hellweg Radio covered the ham radio event, which
> was
> broadcast live on the two radio channels. An article touting the
> successful
> ham radio contact appeared the following day in the local newspaper Der
> Patriot.
>
> The Lippstadt contact marked the 30th ARISS school QSO McArthur has
> handled--by far a record for any ISS crew member.
>
> ARISS <http://www.rac.ca/ariss> is an international educational outreach
> with US participation by ARRL, AMSAT and NASA.
>
> ==>DONATIONS HELP LEAGUE MAKE HEADWAY AGAINST BPL INTERFERENCE, OTHER
> THREATS
>
> Contributions to the ARRL Spectrum Defense Fund have helped the League to
> make significant progress in the battle against interference from
> Broadband
> Over Power Line (BPL). But the fight's not over, says ARRL CEO David
> Sumner,
> K1ZZ, who calls the BPL effort "one of the most important" the ARRL has
> ever
> undertaken to protect Amateur Radio spectrum." Thanks in part to the
> generosity of League members, however, Sumner offered up some good news as
> the Spring 2006 Spectrum Defense Fund campaign kicks off
> <https://www.arrl.org/forms/fdefense/2006/spring/>.
>
> "Contrary to the predictions of its shameless promoters, 2005 was not a
> big
> year for BPL," Sumner said in a letter to League members. "The number of
> cities in which BPL service was widely available to consumers was the same
> at the end of the year as at the beginning: two." Cable and DSL providers
> add more new broadband customers in a single morning than have ever been
> served by BPL, he said. Sumner also pointed to shutdowns of BPL trials in

> Pennsylvania and Idaho.
>
> "Most utilities that have looked at BPL have decided not to pursue it," he
> said. But Sumner cautions that Amateur Radio cannot count on BPL's "likely
> failure in the marketplace" to keep the radio spectrum safe from
> pollution.
>
> The ARRL has been in the forefront of raising the visibility of the BPL
> radio interference issue, Sumner asserted. "We have kept after the FCC to
> correct ongoing spectrum pollution from BPL, particularly from the
> much-ballyhooed system in Manassas, Virginia." At the same time, the
> League
> has cooperated with BPL companies that take the interference issue
> seriously
> and design their systems to avoid it.
>
> "The ARRL is not opposed to BPL, but we remain steadfastly opposed to
> interference caused by BPL systems," Sumner stressed.
>
> Spectrum Defense Fund contributions have enabled the League to petition
> the
> FCC to "properly draw the line between BPL systems that can be deployed
> without serious harm to radio communication and those that
> cannot"--something the current BPL rules don't do. Until such rules are in
> place and properly enforced, "we won't let the spectrum polluters and
> their
> apologists off the hook," Sumner said, adding that the League also will
> keep
> after the FCC to "do the right thing."
>
> In the meantime, Sumner says, BPL companies that take interference
> seriously
> are gaining traction at the expense of those that deny the problem exists.
> "This is no accident," he said. "It's the result of the ARRL's relentless
> media relations efforts to keep radio interference at the center of the
> BPL
> discussion."
>
> While it's attracted much of the attention in recent years, BPL is just
> one
> of many threats to the Amateur Radio spectrum we enjoy. "A dedicated team
> of
> volunteers and staff works constantly on your behalf," Sumner said. He
> notes, for example, that the League is attempting to leverage the
> five-voice-channel "toehold" it obtained for Amateur Radio in the vicinity
> of 5 MHz into something more like a traditional amateur allocation.
>
> Sumner concluded by pointing out that membership dues alone don't cover
> the
> costs of protecting, promoting and advancing the Amateur Radio Service.

> Members may contribute to the Spectrum Defense Fund via the ARRL's secure
> donations Web page
> <https://www.arrl.org/forms/fdefense/2006/spring/fdefense.html>.
>
> ==>AMATEUR RADIO EMERGENCY SERVICE ACTIVATES IN TORNADOS' AFTERMATH
>
> Amateur Radio Emergency Service (ARES) teams in Missouri this week
> assisted
> emergency managers in that state with damage assessment after a huge
> string
> of tornados swept through the nation's midsection March 12. Nine people
> were
> reported dead in Missouri and one in Indiana in the aftermath of the
> severe
> weather. Missouri Section Emergency Coordinator Don Moore, KM0R, told ARRL
> that he and three other radio amateurs deployed March 13 as a
> "quick-response team" to Pettis County, Missouri, just south of Sedalia
> along US Route 65 to support the county's emergency operations center
> (EOC).
>
>
> "There was some major wind through here," Moore told ARRL. The severe
> weather damaged or took down utility lines along US Route 65 and
> elsewhere.
> The Pettis County Emergency Management Agency requested the ARES call-up.
> Nine ARES members ultimately activated to help seven damage-assessment
> teams. ARES stood down later the same day.
>
> ARES handled minimal voice traffic, Moore said. While the ARES group was
> prepared to pass damage assessments to the EOC via WinLink 2000, that
> turned
> out not to be necessary. The ARES team did communicate with the Missouri
> Emergency Management Agency to demonstrate Winlink from the field, he
> added.
>
>
> Missouri appears to have been the state hardest hit by the weekend storms,
> which generated hail said to have been the size of softballs. Damage in
> the
> Show-Me State stretched from west to east, with houses reportedly
> destroyed
> along a 20-mile path south of St Louis.
>
> Tornadoes also struck Kansas, where the University of Kansas canceled
> classes March 13 due to safety concerns. The school, located in Lawrence,
> reportedly suffered damage to nearly two-thirds of its buildings, but no
> serious injuries were reported. Salvation Army Team Emergency Radio
> Network
> (SATERN) members were requested to deploy the SATERN Mobile Generator
> Trailer when the storms knocked out power in Douglas County, Kansas.

>
> SATERN Kansas State Coordinator June Jeffers, KB0WEQ, reports that SATERN
> members moved the generator from Olathe to Lawrence, keeping in touch with
> the emergency nets along the way. SATERN and ARES members in eastern
> Kansas
> remained on standby in case they were needed.
>
> In Arkansas, Section Manager David Norris, K5UZ, reports Franklin County
> ARES/RACES and Sebastian County RACES activated SKYWARN nets over the
> weekend. "Northwest Arkansas was hammered late last night with quite a bit
> of damage in Centerton," he told ARRL March 13. He reported several people
> injured and considerable property damage.
>
> Arkansas SEC J.M. Rowe, N5XFW, reported SKYWARN nets were active as the
> severe weather approached.
>
> In Illinois, Section Manager Sharon Harlan, N9SH, noted that severe storms
> rolled across her state March 12. Houses and businesses throughout the
> capital city of Springfield were damaged or destroyed, and roads into the
> city had to be closed.
>
> The violent weather developed from a line of thunderstorms that stretched
> from the southern Plains and into the Ohio valley. Twisters also hit
> Oklahoma.
>
> ==>MISSISSIPPI BECOMES 22nd STATE TO ADOPT PRB-1 STATUTE
>
> After several earlier tries, Mississippi this week became the 22nd state
> to
> revise its statutes to incorporate the language of the limited federal
> preemption known as PRB-1. Mississippi Gov Haley Barbour signed the bill
> March 13, reports ARRL Mississippi Section Manager Malcolm Keown, W5XX.
> Echoing the language of PRB-1, the new law calls on localities
> establishing
> ordinances regulating antenna placement, screening or height to
> "reasonably
> accommodate" Amateur Radio communication. The Mississippi measure also
> takes
> note of Amateur Radio's communication support in emergencies and
> disasters.
>
> "This legislation supports the Amateur Radio Service in preparing for and
> providing emergency communications for the State of Mississippi and local
> emergency management agencies," the statute reads. The new PRB-1 provision
> became law when Barbour signed it.
>
> The new law provides that local land use regulation ordinances involving
> the
> placement, screening, or height of amateur radio antenna structures "must
> reasonably accommodate amateur communications and must constitute the

> minimum practicable regulation to accomplish local authorities' legitimate
> purposes" to address health, safety, welfare and aesthetic considerations.
> Under the new law, local authorities will determine the types of
> reasonable
> accommodation to be made and the minimum practicable regulation necessary
> to
> address these purposes "within the parameters of the law."
>
> "We now have a Mississippi PRB-1 Law on the books!" Keown exulted in a
> message to Mississippi League members. Keown this week called on his
> section's members to contact all those involved and thank them for
> contributing to the success of the PRB-1 legislation. Similar bills were
> introduced this session in the House and Senate, but the House version, HB
> 736, was the successful measure. The Senate version of the PRB-1
> legislation, SB 2709, passed the full Senate but died in committee in the
> House.
>
> Keown says efforts have been under way since 2001 to get such legislation
> through the Mississippi Legislature. In past years, PRB-1 bills have made
> it
> through one legislative chamber only to die in committee in the other. A
> ceremonial signing of the PRB-1 legislation will be scheduled after the
> legislative session ends.
>
> ==>SOLAR UPDATE
>
> Solar swami Tad "I'll Follow the Sun" Cook, K7RA, Seattle, Washington,
> reports: Average daily sunspot numbers and solar flux values were down
> just
> slightly this week when compared to last, and the geomagnetic indexes were
> up just a bit. We only saw one day with zero sunspots, and there weren't
> any
> really stormy days with high geomagnetic K and A indices.
>
> The prediction for the next few days is a solar flux value of 75, and, in
> fact, that continues in Thursday's prediction from the US Air Force for
> the
> next 45 days. The USAF also predicts Sunday, March 19, will be a day of
> geomagnetic activity, with a planetary A index projected to reach 20. The
> five-day projection for planetary A index from March 17-21 is 8, 8, 20, 15
> and 12. This slightly higher activity is based on what was occurring in
> the
> area of the sun that will be facing us this weekend, looking back to
> February 19-22 when the planetary A index was 6, 20, 17 and 12.
>
> This projection for geomagnetic activity seems shared this week by
> Geophysical Institute Prague, which projects quiet conditions for March
> 17,
> 22 and 23, quiet to unsettled for March 18, unsettled for March 20 and 21,
> and unsettled to active on March 19.

>
> Sunspot numbers for March 9 through 15 were 12, 12, 0, 18, 14, 34 and 22,
> with a mean of 16. 10.7 cm flux was 72.9, 72.2, 74, 73.2, 72.6, 73.6, and
> 74.2, with a mean of 73.2. Estimated planetary A indices were 4, 12, 12,
> 6,
> 3, 4 and 7, with a mean of 6.9. Estimated mid-latitude A indices were 3,
> 9,
> 9, 3, 2, 2 and 6, with a mean of 4.9.

> ==>IN BRIEF:
>
> * This weekend on the radio: The SARL VHF/UHF Contest, the 10-10
> International Mobile Contest, the BARTG Spring RTTY Contest, the Russian
> DX
> Contest, the AGCW VHF/UHF Contest, the CLARA and Family HF Contest, the
> Virginia QSO Party, the UBA Spring Contest (6 meters), the 9K 15-Meter
> Contest and the Run for the Bacon QRP Contest are the weekend of March
> 18-19. JUST AHEAD: The CQ WW WPX Contest (SSB), the UBA Spring Contest (2
> meters), and the Spring QRP Homebrewer Sprint are the weekend of March
> 25-26. See the ARRL Contest Branch page <http://www.arrl.org/contests/>
> and
> the WA7BNM Contest Calendar
> <http://www.hornucopia.com/contestcal/index.html> for more info.
>
> * ARRL Certification and Continuing Education course registration:
> Registration remains open through Sunday, March 19, for these ARRL
> Certification and Continuing Education (CCE). Program on-line courses:
> Amateur Radio Emergency Communication Level 1 (EC-001), Radio Frequency
> Interference (EC-006), Antenna Design and Construction (EC-009),
> Technician
> Licensing (EC-010), Analog Electronics (EC-012) and Digital Electronics
> (EC-013). Classes begin Friday, April 7. NOTE: Because Technician
> Licensing
> (EC-010) courses beginning in April are based upon the current question
> pool, students completing these April classes should take the FCC
> Technician
> class (Element 2) examination by June 30. A *new* Element 2 question pool
> goes into effect July 1. To learn more, visit the CCE Course Listing page
> <http://www.arrl.org/cce/courses.html> or contact the CCE Department
> <cce@...>.
>
> * AMSAT names Director of Education: AMSAT-NA has named H. Paul Shuch,
> N6TX,
> as its Director of Education. An AMSAT Board of Directors member, Shuch
> received his doctorate from the University of California-Berkeley and has
> an
> extensive background in teaching, curriculum development, communications,
> and engineering. AMSAT says Shuch's highest priority will be integrated

> curriculum development at all educational levels, with an emphasis on
> using
> satellites in the classroom, to enhance the teaching of science, math,
> geography, social studies, technology, and the social sciences. "I will
> invite all teachers within AMSAT to share with me their current, past, or
> planned use of satellites in the classroom, their instructional materials,
> and their desires in terms of future curricular development," Shuch said.
> AMSAT already participates in the Amateur Radio on the International Space
> Station (ARISS) program, which helps to educate about human spaceflight
> and
> offers youngsters a chance to speak with the ISS crew via ham radio. Shuch
> says he'll seek ways to encourage ARISS schools and teachers "to take the
> next step, with programs to leverage that enthusiasm into an ongoing
> interest in math, science and Amateur Radio." Among other initiatives, he
> also wants to bring satellite builders and satellite users together in an
> educational setting and get satellite developers "fired up about
> supporting
> the classroom use of their creations."
>
> * CUTESats get OSCAR numbers: AMSAT has issued OSCAR numbers to the CUTE
> (CUbical Tokyo Institute of Technology Engineering) satellites. CUTE 1,
> launched in June 2003, is Cubesat-OSCAR-55 (CO-55), and CUTE 1.7, launched
> in February 2006, is Cubesat-OSCAR-56 (CO-56). CO-56 now is transmitting a
> CW signal with housekeeping data. The downlink is 437.385 MHz, and the CW
> is
> about 50 WPM. The satellite's call sign is JQ1YGW. The command team asks
> anyone receiving the satellite to report any data collected for further
> study <http://lss.mes.titech.ac.jp/ssp/cute1.7/ireceived_e.html>. The
> latest
> version of the CW telemetry decoder software is available on the Lab for
> Space Systems/Tokyo Institute of Technology Web site
> <http://lss.mes.titech.ac.jp/ssp/cute1.7/software_e.html>. More
> information
> on CO-55 and CO-56 is on the CUTE Web site
> <http://lss.mes.titech.ac.jp/ssp/cubesat/index_e.html>.
>
> * NASA honors TV journalist, anchor Walter Cronkite, KB2GSD: NASA has
> honored legendary CBS TV news anchor Walter Cronkite, KB2GSD, for his
> coverage of the US space program. Cronkite, who has narrated two ARRL
> Amateur Radio videos, received the Ambassador of Exploration Award
> February
> 28. "His marathon, live coverage of the first moon landing brought the
> excitement and impact of the historic event into the homes of millions of
> Americans and observers around the world," NASA said in announcing the
> award. NASA is presenting the Ambassador of Exploration Award to the 38
> astronauts and other key individuals who participated in the Mercury,
> Gemini, and Apollo space programs for realizing America's vision of space
> exploration from 1961 to 1972. Cronkite is the first non-astronaut and
> only
> NASA outsider to receive the award, which consists of a small, encased

> sample of lunar material mounted for public display. Cronkite is the
> best-remembered journalist for his commentary and enthusiastic coverage of
> the historic progression of missions from the early Mercury launches,
> through the ground-breaking Gemini missions, to the Apollo 11 and
> subsequent
> moon landings.
>
> * DXCC Desk approves operation for DXCC credit: The ARRL DXCC Desk has

446. Oakfield Townishp / Kent County / MI Tower Ordinances

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-19 19:35:36 UTC
From: Michael J. Wolthuis
Topic: 446 Message: 446

It appears I may be moving from downtown Grand Rapids to near Lincoln Lake Road and M-57 in Northern Kent County. I need to start findind guidlines for putting in a tower. I have not been able to find any info on Oakfield Township. Can anyone on this list point me in the right direction so that I can be prepared and buy the right size tower and get the appropriate approvals.

Thanks,
Mike Wolthuis

The easiest way is to not put up a tower for a ham antenna. Put one up for a TV antenna. Use the TV antenna for 2 meter sideband and after a few Sundays start putting up your ham antennas.

The laws are different and much more relaxed for TV antenna towers.

73,

Mark K8MHZ

YYYYYYeeeeeaaaaaah. He has a few alright. Didn't catch any Regencys in the pix though, but they're probably there somewhere. I still have the first 2M rig I owned, a Regency HR2MS. It cost me around $350 as I recall, c1972. That was several weeks pay for many people back then, and ALL the rig did was scan, with a whopping 6 transmit and 8 receive channels, crystals of course. I think the rigs of today are a bargain for what you get.

453. Music to my ears

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-23 02:59:00 UTC
From: K8MHZ
Topic: 453 Message: 453

I am sitting here listening to Jean KC8WSE passing traffic on the West Michigan Traffic Net.

How does she do it ????

She is totally amazing!!

When I grow up I want to be just like Jean! Jean is the only ham I know that can pass traffic with such skill and grace, such unrivaled accuracy, her voice is like music, and she can do it...blindfolded!

Nice job as well for Doc.

It is a pleasure and an honor to have such fine operators as friends.

73,

Mark K8MHZ

454. Music, cont'd

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-23 03:04:05 UTC
From: K8MHZ
Topic: 454 Message: 454

And let's not forget David, KC8WGA, a 13 year old General that is now passing traffic. He does a fine job. If I NEVER grow up I want to be just like David.

Some fine ops on the link.

73,

Mark K8MHZ

455. manual CH 704

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-24 02:04:27 UTC
From: Jim KC8PCJ
Topic: 455 Message: 455

I was given an aqua guide CH 704 direction finding radio today. It is in very good condition but I do not have a manual for it. It was made by aqua meter instrument corp. Any one have any idea where I can get a manual. I have done some searching on the web but have not had any luck in finding one yet.

456. TV 8 - Special on the April 3, 1956 West Michigan Tornadoes

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-25 02:39:47 UTC
From: Tom VanderMel
Topic: 456 Message: 456

Good evening,

The next few weeks are special. A lot of effort has been put forth towards this 50th anniversary of the F5 tornado that tore through West Michigan on April 3, 1956.

Hudsonville Emergency Services has been heavily involved in projects associated with commemorating this anniversary and we have received support & encouragement from many. Some of this work has contributed significantly to this TV-Special through providing materials, facts, research, and through working with the Producer.

We are sincerely very thankful & grateful for the help we have received from OCEC and WMSAR in the past.

Would you please help us get the word out about these upcoming special events? An anniversary such as this is a once-in-a-lifetime opportunity to encourage our communities to be ready!

TV Special

Tracking The Storm: 50 Years Later
Wood TV 8, WOTV 4
Monday, March 27 @ 7pm
http://www.woodtv.com/Global/story.asp?S=4673320&nav=menu44_13

Over 1,000 images can be found at: www.godandneighbor.com Many of these, I am confident, will be included in the TV-special.

Commemoration:

The National Weather Service and the City of Hudsonville are hosting a commemorative even on April 3, 2006 at 5:30 PM. This event is for survivors and eyewitnesses only. If you know of someone who is a survivor or eyewitness and would like to attend this event, they must RSVP. Please call 616-669-0200 X421 to request an invitation. Time is running out!

Public Open House:

The City of Hudsonville is also hosting a public open house on Saturday, April 22 from 10am to 2pm.

Additional information on that can be found under "Events, Press Releases" at www.godandneighbor.com or www.hudsonville.org/ES

Thank you to many of you for your encouraging words throughout these efforts.

Sincerely,

John Klaassen
Director

Hudsonville Emergency Services

Ottawa County, Michigan

I have 5 Amateur Radio volunteers so far- Is everyone else going to Dayton?

The Center for Women in Transition will be hosting the Girls on the Run 5K race at 8:00 (for volunteers) am on May 20th in Grand Haven. More details will follow. Please let me know if you plan on volunteering.

For those who participated last year, you should remember the magnitude of this event. There were nearly 1,000 runners including the students and coaches. It was a pretty exciting run with a lot of community support.

Date: 2006-03-26 01:20:19 UTC
From: Linda Rosenthal
Topic: 461 Message: 461

Hello, all:

The MAARC web site has been updated to include the following link for Field Day:
http://www.qsl.net/w8zho/fd2006.html

The site is confirmed and we have permission to camp overnight at Fruitland Township Park, a marvelous venue!

Look for updates on this site as we near the time for this annual "show" of our skills as a club in the field.

We're in the early planning stages, but we've got smooth sailing and continuing offers of good help. Questions are welcome.

73,
Linda, AB8QH, and Jon, AB8RD
MAARC Field Day Co-Chairs

John,

You should have picked up a few of the red LED ones you can set on the ground last Saturday. They were $10 each.

And I think we are actually moving from calling them rotating lights to "portable visible-spectrum electromagnetic wave intermittent transmitters." This is more in line with Amateur Radio terms.

Thanks for the laugh.

469. speaker question

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-26 17:40:07 UTC
From: paul
Topic: 469 Message: 469

Morning,Can I use an old pair(powered,volume control on speaker)of computer speakers,and feed it 2 sources?Use a Y-adapter to connect 2 scanners to the 1 pair of speakers.Or a info source to do so.

Hi Paul,

Sure, no tech issues with connecting 2 scanners to 2 speakers.

You can also use audio isolation transformers to use 1 speaker with 2 scanners.

Just be aware of impedance. No 4 or 2 ohm speakers on an 8 ohm output. a 2:1 mismatch in audio is a bad thing if you turn the volume up all the way!

Have fun,

Mark K8MHZ

Thanks Mark,I've been doing the 1:1 iso.thing with sound card packet interface,I should have thought of it. Yeah 2 audio inputs(y adapter)to one speaker just didn't feel right.

Probably would be a good idea to run the audio through isolation transformers.

Mike,

Before doing anything, get a copy of the zoning ordinance for Oakfield Township and find out what it says about height and antennas.

You didn☐t say how high you were looking to go with your tower. Most townships in Kent County limit building heights to 35 ft, some have antenna exemptions. If your only going 40 ft, I wouldn☐t worry about it. But if your going 100 feet, it only takes one #@&$ neighbor complaining to the township office to create lots of problems.

The township I live in allows ham towers, but you need to obtain a building permit for over 35 feet (considered an ☐accessory structure☐) and observe setbacks, etc. Some townships just plain have a 35 foot limit without provisions for ham towers.

One township in this area, a ham was inquiring about erecting a tower and was told by a township official 35 feet was the limit. Upon acquiring a copy of the ordinance, we read where the 35 foot limit exempt Amateur Radio and some other communication antennas. When the township official was asked ☐OK, where in the ordinance are ham towers limited to 35 feet☐. The answer was it wasn☐t, tower went up. This of course refers to what was stated at the beginning of this reply, READ THE ORDINANCE!

To all hams. Whenever your city or township starts looking at antenna/tower/height regulations, find out what☐s going on, contact all hams and CBers in the city/township, and get involved to stop the anti-antenna sentiment that☐s going on. EVEN IF YOU NEVER INTEND TO ERECT A TOWER, that should be YOUR decision. Don☐t let the city/township make that decision for you.

Mike, keep us informed what you find out.

477. Severe Weather Awareness Week

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-03-28 03:39:05 UTC
From: Tom VanderMel
Topic: 477 Message: 477

All,
Just a reminder that this is Severe Weather Awareness Week in MI as declared by the Governor.

The big event will take place Wednesday between 11 am and noon and it will be a good time for businesses and
schools to test their Tornado Shelter Drill procedures and for those of you who receive print outs of those products to
validate their receipt.

At 11 am the Storm Prediction Center will issue a Test Tornado Watch. World Meteorological Code (WMO) WOUS64 KWNS also called the WOU

This will be tone alerted on the NOAA All Hazards Weather Radio as a Required Weekly Test (RWT)

Shortly after WFO GRR will issue the Test Watch County Notification (WCN). WMO header WWUS63 KGRR.

Around 11:15 am a Test Tornado Warning TOR will be issued and also alerted with the RWT code on the NOAA All Hazards
Weather Radio. WMO Code WFUS53 KGRR.

The TOR will be cleared a few minutes later.

The Watch will be cleared prior to Noon using the WCN.

Again this is a great opportunity for schools, businesses and homes to test their shelter plans. Remember NOAA All Hazards Weather Radios should be as common in buildings as smoke detectors.

Thanks for your help in making this a successful Awareness Week,
Mike

Hmm... can't help wondering if the ARRL could use this with their Hello... err, Hallo... program. Sadly enough, I watched it long enough to watch the daisies obliterate the screen. The "dance" is vaguely similar to the one that I threaten to do for my sons when we are in public places - especially in the presence of their friends. Is there a clear point at which fond childhood memories become disturbing dreams and emotional scarring? Ham radio and public humiliation - just a couple of hobbies I can share with my children.
Gotta go - gotta dance!
:-)

Grounding of a Horizontal Antenna
I have a very basic question, and although I'm worried about showing my ignorance on this subject, let me try. I have a horizontal receive only antenna strung about 20 feet (6 m) high in the back yard. Simple wire (not coax), that runs into a window and then into my radio.
When a lightning storm is nearby, I unplug it from the radio. Besides being concerned about a direct hit on the wire antenna, I am also concerned about voltage surge on the wire from a nearby strike.
There are two options: I can leave the end of the antenna just dangling, or somehow ground it. My questions relate to the pros and cons of grounding, or not grounding the antenna. Everything I've read says to ground unused items, antenna towers, etc.
I guess part of this question is also if you do ground it, is it that now there is less likelihood of an actual strike on it, or is it that if there was a strike, it would have an easy path to ground and not damage the antenna?
So, does grounding (a) help prevent strikes, or (b) save the item?
Thinking about this, I guess I should ask the purpose of the lightning rods on barns in the same context: do these help prevent, or...? But, doesn't grounding "just" provide the path to ground that the lightning stroke is "looking for"? Wouldn't having it floating be better?
Thanks,
Bob
Answer by Abdul M. Mousa: We receive many basic questions of this type. In such cases, we usually provide personal replies rather than post them to avoid disturbing the many experts among our 1800 members. I am making an exception this time as posting may satisfy the needs of many others.
First, let me say that the probability that lightning will strike a 6 m (20ft) high, short horizontal wire in the backyard of a house is extremely small. Hence, from the practical point of view, it may not make any difference whether the wire is grounded or not. Also, a nearby strike to such a short wire is unlikely to produce a significant surge magnitude.
However, if the wire receives a direct strike, then leaving one end "dangling" inside the house could lead to a spark that may start a fire or injure a person. Hence it would be prudent to ground it. This way, same as in case of lightning rods, lightning would be safely discharged to ground.

Assuming that the wire was long enough (say several kilometers) and other factors (height, keraunic level, etc...) were such that the wire receives a significant number of lightning strikes, then the frequency of lightning strikes will be independent of whether the wire is grounded or floating.
By the way, the overhead shield wires on power lines used to be bonded to each tower, i.e. grounded. This, however, generates circulating currents via 60 Hz electromagnetic induction. The related power loss is significant.
For several decades, many utilities have been insulating the shield wires to avoid the power loss and or to serve other purposes, e.g. using the shield wires as communication circuits. It is established, both theoretically and via field observation, that such a floating condition neither affects the frequency of lightning strikes nor impair the shielding function ability of those wires [1].

Comment by R.T. Hasbrouck: Growing up in the humid Northeast offered many opportunities to experience the unbridled exuberance of summer thunderstorms. As a teenager, there was my own unplanned lightning "experiment." When my amateur radio equipment wasn't being used, I generally made a practice of disconnecting and grounding the antenna lead-in wire. Awakened one summer night by sounds of distant thunder, I was startled to see the corner of my darkened bedroom, where the ham station was located, being illuminated periodically by a blue glow. Upon closer investigation I saw arcing between the inadvertently unterminated lead-in wire and a nearby point that was grounded. From the thunder that followed shortly after each spark, I estimated ("flash tobang" interval of five seconds equals about one mile) the storm to be from 10 to 15 miles away. My antenna was picking up enough of the lightning□s' horizontally-polarized radiated energy to produce sparks an inch long.
Grounding provides a preferential path for lightning current to follow. So, provide a good pathway, and pay attention to where it runs.
I strongly suggest getting a "lightning arrestor device" (LAD---my term) designed for antennas. The company with which I am familiar is Alpha-Delta---there are others as well. The LAD is located outside your house, and its body is connected to a proper earth grounding point by a suitable conductor. The feed line passes through the LAD before entering your house. Under normal conditions, the LAD is "invisible," i.e., it does not affect your radio reception. When a sufficiently high voltage appears on the feed line, an arc over occurs in the LAD, providing a conductive path to its grounded body. Current will then be conducted to earth. Note that high transient electrostatic voltages, capable of damaging the solid-state front end of a modern receiver, can appear on your antenna from distant lightning, nearby lightning, windblown sand, or snow.In the event of a direct strike to your antenna, the LAD will most likely be destroyed, and other collateral damage may occur. In addition to having an LAD, leaving the receiver disconnected (and unplugged from the ac outlet) will provide the highest level of equipment protection.
Regarding the other question---a lightning strike is a random event. When a structure lacking any kind of lightning protection system is struck, current will follow all conductive paths present---wet brick work, metal water pipes, metal conduit, electrical wiring, etc. The result is unwanted and most likely damaging currents flowing where you wouldn't want them to flow. A structure that incorporates properly designed and installed lightning conductors provides low-impedance, preferential paths directly to earth---external to the structure itself. Damage to the structure will be minimal or non-existent.
Good luck.

George (aka Skip) K8RRA, a new member of this board, is a TV star! I just saw him on the PBS program Great Lakes Ports o' Call describing the Grand Haven Musical Fountain. Nice job Skip!

How timely!

He just joined the reflector today. This may be his first message from the reflector.

Kudos Skip.

Skip,

I got the cables today from RS. The serial does not have a level converter so it can't be used. I can't seem to get the USB cable to work. I am still working on it.

73,

Mark K8MHZ

John, isn't "star" a bit over the top?
It was less than even a cameo appearance.
You might call it true "hamming"...
And then I missed seeing it:-(

Cheers...

Well, yes skip, star was a little over the top, but you did a very good job describing the fountain and the boardwalk, and it was neat seeing someone I know on TV. The show did a very good job covering the lake shore cities from New Buffalo to Ludington.

Hi Skip,

I am not sure, the help file is pretty poor.

The program is called YPlog. I think I got it from DXzone.com

I am still working on it.

Skip,

So far no luck with either the serial cable or the USB on two different computers using two different operating systems.

I think I have been sold a bill of goods. I am waiting for some more info from the guy that said the USB cable worked. Failing that both cables will go back to RS for a refund. I should have known better from someone that made such a claim with no further instruction as how to do it.

Buxxcomm has a CI-V cable for about 8 bucks plus shipping. I really prefer not using mail order, but I guess if it works so be it.

500. MAARC Club Meeting

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-04 04:24:28 UTC
From: Jon Plyler
Topic: 500 Message: 500

This Thursday, April 6 is the regular club meeting for MAARC. Our guest this month is Abe, W8HVG, who will be talking about the IRA link system. Our meeting is at 7 pm. All are welcome to attend. For information and directions to MAARC/W8ZHO, please visit our website at http://www.qsl.net/w8zho

The address and link to a map is at the bottom of each page.

For those interested in Field Day for Muskegon County, our FD 2006 plans are also being posted to the website this year.

501. Wednesday Night Digital Net

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-04 17:03:52 UTC
From: Joe Veldhuis
Topic: 501 Message: 501

Well, the net hasn't had any checkins the last 2 weeks, so perhaps I should announce it again! It's held every Wednesday night at 8 PM eastern, on the NOARC 145.490 -94.8 repeater. I take checkins the usual way, then each station makes their comment using a digital signal.

The last 2 months I've been using different modes every other week, however from now on I'm going to stick to PSK31, since that seems to be what everyone's interested in. If there's interest, perhaps I'll start a separate net for slow-scan TV (which I was doing on the third week of each month).

If you want to get in on it, all you need is a computer, software, and optionally a soundcard-to-rig interface.

For Windows:
MultiPSK (free): http://members.aol.com/f6cte/index_anglais.htm
MixW ($50): http://www.mixw.net

For Linux:
gMFSK (free): http://www.w1hkj.com

502. Learn to Send Code, Tips

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-04 23:58:33 UTC
From: Bill Fries
Topic: 492 Message: 502

All:

I have prepared a brief story on how to use your computer's sound card to help you send better code. This technique will not help you receive the code so much as it will make sending code more comfortable. Use this squeeze technique with your paddles and a keyer for endurance and nearly effortless code.

If you are learning to send Morse code you may be worried that your code will sound choppy or improperly sent. When you start sending, you will sound like you stutter or briefly hesitate in the middle of a character. These feelings are normal. This article will explain how to send code to your computer. The computer software will hear and evaluate your sending and give you good feedback without you having to worry you are sending choppy code on the air.

You will need a few items to get this process to work for you. First, learn to send with paddles. Do not use this method to send with a straight key. There are many schools of thought on this subject and I come down squarely on the side of sending code using paddles and an iambic keyer. You will need a set of paddles. Bencher and others make wonderful paddles which can be works of art. You can make your own paddles or a single lever key. Ask to see my wonderful Italian paddles. Beautiful, and expensive. You need a transceiver that is capable of transmitting code although you will not transmit the code. You will need a keyer. Some transceivers will have a keyer built inside. The keyer will interpret your paddle and translate the paddle closures into a sidetone or the sound of code from the radio. The keyer could be an outboard keyer but this adds another complication. However you might like an outboard keyer. And you will use a computer to listen to your rig's sidetone and interpret the Morse code you are sending. Finally get a shareware software program called CWGet. This software hears your rig's sidetone through the sound card and interprets your code.

The initial step is to set up the radio to think it is sending Morse code. Usually you will put the rig into CW mode. Then you switch OUT the break in feature. The break in tells the rig to transmit the CW (which, during practice you do not want to happen). The CW mode and no break in will tell the rig to only sound the rig's sidetone on each key stroke. The computer hears the sidetone and the software interprets the tones.

Now, choose a frequency somewhere and it does not have to be in the amateur bands because you are not transmitting. Your chosen frequency should be quiet and when you tap the paddles you should clearly hear the sidetone and maybe a little background hiss.

Run the CWGet software and connect the rig's speaker output to the computer's headset soundcard input. I split the rig's speaker output to run an outboard speaker and the computer. My computer's speaker will be muted, but you might like to hear your sidetone on the computer's speaker. Try it a couple of ways. You want the CWGet software to hear the transceiver's keyer sidetone when you close the paddles. Send a series of dits or dahs and fine tune the software so it is sampling the sidetone from your radio. You are all set. Simple, yes?

Initially, set the keyer speed to around ten or twelve words per minute. This gives you some good feedback and helps you find your rhythm. You want to get used to squeezing the paddles together to send a character. Try not to stab at the paddles to send a character. You want to gently stroke the paddle. Send a K or a C by lightly stroking or lightly squeezing. Send a period or slant bar in a similar manner. Then try sending a F without letting up the pressure on the dit side. You can insert the dah between the dits. It is fun! Some folks will tell you there is an upper speed limit to squeeze keying but we are a long way away from thirty words per minute. Take your time and get to the point where the software is following your keying accurately. For example, if you send an A but the software sees an E and a T you know you need to squeeze and not stab. A good sender will make this look effortless as they comfortably send the code. There is no effort and amazingly little finger movement. If you slap the paddles around the desktop you are not stroking the paddles. Be gentle.

To adjust the paddles set the contacts just barely open. Some operators want a wider gap on one side of the paddles, say the dah side. Some old time hams will say this gap should be the thickness of a King of Clubs playing card. You do not need to move the paddle a lot side to side to make the closure. And make the tension as light as you can and still control the paddles. Some folks will like more tension on one paddle. I will make the left paddle the dit and the right paddle the dah. The keyer can be reversed if your paddles are not wired that way. Light touch and little movement will help you send code at upward of twenty words per minute effortlessly. And increase your keyer speed as you get better at squeeze keying the characters. Now sit back with a good book and send the book to the computer software. Mix in a few numbers and after a while it will feel very comfortable.

There are nets where you can go to practice your Morse code, but to build some confidence, you probably only want to send the sidetone to the computer software. When you get more comfortable, you can check into a net and sound like a pro. Also, there is the FISTS Club (see www.fists.org) that can pair you with a code buddy. Your code speed will improve with practice. You will get lots more comfortable sending and receiving code with regular practice. And remember a "Can Do It" attitude makes the process all the better.

Our club will be making outboard keyers as a project later in April. Contact Tom, W8AMZ or Bill, AB8SC for details or to get on our participants list. The whole purpose of the above exercise, and the keyer project, is to get us more comfortable with sending and receiving code. Do these exercises

to get you more comfortable with the code. Do not try these exercises in an attempt to learn and then pass the Element One exam as a step toward your General license. That process is entirely different as you are required to receive the code and sending code is not an option.

While I profess no proficiency with Morse code I still enjoy this mode. My crutch is the CWGet software. I probably have fifty countries confirmed using CW. But I do not profess any proficiency or intimate comfortableness with code. I like to write and provide some pointers. I sincerely hope this material is helpful and that you become a more fluent code operator.

503. Keyer Project 4 U

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-05 13:10:43 UTC
From: Bill Fries
Topic: 492 Message: 503

All:

"Reprinted" from Flashovers:

We are pleased to announce a wonderful project for our ham radio members. We are going to build a keyer that you can use to help you send Morse code through not only your HF radio, but you also will be able to use this project to send modulated CW on two meters FM. What all does this mean?

You want to get more fluent with code. To transmit code you will find some hardware useful. Start with a set of paddles that interface to a keyer. The keyer interfaces with your radio so a paddle closure generates a dit or dah in the radio. The keyer is feature packed and along with six memories can be trained to help you learn iambic keying, learn six messages, and run a long time on mere milliamps of power. You will also learn good soldering technique with small components by building this kit.

Tom, W8AMZ is hosting this fine seminar. To help Tom with this project we will need a good count of participants. We will also want to know what make and model of radio you will use with the keyer. We are building this project to assist with the new code training net on two meters that we will use to learn sending and receiving code. Expect that the project will cost about $30 for each keyer. We will order the keyer, enclosure, switches, and rig interface plugs for each individual project. You need to get your call sign on the list before the middle of April so we can make these keyers on April 22 at the clubhouse. The event starts with basic soldering techniques at 9:00 am and then proceeds into the actual kit building. After the day?s activities you will have a handy keyer with lots of function and fun for your use and enjoyment.

504. New/Upgraded Hams

As of about 4:30 pm today (Thursday), Regular was $2.539/gal. at the
16th St. Meijer in Holland, whereas everywhere else I saw it for $2.799
or $2.809.

I had to wait in line for a while.

I know nothing about the price at any other Meijer gas station.

I didn't have to wait in line at the North Muskegon Meijer store last night about 9:30PM when the price of gas was still $2.53.9. I was very surprised to find it still that low, because the 3 stations just up the street were already at $2.79.9 at 6:00PM. I don't think the Meijer price stayed that low for very long after I filled up, because a tanker was there filling their tanks.

512. FYI: Portable power source

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-07 15:48:01 UTC
From: Alan NV8A
Topic: 512 Message: 512

People looking for a compact portable power source might like to look at the Radio Schlock 270-4130, which is designed as a self-contained jump-start unit for cars. Originally priced at $39.99, several area RS stores have them on clearance for $19.97.

They have an internal 12v 12AH battery and charging circuitry, a cigarette-lighter socket, and leads terminated in battery clamps. They connect to a regular extension cord (not included) for charging. I think I read that somebody had already opened his up and cut a hole in the case for a set of Anderson PowerPoles.

It won't run your high-power mobile rig for long, but your HT should last a long time on it.

I bought one and may yet buy another (one to keep in each car).

In the interests of full disclosure I have to say that some of my mutual funds *may* include RS stocks (I hardly ever check to see what's there), but other than that I have no connection with RS and usually avoid the stores whenever possible.

The production is pretty crude by today's standards. Did you notice
Buck looking to the right and down to apparently read his script?

I wish they didn't compress the data so much to be able to stream a
video like this. It makes the image watery looking much of the
time... But it's still fun to watch.

I think it's the other way around, DeSotos were here first.

One thing some DeSotos had in common with cruise missiles is that they would go about 500 miles before they blew up.

Not really, DeSotos were great cars. So were Studebakers. My first car was a 1965 Studebaker. My dad bought if for me, used of course. The license plates cost more than the car. Buying insurance would have totaled it. Lucky for me back then we had the 'unisured motorists fund'. Hmmm....come to think of it, that cost 40 bucks and the car only cost 35.

Ya, those were the days....

Weren't DeSotos made from expended cruise missiles?

That was too cool!

Buck was pretty glib, was he not?

I really miss black and white TV. What was lacking in color and resolution was made up for by our own individual imaginations. Plus it made DeSotos look like cruise missles.

I remember Buck Matthews... on the other hand, in 1964 I was more interested in Buck Barry's program.

Thanks for passing on the interesting link, Laryn!

From: Bill Fries
Topic: 515 Message: 524

All:

This Saturday is the Michigan QSO party. Following the Skywarn training we will have the opportunity to enter the contest and enjoy a little radio fun.

You are encouraged to participate and enjoy the event. It runs from 1600 to 0400 UTC which translates noon to midnight.

We will need operators and loggers. We can operate CW and phone.

A great warm-up for Field Day coming this summer.

See you there?

Bill, AB8SC

529. Wunder Radar Widget

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-13 22:18:09 UTC
From: Dennis Harriss
Topic: 529 Message: 529

Hi All,

Here is a radar display that will sit on your desktop and update itself as long as you have an internet connection. It uses a data feed from http://www.wunderground.com. Unfortunately right now it will only allow you to pan, zoom, animate (fast,medium,slow), show storm tracks. This should at lest help get a rough idea of the current radar displays. Then you can go to Weather Underground for more detailed radar displays.

First go this link and download and install the latest Widget Engine.
http://widgets.yahoo.com/

Then go to this link and download the Wunder Radar Widget.
http://widgets.yahoo.com/gallery/?search=wunder+radar

By default the widgets get installed in the
C:/Documents and Settings/"your name"/My documents/My Widgets
In Windows2000 & XP.

If you can't download the radar widget let me know and I will send it to you.

I would like to thank Tom KC8OJT for letting me know about this Widget.

I wonder what the ratio of man made emmisions of CO2 vs nature's are.

I also wonder how the effect of the destruction of large forests (that change CO2 into Oxygen) plays into the equation.

Another variable is the increase of seaweed in our lakes caused by the dumping of sewage. Seaweed is a major player in the CO2 to O2 conversion game and is thought by some to balance the equation a bit.

We also need to look at Ozone and it's amounts....and how lightning affects Ozone levels.

As you can see, the scientists have much to factor into their calculations. With the speed at which I have seen most projects such as the global warming studies move, I gather it will be at least the dawn of the next Ice Age before the scientists figure out what is causing global warming.

CAUTION DURING THUNDERSTORMS

LONDON - Two women were killed by a bolt of lightning in Hyde Park when their underwired bras acted as conductors, a coroner said Wednesday. "I think this was a tragic case, a pure act of God," coroner Paul Knapman told an inquest into the deaths. He recorded a verdict of death by misadventure. The two women, Anuban Bell, 24, and Sunee Whitworth, 39, had been sheltering under a tree in the park during a thunderstorm. Pathologist Dr Iain West said both women were wearing underwired bras and had been left with burn marks on their chests from the electrical current that passed through their bodies. Death would have been instant, he said. The bodies were not discovered until the following day because passers-by thought they were vagrants.

Hi, all.

For those who haven't yet had NWS Basic Skywarn training this year, here's a training opportunity to consider:

Mecosta County Basic Skywarn training Tuesday: April 18 from 7 - 9 p.m. at the classroom of the Big Rapids Department Of Public Safety Building, 435 N. Michigan in Big Rapids.

If anyone needs directions, just give a call on the Big Rapids 146.740 2-meter repeater, and someone will be glad to assist you.

Thanks, and best 73 from Tom Behler: KB8TYJ, Mecosta County EC/RO

544. MIQP Results

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-16 14:29:03 UTC
From: Bill Fries
Topic: 515 Message: 544

All:

KC8MDL, W8AMZ, AB8SC, N8YJT, K8PIX, and KD8BGQ worked the W8ZHO contest station Saturday. We did around two hundred QSOs distributed between twenty and seventy-five meters. We had a wonderful experience and enjoyed every caller. We even heard from some old friends, snowbirds, and current friends. We really enjoyed the opportunity to be radio active. Thank you to all the participants and the stations in our log.

Bill, AB8SC

Tom:

Thanks for participating. I'm sorry to not have recognized your call. I do remember logging Mecosta County. We had fifteen counties, give or take. We even logged Houghton County on seventy-five. But the good ones were close in like Mecosta. Yes, the band was noisy and we are not real comfortable with the rig, yet.

Contesting is real interesting. We get to learn fast thinking on our feet, handling small pile-ups, and logging. It sure is easy to transpose a few letters in a call sign! Hi

We wanted to do a little CW, too. But my keyer and instruction manual were too distant separated. I could not remember how to manage serial numbers. I guess the next time I'll keep the manual much, much closer to the keyer. We had a few requests to operate CW and it would have been fun due to the informal nature of the contest and our laid back attitude. We were there to have fun on radio. We succeeded!

Bill

Bill,

Are you saying you don't know how to send the numbers in code on the paddles?

Bill:

Well, I made some CW contacts down around 3.560 MHZ, but I have to admit that my fist was rusty. ... have to do a lot of work to get me up to speed for Field Day. ... I have been a CW op from way back when, but the last time I did it was for the North American QSO Party in January. ... Always something to work on, I guess.

Wonder if anyone had any success yesterday on 40. It was really noisy here, with not much activity, so I just concentrated on 75 from about 9 p.m. till mid-night.

As I said, I wanted to do more, but other obligations got in the way.

Take care, Bill, and you sure do have a good group over there in Muskegon. You may or may not recall, but last year, several of us visited your club for the Advanced Skywarn Training you offered. We felt very welcome, and enjoyed the training and the lunch afterword immensely.

In case you don't still quite remember me, I am the visually-impaired ham and EC/RO from Mecosta County.

Finally, tell Jean (KC8WSE) she's doing a great job on the WMTN.

Tom,

Sounds like you need to be a part of the cw practice we are putting together
on the 94. It has a couple of goals in mind. Introduce newer hams to cw
and help them to upgrade to great world of HF, and help the rest of improve
our cw abilities.

Sure, you are fondly remembered over in Muskegon. Fine Business.

Yes, due to the efforts of her Elmers, Jean is improving and showing promise. We are quite proud of her and all the hams active in our association.

Speaking of Advanced Skywarn, you missed another great seminar on this subject, yesterday. Our new Skywarn coordinator has taken the program to new heights of professionalism and is turning our group into one heck of a nice, well run organization.

Thanks for the flowers!

Bill, AB8SC

This is a re-post of a message in case more have joined this group since I first sent it:

=====

The Center for Women in Transition will be hosting the Girls on the Run 5K race at 8:00 (for volunteers) am on May 20th in Grand Haven. More details will follow. Please let me know if you plan on volunteering.

For those who participated last year, you should remember the magnitude of this event. There were nearly 1,000 runners including the students and coaches. It was a pretty exciting run with a lot of community support.

I will be sending a volunteer form approximating our count at 10-30 people, but more is better. The run has a lot of corners and uses part of a very busy street in Grand Haven. Please help keep the runners protected.

Andrew Young

Well, I have trouble getting into the 94 repeater from my home here in Big Rapids, although I can access it from our County EOC, since that antenna is much higher.

Actually, I got my Extra the old way via the 20 WPM code speed, and my usual sending speed for the code is probably between 20 and 25 wpm, when I am at my best; it's amazing what time lapses can do to your speed and proficiency.

Anyway, if you can give me the particulars, I'll try to at least listen to your CW practice.

We did that sort of thing a few years ago here in Big Rapids, and some folks actually got pretty good at sending and copying the code.

Problem is now that folks seem to be loosing interest in the code because of the FCC's likely decision to drop it as a requirement.

I keep telling them, though, that it's way too early to draw that conclusion yet, and that if they want to upgrade, it's best not to wait.

Fb on all, Bill.

Maybe next year, we can make it over there again for the Advanced Skywarn class. It always depends on how many student papers I have to grade as we get close to the end of the semester.

If there's anything I can do to help you guys out with Jean, just give me a shout.

Now that I have finally gotten my e-mails to post correctly to the list, it may be much easier.

You can always contact me, though at my private e-mail address which is

557. Tulip Time Festival 2006 - NEED ASSISTANCE

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-18 01:11:11 UTC
From: Steve Vander Hill
Topic: 557 Message: 557

Dear WEST MICHIGAN HAM Member:

The purpose of this email is to ask for your assistance in filling the remaining Amateur Radio Operator (ham) positions for this year's Tulip Time Festival.

We currently have one ham position open for both the Wednesday (5/11) & Thursday (5/12) to walk with an American Red Cross First Aid volunteer. Also we are in need of a Net Control Assistant for same two days. Net Control will be located at the Sheriffs Department Emergency Operations Center (120th & Fillmore).

We currently have ten ham positions open for Saturday (5/13) to walk with American Red Cross First Aid volunteers. Also we are in need of two additional Packet operators, one at the Holland High School, and one at the Sheriffs Department Emergency Operations Center (120th & Fillmore).

The "tentative" schedule for Wednesday (5/10) and Thursday (5/11) is as follows:

* If you want a ride into downtown Holland, be at the Ottawa County American Red Cross building, which is located at 270 James Street by 11:45am. A bus will leave from the ARC building at noon to the American Red Cross Tulip Time Center, which is located on the corner of 8th & Pine (across from the Police Station).
* If you want to drive and park downtown, be at the American Red Cross Tulip Time Center, which is located on the corner of 8th & Pine (across for the Police Station) by 12:15pm to gather supplies.
* At 12:30pm at the American Red Cross Tulip Time Center team members will be introduced to each other along with a short operational debriefing and last minute informational sharing.
* At 12:45pm Teams will be dispatched to their specific parade route block of coverage.
* As the parade/s are finished, Teams will follow behind the parade back to the at the American Red Cross Tulip Time Center to turn in supplies, log off from Net Control, and either wait for the bus ride back to the Ottawa County American Red Cross building on James, or walk back to your personal vehicle.

The "tentative" schedule for Saturday (5/13) is as follows:

* If you want a ride into downtown Holland, be at the Ottawa County American Red Cross building, which is located at 270 James Street by 11:45am. A bus will leave from the ARC building at noon to the Holland High School dome, which is located at Southwest of the corner of 24th & Van Raalte.
* If you want to drive and park at the Holland High School, be inside

by the ARC setup, inside the dome by 12:15pm to gather supplies.
* At 12:30pm at the Holland High School, team members will be introduced to each other along with a short operational debriefing and last minute informational sharing.
* At 12:45pm Teams will be dispatched to their specific parade route block of coverage. Buses will bring volunteers that are covering the Eight Street blocks to the American Red Cross Tulip Time Center, which is located on the corner of 8th & Pine (across from the Police Station) while the volunteers covering the Van Raalte blocks will be walking directly from the Holland High School.
* As the parade is finished, Teams will follow behind the parade back to the at the American Red Cross Tulip Time Center or the Holland High School dome whichever is closest to turn in supplies, log off from Net Control, and either wait for the bus ride back to the Ottawa County American Red Cross building on James, or walk back to your personal vehicle.

If you or someone you know is interested in volunteering please provide me with your full name, call sign, contact phone number, email address, and any special assignment requests you would like cover.

Best regards,

Steve Vander Hill - N8UJD
svanderhill@....

558. MIQP Catagory

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-18 01:17:05 UTC
From: Bill Fries
Topic: 515 Message: 558

All:

>From the www site on the subject of the MIQP:

(b) Multi Operator ? Entries where more than one operator performs the operating and logging functions. Multi-operator entries are categorized in two ways:
Single-Transmitter - Entries with only one transmitted signal on the air at any one time.
Multi-Transmitter - Entries with multiple transmitted signals on the air at any one time.
Multi-operator entries must operate under a single callsign. Multi-operator entries are not categorized by power.

I'm reading this that our club worked as a multi operator single transmitter because our friends likely used their own call signs and not the W8ZHO call we used at the club for the event.

Thanks for the offer of your QSOs from your log. There does not seem to be a club category. And the folks offering QSO credit are offering a handful of QSOs.

Thank you!

Bill, AB8SC

559. Batching QSL Cards?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-18 01:47:17 UTC
From: Bill Fries
Topic: 515 Message: 559

All:

>From the ARRL Michigan Section Newsletter I copied the following:

QSL Batching for Affiliated Clubs
If your club is affiliated with the ARRL, you can use the Outgoing QSL Service
to send club station QSLs to DX stations. In addition, you batch cards from club members, who are also ARRL members. This might be a useful service to your club members who occasionally work some DX, but never quite collect enough cards to send in a whole batch themselves.
According to the Web page, http://www.arrl.org/qsl/qslout.html: "ARRL affiliated club stations may use the service (Outgoing QSL Service) when submitting club QSLs by indicating the club name. Club secretaries should check affiliation papers to ensure that affiliation is current. In addition to sending club station QSLs through this service, affiliated clubs may also "pool" their members' individual QSL cards to effect an even greater savings.
Each club member using this service must also be a League member. Cards should be sorted "en masse" by prefix, and proof of Membership enclosed for each ARRL member."
Give it a try!

This means that if anyone wants to send their card via the buro their cards and my cards to the buro can be packaged together. Buro cards are only accepted for members of the ARRL. My first two or three hundred QSL cards (from a couple of contests) were all mailed via the buro. It takes a lot of time to get a buro card back but the cost of a buro card is CHEAP! So I sent buro cards to four or six, oh, say, Germany stations knowing I would get back a card to confirm that country. Sure, you can send a dozen or so buro cards but why not batch these together and send in a pound or two?

Don't forget, buro cards coming to you are handled as incoming cards and you DO NOT need to be an ARRL member. But you DO need to have an envelope and postage at the buro to get any carding coming in from, oh, say, Germany.

We can offer this service to club members if there is a desire. Drop me a note.

Bill, AB8SC

For Immediate Release

Midland Amateur Radio Club Sponsors
Annual Hamfest and Computer Show

(Midland, MI, April 19, 2006) The Midland Amateur
Radio Club will be holding it's 32nd annual Hamfest on
Saturday, June 17th, 2006, to be held in the
Gerstacker Fair Center on the Midland County
Fairgrounds. The site is just north of US 10 on
Eastman Road, directly across from the Midland Mall.
Vendor set-up is at 6:30 am, with doors opening for
the public at 8:00 am. Tickets are $5.00. The MARC
Hamfest traditionally features commercial vendors as
well as table space available for amateurs with
equipment to sell and trade. A vast array of amateur
radio equipment and accessories, computers and
software, parts, coaxial cable and connectors will
greet visitors to the Gerstacker facility. The
Midland Amateur Radio Club's large stock of vintage
and hard-to-find vacuum tubes will also available for
sale.
Outside, a large space will be available for trunk
sales, and visitor parking is free.
The Club will be offering VE exams on-site for those
wishing to earn their Ham Radio license, or those
wishing to upgrade and earn new privileges.

Registration for the exams begins when the Hamfest doors open at 8:00 am; testing begins promptly at 9:00 am. Applicants need to bring two pieces of ID, copies of any licenses and certificates that applicable and two pencils. Calculators are optional. Test fee is $14.00. If applicants choose to visit the Hamfest after their tests, the gate fee is not included in the testing fee. Candidates should take note that the Technician Test pool will be changing on July 1st. For those planning on staying overnight, accommodations including the Fairview Inn, Hampton Inn, Holiday Inn are available nearby. For further Information & Table Reservations ($5.00 each) contact us at:

562. Fox Hunt Sunday!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-20 14:10:57 UTC
From: Bill Fries
Topic: 515 Message: 562

Hey, you:

The Muskegon radio club is hosting a Fox Hunt on Sunday April 23 at 2:00 in the afternoon. The event is being run from their clubhouse, 2888 Scenic Drive in Muskegon just a little south of the Red Rooster Restaurant and over by that big Lake Michigan puddle.

Teams of one to fifty are encouraged. Imagine a fifty member's team bus! Excellent!

Fun for all.

Bill, AB8SC

I have painted mobile whips without any noticeable signal problems or swr issues. I would think the important thing would be to not create another path for RF to go by painting the insulators or anything like that.

Just my $0.02.

568. Packet Stations as APRS Digipeaters

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-21 10:03:46 UTC
From: Andrew
Topic: 568 Message: 568

If anyone is interested in learning a little about APRS, and would like to try setting your station up as a digipeater on 144.39, we are in need of some extra coverage in the northern Muskegon County area.

It would be a good way to put your station to use while it is idle.

The most simple way is to set your alias callsign as RELAY or WIDE1-1. You can also configure your beacon with your position and you will show up on http://www.findu.com/cgi-bin/find.cgi?call=n8ary-14&terra=1°ree=0.004 complete with a satellite image of your location (Substitute N8ARY-14 with your callsign).

You can send messages to other APRS stations and the coverage paths are much longer than most regular packet frequencies.

If you are not sure what to do, Tom V. or I can give you some guidance.

Andrew Young
N8ARY

569. Re: [WestMichiganHams] Keyer Kits

From: Tom
Topic: 569 Message: 569

Greetings to all,

It turns out we still have one keyer kit left over. We will be assembling them Saturday at the clubhouse. They can be used for HF or to modulate cw on FM VHF such as an HT or mobile radio. If you have any questions or want to reserve that kit for yourself then email me at advsound1@... or call me at 231-767-1095 or if you would like feel free to stop up to the clubhouse visit and or help others with building their kits or just get on the air, we have a great radio shack there. Basic soldering start at 9:00 AM

We will be using the keyer kits on a cw net to teach cw to those who wish to learn or just want to improve their skills.

From: Bill Fries
Topic: 564 Message: 571

All:

Our radio club is taking orders for Field Day tee shirts. This year's shirts will feature the club logo screened on the back.

Shirts are $16

Pins are $5

I would like your call sign, shirt size, and number of shirts you will need. Sorry, but we will not be able to accommodate any order of fifty or more shirts to an individual ham unless they bring their bus to Field Day. Hi!

We need orders before mid May because those going to Dayton are charged with bringing back the tee shirts!

73

Bill, AB8SC

572. Global warming and Ice Age cycles

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-23 20:15:04 UTC
From: K8MHZ
Topic: 572 Message: 572

The last Ice Age ended about 10,000 years ago. The next Ice Age is expected to peak in 30,000 years.

Just by keeping with cycle temparatures, average global temps should rise for another 10,000 years before they start dropping again.

So who is to blame for global warming?

Just something to think about.

73,

Mark K8MHZ

573. [WestMichiganHams] on global warming. Was: Global Warming Myth, etc

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-24 02:28:53 UTC
From: George (Skip) VerDuin
Topic: 528 Message: 573

Generally accepted facts(?):
On average the earth is warming and human population is growing in number and individual size.
Climate of Earth changed quickly enough to eradicate the large dinosaur populations and other "advanced" animals.
There is a hole in the ozone - growing at the south pole thus passing more UV that is damaging to human skin.
Deviation from average is expected for everything that is represented by statistics.
Individual choice guides individual action / Individuals choose a church - not the other way around.
The church taught the earth is flat and center of the universe, then excommunicated Galileo for thinking otherwise.
Presently it looks like this all started with a "bang".
The time of one human life is but a period on a mile(s) long sentence since formation of Earth.

Generally accepted personal decisions(?).
Do you recycle and otherwise capture things dangerous to our environment?
How many causes have you tried to convince others of?
If you had the choice, would you use DDT to kill mosquitoes in your back yard?
Is fish your only Friday meal?
How many children have you added to earths population?
Does your vehicle get better than fleet average fuel consumption?
Is your home well insulated and 72 degrees in summer and winter?
Will you be moving south west into a milder climate any time soon?
Just how do you decide who to believe best describes reality?
How many of your choices are globally best fit and how many choices are personal best fit?

If you want me to accept that global warming is a myth
If you want me to accept man is the only (major?) cause of global warming
If you want me to accept that the end is near because of global warming
Then there is a long way to go.
If we are to debate our choices in the context of global warming, or exploding population, or energy costs, or ...
Then bring it on and let's have a healthy debate.

On the other hand - remember 6 months ago?
There was a long thread here over time - GMT - EDST - ...
Yesterday the W8CSO clock remains mis-set weeks after the time change dictated by government.
See how provocative this can get?

The point is: many things don't change even when there is a bunch of
discussion about them...
While global warming is in fact impinging on our lives, and we should
rightly add it into our decision making,
I'm in favor of reserving this small part of space/time for ham radio
and placing global warming on the global thread.

That's why we need to operate on minimum necessary power- A kilowatt might warm the ionosphere. That could (not)contribute to global warming.

I will get on setting the clock soon. Third shift with overtime makes me an unmotivated procrastinator. I also have to find the programming manual I possibly misplaced when rearranging my shack.

In the meantime, don't set your watch in Grand Haven.

Reminder of the Road Side Pickup, Tuesday April 25, along Hwy M-57 between Tefft Ave and Berrigan Ave. Sponsored by GRARA and American Red Cross. All are appreciated regardless of club or no affiliation.
Meet at the Park and Ride at Hwy US-131 exit 101 (M-57/Greenville exit) at 6PM. TI 147.26+(98.4Hz). During the operation, or if your arriving late, use Cedar Springs 146.88-(141.3Hz).
Keep in mind the after gathering at the Rockford Corner Bar.
As of this typing, the weather will be cool, rain ending by early afternoon. But just in case, the alternate bad weather date is Thursday, April 27.

Road side pickup is picking up trash along the side of the road. It's what those Adopt a Highway signs are about along the highways. This is pickup week.

580. Tulip Time Festival 2006 - NEED ASSISTANCE

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-25 01:29:52 UTC
From: Steve Vander Hill
Topic: 557 Message: 580

Hello, the 2006 Tulip Time Festival starts in less than two weeks. This year as in the past thirty years, the West Michigan Amateur Radio Operators (hams) are working with the American Red Cross to provide on a block-by-block basis First Aid and Emergency Communications.
We currently are short for both the Wednesday (5/11) and Thursday (5/12) parades one ham to walk with the a American Red Cross First Aid volunteer, and one ham to be a Net Control Assistant. We currently are short ten hams for the Saturday (5/13) Grand Finale parade, along with two Packet operators.
We are also in need of a couple HTs for some new hams that have just received their licenses and who have decided to volunteer their new privileges providing this community service.
Now comes the favor, if you or someone you know is interested in volunteering, please email me (svanderhill@...
<mailto:svanderhill@...>) or call me (616-738-0427) with your/their full name, call sign, contact phone number, email address, and any other information you might think I would need.
Thank you in advance for making this festival a safe, secure, and fun one.
Best regards,
Steve Vander Hill ? N8UJD

586. Girls on the Run

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-26 22:36:40 UTC
From: Andrew Young
Topic: 436 Message: 586

I will be attending a meeting for the Girls On the Run event on May 16th, at which I will be picking up tee shirts for the event volunteers. If you are planning on attending and haven't responded yet, please let me know. I will also need everyone's tee shirt size.

For those who don't know, this is a 5k run with about 1,000 participants. There will also be a lot of parents along the route and they will look to us during any emergencies. I got a lot of comments from parents and school officials last year about how good it was to have us along the route for security and safety of the runners. The run is on May 20th at 9:00 am. Volunteers should be at the GHPS lot at 8:00.

Everyone did a great job last year and I hope to see you all back as well as others who didn't come last time.

So far I have:

Craig C. (tentative)
Mark D.
Greg S.
John F.
Jason M.
Don M.
John W. (for 2 positions?)

We'll definitely need several more. All you'll need is an HT with a good battery charge because the run is pretty close to the repeater.

Katie N. from the Center for Women in Transition wanted me to thank everyone in advance for their help.

Thanks,

Andrew Young

588. Clubhouse Work Bee

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-26 23:01:56 UTC
From: Bill Fries
Topic: 569 Message: 588

All:

The folks at the Muskegon radio club are doing a clean up around their clubhouse on Saturday morning. So if you can, drop by and lend a hand. We'll be raking, dusting, cutting, and trying to remove the HUGE tree on the ground and in the way. You could drop by after the March of Dimes walk or after Rockets for Schools. We would love to have your help.

Even with lots of help the effort is expected to be continued on May 13. We'll then have the place whipped into shape for Mother's Day.

Thank you.

Bill, AB8SC
President of the radio club in Muskegon

591. Amateur Radio to be in Parade Magazine this Sunday

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-26 23:59:45 UTC
From: K8MHZ
Topic: 591 Message: 591
Attachments: 1 described; binary payloads are missing from this source WARC

From QRZ.net:

Amateur Radio will be included in the April 30, 2006 issue of Parade Magazine. Parade Magazine is a pullout in most Sunday Newspapers nation wide.
National Military Appreciation Month has selected Amateur Radio Military Appreciation Day as one of the focus events for this years article describing events during the Month of May that honors and support those that serve in the Military.
This is a great public relations boost for our hobby. Please be sure to tell your friends and family members about Amateur Radio coverage.
ARMAD is an event that allows the public to share LIVE messages of support to those who serve in the military, Retiree's, and Veterans. The event takes place on the Saturday of Memorial DAY weekend. This year it falls on May 27, 2006.
ARMAD will also be featured along with the Founder of National Military Appreciation Month during the week of May 15, 2006 on ARMY WIFE TALK RADIO. You can listen at:

Get involved and "Ham It Up For The Troops."

596. Michigan - Morse Day

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-27 12:09:20 UTC
From: Tom VanderMel
Topic: 596 Message: 596

....Please distribute to your local ham radio community.....

Hello Everyone:

In case a few of those in Michigan are interested..

On Saturday, April 29, area members of the Morse Telegraph Club will be present at the Steam Railroad Institute Museum at Owosso, Michigan for "Morse Day." This annual event, held in celebration of the birthday of Samuel Morse, consists of a nationwide gathering of land-line telegraph operators at various locations throughout the United States.

The various chapter gatherings are linked together via the National Telegraph Office and hub located at Owosso. This hub facility permits operators from throughout the US and Canada to gather "on-line" using authentic, original telegraph instruments (keys, sounders, etc.), and the original "American Morse Code."

The event will take place from 11-AM to 2-PM at the museum. Please feel free to stop by and visit. While there, you can also tour the grounds and see steam locomotives in various stages of restoration and refit, a rather interesting process in itself.

The museum is located at:

405 S. Washington

Owosso, Michigan 48867.

For more information or directions to the museum, please visit:

www.mstrp.com

For more information on the Morse Telegraph Club, please visit:

600. Digital network locally

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-28 15:10:04 UTC
From: George (Skip) VerDuin
Topic: 600 Message: 600

Greetings.

I am into the project of adding another digital node in Grand Haven. At this moment it is active part time on 145.070. It will be more like 24/7 after I find a special connector and it is mounted permanently (another month?).

The software is jnos, and the present configuration includes a BBS and an outgoing Internet gateway via telnet (ampr.org). There are several versions of automation to route interconnects like KA-NODE, and AEA-NODE - I've prototyped NET-ROM. The bad news? - I find no "neighbors".

The other "bad news? - I find my station listed on KC8MSE-7 as a "node". I can't believe NET-ROM will work if you were to try my node out from MSE-7...

Thus the purpose of this note: Where are NET-ROM nodes in western Mich - if any...?

I see you tried to connect on K8RRA-7 Dave,
I've put the BBS on -1...

Our configurations may be a bit different.
I've not had the pleasure to connect to your node / I did not know it
was a nos.
Thanks for the response!

I see from my trace files that you have been active for quite a while.
I seldom hear you directly - mostly I hear others in contact with you.

Comparing notes sounds like a heads-up idea.
I look forward to the chance.

604. Kenwood TM-741A problem

Yahoo group: WestMichiganHams (2006 — 2008)

From: John Wehmer
Topic: 604 Message: 604

My mobile, a Kenwood TM-741A, has an ongoing intermittent problem. Every once in a while, the 2-meter section loses its memory. The 70cm and 6m sections never have done this. The problem only happens when I turn the unit on, never while using it. The time period between hiccups is several weeks to several months. Does anyone have any ideas?

Ya John,

It is a secret government enabled radio erasing frequencies so they
won't fall into any citizens hands by accident.

:)

John,

It's a Kenwood thing.

You may want to try doing a factory reset. You will loose ALL of your memory settings, but it does work on Kenwoods sometimes. My TM-V7A used to do it until a factory reset was done.

Kenwoods also do not like low voltage, even when off! Have you noticed this happening when you have a low battery or power supply voltage? None is far better than low to a Kenwood.

Good luck, next time buy an Icom or a Yeasu!

73,

Mark K8MHZ

From: John Wehmer (WB9JSR)
Topic: 604 Message: 608

Thanks for the input Mark. The unit is used only in the mobile and I have not noticed the problem having anything to do low voltage. I usually turn the unit off after I turn the engine off and turn it back on after I start the engine. I have done a reset of the 2 meter module. There may be a complete reset for all 3 modules, I?ll have to check that out.

73 John WB9JSR

K8MHZ <k8mhz@...> wrote:
John,

It's a Kenwood thing.

You may want to try doing a factory reset. You will loose ALL of your memory settings, but it does work on Kenwoods sometimes. My TM-V7A used to do it until a factory reset was done.

Kenwoods also do not like low voltage, even when off! Have you noticed this happening when you have a low battery or power supply voltage? None is far better than low to a Kenwood.

Good luck, next time buy an Icom or a Yeasu!

Subject: [WestMichiganHams] Kenwood TM-741A problem

My mobile, a Kenwood TM-741A, has an ongoing intermittent problem. Every once in a while, the 2-meter section loses its memory. The 70cm and 6m sections never have done this. The problem only happens when I turn the unit on, never while using it. The time period between hiccups is several weeks to several months. Does anyone have any ideas?

From: K8MHZ
Topic: 609 Message: 609

Hello All,

As you may or may not know, MCARES has decided they want nothing to do with the Air Fair this year. Instead, I will be working on one of the committees for the Summer Celebration and they have requested help from the hams, especially those with past experience with the show.

First, and this is good news, hams will NOT be working in the Security Operations effort. What Summer Celebration needs is the following, so far:

Site Committee

Persons to assist in the set up of the show. This will be done during the week prior to the show. Since I have never worked on the site committee before I have little more to pass on other than they still need help in this area.

Child Watch

I think our assistance with Child Watch is the most important thing we do at the Air Fair. They will have some of their own people but they have requested for hams to be there with them. I think they liked us!

AirDales

The new Air Boss is looking for a few people to make a commitment of at least three years to work with Air Operations. One of the things they do is park the planes for the static displays. They also set up the acts on the ramp for the show. Working with Air Operations is a very prestigious role. They also need non-hams that are willing to make a three year commitment so if you know someone with a love for airshows and no ham license, let me know.

Deployable Communications Network

We need a few very skilled hams to work with the non-ham WLAN techs to set up an Intranet. Once in place, we will need people to keep the system running. If the system works as planned, there will be video surveillance cameras on the 'net. This will be a first for the show. We also may need help setting up the portable repeater(s).

I also heard rumors that the Norton Shores Fire Department may need a few of us, too. Chief Purchase is out of town until next week so I have no official info for the roles the FD may have for us. I would like to stress that NSFD has been VERY GOOD to the hams in the area and we would be remiss not to offer our help if they request it.

There are forms to fill out and some stuff to read. So far, my contact with Summer Celebration has shown that Joe Austin is trying very hard to have a very organized event. He has done well with Summer Celebration and I think he will pull it off. I think he is headed in the right direction.

Two things that are crabbed about most is the traffic leaving the show and the same acts coming year after year. This year at 5 pm, the show does not end. The last air act will be a re-enactment of a Viet-Nam helicopter battle with pyro and everything! When the choppers land, the beer tents open and the bands start playing. People will be able to go on the choppers that were in the show for rides. This should ease the outgoing traffic considerably.

There will also be entirely new acts we have never seen. It should be a great show.

Summer Celebration has a big get together each year with food and stuff to show appreciation to it's volunteers. Those that work this year's Air Fair will be invited. I will have more details on that later.

In short the spots should be very enjoyable with much less stress than we had working Security. If you have any questions please e-mail me at k8mhz@..., or here on the reflector if Don the Owner doesn't mind.

Thanks much and 73,

Mark K8MHZ

I was surprised to hear that Art Bell left the country today to live in the Philippines.

He took his cats but I am not sure about his ham gear. He is supposed to continue his weekend AM radio show from the Philippines.

His former wife died in January and on April 8 he married a Phillipino girl. At least she looks like a Phillipino girl...kinda...her skin is kinda grey and her eyes are big and almond shaped....is she wearing a wig??

Topic: 609 Message: 613

Jeff, I can't believe what I just read here. There is absolutely nothing improper of an amateur radio operator organizing a group of radio operators to help with communications at a public event for the purpose of child watch and other public benefit. There is no going around the Muskegon County EC, because they have chosen not to organize the event this year. For that matter the understanding I have is the Muskegon county members were told they welcome to participate if they wanted but were asked not to wear any ARES clothing or items because it was not ARES organized event. Then again it would be illegal for them to tell them that they couldn't participate in a event that would benefit the public such as this. The thought that a county EC would tell or recommend that it's volunteer amateur radio members not participate in a public event, in a voluntary position where he or she would be using their radio skills and efforts to the good of the public. That is part of what the FCC issued their license for. I sure hope such recommendations were either a mistake or based on a misunderstanding.

No County EC has authority to tell any licensed amateur radio operator member or non member he or she can not or should not participate in an event such as this. If he or she feels they do, then he or she is not qualified for said position!

We all need to stop and think about why we have amateur radio licenses and why the government has allowed us to have them, and what good we can do with them.

Good evening to all, 73'

Seems kinda bold to me Jeff. I also do not know the particulars as to why Muskegon County ARES is not participating on the Air Fair. Can't say that I care.

As you recall Everyone that participates is ARES/ RACES is a Volunteer. That makes me a volunteer as well. Sometimes I volunteer my time to ARES/RACES,

Sometimes to the Red Cross, sometimes to Summer celebration, sometimes to other worthwhile causes. I do not ask for nor do I expect any advice, guidance

or permission from from my local EC as to how I volunteer my time. So if we are talking about improper, I find it highly improper that any individual in a

leadership position within a volunteer service organization would ask there members not participate is someone's event. Proper would be to follow the party

line and not offer assisance as a group. But to ask your members to not participate, that is way out of line.

Skip,
The station here has a Net-Node. It's call sign is WB8I-2, but I do not seem to hear you direct. I do not hear any other Net-Nodes in this area.(I do hear them

from acrost the big lake). I am still having trouble hearing Grand Rapids, I may hang another port on the system with a beem pointedin that direction.

Who knows I also notice that the last time I hear WA8RSA, I was hearing a non AMPR IP address. It looked like it was a LAN address.

73 de Don, WB8I

To all readers,

I Tom W8AMZ wrote the earlier response to Jeff the Kent county EC statement. I don't normally get involved in theses little political things on the reflectors, but I sat down this evening to read my email and saw what really made me very upset (that's an understatement). A county EC had the gull to overstep his authority and tell his volunteer members to ignore a call for help from a well qualified radio operator (Mark K8MHZ) who is organizing a large event.

Now yes The Muskegon county EC has decided that ARES will not be operating this event this year. Ok fine he has the right to do so for what ever his reasons are. Well that leaves a ligament event out there in need of help with communications. K8MHZ a licensed amateur radio operator with experience has stepped up to the plate and is helping. Now the efforts of K8MHZ are not only noble but he is also highly qualified for this event and should be supported in every way possible. As licensed radio operators we are allowed to hone our skills, enjoy the hobby and volunteer our services on a voluntary basis only, in any way we can help the community. It's a good thing and is encouraged by all operators and the FCC.

Now I'm not a very good letter writer but I hope I've gotten my feeling across to everybody. I also hope the Kent county members have minds of their own and can decide what is right or wrong and don't ignore a ligament call for help.

Jeff,

MCARES has told their members that they have no problem with hams working the Air Fair but they have to do it under the auspices of Muskegon Summer
Celebration, not MCARES.

I think you may want to gather some additional info before you simply boycott any event.

Please e-mail me off line if you want further info that you prefer not to discuss on this list. Myself, I have no secrets about the entire ordeal and thusly have no problem discussing the issues in any forum, private or public. It's your call.

73,

Mark K8MHZ

Mark, while I do not want to start a political discussion on this list. I do not feel it is proper for an amateur to go around the wishes of the counties EC and there established program. For this reason, members from Kent County have been asked to not participate.

Jeff Nawrot
Kent County EC

619. Muskegon Air Fair

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-04-30 13:27:29 UTC
From: Jim, K8COP
Topic: 619 Message: 619

I think the air needs to be cleared as to some of the comments I have read this morning.

It is true that Muskegon County Amateur Radio Emergency Service is NOT participating with the Muskegon Air Fair this year.

This decision was made at the staff level of this group, not the Emergency Coordinator himself.

It was a tuff decision to make, but we felt that our members were tired and "burn-out" on this three day event. Continually calling for help each year from every county around to assist, and fill-in was not a proper use of resources for an event held in our county.

Mark Derby, K8MHZ, has decided to coordinate the Air Fair again this year. I wish him will with the endeavor.

If anyone wants to discuss this further, please contact me direct.

Alan,

There are many issues with the Air Fair as one would expect for an event it's size. The staff has seen our involvement go from a handful of operators to dozens. Last year I would estimate that 30 to 40 percent of the time we spent in staff meetings was discussing the Air Fair. That's a big chunk of time to spend on just one event. MCARES has gone through some changes recently and the staff has decided that they would better serve the group if they did not have to work on the Air Fair. Obviously I voted against not working the Air Fair as I personally feel that it is a great training ground for operation in a harsh environment, plus it allows us to perform some great public services.

The decision did not come from the membership itself. The membership is called upon to work the show, not plan it. They don't have to spend close to four months worth of time briefing and de-briefing. It must be understood that the membership was never asked not to participate at the Air Fair. They were asked not to wear ARES logos, but I think that is a moot point because Summer Celebration will be providing shirts for everyone there. Hats, too, I believe.

I will be working directly for the Summer Celebration committees and we need good people to come help. As mentioned in a previous post Summer Celebration needs non-hams for some spots too.

I hope to see you there!

73,

Mark K8MHZ

All, Like I said I wasn't planning on starting a political discussion here as to the who's and what's of things. Since a few people do not agree with me I spend a moment justifying my post to the entire world as it will save me several minutes of typing to each individual.

#1) I do have the authority to ask my county to not participate. If they choose to they do so on there own with out the support of an established program. In Kent County we have a RACES only program, so if they choose to participate that means do not wear your ID's or Uniform shirts from our County! Your participating as a amateur radio operator, not as a member of Kent County RACES.

#2) Contact Jim for more info on this issue.

#3) This is the end of my response to it on this list. If you do not agree with the policies in Kent County. Don't join the program in our county. We run a highly respected professional program and spend more time then anyone in the state working for our EMD, our numbers prove it and our members show it with there actions.

If you have a specific issue, feel free to email me direct jnawrot@kcraces.net

Jeff

Jeff, I can't believe what I just read here. There is absolutely nothing improper of an amateur radio operator organizing a group of radio operators to help with communications at a public event for the purpose of child watch and other public benefit. There is no going around the Muskegon County EC, because they have chosen not to organize the event this year. For that matter the understanding I have is the Muskegon county members were told they welcome to participate if they wanted but were asked not to wear any ARES clothing or items because it was not ARES organized event. Then again it would be illegal for them to tell them that they couldn't participate in a event that would benefit the public such as this. The thought that a county EC would tell or recommend that it's volunteer amateur radio members not participate in a public event, in a voluntary position where he or she would be using their radio skills and efforts to the good of the public. That is part of what the FCC issued their license for. I sure hope such recommendations were either a mistake or based on a misunderstanding.

No County EC has authority to tell any licensed amateur radio operator member or non member he or she can not or should not participate in an event such as this. If he or she feels they do, then he or she is not qualified for said position!

We all need to stop and think about why we have amateur radio licenses and why the government has allowed us to have them, and what good we can do with them.

Good evening to all, 73'

"If they choose to they do so on there (sic) own with out (sic) the support of an established program."

This is NOT TRUE! Anyone working the Air Fair will have the support of a very established program, the Muskegon Summer Celebration.

I also question the Constitutional legality of dictating what a person wears at an event not under the dictator's control. It is, as I *previously stated* a moot point as the Summer Celebration committees will have the sole authority over the dress code at the Air Fair. We will have our own shirts to wear.

Jeff is correct about not being able to participate as a RACES member. There is a limit to the amount of training RACES members can have each month and it amounts to an hour a week or so if I remember, or is it an hour a month? Any activity that RACES performs outside of being called upon by the Governor becomes technically illegal if it exceeds the stringent limitations set forth by law. Anyone wanting to argue this point will be referred to the appropriate authority having jurisdiction over the matter.

Those wanting to work the show will be working under the direction of the Muskegon Summer Celebration committee and will be covered by that organization. In the past we had no such coverage, in fact, Grevious didn't even know the names of the people working for him.

Thanks to all that have helped in the past with all of our events, and thanks in advance for your continuing support of your community.

73,

Mark K8MHZ

Hello Everyone There have been some posts made that are not in the interest of promoting ham radio but instead to undermined other organizations activities. Every member of West Michigan Hams can go to the membership list and send a comment to the individual member they do not agree with and I expect each one of you to do that.
If you are a EC of a group then go to your website and send your comment to your group there that you do not agree with what the other group is doing, please respect our site here as we respect your site and do not post comments on it airing your disagreement of what the other group is doing. No ham is required by law to volunteer his time, we do it because we want too and if it is no longer any fun to do there will be none of us doing anything.

So please remember send comments meant for individuals to there personal e-mail and not just click on reply and send it to everyone

Thank you Don Meyer . KB8ODB

Good morning Don,

YES - let's share a coffee...
Your call to set a time and place?

I've visited your node several times in the past without appreciating the similarity. After doing some web research this morning, I now believe your "net-node" should be compatible with my "net-rom" if our software authors have both been faithful to the standards. To that end, I will configure my node to add your node as a neighbor. Yes - I'll need to set a digi-path since our direct path is not 100% reliable... I should know how well it works in a couple more days.

My path to WA8RSE is not very reliable via RF either. Also, I can not reach RSE via telnet from the command line, while I can reach RSE from telnet within jnos. The bad news is that RSE rejects my login - his node seems to permit only pre-registered logins? I expect to sort out his rules as he and I have further conversation.

I also expect to improve my node's RF accessibility. My plan is to raise the antenna another 20ft (+/-) and increase power from 30 to 100W. It remains to be seen if it will reach the other side of the lake - today it does not. Which opens another subject: what omni-directional antenna works best for digital networks? I've been looking to build a loop for the purpose - but I can still change my mind with an eraser since it is not built yet...

Mark,

I am at your service regardless of who is in charge. The removal of security duties is good news to me, since I always felt we were placing ourselves in a high-risk without much authority to enforce anything, if you know what I mean.

I also think the fact we are still being included in the Air Fair scheme of things is great news! It means we have made a good impression. I am glad we have you and your connections to keep us involved.

Andrew

Subject: [WestMichiganHams] Looking for a few good hams

Hello All,

As you may or may not know, MCARES has decided they want nothing to do with the Air Fair this year. Instead, I will be working on one of the committees for the Summer Celebration and they have requested help from the hams, especially those with past experience with the show.

First, and this is good news, hams will NOT be working in the Security Operations effort. What Summer Celebration needs is the following, so far:

Site Committee

Persons to assist in the set up of the show. This will be done during the week prior to the show. Since I have never worked on the site committee before I have little more to pass on other than they still need help in this area.

Child Watch

I think our assistance with Child Watch is the most important thing we do at the Air Fair. They will have some of their own people but they have requested for hams to be there with them. I think they liked us!

AirDales

The new Air Boss is looking for a few people to make a commitment of at least three years to work with Air Operations. One of the things they do is park the planes for the static displays. They also set up the acts on the ramp for the show. Working with Air Operations is a very prestigious role. They also need non-hams that are willing to make a three year commitment so if you know someone with a love for airshows and no ham license, let me know.

Deployable Communications Network

We need a few very skilled hams to work with the non-ham WLAN techs to set up an Intranet. Once in place, we will need people to keep the system running. If the system works as planned, there will be video surveillance cameras on the 'net. This will be a first for the show. We also may need help setting up the portable repeater(s).

I also heard rumors that the Norton Shores Fire Department may need a few of us, too. Chief Purchase is out of town until next week so I have no official info for the roles the FD may have for us. I would like to stress that NSFD has been VERY GOOD to the hams in the area and we would be remiss not to offer our help if they request it.

There are forms to fill out and some stuff to read. So far, my contact with Summer Celebration has shown that Joe Austin is trying very hard to have a very organized event. He has done well with Summer Celebration and I think he will pull it off. I think he is headed in the right direction.

Two things that are crabbed about most is the traffic leaving the show and the same acts coming year after year. This year at 5 pm, the show does not end. The last air act will be a re-enactment of a Viet-Nam helicopter battle with pyro and everything! When the choppers land, the beer tents open and the bands start playing. People will be able to go on the choppers that were in the show for rides. This should ease the outgoing traffic considerably.

There will also be entirely new acts we have never seen. It should be a great show.

Summer Celebration has a big get together each year with food and stuff to show appreciation to it's volunteers. Those that work this year's Air Fair will be invited. I will have more details on that later.

In short the spots should be very enjoyable with much less stress than we had working Security. If you have any questions please e-mail me at k8mhz@..., or here on the reflector if Don the Owner doesn't mind.

Thanks much and 73,

Mark K8MHZ

Jeff,

So what you are saying is your RACES group is asking its members not to work under your group's authority (badges and apparel) but you are also not prohibiting them from helping as individual amateur radio operators? That sounds reasonable to me.

I am sure there was nothing negative intended by anyone here. Sometimes a person's meaning can be misconstrued in e-mail because you don't hear inflection or tone and writing styles can vary from one to another. I find myself reading my posts 3 or 4 times before hitting the send button for that very reason.

Andrew

Subject: Re: [WestMichiganHams] Looking for a few good hams

All, Like I said I wasn't planning on starting a political discussion here as to the who's and what's of things. Since a few people do not agree with me I spend a moment justifying my post to the entire world as it will save me several minutes of typing to each individual.

#1) I do have the authority to ask my county to not participate. If they choose to they do so on there own with out the support of an established program. In Kent County we have a RACES only program, so if they choose to participate that means do not wear your ID's or Uniform shirts from our County! Your participating as a amateur radio operator, not as a member of Kent County RACES.

#2) Contact Jim for more info on this issue.

#3) This is the end of my response to it on this list. If you do not agree with the policies in Kent County. Don't join the program in our county. We run a highly respected professional program and spend more time then anyone in the state working for our EMD, our numbers prove it and our members show it with there actions.

If you have a specific issue, feel free to email me direct jnawrot@...

Jeff

Jeff, I can't believe what I just read here. There is absolutely nothing improper of an amateur radio operator organizing a group of radio operators to help with communications at

a public event for the purpose of child watch and other public benefit. There is no going around the Muskegon County EC, because they have chosen not to organize the event this year. For that matter the understanding I have is the Muskegon county members were told they welcome to participate if they wanted but were asked not to wear any ARES clothing or items because it was not ARES organized event. Then again it would be illegal for them to tell them that they couldn't participate in a event that would benefit the public such as this. The thought that a county EC would tell or recommend that it's volunteer amateur radio members not participate in a public event, in a voluntary position where he or she would be using their radio skills and efforts to the good of the public. That is part of what the FCC issued their license for. I sure hope such recommendations were either a mistake or based on a misunderstanding.

No County EC has authority to tell any licensed amateur radio operator member or non member he or she can not or should not participate in an event such as this. If he or she feels they do, then he or she is not qualified for said position!

We all need to stop and think about why we have amateur radio licenses and why the government has allowed us to have them, and what good we can do with them.

Good evening to all, 73'

Mark, while I do not want to start a political discussion on this list. I do not feel it is proper for an amateur to go around the wishes of the counties EC and there established program. For this reason, members from Kent County have been asked to not participate.

Jeff Nawrot
Kent County EC

From: K8MHZ
Topic: 630 Message: 630

I would like to say to all the KCRACES members that have been monitoring the last few threads that no matter what your decision is for this year's Air Fair I sincerely appreciate your help in the past. I also want to know that I won't hold it against any of you for not wanting to go against Jeff Nawrot's wishes for you to not work the show. I really do understand you not wanting to go against his wishes and I respect your decisions.

Kent County has helped me out when I really needed them. Truly, the spots you folks covered in the past years may have gone unattended had you not came in and offered a hand.

Working the Air Fair is not a piece of cake. The long hours and rough conditions make it a formidable task. To travel from a neighboring county to help out without compensation speaks volumes of your commitments. I believe actions speak louder than words and I truly have appreciated your actions.

73,

Mark K8MHZ

Irving Vermilya-America's #1 Amateur
by Donna Halper
If you were alive during the formative years of amateur radio, you knew Irving Vermilya. From the time he was 12 and he travelled with his dad and his family's minister to Canada to hear Marconi speak, amateur radio was his first love, and he was a life-long ambassador for it. (The story goes that after the talk, which was mainly attended by adults, Marconi came over to the young lad and encouraged him in his interest in wireless. He even gave young Irving a piece of equipment, which became Irv's first receiving set.)

Born in June of 1890, Vermilya grew up in Mt. Vernon, New York, where he built that first rather primitive set in December of 1901, after returning from his trip to see Marconi (as he later recalled, it looked strange, but it worked). Other more advanced (and more professional-looking) sets followed, and his dedication to wireless increased. His spark transmissions were so frequently heard that he was offered jobs on ships that needed a wireless operator. He became a member of the newly formed Radio Club of America in 1911, using the calls VN. (Later, he would use 1HAA, but he was best known as W1-ZE). In late 1912, the government began to require that all wireless operators be licensed. Irv hurried to the Brooklyn Navy Yard to take the test, and was given Certificate of Skill #1. For the rest of his life, he would be known as America's Number 1 Amateur-which he truly was.

Irv Vermilya's involvement with radio continued; at the age of 16, he did in fact go to sea as a wireless operator; a few years later, he was given the important job of running the Marconi Wireless Station, WCC, on Cape Cod. During World War I, he served in the Navy, and then returned to Massachusetts to run the RCA wireless station at Marion. His engineering and wireless skills brought him into contact with such legendary figures as David Sarnoff, Lee DeForest, and Edwin Howard Armstrong.

By 1921, professional radio stations were springing up, and Irv was interested in this new technology too. Using his newly acquired license for a land station, 1ZE, he began doing radio broadcasts in late April (according to the Boston Traveller's ham radio column, he got special permission to be on even before he received the official license in May); his plan for 1ZE was to both promote amateur radio and to entertain his neighbours in and around New Bedford and upper Cape Cod with concerts and local information. His work came to the immediate attention of the Slocum and Kilburn Company, which was planning to open a station at their mill (the mill was similar to what we would call a "general store", since it also sold electrical equipment, tools, and building supplies; the station would be located in the radio department). They hired Irv to build it and run it, and the station went on the air officially the last week of May 1922 as WDAU.

(A "cousin" of WDAU still exists, although today, it is known as WNBH; these initials stand for New Bedford Hotel, where its studios once were located. Interestingly, thanks to the consistent link of Irving Vermilya as owner or engineer, WNBH claims to be the 11th station in the US, tracing itself back to 1ZE in mid 1921 and then to WDAU. However, the evidence seems to suggest that while Irv worked at 1ZE, WDAU, amd WBBG, the first two never directly evolved into WNBH. 1ZE remained on the air, in fact, long after he was hired to build WDAU.

1ZE was renamed by the government as W1-ZE, but Irv still owned and operated this well-respected ham station for over 40 years. Slocum & Kilburn kept WDAU on the air briefly even after Irv left to put WBBG on. It was WBBG that really evolved into WNBH; the station first began to broadcast under those calls in early November of 1925. But being the 11th station in the US makes a great story, and it has been repeatedly stated as a fact both by WNBH and by the New Bedford media. Given Irving Vermilya's many achievements, it doesn't surprise me that he receives credit for one that may not totally be accurate.)

When financial problems beset Slocum and Kilburn in late 1923, Irving acquired the station's equipment and moved it to his house (imagine his wife's surprise) in January of 1924. He began to operate it under the call letters WBBG until mid-1925. (His was one of many small stations that suffered when ASCAP required all stations, no matter what their size, to pay large fees to play ASCAP music; such fees almost drove Irv's little station off the air, but it made him even more determined to find some financial backers so that he could keep the station operating.) He was finally able, with business partner and fellow ham radio operator, Armand J. Lopez, to move his radio station back to New Bedford in November of 1925, requesting the aforementioned WNBH call letters. It was common in radio's early days for stations to have studios at hotels, since this provided a studio audience as well as a house dance band, and it certainly gave WNBH a good community image to have the hotel as its location. Irv continued to play a major role in WNBH's operation, serving as its General Manager, as well as helping to hire the talent and getting the station publicity. His ability as an engineer was well-known, and he frequently kept the station up and running during winter storms or other weather-related problems. In May of 1934, he sold WNBH to the owners of the New Bedford Standard-Times newspaper, but he continued to work there, first as station manager and later as the chief engineer until he retired in 1955.

Vermilya in his later years at WNBH
While Irv Vermilya's career in professional radio earned him considerable praise, he never stopped being involved with ham radio. In 1921, he was named the New England Manager of the ARRL. He was the mentor to Eunice Randall, the district's first woman amateur, and at a time when women were not expected to know anything about radio, Irv was totally supportive of Eunice and encouraged other men to give her a chance-Irv and Eunice were friends for many years, participating in various conventions together, and of course, keeping in touch via their ham sets. Irv wrote columns on ham radio for QST and for various newspapers, and won virtually every award a ham could win-it was impossible to read any magazine about ham radio without seeing another country or continent that W1-ZE had received or been received by. (In the early 1920s, amateur 'tests' were often held to see how far a transmission could go, and Irv was one of the few whose messages were received as far away as Europe.) And as you might expect, he also put a mobile transmitter in his car, and in the early 1930s, he set up the first police radio station for the New Bedford Police department (WPFN). In fact, whenever he could put his radio skills to a positive use, Irv was right there to volunteer, whether it was relaying messages during a hurricane or attracting some publicity for ham radio by engaging in a "foot-sending" contest with Eunice Randall (Eunice usually won). Years later, he was one of the founding members of the Old Old Timers Club, and served on its board. He was also the first American citizen ever given a permit to operate his mobile station in Canada.

I would like to tell you that such a distinguished career and such a highly respected man lived to a ripe old age, but not every story has a Hollywood ending. Depressed by the death of his wife, in failing health, and perhaps feeling the radio industry no longer had a place for him, in late January 1964, Irv Vermilya committed suicide. His death came as a shock to the many people who had admired him; even the Standard-Times editorialized about

what a fine human being he was, and how much he had contributed to broadcasting. Irving Vermilya elevated the status of ham radio, and was an able spokesperson and emissary, whose outgoing personality made friends wherever he went. If it were not for him, New Bedford and large parts of Cape Cod would not have had a professional radio station until the 1930s, and thousands of people who met him via ham radio would not have known what fun this hobby could be. He was a strong believer in community involvement, and whatever station he ran, be it amateur or profession, it would always do its part to help the community. Perhaps he never invented something major the way Marconi did, perhaps his name is not as famous as Sarnoff's, but it is radio's early pioneers who paved the way for the fledgeling industry to grow and succeed. Irving Vermilya devoted his life to radio, and he deserves our thanks for that dedication and his many years of service to the industry he loved so much.

633. Radio Club Meeting

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-02 22:35:55 UTC
From: Bill Fries
Topic: 632 Message: 633

All:

The radio club is meeting Thursday evening at 7:00 at our clubhouse. Drop by for a great meeting. Al, KV8X will provide the program. He is exploring feed line in the form of coax. Should be very interesting.

Even if you already know everything about coax you can still get a cup of fresh coffee and a stale donut. Sounds great? You bet!

Bill, AB8SC
President of the club

Radio club meeting reminders: GRARA and LARC

Grand Rapids Amateur Radio Association (GRARA)
The May meeting is this Friday, May 5 at the Red Cross building, 1050 Fuller Ave. NE (just south of Leonard Street). Doors open at 6:30 PM for eyeball QSOs, business meeting starts at 7:00. All are welcome. http://www.w8dc.org

The traditional after-meeting meal this month will be held either at the Hunan Chinese restaurant or at the Adobe In-N-Out Mexican Restaurant at Leonard and Fuller NE. Everybody is invited to join in in this tradition. If you would like directions to the restaurant, ask any officer at the meeting.

Keep in mind the JUNE meeting will be Friday, June 2 at the HUDSONVILLE FAIRGROUNDS, following the "Roadside Chili Potluck". The potluck is a long standing tradition of the IRA the evening before HAMFESTIVAL. http://www.w8hvg.org

---

Lowell Amateur Radio Club (LARC)
The May meeting is this Saturday, May 6, 9AM social, 10AM meeting at Lowell City Airport, 730 Lincoln Lake Ave SE just north of Lowell between Main St (Hwy M-21) and Vergennes St. Normally on the second Saturday, moved this month to the first Saturday to avoid conflict with the River Bank Run where volunteer hams are needed for communications HINT HINT! All are welcome. Talk-in 145.27-(94.8Hz) http://www.qsl.net/w8lrc mailto:w8lrc@...

Monthly W8LRC repeater transmitter grounds cleanup at the Citadel Broadcasting WKLQ site Wednesday, May 10. Location, 2900 Lincoln Lake Ave NE, just north of 3 Mile Rd, 7PM.
Talk-in
145.27-(94.8Hz)

Tracking system to better pinpoint planes' locations
Posted 5/2/2006 10:46 PM ET
By Alan Levin, USA TODAY
WASHINGTON - The government is endorsing a new concept for the future of guiding planes that will eventually replace radar in tracking jets over the USA.
Federal Aviation Administration boss Marion Blakey said Tuesday that the new system will improve safety and save billions of dollars for the government and airlines by streamlining how aircraft operate.

Known as ADS-B (Automatic Dependent Surveillance-Broadcast), the system works by providing vastly improved information about where a plane is located and where it is heading. It also allows aircraft to receive far more detailed reports from the ground on weather and the location of other planes.

Blakey said the technology is "the future of air traffic control." The FAA's Vincent Capezzuto, who manages the system, said it will revolutionize flying in the same way that the Internet changed computing.

Ever since the 1950s, controllers have guided aircraft using radars, which sweep the skies with radio beams that track metal objects. But because radar is imprecise, controllers must keep planes miles apart to ensure they do not collide. Only controllers on the ground have access to radar, so pilots don't always know the location of other planes.

Under ADS-B, planes use global positioning satellites to determine their exact position and then broadcast once a second where they are. Ground stations costing a small fraction of a radar can receive the radio blips and tell controllers the locations of planes. The same information can easily be transmitted to all the aircraft in the sky so pilots can follow other planes.

The FAA has been testing ADS-B for years, but Tuesday's announcement was the first time the agency has said it intends to make it the backbone of the air traffic system. ADS-B has allowed air traffic controllers in Alaska to follow planes that were hundreds of miles from the nearest radar. Australia

is installing it to track aircraft over stretches of the country's uninhabited interior.

Blakey said the agency intends to place the system in a few spots around the country by 2010. That initial phase will cost the FAA and airlines $600 million but will save them $1.3 billion, she said. The new system will cover all areas currently served by radar by 2014.

Cargo hauler UPS has equipped 107 of its jets with ADS-B and uses it to speed flights into and out of its Louisville hub, Director of Operations Karen Lee said. A recent experiment showed the airline could save $2 million a year in fuel simply by using the system to take more efficient routes to land in Louisville.

ADS-B has been endorsed by airlines and pilot groups, but numerous details need to be worked out. Airlines, for example, have been cautious about the high price tag they must pay. In addition, the FAA is still working out an adequate backup system for ADS-B.

Paul,

Transmitting legally on Amateur frequencies requires a licensed Control Operator. A Control Operator can operate more than one radio at a time. If you are in control of both pieces of equipment the tests you describe would be legal. The trick is being able to control both rigs from one place. If you can figure out how to do that, you're OK. Remember that you can't transmit control commands on 2 meters. It is OK on 440 and via TX. If the rig that the non-licensee is sitting at was a Kenwood TM-V7A for instance and you had an HT that had DTCS (Digital Tone Coded Squelch) you could control the Kenwood from as far away as you could work 440 simplex. If you don't have the bux for such a set up, a homebrew project may be in order.

Or you could get the XYL licensed or have one or two of us come help.

Good Luck!

> In a consolidated complaint on behalf of Tarnovsky, Blasdell and South
> filed
> October 13, the ARRL asked the FCC to order the BPL system shut down
> "until
> the operator can demonstrate compliance with the requirement that it not
> cause harmful interference to licensed radio services."
>
> ==>A FORCE FOR THE FUTURE: EDUCATION AND TECHNOLOGY PROGRAM NEEDS YOUR
> HELP
>
> To those who wonder--or worry--about what the League is doing to ensure
> the
> future of Amateur Radio, ARRL Chief Development Officer Mary Hobart,
> K1MMH,
> offers a prompt response: the ARRL Education and Technology Program (ETP).
> More familiar to many as "The Big Project," the program has provided
> turnkey
> Amateur Radio stations and educational materials to more than 170 schools
> across the US. More important, Hobart says, the ETP each year exposes many
> youngsters and their teachers to Amateur Radio, wireless technology,
> electronics and even robotics--something that likely wouldn't happen if
> the
> program didn't exist. With the ETP kicking off its 2006 fundraising
> campaign
> this month, Hobart emphasizes that the program depends entirely on
> individual donations.
>
> "The Education and Technology Program is unique among ARRL's programs in
> that it is totally funded by voluntary member contributions, so the onus
> to
> continue to put stations in schools and to grow the program rests on those
> willing to contribute," she says. "This is an awesome responsibility for
> the
> Amateur Radio community."
>
> Campaign revenue not only covers the cost of placing stations in schools,
> Hobart notes. It also funds a burgeoning schedule of Teachers Institutes
> each summer as well as ongoing efforts to guide national educational
> standards in science and mathematics. Hobart called the Teachers
> Institutes
> "a powerful tool" to inspire educators and to help them develop confidence

> in teaching about wireless technology and electronics through Amateur
> Radio.
>
> Generous gifts helped the ETP to expand to five the number of free
> Teachers
> Institutes it's offering in 2006, its third year, and Hobart is optimistic
> that the program will be able to afford additional sessions in the years
> ahead. Some, but not all, of those who attend are Amateur Radio licensees,
> while others become hams as a result of attending the week-long sessions.
> In
> any event, Hobart points out that Teachers Institute alumni influence
> thousands of youngsters each year.
>
> In fact, the "poster boy" for the 2006 campaign is Ronny Risinger, KC5EES,
> a
> teacher at LBJ High School in Austin, Texas--an ARRL "Big Project"
> participant. Risinger attended the first ETP Teachers Institute in 2004 at
> ARRL Headquarters. His success with the program became the centerpiece of
> this year's ETP fundraising effort.
>
> "Ronny's story is a powerful one," said Hobart. "He's a teacher and a ham
> who's taken advantage of all the ETP resources at his disposal. This is
> why
> we tell his story."
>
> Risinger credits the ETP and the Teachers Institute with his success in
> inspiring and teaching his students. He says the League program gave him a
> strong sense of confidence that allows him to be a better teacher,
> presenting his classroom material in unique and engaging ways--and
> especially hands-on projects that captivate his students.
>
> Hobart says Risinger is just one example of how ETP participation and
> attendance at a Teachers Institute can inspire educators and help their
> students to embrace both wireless technology and Amateur Radio.
>
> "Supporting the ARRL Education and Technology Program is an opportunity to
> do something about the future of Amateur Radio and attracting the younger
> generation," Hobart says. "Outside of the League's ongoing and essential
> effort to defend our spectrum, I can think of no other initiative that
> prepares ham radio for its future."
>
> Contribute to the ARRL Education and Technology Program by July 31 via the
> secure donation Web site
> <https://www.arrl.org/forms/development/donations/education/education.html>.
> Contributions are tax deductible to the extent allowed by law.
>
> ==>JROTC CADETS AT ALABAMA SCHOOL QUERY ISS ASTRONAUT
>
> US Air Force Junior Reserve Officers' Training Corps (JROTC) cadets at Bob
> Jones High School in Madison, Alabama, got the first shot at speaking with

> new ISS crew member Jeff Williams, KD5TVQ. The Amateur Radio on the
> International Space Station (ARISS) program arranged the May 1 contact
> with
> NA1SS, which marked the inaugural school QSO of Williams' duty tour as
> part
> of Expedition 13. Posing the first question was Williams' nephew, Adam
> Williams, who wanted to know if his uncle found it difficult to adapt to
> living in space.
>
> "It takes a little bit of adaptation to get used to living in space, no
> matter times you've been here, but after you've been here the first time,
> you know what to expect, so it's a lot easier to adapt," Williams told his
> nephew. "It still takes a little bit of time to adapt to the weightless
> environment and to know your way around--in this case, in a new
> spacecraft,
> the space station."
>
> Williams flew aboard the shuttle Atlantis in May 2000 on a 10-day space
> station assembly mission. During that flight, he performed a spacewalk
> lasting almost seven hours. He told the Bob Jones students that he's
> already
> looking forward to his next spacewalk, set for later in his mission. As
> opposed to the initial jolt of a shuttle launch, Williams told the cadets,
> the Russian Soyuz rocket launch is easier the first couple of minutes but
> gets rougher as it continues its flight into space.
>
> Williams also described the science experiments he and Expedition 13
> Commander Pavel Vinogradov, RV3BS, have under way. "We do a variety of
> experiments," he explained, adding that some projects deal with fluid
> dynamics, to help understand how fluids behave in a weightless
> environment.
> In addition, the crew is growing crystals to study materials science,
> "because crystals will grow more uniformly and precisely in a weightless
> environment without the force of gravity."
>
> Other research is investigating the effects of weightlessness on the body
> "so that we understand how to counter the impact on the body for future,
> long-duration missions--especially to places like Mars or living on the
> moon
> for a long period of time," Williams said.
>
> Replying to a later question, Williams said he expects astronauts to again
> land on the moon, but he added that he doesn't expect that to happen
> before
> 2010. "Nothing goes as quick as we want it to, but we will go back to the
> moon--I'm confident of that."
>
> The school's senior aerospace science instructor, Lt Col Randy Herd (Ret)
> served as the master of ceremonies for the event as students and other
> faculty members looked on. Tony Hutchison, VK5ZAI, served as the Earth

> station for the event. Verizon Conferencing donated a teleconference link
> to
> provide two-way audio between the school and Hutchison's QTH in Kingston,
> Australia. The contact Dieter Schliemann, KX4Y, served as the ARISS mentor
> for the Bob Jones High School contact, which was the 238th school QSO
> since
> the first crew arrived aboard the ISS in 2000.
>
> ARISS <http://www.rac.ca/ariss> is an educational outreach of a
> nine-nation
> consortium, with US participation by ARRL, AMSAT and NASA.
>
> ==>FCC WRC-03 AMATEUR RULE CHANGES NOW IN EFFECT
>
> Several FCC Part 97 Amateur Radio rule revisions to implement changes
> agreed
> to at the international level during World Radiocommunication Conference
> 2003 (WRC-03) went into effect May 3 upon their publication in The Federal
> Register. The FCC Order
> <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-06-79A1.pdf>,
> released
> in January, affects ?97.111, Authorized transmissions; ?97.113, Prohibited
> transmissions; ?97.115, Third party communications, and ?97.117,
> International communications. The FCC has yet to deal with the so-called
> "Morse code proceeding," WT Docket 05-235, which also stemmed from
> decisions
> made at WRC-03. The Commission has proposed deleting the Element 1 5 WPM
> code test as a requirement to obtain any Amateur Radio license.
>
> "These amendments will ensure that the Commission's Amateur Radio Service
> rules conform to Article 25 of the international Radio Regulations adopted
> at the 2003 World Radiocommunication Conference, and will further the
> Commission's ongoing efforts to streamline its Amateur Service Rules," the
> FCC Order said.
>
> The FCC Order revises:
>
> * ?97.111(a)(1) to permit "transmissions necessary to exchange messages
> with
> other stations in the Amateur Service, except those in any country whose
> administration has notified the ITU that it objects to such
> communications.
> The FCC will issue public notices of current arrangements for
> international
> communications." The old language permitted communication among amateur
> stations in different countries "except those in any country whose
> administration has given notice that it objects to such communications."
>
> The FCC said the change does not prejudice its consideration of comments
> to

> rule changes it's proposed to ?97.111(a)(2) in WT Docket 04-140--the
> so-called "Omnibus" proceeding that covers a wide range of rule changes
> and
> proposals. The Commission wants to amend that rule section to clarify that
> amateur stations may at all times and on all authorized channels transmit
> communications necessary to meet essential needs and to facilitate relief
> actions.
>
> * ?97.115(a)(2) to facilitate the transmission of international
> communications on behalf of third parties in emergency or disaster-relief
> situations, whether or not a third-party agreement is in place between the
> US and the countries involved. The revision now permits communication with
> any non-US station "when transmitting emergency or disaster relief
> communications" as well as with any non-US station "whose administration
> has
> made arrangements with the United States to allow amateur stations to be
> used for transmitting international communications on behalf of third
> parties."
>
> The revised rule further provides that no station may transmit third-party
> traffic other than emergency or disaster relief communications to a
> station
> whose government has not made a third-party arrangement. Still excepted
> from
> the prohibition is any third party eligible to be the control operator of
> an
> amateur station.
>
> * ?97.113(a)(4) to prohibit amateur stations exchanging messages with
> amateur stations in other countries from making transmissions that are
> encoded for the purpose of obscuring their meaning, except for control
> signals exchanged between Earth command stations and space stations in the
> Amateur-Satellite service, something Part 97 already provides for. The old
> rule referred to the use of "codes and ciphers."
>
> The same rule also already prohibits transmitting music, communications
> intended to facilitate a criminal act, obscene or indecent words or
> language
> and false or deceptive messages, signals or identification.
>
> * ?97.117 to state that amateur stations may transmit communications
> incidental to the purposes of the Amateur Service and to remarks of a
> personal character.
>
> The FCC also revised ?97.3 and 97.309 to update the definition of
> International Morse code and of various digital codes in the amateur rules
> to reflect changes in the Radio Regulations.
>
> The WRC-03 Final Acts revising the international regulations that apply to
> the Amateur and the Amateur Satellite services became effective July 5,

> 2003. These latest Part 97 revisions now bring the FCC's Amateur Service
> rules into conformance with the international Radio Regulations.
>
> ==>HIGH SCHOOL TO OFFER "RADIO AMATEURS AND DISASTER OPERATIONS" CLASS
>
> A California high school that's participating in the ARRL Education and
> Technology Program (ETP--also known as "The Big Project") will offer a
> year-long elective course, "Radio Amateurs and Disaster Operations"
> (RADIO),
> starting this fall. Moorpark High School math and meteorology teacher Tom
> Baker, NC6B, says the course is the first of its kind anywhere in the US.
> The class curriculum was created in conjunction with the ARRL, the
> American
> Red Cross and various Ventura County agencies. ARRL ETP Coordinator Mark
> Spencer, WA8SME, gives the new course high marks and says it has a great
> chance to succeed.
>
> "This program has in place all three components that will be necessary for
> success: a motivated teacher, supportive school administration and strong
> support and involvement by the local ham community," Spencer said. He
> attended an April 4 meeting at the school to discuss its "Learn and Serve
> Program," and he believes the support shown at that session will greatly
> boost the RADIO initiative.
>
> "The meeting was well attended, and the attendees included representatives
> of all the emergency management participants in the program, the mayor's
> office, the school and district office, school support staff and the ARRL
> Division and Section," Spencer said. Among those on hand were ARRL
> Southwestern Division Director Dick Norton, N6AA, and Santa Barbara
> Section
> Emergency Coordinator Jennifer Roe, AA6MX.
>
> The elective RADIO course is open to students in grades 9 through 12, and
> it
> will feature instruction from certified experts in their respective
> fields.
> After studying, testing and meeting any practical skills requirements, all
> RADIO students will come away with an Amateur Radio license (at least
> Technician class), American Red Cross First Aid Training Certification,
> American Red Cross CPR Training Certification and American Red Cross AED
> Training (Automated External Defibrillator) Certification.
>
> Students will learn about and how to seamlessly interface with the
> National
> Incident Management System (NIMS), Incident Command System (ICS) and local
> government infrastructure. They'll also learn search-and-rescue techniques
> among other disaster and emergency preparedness skills. RADIO participants
> will even learn peer mediation skills.
>
> The RADIO course not only will provide service-learning opportunities for

> students but will make them prime candidates as volunteers for service
> organizations and, later, as potential service professionals.
>
> Moorpark High School, which has an enrollment of approximately 2700,
> established its Amateur Radio club, W6MHS, last August, and it became an
> ARRL-affiliated club in October. In December, W6MHS won an ARRL ETP grant
> and received station equipment through the program (some 170 schools now
> participate in the "Big Project"). This August, Moorpark High School will
> host one of the ARRL ETP Teachers Institutes.
>
> "We are very excited about this program," said Baker of the RADIO course.
> He
> has offered to help other schools in the US to establish RADIO curricula.
> "This will be quite a challenging and enjoyable class. It will give
> students
> skills to become positively and directly involved with their community,
> and
> it gives this high school a pool of talented, trained individuals who can
> assist with many on-campus situations."
>
> Contact Baker (805-378-6305) for more information or visit the RADIO page
> on
> the school's Department of Meteorology Web site
> <http://www.mhsweather.org/pages/10/index.htm>.
>
> ==>MINE DISASTER SURVIVOR KC8VKZ RECALLS DETAILS OF TRAGEDY
>
> Randy McCloy, KC8VKZ--the lone survivor of the January 2 Sago Mine
> disaster
> in West Virginia--has expressed his sorrow to the victims' families and
> shared his personal recollections of the tragedy.
>
> "I cannot explain why I was spared while the others perished," McCloy
> wrote
> April 26, the Associated Press reports. The letter publicly revealed for
> the
> first time McCloy's memories of the incident that almost took his life.
> Following weeks of hospital treatment and rehabilitation, McCloy, 26, is
> still recovering from the ordeal.
>
> While he does not remember the explosion that trapped 12 colleagues and
> himself in the mine, he said he does recall the mine's filling quickly
> "with
> fumes and thick smoke," making breathing difficult. He said at least four
> of
> the emergency air packs failed to function, so the miners shared the units
> that did and there were not enough to go around.
>
> The trapped miners also tried to signal their location by beating on mine
> roof bolts and plates with a sledgehammer, McCloy told the victims'

> families
> in his letter. As they began to accept their fate, he said, the group
> prayed
> and wrote letters to their loved ones. He says as his co-workers lost
> consciousness one by one, he just sat and waited, "unable to do much
> else."
>
> McCloy, who did not testify during a public hearing into the Sago disaster
> this week, said he didn't know how long it was before he also fell
> unconscious from the gas and smoke. He was rescued after 41 hours
> underground.
>
> The McCloys and their two children live in Simpson, West Virginia.
>
> ==>SOLAR UPDATE
>
> Heliophile Tad "Seasons in the Sun" Cook, K7RA, Seattle, Washington,
> reports: This was a nice, quiet week with no notable geomagnetic activity.
> In fact, the middle latitude K index was zero for a 36-hour period
> centered
> on April 30. At approximately the same time the high latitude college K
> index was zero for 51 hours straight. Average daily sunspot numbers were
> nearly double those of the previous seven days, rising by more than 29
> points to 59.7.
>
> As of early May 5, the IMF was pointing south, leaving Earth vulnerable to
> solar wind. The planetary A index reached five on Thursday, May 4, and
> it's
> predicted to hit 20, 30, 20 and 12 for May 5-8. Geophysical Institute
> Prague
> gives a forecast until May 11 of active geomagnetic conditions on May 5
> and
> 6, unsettled May 7, quiet to unsettled May 8, quiet on May 9, back to
> unsettled on May 10, and unsettled to active on May 11.
>
> Sunspot numbers for April 27 through May 3 were 63, 68, 64, 62, 51, 58 and
> 52, with a mean of 59.7. The 10.7 cm flux was 100.7, 100.1, 101.2, 99.9,
> 93.4, 89.4, and 89, with a mean of 96.2. Estimated planetary A indices
> were
> 5, 12, 3, 1, 2, 4 and 3, with a mean of 4.3. Estimated mid-latitude A
> indices were 3, 10, 2, 0, 2, 4 and 2, with a mean of 3.3.

> ==>IN BRIEF:
>
> * This weekend on the radio: The New England, Seventh Call Area and
> Indiana
> QSO parties, the MARAC County Hunter Contest (CW), the 10-10 International
> Spring Contest (CW), the Microwave Spring Sprint, and the ARI

> International
> DX Contest are the weekend of May 6-7. The RSGB 80-meter Club Championship
> (Data) is May 10. The Thursday NCCC Sprint Ladder is May 12 (UTC). JUST
> AHEAD: The Mid-Atlantic QSO Party, the VK/Trans-Tasman 80-Meter Contest
> (phone), the VOLTA Worldwide RTTY Contest, the CQ-M International DX
> Contest, the F.I.S.T.S. Spring Sprint and the 50 MHz Spring Sprint are the
> weekend of May 13-14. The Run for the Bacon QRP Contest is May 15. The
> NAQCC
> 80-Meter Straight Key/Bug Sprint is May 18, the RSGB 80-Meter Club
> Championship (CW) is May 18 and the Thursday NCCC Sprint Ladder is May 19
> (UTC). See the ARRL Contest Branch page <http://www.arrl.org/contests/>
> and
> the WA7BNM Contest Calendar
> <http://www.hornucopia.com/contestcal/index.html> for more info.
>
> * ARRL Certification and Continuing Education course registration:
> Registration remains open through Sunday, May 21, for these ARRL
> Certification and Continuing Education (CCE). Program on-line courses:
> Amateur Radio Emergency Communication Level 1 (EC-001), Radio Frequency
> Interference (EC-006), Antenna Design and Construction (EC-009), Analog
> Electronics (EC-012) and Digital Electronics (EC-013). Classes begin
> Friday,
> June 2. To learn more, visit the CCE Course Listing page
> <http://www.arrl.org/cce/courses.html> or contact the CCE Department
> <cce@...>.
>
> * AMSAT issues first call for papers for 2006 symposium: AMSAT-NA has
> issued
> a first call for papers and presentations for its 2006 Space Symposium
> October 6-8 near San Francisco, California
> <http://www.amsat.org/amsat-new/symposium/2006CallForPapers.php>. Speakers
> are invited to submit and present papers dealing with the science of
> Amateur
> Radio satellites and associated technologies. Speakers originally
> scheduled
> to present at the cancelled 2005 Symposium are encouraged to resubmit
> their
> papers for 2006. Recommended topics include--but are not limited to--AMSAT
> Phase 3E, AMSAT Eagle, microsatellites, cubesats and nanosatellites,
> ARISS,
> antennas, ground stations and more. The AMSAT-NA Board of Directors will
> meet October 5-6, and the annual general membership meeting will be
> October
> 6. AMSAT International will meet October 8. In addition, the IARU
> Satellite
> Committee will hold a public roundtable discussion on frequency
> coordination
> October 8. The ARISS International Delegates Meeting takes place October
> 9-10. Applications to present papers must be submitted by July 15, and
> papers are due August 1. An online registration system is available to

> submit and track abstracts
> <http://www.amsat.org/amsat-new/symposium/2006PapersProcedure.php>. This
> system lets users submit papers and subsequent changes online. Complete
> information on the 2006 Symposium is available on the AMSAT Web site
> <http://www.amsat.org/amsat-new/symposium/>.
>
> * Astronaut Eileen Collins completes career of space firsts: Astronaut
> Eileen Collins, KD5EDS, is leaving NASA. The first woman to command a
> space
> shuttle and the leader of the shuttle Discovery return-to-flight mission
> last year, Collins plans to pursue private interests and spend more time
> with family. "Eileen Collins is a living, breathing example of the best
> that
> our nation has to offer," said NASA Administrator Michael Griffin. A
> veteran
> of four space flights, Collins' career at NASA has been punctuated by
> firsts. She was the first woman selected as a pilot astronaut, the first
> woman to serve as a shuttle pilot and the first woman to command a US
> spacecraft. Mike Coats, director of NASA's Johnson Space Center called
> Collins "a true pioneer in space and on Earth." Collins was selected as an
> astronaut in 1990. She served as the shuttle pilot on Mir space station
> rendezvous missions in 1995 and 1997. In addition to the 2005 Discovery
> mission, Collins commanded the shuttle Columbia on the 1999 flight that
> launched the Chandra X-Ray Observatory. NASA Flight Crew Operations
> Director
> Ken Bowersox, KD5JBP, described Collins as "a gifted leader who knows what
> it takes to get a team through the most difficult of times."
>
> * James T. Hanson, W1TRC, wins April QST Cover Plaque Award: The winner of
> the QST Cover Plaque Award for April is James T. Hanson, W1TRC, for his
> article "A Home-made Ultrasonic Power Line Arc Detector." Congratulations,
> James! The winner of the QST Cover Plaque award--given to the author or
> authors of the best article in each issue--is determined by a vote of ARRL
> members on the QST Cover Plaque Poll Web page
> <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your
> favorite article in the May issue by Wednesday, May 31.
>
> * Former RSGB President John Case, GW4HWR, SK: The Radio Society of Great
> Britain (RSGB) reports that a past society president, John Case, GW4HWR,
> has
> died. Case served as RSGB President in 1991 and continued to be active in
> Society affairs until the mid-1990s. Case was the longtime chairman of the
> RSGB Training and Education, and he led the team responsible for the
> introduction of the Amateur Radio Novice license and was the author of a
> number of RSGB training guides and other publications. A service was held
> April 24 in Cardiff.--RSGB
>
> * Corrections: In The ARRL Letter, Vol 25, No 17 (Apr 28, 2006), the news
> brief "Armed Forces Day 2006 military/amateur activities set," contains an
> incorrect or incomplete hyperlink to the detailed Armed Forces Day

> crossband
> communication test information. The tentative schedule of Armed Forces Day
> on-the-air events--including a list of participating stations, the
> Secretary
> of Defense's message transmission schedule and more information--is on the
> US Army MARS news page <http://www.netcom.army.mil/mars/news/>. Click on
> the
> "Armed Forces Day" link. In the same issue, the story "Supply and Demand:
> VU4AN Andamans Operations Create a Clamor," contained some incorrect
> information: (1) Indian telecommunications authorities granted licenses to
> approximately 30 foreign licensees for the Andamans event (ie,
> approximately
> 70 operators total). (2) Bharathi Prasad, VU2RBI, won the 2005 Dayton
> Hamvention Special Achievement Award. (3) Individual participating
> stations
> will announce QSL routes. Only a few stations are accepting QSL requests
> via
> VU2JOS at NIAR.

643. Bring a Friend to the Meeting

Yahoo group: WestMichiganHams (2006 — 2008)

From: Bill Fries
Topic: 636 Message: 643

All:

The Muskegon Area Amateur Radio Council is encouraging area amateurs to drop by and see our club in action. You are invited! We have a special program on tap for our June 1 meeting that you will just love. Jim Weaver, K8JE and our Great Lakes Division director for our ARRL will be the featured speaker.

For this event we are encouraging all our members to attend and visit with Jim. And our members are encouraged to bring along another ham. We are looking forward to having the clubhouse filled to the brim with hams. Won?t that be a sight!

If you are struggling with the choice of who to invite then drop me or Bob, KC8VTX a quick phone call or e-mail. He is found at jmdupie@... <mailto:jmdupie@...> He has an extensive list of folks who have been members of the club and are not now active. You can surely find a ham contact on the list to invite for this opportunity. Or go on the internet and search for a local ham in the call book. We have a wonderful association and our friends in the amateur radio community will love hearing about our fun loving group.

Maybe you just want to drop by, unaccompanied, to our meeting? That is encouraged, also. And this meeting will be the one to make. I'm hoping that the weather is cooperating because we just might have to hold the meeting outside and give our sound system a real work out! Now that will be a sight!

If you don't know what a call book is or if you need a little nudge then drop me a note. Hams helping hams is the name of the game. And being a good ham you really should not claim a case of mic fright. Let us gather our old friends, our new friends, other ham's friends, and we'll make some new friends. Radio is fun. Let's encourage radio around here in Western Michigan.

See you and your friends there!

Bill, AB8SC
President of the MAARC

649. QSL card art exhibit

Yahoo group: WestMichiganHams (2006 — 2008)

Attachments: 1 described; binary payloads are missing from this source WARC

The following article was from 2003 but it mentions something I never heard of. An exhibit at an art gallery featuring QSL cards. There is also mention of a book we should be seeking out, "Hello World: A Life in Ham Radio".

I have only been collecting cards for a few months now. I have about 90 cards from 24 countries and 24 states. In the process of collecting them I have made some friends on the air from many different countries. Just more than a signal report, we talked about each other's lives and families, what it is like where we live and have even went on to exchange e-mails. The highlight of my collection came yesterday. A short time ago I made friends with the QSL manager for 4A7L. She was also the QSL manager for The Kingdom of Jordan's King Hussein 1, JY1, now SK. She has un-used QSL cards from him and sets of un-used postage stamps from 1952. She has sent me two sets of stamps (one for my father) and one of the QSL cards. The card is made from very heavy stock, like a matte board, with gold on the edges. The call JY1 is made of embossed gold foil. On the card is a picture of King Hussein, not printed on the card but cut from a photo and glued there. His signature, from a rubber stamp, is on the card. Someone spent a great deal of time designing that card. It will reside in a picture frame along with the stamps and the note explaining them.

I started designing cards as soon as I had to send one out. I now have about 1/2 dozen designs for my own call and have done a few others as well. I never thought about the cards as exhibit worthy art until I read the article, below.

Something I picked out of the article that I kind of liked....the author coined hams as being part of an "elite sub-culture". I like that.

73,

Mark K8MHZ

Art
Radio Ga-Ga
At Spur, One Man's Career in Ham Radio Reveals a Lifetime of Curious Connections
Hello World: A Life in Ham Radio
the Spur Propaganda Gallery through Dec. 22 By J. Bowers

To the uninitiated, sitting in a dank basement with humming receiver components and antennae might seem even geekier than playing Everquest for 40 hours straight. But before there were online gaming communities, cellular phones, international relay chats, and instant messaging, ham radio was the best way for a civilian to reach out and touch the world. With a basic, often homemade setup consisting of a transceiver, a power source, an antenna, a speaker, and a microphone, amateur radiophiles everywhere transformed themselves into international communication hubs, using their know-how to establish contact with fellow hams in distant lands.
Once connected, a ham operating out of Baltimore might enjoy a "QSO," or contact, with Erik Biorck at Radio S21ZG in Bangladesh, or Darcy Bens at Radio VEGCK/A7 in Doha, Qatar. After exchanging station addresses and friendly conversation, both hams mail "QSLs" to each

other--tangible verification that their "QSOs" occurred, complete with equipment specifications, time of contact, and other information, all printed and/or handwritten on a 3 1/2-by-5 1/2-inch card. Geeky? Sure. Interesting? More than you'd think.

Hello World, on display at Hampden's Spur Propaganda Gallery, plays host to hundreds of QSL cards. Sealed in plastic sandwich bags and neatly tacked to strips of wood along the gallery walls, the more than 300 QSL cards represent the personal collection of one Hackensack, N.J., ham--namely, Jerry Powell, call number WO2JW, or "Whiskey Two Oscar Juliet Whiskey," in the ham-favored International Telecommunication Union phonetic alphabet.

An avid follower of the news, Powell often used his radio to contact ham operators in international hot spots, amassing a QSL collection that includes communiqués from post-bomb Japan, Vietnam, Iran, Korea, and other locales where civilian contact was discouraged or restricted. By passing government-sanctioned licensing exams, amateur radio enthusiasts become part of an elite subculture, able to wirelessly transmit information around the world--an ability that carries weight even today, when a hurricane or other disaster can knock out phone and power lines in seconds.

Even though Powell, who held a license from 1928 until his "key went silent" in 2001, was just an average American hobbyist, his 67-year ham-radio career caught the attention of author/ham Danny Gregory and graphic designer/ham Paul Sahre. Gregory and Sahre used Powell's formidable QSL collection as the backbone for their book Hello World: A Life in Ham Radio (Princeton Architectural Press, 2003). Peppered with diagrams that look like they could have been plucked from a 1950s science textbook, Hello World is at once an educational text and a picture book of Powell's radio lifestyle.

It makes sense, then, that Spur's Hello World exhibit is best viewed as a companion piece to the eponymous book. Without the context of ham-radio culture, the colorful QSL cards lining the walls would never transcend their license plate/picture postcard/calling card hybrid appearance. But with a little help from Gregory and Sahre's impeccably researched, pleasantly lighthearted book, the full historical resonance of the ham-radio phenomenon turns Hello World into one of the year's most successful sociocultural exhibits.

Most of the ham operators in Powell's collection designed and printed their own QSL cards, using amateur typography, icon, layout, and paper-quality knowledge to identify and advertise their home stations. As a result, the cards' styles and subjects vary as wildly as their creators' nationalities. Some hams, like L.R. Goetz, operating as W9MHM out of Indianapolis, used QSL cards to advertise their businesses--a sly way to evade laws forbidding on-air commercial enterprise. Others, including Joseph H. Miller of PJ9AB, in the Netherlands Antilles, use their QSLs as a forum for Christian witnessing. Miller's card converts the name of his homemade station, Trans World Radio, into an acronym for "Telling the World of Redemption Through our Lord and Saviour Jesus Christ."

The bulk of Powell's collection consists of QSLs from hams who used the postcard-sized format as a way to display pictures of their families (often posed in front of the home ham station), or to offer insights about their locations. In 1959, Glenn E. Murphy, aka K4TLN out of Athens, Ala., sent Powell a photo collage QSL. In addition to depicting Murphy himself, hamming away in front of a homemade map that denounces everyone north of the Mason-Dixon line as "damn Yankees," K4TLN's QSL card shows his son Mack brandishing toy six-guns, his daughter Karen, and his wife, identified only as XYL--shorthand for "ex-young lady," a slang term used to refer to any male ham's wife. Of course, some XYLs ran their own stations, including Maude Phillips, of Alberta, Canada, whose 1944 QSL shows a sexy

cartoon version of herself, sending out "CQ" calls on her transceiver while her boxer-shorted husband, Glen, mends his pants. The caption reads: "While Maude QSOs, the old man sews!!" Phillips added a second handwritten caption beneath her equipment specs, claiming that the cartoon "ab[ou]t covers the situation here!"

The concept behind Gregory and Sahre's book may seem unassuming at first, but the QSLs on display at Spur provide a fascinating gateway into ham-radio subculture. The cumulative effect of seeing Powell's collection all at once should intrigue any history or pop-culture buff. Even those who don't know a ham radio from a ham sandwich.

At least one copy of this book is at Barnes & Noble on Harvey St. It is in the Science - Electronics section. If they are out they will order a copy for you and it should only take about a week.

At Spur, One Man's Career in Ham Radio Reveals a Lifetime of Curious Connections
Hello World: A Life in Ham Radio
the Spur Propaganda Gallery through Dec. 22 By J. Bowers

To the uninitiated, sitting in a dank basement with humming receiver components and antennae might seem even geekier than playing Everquest for 40 hours straight. But before there were online gaming communities, cellular phones, international relay chats, and instant messaging, ham radio was the best way for a civilian to reach out and touch the world. With a basic, often homemade setup consisting of a transceiver, a power source, an antenna, a speaker, and a microphone, amateur radiophiles everywhere transformed themselves into international communication hubs, using their know-how to establish contact with fellow hams in distant lands.
Once connected, a ham operating out of Baltimore might enjoy a "QSO," or contact, with Erik Biorck at Radio S21ZG in Bangladesh, or Darcy Bens at Radio VEGCK/A7 in Doha, Qatar. After exchanging station addresses and friendly conversation, both hams mail "QSLs" to each other--tangible verification that their "QSOs" occurred, complete with equipment specifications, time of contact, and other information, all printed and/or handwritten on a 3 1/2-by-5 1/2-inch card. Geeky? Sure. Interesting? More than you'd think.

Hello World, on display at Hampden's Spur Propaganda Gallery, plays host to hundreds of QSL cards. Sealed in plastic sandwich bags and neatly tacked to strips of wood along the gallery walls, the more than 300 QSL cards represent the personal collection of one Hackensack, N.J., ham--namely, Jerry Powell, call number WO2JW, or "Whiskey Two Oscar Juliet Whiskey," in the ham-favored International Telecommunication Union phonetic alphabet.

An avid follower of the news, Powell often used his radio to contact ham operators in international hot spots, amassing a QSL collection that includes communiqués from post-bomb Japan, Vietnam, Iran, Korea, and other locales where civilian contact was discouraged or restricted. By passing government-sanctioned licensing exams, amateur radio enthusiasts become part of an elite subculture, able to wirelessly transmit information around the world--an ability that carries weight even today, when a hurricane or other disaster can knock out phone and power lines in seconds.

Even though Powell, who held a license from 1928 until his "key went silent" in 2001, was just an average American hobbyist, his 67-year ham-radio career caught the attention of author/ham Danny Gregory and graphic designer/ham Paul Sahre. Gregory and Sahre used Powell's formidable QSL collection as the backbone for their book Hello World: A Life in Ham Radio (Princeton Architectural Press, 2003). Peppered with diagrams that look like they could have been plucked from a 1950s science textbook, Hello World is at once an educational text and a picture book of Powell's radio lifestyle.

It makes sense, then, that Spur's Hello World exhibit is best viewed as a companion piece to the eponymous book. Without the context of ham-radio culture, the colorful QSL cards lining the walls would never transcend their license plate/picture postcard/calling card hybrid appearance. But with a little help from Gregory and Sahre's impeccably researched, pleasantly lighthearted book, the full historical resonance of the ham-radio phenomenon turns Hello World into one of the year's most successful sociocultural exhibits.

Most of the ham operators in Powell's collection designed and printed their own QSL cards, using amateur typography, icon, layout, and paper-quality knowledge to identify and advertise their home stations. As a result, the cards' styles and subjects vary as wildly as their creators' nationalities. Some hams, like L.R. Goetz, operating as W9MHM out of Indianapolis, used QSL cards to advertise their businesses--a sly way to evade laws forbidding on-air commercial enterprise. Others, including Joseph H. Miller of PJ9AB, in the Netherlands Antilles, use their QSLs as a forum for Christian witnessing. Miller's card converts the name of his homemade station, Trans World Radio, into an acronym for "Telling the World of Redemption Through our Lord and Saviour Jesus Christ."

The bulk of Powell's collection consists of QSLs from hams who used the postcard-sized format as a way to display pictures of their families (often posed in front of the home ham station), or to offer insights about their locations. In 1959, Glenn E. Murphy, aka K4TLN out of Athens, Ala., sent Powell a photo collage QSL. In addition to depicting Murphy himself, hamming away in front of a homemade map that denounces everyone north of the Mason-Dixon line as "damn Yankees," K4TLN's QSL card shows his son Mack brandishing toy six-guns, his daughter Karen, and his wife, identified only as XYL--shorthand for "ex-young lady," a slang term used to refer to any male ham's wife. Of course, some XYLs ran their own stations, including Maude Phillips, of Alberta, Canada, whose 1944 QSL shows a sexy cartoon version of herself, sending out "CQ" calls on her transceiver while her boxer-shorted husband, Glen, mends his pants. The caption reads: "While Maude QSOs, the old man sews!!" Phillips added a second handwritten caption beneath her equipment specs, claiming that the cartoon "ab[ou]t covers the situation here!"

The concept behind Gregory and Sahre's book may seem unassuming at first, but the QSLs on display at Spur provide a fascinating gateway into ham-radio subculture. The cumulative effect of seeing Powell's collection all at once should intrigue any history or pop-culture buff. Even those who don't know a ham radio from a ham sandwich.

Hello, the 2006 Tulip Time Festival has started and the first parade is on Wednesday.
We currently are short one ham for the Wednesday parade, two hams short for the Thursday parade, and one ham short for Saturday. We are also in the need of some HTs for some new hams (students of Brian Brethauer) and for those that might not own a HT.
If you, or someone you know is interested in volunteering, please have them email me as soon as possible (svanderhill@...) or call me (616-738-0427) with your/their full name, call sign, contact phone number, email address, and any other information you might think I would need.
Best regards,
Steve - N8UJD

Subject: [WestMichiganHams] QSL card art exhibit
Date: Mon, 7 May 2007 10:06:49 -0400

The following article was from 2003 but it mentions something I never heard of. An exhibit at an art gallery featuring QSL cards. There is also mention of a book we should be seeking out, "Hello World: A Life in Ham Radio".

I have only been collecting cards for a few months now. I have about 90 cards from 24 countries and 24 states. In the process of collecting them I have made some friends on the air from many different countries. Just more than a signal report, we talked about each other's lives and families, what it is like where we live and have even went on to exchange e-mails. The highlight of my collection came yesterday. A short time ago I made friends with the QSL manager for 4A7L. She was also the QSL manager for The Kingdom of Jordan's King Hussein 1, JY1, now SK. She has un-used QSL cards from him and sets of un-used postage stamps from 1952. She has sent me two sets of stamps (one for my father) and one of the QSL cards. The card is made from very heavy stock, like a matte board, with gold on the edges. The call JY1 is made of embossed gold foil. On the card is a picture of King Hussein, not printed on the card but cut from a photo and glued there. His signature, from a rubber stamp, is on the card. Someone spent a great deal of time designing that card. It will reside in a picture frame along with the stamps and the note explaining them.

I started designing cards as soon as I had to send one out. I now have about 1/2 dozen designs for my own call and have done a few others as well. I never thought about the cards as exhibit worthy art until I read the article, below.

Something I picked out of the article that I kind of liked....the author coined hams as being part of an "elite sub-culture". I like that.

Linda got this book from the library. The various libraries share their collection and you can generally order a copy of a book on line. Cheaper?

This was a very good book and quite interesting.

I have heard a rumor of an historically important QSL card, the MAARC, and a presentation all mentioned in the same sentence. Just a rumor, though!

Not necessarily a QSL card but Bob, KC8VTX found his father's call sign from the 1920s. 9AUY or something like that. Fascinating. Next challenge? Get a QSL card from his father?

Great fun!

All:

I have news of a supplier for aluminum rod for your next Moxon antenna project.

The guy with the rod can get same for around $2 per foot. He will also construct an antenna and bring same to the next club meeting.

His name is Bruce, WD8KPQ and he is the guy who ran the fox hunting antenna seminar. Wonderful guy with lots of talent and ability.

Need help? Drop me or him a line.

Bill, AB8SC

All:

Saturday we are having another work bee at the clubhouse. You are encouraged to bring along a rake or chain saw or bow saw or just yourself and your favorite bucket and sponge. We want to clean up around the clubhouse in preparation for the busy summer months.

Please find time to slip in and lend a hand. We'll start around 9:00 in the morning and we plan on running out of gas around two or three.

Paul:

Operation of the autopatch is rather simple and I'd suggest:

First, ask permission to use the autopatch. Just drop your call and say you would like to use the autopatch. There is infrequently any opposition but you will be tying up the repeater for a bit and it is a courtesy to ask permission of those monitoring.

Punch the autopatch access code, the * on your keypad, and the phone number. You should not ask the autopatch to make a long distance toll call and the repeater may not offer you the autopatch should you make such a request. However, on this subject, my local phone service has just implemented a "local" call policy in all of the 231 area code.

The repeater will announce and dial the number you requested. You work the phone the same way as you do at home, but you take turns transmitting since the repeater is not full duplex like your home phone. Be brief because I don't remember the time out timer being suspended for an autopatch call. You might find out!

After your call you push the # key to end the autopatch. The machine announces "autopatch complete" and the time and returns to regular mode. You acknowledge that you are ending your autopatch call and give a brief thank you for the privilege. Simple?

Check the repeaters for the autopatch feature. Autopatch is getting less likely to be implemented. I was "caught" trying to access an autopatch on a machine not supporting this feature. The repeater trustee said, "Wow, I have not heard anyone trying to use the autopatch in over ten years." Not so widely supported as you might have hoped.

Trivia tidbit: The Muskegon repeater, the '94, has autopatch because there is an alarm inside the building. The radio club maintains the alarm and the phone line for the alarm to dial in exchange for tower space. A nice arrangement.

Hope this helps.

Bill, AB8SC

666. Rising copper prices lead to rising cable prices

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-10 14:00:07 UTC
From: Alan NV8A
Topic: 666 Message: 666

I tried to order coaxial cable yesterday at the price shown on a vendor's Web site but was informed that skyrocketing copper prices (82% increase this year alone was what I heard on the news today) have forced a price rise of approx. 15%.

So if you're thinking of buying coax, perhaps you shouldn't wait too long; the price may yet go higher still.

Key up and announce "YOURCALL accessing autopatch" Hit "*" and unkey to check for dial tone. Enter in a Muskegon area telephone number.

To end the call hit "#". The repeater will ID with the time. Announce "YOURCALL".

Autopatches are for Non-business telephone calls.

All electrical materials are going up so fast that the prices we get from the supply houses are only good for 24 hours.

Metals such as copper and steel are at an all time high. Scrap value for copper is way up. A piece of 2 inch steel rigid conduit now costs almost 60 dollars for ONE piece.

1000 feet of #12 THHN is now $250.

The reason? China is outbidding everyone for raw materials. This pushes the price up for all. China can afford to pay more than anyone for raw materials because they use slave and incarcerated labor. They are also building Mercedes Benz and Cadillac autos there. They are also building counterfeit Lexus'. I just read that a factory burned down there killing all the people inside. The reason? It is common practice to lock workers inside factories there so they can't get out. This was done at a factory running a night shift and when fire broke out all the doors were locked from the outside. When this happened here 70 some years ago it paved the way for unions, made headlines world wide and is now a part of our history books.

In China it is just part of 'doing business'.

Can you say 'Most Preferred Nation?'

From: T Behler
Topic: 670 Message: 670

Hi, all.

The following appeared in the May 10, 2006 edition of the Handiham Weekly E-letter.

Thought it might be of interest to someone who might be elmering a prospective new ham.

Best 73 from Tom Behler: KB8TYJ, Big Rapids, MI

*****ARRL plans online Technician Course:

Remember when ARRL first offered the online courses in emergency communications? They were successful, and worked to train many hams as communicators in the EMCOMM system. Now the ARRL is planning a licensing course online for the very first time. The course will most likely be structured and presented along the lines of the EMCOMM courses. It will take enrollments monthly, and cost $69 U.S. Students will register on line at:
https://www.arrl.org/forms/cce/

Registration has not yet opened for the new online Technician class, but the current course offerings are listed. Go to the course you are interested in, then follow the "List scheduled classes" link to see when enrollment opens.

I decided to order the coax at the increased price anyway, only to be told that they were now out of stock and that by the time they got more (perhaps 3 weeks) the price could be higher still. IOW, I couldn't even lock in the current already-increased price.

679. Chinese factory fire

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-11 16:45:11 UTC
From: ke8fo
Topic: 679 Message: 679

Mark,

As a journalist, I get annoyed by rumors, myths, hoaxes and other baloney spread on the Internet. "Why don't you guys print the truth?" is what we hear all the time, when the so-called "truth" the person wants us to print is typically not true.

The Chinese factory fire you refer to, for instance....
I did a search, because I had heard nothing about such an event, and could only find the following account from 1999.....At the very end is probably the fire you refer to, and it happened 13 years ago in THAILAND.

Mind you, I am not defending the Chinese bureaucrats or communism. Just the truth. ----Mark, KE8FO

Profit before people: 16 workers die in Chinese factory fire
By Peter Symonds
16 June 1999

A tragedy is repeated time and again in the sweatshops of Asia: highly inflammable materials, the lack of elementary fire safety measures and a blaze that kills workers who are trapped with no means of escape.

The latest occurred on Saturday in the Chinese industrial city of Shenzhen, adjacent to Hong Kong. According to Chinese news reports, 16 people□12 women and four men□died when a fire broke out at around 5.25 pm on the first floor of the Zhimao Electronics Plant. Another eight people are reported to be seriously injured.

The blaze engulfed packaging materials for electric fans and rapidly spread to the other floors. Even though firefighters were quickly on the scene, they took over an hour to put it out. More than 100 workers were stranded in the four-storey building and firemen had to use ladders to rescue 58 workers trapped on the top floor.

The factory managers responded to the fire by ordering workers to "save materials" rather than their endangered colleagues. Clearly uppermost in the managers' minds were the company's potential financial losses. Under conditions where tens, if not hundreds, of millions are unemployed or underemployed in China's cities and rural expanses, workers are easily replaceable.

The 16 dead workers suffocated in heavy smoke. According to a report in the South China Morning Post, "Witnesses interviewed by Guangdong television said the workers were unable to escape because the windows were sealed by metal screens to prevent theft."

The Governor of Guangdong Province Lu Ruihua has ordered an investigation. The factory managers have been questioned but no charges have been laid and no arrests made. It is conceivable, though unlikely, that the state-run media and bureaucracy may make an example out of someone for their own political purposes□for instance, to make play of the fact that the plant was established by investors from rival Taiwan.

What is certain, however, is that no official investigation will probe into the real causes of these repeated disasters: the ubiquitous character of the atrocious working conditions, barred windows, shoddy construction, lack of fire escapes, hoses, extinguishers, sprinkler systems and procedures, all of which is sanctioned by the Stalinist bureaucracy and the state-run trade unions at the local, provincial and national levels.

On May 10, 1993, the worst industrial fire in history took place outside Bangkok in Thailand. Officially, 188 workers, mostly young women, died in the Kader Industrial toy factory after they were trapped behind jammed doors in a building without fire escapes. The police investigation sought to make a single worker the scapegoat for the tragedy. The managers, building inspectors, government officials, trade unions and politicians all got off scot-free. After a pitiful compensation package was paid to the victims and their families, it was business as usual for investors in Thailand.

Like the latest fire in Shenzhen, the Bangkok blaze hardly rated a mention in the international media.

680. Info on a "Landspout" yesterday in K-zoo

Public Information Statement

Statement as of 1:18 PM EDT on May 11, 2006

... Brief weak tornado touches down in field in Kalamazoo County on Wednesday...

A brief F0 tornado touched down in a field about 2 miles south-southwest of Schoolcraft mi Wednesday afternoon. Eye witness reports indicate that the tornado touched down and went back aloft 2 times in a span of about two minutes around 345 PM. The tornado remained nearly stationary in a field and no damage was reported. The exact location of the field and brief touchdown was northeast of the intersection of xy Avenue and 10th street.

It appears that the tornado was of the landspout variety. The formation mechanism for landspouts is very different from that of the most destructive tornadoes. Landspouts develop as a thunderstorm... or even a towering cumulus cloud... rapidly develops above a surface boundary such as a lake breeze or wind shift.

In this case... it appears two colliding thunderstorm outflow boundaries played a key role in this brief spinup south of Schoolcraft. For more information of landspout tornadoes please refer to a weblink to a similar event from last year. The write up can be viewed at www.Weather.Gov/GRR/science (lower case). Once on that Page click the landspout case.

Hello Mark,

Thanks for making me take the time to do a follow up. I remember reading about the incident in our local newspaper a couple months ago so I can't find the exact article. A search found a fire in Feb. in Bangladesh that fits the description of the one I thought was in China with the workers being locked in.

I stand humbly corrected,

73,

Mark K8MHZ

From: Tom VanderMel
Topic: 683 Message: 683

Fellow hams:
The Independent Repeater Association (IRA) will be having tower clean up party at the main tower site in Grand Rapids on June 17th. (2 Saturdays after the IRA hamfest on June 3rd.). General maintenance (painting, cleaning etc) and weed control will be the main jobs. if you can make this please let me know by drop me an e-mail (KC8WJA@...) or catch me on the repeater. Based on the available manpower , we'll select what job we can get done. One of those big jobs would be to replace the main receiver feed line with a new 2 1/8" Hard line. Please pass this e-mail along to anyone that maybe able to help.

Thanks in advance helping spread the word.

> The sample letter points out the value of Amateur Radio's role in recent
> disasters, such as Hurricane Katrina. "The reason we need your help is
> that
> the FCC continues to resist growing evidence that its rules are inadequate
> to protect radiocommunication systems, including those relied upon by
> First
> Responders, from radio spectrum pollution caused by BPL systems," it says.
> "The FCC needs to objectively and carefully review this evidence and adopt
> rules that will keep interference from BPL within reasonable bounds."
>
> The sample letter notes that not only has the FCC shown no inclination to
> do
> that, it's so far failed "to enforce its existing rules in specific, well
> documented instances of harmful interference."
>
> "Remember that it is not BPL that we oppose, but BPL interference," Sumner
> emphasized this week. "Some BPL systems are designed not to cause
> widespread
> interference, but many are not. The problem is that the FCC rules don't
> distinguish between the two. This is unfair to licensed radio services
> that
> must deal with the consequences of spectrum pollution."
>
> ==>FCC, PILOT TRAVEL CENTERS CONSENT DECREE ENDS TRANSCEIVER MARKETING
> CASE
>
> A consent decree has finally ended an enforcement action against Pilot
> Travel Centers LLC that could have cost the company $125,000 in fines. In
> November 2004 the FCC issued a Notice of Apparent Liability (NAL)
> asserting
> that Pilot, despite multiple citations and warnings, continued to market
> CB
> transceivers labeled as Amateur Radio gear but intended for use on both
> Citizens Band and amateur frequencies. An FCC Order released May 11 adopts
> the attached consent decree between the agency and Pilot and terminates
> the
> forfeiture action. While Pilot agrees to make "a voluntary contribution"
> of
> $90,000 to the US Treasury "without further protest or recourse," the
> company does not admit any wrongdoing.
>
> "The parties further agree that this consent decree is for settlement
> purposes only and that by agreeing to the consent decree, Pilot does not
> admit or deny any liability for violating the [Communications] Act or the
> rules in connection with the matters that are the subject of this consent
> decree," the agreement stipulates.

>
> Under the terms of the consent decree, Pilot must refrain in the future
> from
> marketing as "Amateur Radio" gear any transmitting devices with built-in
> features to facilitate CB operation. The company also must determine in
> advance that any CB transmitting gear it offers for sale is FCC
> certificated. CB transmitters must receive FCC certification--formerly
> called "type acceptance." Amateur Radio transmitting equipment does not
> require FCC certification.
>
> Should Pilot plan to sell legitimate Amateur Radio transceivers, it must
> ensure before marketing or selling them that the ARRL Lab has reviewed the
> equipment in question and determined that it transmits only in the Amateur
> Radio bands. The ARRL Lab tests equipment both for QST "Product Review"
> articles as well as for compliance with QST advertising policy, which
> requires that items offered for sale meet FCC rules.
>
> Further, the consent decree requires Pilot to remove from sale certain
> Galaxy brand transceivers (models DX33HML, DX66V and DX99V) and any other
> "Amateur Radio" transceivers that have not passed ARRL Lab muster in the
> course of product review or advertising compliance testing. Pilot also
> will
> have to ensure that any CB transceivers on sale by entities leasing space
> on
> its premises are FCC certificated.
>
> The consent decree brings to a close an enforcement action dating back
> more
> than six years. In its 2004 NAL, the FCC cited 47 separate instances
> between
> 2002 and 2004 when Pilot allegedly had offered for sale various models of
> non-certificated Galaxy CB transceivers labeled as "amateur radios" that
> easily could be modified for CB operation.
>
> The Order and the consent decree are on the FCC Web site
> <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-06-53A1.pdf>.
>
> ==>INUIT STUDENTS JOIN THE SPACE PROGRAM VIA HAM RADIO
>
> Thanks to Amateur Radio and an international teleconferencing link, Inuit
> students attending Jaanimmarik School in Kuujjuaq, Quebec, Canada, joined
> the space program May 4. The Amateur Radio on the International Space
> Station (ARISS) program arranged the contact between NA1SS and ARISS
> veteran
> Tony Hutchison, VK5ZAI, in Kingston, Australia. Verizon Conferencing
> donated
> a two-way audio link between the northern Quebec school and VK5ZAI.
> Speaking
> from NA1SS, US astronaut Jeff Williams, KD5TVQ, told the students that
> it's

> very exciting to be in space.
>
> "To look at the earth from up here and to see the entire earth at one time
> is fabulous," Williams said. "Of course, being weightless is also
> fantastic,
> when you float around, and everything else floats around too, if it's not
> tied down."
>
> Williams reported that he and Expedition 13 Commander Pavel Vinogradov,
> RV3BS, are doing experiments involving crystal growth in a microgravity
> environment as well as fluid dynamics and growing plants. In what little
> spare time he has in his busy work week, Williams--like many ISS crew
> members before him--enjoys looking through the ISS window at Earth some
> 220
> miles below.
>
> "The mountains are beautiful, the horizon is beautiful during a sunset or
> a
> sunrise," Williams said. "You see the different colors in the atmosphere."
>
> One youngster wanted to know if Williams had had a chance to use the
> Canadarm2--the robotic manipulator that was made in Canada. The astronaut
> said he had used it and would be using it again this week. "I use it
> fairly
> regularly," Williams added. "It's a fantastic piece of equipment."
>
> Accompanied by some tittering from his classmates, one youngster asked the
> somewhat indelicate question, "How do you go to the bathroom in space?"
> Responded Williams, "You go very carefully, very carefully." He went on to
> explain that the ISS is equipped with a special "air-flow" toilet "that
> helps things go where they need to go."
>
> ARISS mentor Steve McFarlane, VE3BTD, estimated the audience at
> approximately 450. The event attracted the attention of CBC North as well
> as
> local radio, which broadcast the contact live with a running translation
> into Inuktituk. APTN (Northern Canada TV Network) is producing a segment
> for
> later broadcast.
>
> Ottawa news media also reported on the contact because students from
> Manordale Public School in Ottawa were on hand in Kuujjuaq for the
> Jaanimmarik contact, McFarlane said. Youngsters at Manordale spoke with
> ISS
> Expedition 10 Commander Leroy Chiao, KE5BRW, in December 2004.
>
> ARISS <http://www.rac.ca/ariss> is an educational outreach of a
> nine-nation
> consortium, with US participation by ARRL, AMSAT and NASA.
>

> ==>ARRL'S "HELLO" CAMPAIGN A HIT AT NAB, RTNDA CONVENTIONS
>
> When the National Association of Broadcasters (NAB) and the
> Radio-Television
> News Directors Association (RTNDA) met in Las Vegas for their annual
> conventions in late April, the ARRL was well represented. ARRL President
> Joel Harrison, W5ZN, headed the League contingent. Media and Public
> Relations Manager Allen Pitts, W1AGP, Pacific Division Director Bob
> Vallio,
> W6RGG, and Vice Director Andy Oppel, N6AJO, rounded out the delegation.
> The
> presence of thousands of broadcasters offered Pitts an ideal opportunity
> to
> promote the ARRL "Hello . . . -- Celebrating 100 Years of Voice over Radio
> Worldwide" public service announcements. Pitts gauged success on the basis
> of what he *didn't* end up taking home.
>
> "I carried 60 full 'Hello' press books containing news releases,
> information
> and PSAs to the NAB," Pitts said. "At the end of the three days only one
> was
> left, and that went to a radio station manager I met in the airport going
> home." Pitts reports he's been hearing from hams, engineers and radio
> station managers that the PSAs are airing on cable systems and radio
> stations. In addition, of the 4500 brochures he took to the convention, he
> had but 300 left.
>
> The highlight each year for radio amateurs attending the NAB convention is
> the ham radio operators' reception, sponsored this year by Bob Heil,
> K9EID,
> of Heil Sound Ltd. Some 2000 radio amateurs with broadcasting industry
> connections attended the April 26 affair.
>
> The big news at this year's reception was that Heil will be inducted next
> month into the Rock and Roll Hall of Fame in Cleveland, Ohio. A veteran
> music industry soundman and sound reinforcement innovator, Heil has worked
> with some of the biggest names in the entertainment industry, including
> Chuck Berry, The Who, the Grateful Dead, Joe Walsh, WB6ACU, and ZZ Top.
>
> NAB Vice President of Science and Technology John Marino, KR1O, co-hosted
> the event.
>
> ARRL President Harrison greeted the gathering on behalf of the League and
> spoke briefly about the changes and challenges Amateur Radio faces in the
> 21st century.
>
> Charlie Wooten, NF4A, was honored as Clear Channel Communications
> "National
> Engineer of the Year," and Heil presented him with a microphone bearing
> Wooten's call sign. Pitts credits Wooten with getting the "Hello" campaign

> PSAs on many Clear Channel radio stations.
>
> Pitts said he found a lot of interest in the "Hello" campaign among those
> attending the broadcasters' gatherings. "But it takes more than just
> passing
> out disks to make it on the air," he added. "It takes a personal contact,
> and that's why we need continued action by our public information officers
> nationwide."
>
> ==>ARRL WELCOMES NEW, RETURNING STAFFERS, ANNOUNCES STAFF SHIFT
>
> ARRL Headquarters has welcomed three new staff members. One current and
> one
> former staffer have filled other openings.
>
> ARRL Membership Manager Katie Breen, W1KRB, owned and operated a
> restaurant
> for three years before coming to Headquarters. A Connecticut native with a
> strong marketing, customer service, volunteer management and event
> planning
> background, Breen's also been an urban and regional planning professional.
> Outside of ARRL, she's actively involved with the Jaycees and other
> community activities.
>
> Breen is responsible for League membership recruitment and retention, and
> she says she'll focus on putting a personal touch on ARRL. As a result,
> she
> has an open-door policy and welcomes telephone calls (860-594-0297 and
> e-mail (kbreen@...) from members.
>
> Customer Service Manager Amy Hurtado has filled the vacancy left by the
> departure of Kathy Capodicasa, N1GZO, to supervise membership application
> processing and product sales. Most recently she managed a large customer
> service team at a busy direct-mail facility and has prior experience in
> direct mail design and production.
>
> At ARRL Headquarters she oversees ARRL membership fulfillment operations
> and
> circulation for QST and all ARRL periodicals. She'll also handle the
> membership renewal process, the ARRL Life Membership program and Silent
> Key
> administration. She works closely with Breen and with Marketing Manager
> Bob
> Inderbitzen, NQ1R, on target marketing, market concepts and direct mail
> campaigns. Members may contact Hurtado by telephone (860-594-0257) or
> e-mail
> (ahurtado@...).
>
> Assistant Editor S. Khrystyne Keane, K1SFA, is relatively new licensee,
> but

> she's gleaned a lot of Amateur Radio knowledge from her husband Michael,
> K1MK, an ARRL Life Member and 30-year veteran ham.
>
> With an academic background in journalism, history, English and
> photography,
> Keane has led political campaigns, worked for the Boy Scouts of America
> and
> headed the news department for a local weekly. At ARRL, she prepares and
> edits news and feature articles for the Web site, QST and NCJ.
>
> Outside of Headquarters, Keane volunteers with the Cub Scouts and enjoys
> reading. "Working at the League is something I have wanted to do ever
> since
> I learned about the ARRL," she says. "You could say that this is a dream
> come true."
>
> A familiar face at ARRL Headquarters for 25 years, former ARRL Advertising
> Manager Debra Jahnke, K1DAJ, will return to the fold in late May to take
> on
> the responsibilities of Business Services Manager for the ARRL Sales and
> Marketing Department. Jahnke left Headquarters in 2005 to become
> advertising
> director for a Wisconsin publisher, and she earned her ham radio license
> along the way. "I'm thrilled to be returning home and to be back at ARRL,"
> Jahnke said. "I feel my job experience during the past year provided me
> with
> a new perspective and new ideas, and I can't wait to get started."
>
> At Headquarters, Jahnke will head the business services team, developing
> advertising opportunities for QST, QEX and NCJ and working with League
> clients who purchase ARRL publications and other services.
>
> Jahnke plans to spend at least one day at ARRL EXPO 2006 at Dayton
> Hamvention and will be on site at Newington starging May 24.
>
> Contest Branch Manager Dan Henderson, N1ND, soon will shift gears after
> seven-plus years at ARRL to tackle new duties as Regulatory Information
> Specialist. He'll succeed John Hennessee, N1KB, who died in March. In his
> new job, Henderson will work with US amateurs on a wide range of topics
> relating to FCC rules and regulations governing Amateur Radio. He'll
> assist
> members in such areas as the PRB-1 limited federal preemption, antenna and
> zoning questions and the ARRL Volunteer Counsel and Volunteer Consulting
> Engineer programs.
>
> ==>MISSISSIPPI ARRL MEMBER WINS SBA AWARD FOR KATRINA EFFORTS
>
> A Mississippi radio amateur and broadcaster who braved the fury of
> Hurricane
> Katrina to keep his ham radio club's low-power FM (LPFM) broadcast station

> WQRZ-LP on the air was one of three recipients to receive the Small
> Business
> Administration (SBA) Phoenix Award. The SBA honored ARRL Member Brice
> Phillips, KB5MPW, of Bay Saint Louis, for "Outstanding Contributions to
> Disaster Recovery by a Volunteer."
>
> "We are proud to be the first Amateur Radio organization-owned broadcast
> facility in the US--and proud Mississippians--to serve our state and as a
> model to the country as the first broadcast station to be attached to an
> emergency operations center," Phillips says. He notes that the station
> lost
> everything to the storm except "our lives and our commitment to the
> community."
>
> Owned and operated by the Hancock County Amateur Radio Association,
> WQRZ-LP
> (103.5 FM) was built and is operated by volunteers with disabilities.
> Before
> Hurricane Katrina hit, Phillips and WQRZ-LP Program Director Christine
> Stach, KC5RIC, relocated the station from a small shed next to their house
> in Waveland to the Hancock County Emergency Operations Center (EOC), which
> was forced to move twice.
>
> As the storm surge waters reached the building's second level, Phillips
> braved the elements and rigged car batteries to power the station's
> broadcasts of search-and-rescue and other emergency information. WQRZ was
> one of only four of the more than three dozen Gulf Coast radio
> stations--and
> the only one in Hancock County--to stay on the air during the early days
> after Katrina struck. Phillips also was among the many radio amateurs
> providing emergency communication in the storm-stricken region.
>
> FEMA distributed 3000 FM radios to Hancock County storm survivors so they
> could tune to WQRZ-LP and learn where to get food, water, ice, tarpaulins,
> help from the Red Cross and The Salvation Army and other survival
> assistance.
>
> Phillips received his award in Washington, DC, during SBA National Small
> Business Week in mid-April.
>
> Normally solar-powered, WQRZ-LP serves the Bay Saint Louis, Waveland,
> Diamondhead and Kiln areas of Mississippi. WQRZ-LP's licensee, the Hancock
> County Amateur Radio Association, is a non-profit IRS 501(c)(3)
> organization. The station invites contributions to help it rebuild to
> WQRZ-LP, POB 1145, Kiln, MS 39556-1145. Contact the station for more
> information <WQRZ1035@...>.
>
> ==>ARRL UPDATES AMATEUR RADIO EMERGENCY COMMUNICATIONS LEVEL 3 COURSE
>
> The ARRL Certification and Continuing Education (CCE) Program has revised

> and updated its Amateur Radio Emergency Communications (AREC) Level 3
> course. The new top-level EmComm course, designated EC-003 Rev 2, has
> supplanted EC-003 in the program's list of online offerings. ARRL Online
> Course Development Coordinator Howard Robins, W1HSR, says the updated
> curriculum incorporates some major changes.
>
> "This update is very significant, because it brings the management
> training
> part of the AREC program into line with today's homeland security
> environment," Robins remarked. "This is the first revision of the AREC
> Level
> 3 course since it was originally introduced in December 2000. Needless to
> say, much has changed since then, and this revision reflects those
> changes."
>
> EmComm Online Course Editor Dave Colter, WA1ZCN, was the principal author
> of
> EC-003 Rev 2, Robins noted. He says a number of individuals with
> experience
> in the emergency communications arena beta-tested the updated course, and
> it
> underwent a thorough final review prior to its release. The AREC Level 1
> (EC-001) and 2 (EC-002) courses are prerequisites for the Level 3 course.
>
> According to Robins, EC-003R2 includes significant information about how
> Amateur Radio emergency communication leadership must prepare and function
> in the post-September 11, 2001, era. He says the updated course takes into
> account the "many changes in the homeland security landscape--a term that
> did not exist when the original Level 3 curriculum was developed.--and how
> Amateur Radio fits into that landscape."
>
> New topics include:
>
> * National Incident Management System (NIMS)
>
> * National Response Plan (NRP)
>
> * Key NRP Emergency Support Functions
>
> * Department of Homeland Security Citizen Corps and Community Emergency
> Response Teams
>
> * National Disaster Medical System (NDMS) Communications Support
>
> * Hospital Emergency Communications
>
> * ARES Management and the Incident Command System (ICS)
>
> Robins points out that several other Level 3 units have been revised to
> better focus on leadership and management.

>
> Registration for EC-003 Rev 2 opens Monday, May 15 and will remain open
> through June 4. The inaugural class begins Friday, June 16.
>
> To learn more about this and other online educational offerings from ARRL,
> visit the CCE Course Listing page <http://www.arrl.org/cce/courses.html>
> or
> contact the CCE Department <cce@...>.
>
> ==>SOLAR UPDATE
>
> Solar Seer Tad "Sunny" Cook, K7RA, Seattle, Washington, reports: This week
> saw higher geomagnetic activity and lower sunspot numbers than the
> previous
> period (our reporting week is Thursday through Wednesday). Average daily
> sunspot numbers declined more than 5 points to 54.3. Today, May 12, look
> for
> active geomagnetic conditions with a planetary A index predicted at 25,
> then
> declining to 12 and 10 on Saturday and Sunday. Sunspot numbers and solar
> flux should be a bit lower than the past week.
>
> Geophysical Institute Prague predicts active geomagnetic conditions for
> today, May 12, unsettled May 13, quiet to unsettled May 14, nice and quiet
> May 15-16, back to quiet to unsettled for May 17, and unsettled conditions
> on May 18.
>
> Many readers alerted us to a new long-range sunspot cycle prediction
> regarding the peak of Cycle 25, which should reach solar maximum around
> 2022
> <http://science.nasa.gov/headlines/y2006/10may_longrange.htm?list15934>.
>
> For more information concerning propagation and an explanation of the
> numbers, see the ARRL Technical Information Service Propagation page
> <http://www.arrl.org/tis/info/propagation.html>.
>
> Sunspot numbers for May 4 through 10 were 50, 61, 69, 64, 53, 56 and 27,
> with a mean of 54.3. 10.7 cm flux was 91.8, 86.7, 87, 86.2, 84.7, 82.6,
> and
> 78.2, with a mean of 85.3. Estimated planetary A indices were 14, 13, 24,
> 19, 8, 4 and 4, with a mean of 12.3. Estimated mid-latitude A indices were
> 10, 8, 14, 17, 5, 2 and 4, with a mean of 8.6.
>
> ----------
>
> ==>IN BRIEF:
>
> * This weekend on the radio: The Mid-Atlantic QSO Party, the
> VK/Trans-Tasman
>80-Meter Contest (phone), the VOLTA Worldwide RTTY Contest, the CQ-M

> International DX Contest, the F.I.S.T.S. Spring Sprint and the 50 MHz
> Spring
> Sprint are the weekend of May 13-14. The Run for the Bacon QRP Contest is
> May 15. The NAQCC 80-Meter Straight Key/Bug Sprint is May 18, the RSGB
> 80-Meter Club Championship (CW) is May 18 and the Thursday NCCC Sprint
> Ladder is May 19 (UTC). JUST AHEAD: Armed Forces Day military/Amateur
> Radio
> communications tests, the US Counties QSO Party (SSB) His Majesty the King
> of Spain Contest (CW), the EU PSK DX Contest, the Portuguese Navy Day
> Contest (PSK31 and CW/SSB), the Manchester Mineira CW Contest and the
> Baltic
> Contest are the weekend of May 20-21. The QRP Minimal Art Session is May
> 25.
> See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the
> WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html>
> for more info.
>
> * ARRL Certification and Continuing Education course registration:
> Registration remains open through Sunday, May 21, for these ARRL
> Certification and Continuing Education (CCE). Program on-line courses:
> Amateur Radio Emergency Communication Level 1 (EC-001), Radio Frequency
> Interference (EC-006), Antenna Design and Construction (EC-009), Analog
> Electronics (EC-012) and Digital Electronics (EC-013). Classes begin
> Friday,
> June 2. To learn more, visit the CCE Course Listing page
> <http://www.arrl.org/cce/courses.html> or contact the CCE Department
> <cce@...>.
>
> * New Jersey Tech+ scores WAS on 40 CW in her first year on the air: ARRL
> member Jane Tymko, KC2OBS, of Bartley, New Jersey, managed to work all
> states during her very first year as a radio amateur. The kicker is that
> Tymko, a Technician with Element 1 credit--what used to be called a "Tech
> Plus" ticket--worked all 50 states on the often broadcaster-plagued
> 40-meter
> Novice/Tech Plus band segment, 7100-7150 kHz. "I'm working on my General,
> now that I've accomplished this," Tymko told ARRL when she visited
> Headquarters to get her cards checked for the Worked All States (WAS)
> Award.
> ARRL Membership Services Manager Wayne Mills, N7NG, presented her WAS
> certificate on the spot (photo). Tymko says Alaska was her hardest state.
> Most of the time, though, she simply called "CQ," and says most ops slowed
> down to match her 12-14 WPM CW copying capability. Her setup is modest:
> 100
> W to a dipole. She studied for her license entirely on her own, using a
> Morse training program to learn the code. In addition to the ARRL, Tymko
> is
> a member of the YLRL and F.I.S.T.S. Congratulations, Jane!
>
> * German experimental stations on 440 kHz: Geri Holger, DK8KW/W1KW, in
> Peine

> near Hannover, reports that German telecommunication authorities have
> issued
> him an experimental license to operate on the "medium wave" frequency of
> 440
> kHz using the call sign DI2BO. He joins Walter Staubach, DJ2LF, in Dormitz
> near Nuernberg, who's been operating experimental station DI2AG on 440
> kHz.
> Tests have been under way on that frequency since January 2005, Holger
> says,
> "to study the special propagation conditions on medium wave." Holger says
> CW
> beacon transmissions (which include call sign and grid square) will be
> sent
> on 440 kHz (?100 Hz), maximum 200 Hz bandwidth at a maximum power of 9 W
> ERP. "Both beacon transmissions will be coordinated in a way so that they
> can be observed simultaneously to study the propagation from both
> locations
> at the same time," Holger explained. "Also, two-way contacts between both
> experimental stations are planned." Further information is on the DK8KW
> Longwave Information Web site <http://www.qru.de/di2bo.html>.
>
> * AMSAT and ARISS staff museum Space Day 2006 exhibit: Representatives of
> AMSAT-NA and the Amateur Radio on the International Space Station (ARISS)
> program staffed a Space Day 2006 exhibit May 5 at the Smithsonian National
> Air and Space Museum's Udvar-Hazy Center. The ARISS team exhibited various
> pieces of ISS hardware and AMSAT representatives explained the process of
> building small satellites. On display were the California Polytechnic
> Institute CubeSat model and several picosats. Popular with youngsters who
> stopped by was the opportunity to listen to recorded ARISS school
> contacts.
> Among those staffing the exhibit were ARISS International Chairman Frank
> Bauer, KA3HDO, Past AMSAT-NA President Perry Klein, W3PK, and Bill Boston,
> N3DCI. "We gave out several hundred ARRL and other brochures. There was so
> much interest, I lost my voice by the end of the day and still haven't
> gotten it back fully!" Klein quipped this week. Others assisting included
> APRS guru and satellite experimenter Bob Bruninga, WB4APR, Ken Nichols,
> KD3VK, Bob McCown, N3IYI, and AMSAT-NA Director of Education and Board
> member H. Paul Shuch, N6TX.
>
> * Former Army MARS Chief Larry Warren, KF7TJ/AAV9ET, SK: Robert L. "Larry"
> Warren, KF7TJ/AAV9ET, of Hereford, Arizona, died April 28. He was 78. An
> ARRL member, Warren served as Chief of the Army Military Affiliate Radio
> System (MARS) from 1983 until he retired in 1989, although he continued on
> as a MARS special consultant until last December. Warren is credited with
> initiating the global Army MARS Area Gateway network to expedite the relay
> and delivery of MARSgram and other message traffic. After joining the US
> Army Air Corps in 1946, Warren remained on active duty with the Army for
> 20
> years, retiring with the rank of major. He then worked for the Department
> of

> the Army in a civilian capacity at Ft Huachuca, Arizona, for 22 years. A
> MARS member for 58 years, Warren was a member of the Cochise Amateur Radio
> Club and of the Radio Amateur Civil Emergency Service (RACES).

Wow! I sure wish I knew what the picture was!

I got a letter and a certificate from the ARRL crediting me with the photo. I don't even know which one it was. I am supposed to be getting some copies from them soon. All I know is that the pic was about Field Day. Is it the picture with the back of the MCV and the flag?

Nice timing though, eh? With Field Day coming up and all.

Have an older Kenwood HT,battery packs are $$$.8.4 volts 800mAh.Specs.say 6.3 v~15 vdc (8.5 vdc nominal).The mAh is approximate run time,correct?Can I combine battery packs to add up to 8.5 volts?(I have not yet found a generic 8.4 volt pack.)Or can I use the 6.3~15 vdc range for the battery pack "add up"?Charging is a different issue for another day.

Paul,

Rechargeable Nickel batteries are 1.2 volts charged so 7 would give you 8.4 volts. 7 modern AA NiMH batteries would give you 2300 mAh or 2.3 Ah. Your run time will depend upon a couple things. One is the draw of the load, the other is the 'head room' of the power supply. If you start with 15 volts and the radio can run at 6.3 that means you can discharge the battery pack to less than 50 percent and still operate. Most ratings figure a battery to be fully discharged at 80 percent of it's full voltage. You will find that the loss rate is very rapid from 80 to 50 percent.

If you have an old battery pack you may be able to bust it open and fill it with AA's.

The 15 volt top end is for use in a vehicle with just a cable. Circuitry inside the radio cuts the voltage back to it's working voltage which seems to be around 8 or 9 volts. Also, HT's loose output power relative to supply voltage. The radio may work at 6.3 volts but 12 may be needed to produce the full (usually 5 watt) output of the transmitter.

Aftermarket batteries are available and there is a place in Holland that rebuilds them. Figure about 40 bucks or so either way.

I hope some of this helps.

73,

Mark K8MHZ

You may want to try Battery Plus in Holland. They are much less on
replacement batteries. Tom

694. Special Event - Strange Antenna Challenge

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-14 15:26:38 UTC
From: K8MHZ
Topic: 694 Message: 694

This sounds like a FUN event! They have a great field manual about antenna building at their site. I recommend downloading the 5 meg file even if you don't care to build antennas out of ladders, metal garbage cans, Dodge K cars or crane booms. People in emergency services should be able to use whatever is available for an antenna and this event pushes creativity to it's limit.

Here is a description from eHam.net:

May 27-29, 2006 the Kurt N. Sterba Strange Antenna Challenge, k0s, will take place. We will begin the special event 10 AM Central at or near 14.200 MHz, and plan to remain in the general class portion of any bands used. OUR antennas are NOT permitted to be constructed of wire or metal pipe. Our past antennas have included such items as metal folding chairs, chicken wire, fences, ladders, and trucks. Non-k0s stations may of course use any antenna they wish. Those wishing a Special Event QSL Confirmation should send a self-addressed stamped envelope (SASE) to Erik Weaver, n0ew/k0s, 4857 E. Farm Road 136, Springfield, MO, 65809 (within 2-4 weeks please). Additional information and updates may be found at www.n0ew.org/k0s/ as well as a field manual for those interested in learning more about transmatches and antennas, both normal and strange.

Those stations willing to observe a few simple rules of conduct and send their logs to n0ew may run a k0s "satellite" station (see the web site for details). This offers a great public relations opportunity! Field Day is only one-month away; this is a good time to verify all your equipment is working properly.

Why bother using such strange antennas? Practiced skills include increased ability to match your transceiver to an extremely wide range of antennas via a transmatch (antenna tuner), and the ability to recognize miscellaneous bits of metal from which an antenna may be fabricated. Following the ravages of a natural disaster this is a potentially life-saving skill enabling HF communications without use of normal antennas. Not to be overlooked however, is the simple pleasure of making a couple pieces of chicken wire or some scrap metal perform as well as your neighbors dipole! It certainly makes for great conversation at the next hamfest or club meeting.

Thanks Laryn!

It definitely was a pleasure. I enjoy working with Mark.

I know my 30+ years of working 9-1-1 dispatch came out a couple of times,
but that is what makes it easy to do.

Thanks to everyone who participated in the field. I hope by now that you
have dried out and warmed up.

Looking forward to Tulip Time again next year.

73,

Denny N8CTT

John,

That was for HF, I presume. I am going to try two grapes for VHF.

That way I can say with some truth, "I heard it through the grapevine."

I hope the weather holds out as I am planning a full size 20 meter 1/4 wave vertical on the roof made from an aluminum extension ladder and a 1/2 acre of aluminum foil on the roof for a ground plane.

Nothing says "Talk to me neighbor" like an extension ladder pointing straight up and scads of foil covering the roof.

73,

Mark K8MHZ

If you use folding chairs for antennas, wouldn't you be more concerned with the sitting wave ratio instead of the standing wave ratio?

May 27-29, 2006 the Kurt N. Sterba Strange Antenna Challenge, k0s, will take place. We will begin the special event 10 AM Central at or near 14.200 MHz, and plan to remain in the general class portion of any bands used. OUR antennas are NOT permitted to be constructed of wire or metal pipe. Our past antennas have included such items as metal folding chairs, chicken wire, fences, ladders, and trucks. Non-k0s stations may of course use any antenna they wish. Those wishing a Special Event QSL Confirmation should send a self-addressed stamped envelope (SASE) to Erik Weaver, n0ew/k0s, 4857 E. Farm Road 136, Springfield, MO, 65809 (within 2-4 weeks please). Additional information and updates may be found at www.n0ew.org/k0s/ as well as a field manual for those interested in learning more about transmatches and antennas, both normal and strange.

Those stations willing to observe a few simple rules of conduct and send their logs to n0ew may run a k0s "satellite" station (see the web site for details). This offers a great public relations opportunity! Field Day is only one-month away; this is a good time to verify all your equipment is working properly.

Why bother using such strange antennas? Practiced skills include increased ability to match your transceiver to an extremely wide range of antennas via a transmatch (antenna tuner), and the ability to recognize miscellaneous bits of metal from which an antenna may be

fabricated. Following the ravages of a natural disaster this is a potentially life-saving skill enabling HF communications without use of normal antennas. Not to be overlooked however, is the simple pleasure of making a couple pieces of chicken wire or some scrap metal perform as well as your neighbors dipole! It certainly makes for great conversation at the next hamfest or club meeting.

Does anyone have an NMO mag mount they would like to sell?

703. Need someone to help me test my 6m rig

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-15 18:52:49 UTC
From: Joe Veldhuis
Topic: 703 Message: 703

Well, during yesterday's excellent 6 meter opening, I found that there may be something wrong with my rig. I was unable to make any contacts (distant or local), and after about 30 minutes, found that the rig had gotten too hot to touch, which doesn't seem like it should be the case given the fact that the antenna is a good match. I want to know if it's putting out any signal at all, and if so, if it's intelligible or not.

So, to that end, I need someone with a 6 meter rig and a (preferably vertically polarized) antenna to arrange an on-air test. I would like to test FM, SSB, CW and digital but if all you have is a handheld scanner that only does FM, I guess that will be good enough. If anyone has some test equipment suitable for 6 meters and could give it a bench test, that would be even better.

Basically, if it turns out I have to ship the thing out for repairs, I want to be able to tell them exactly what the problem is, rather than just saying "it doesn't seem to get out on 6." So, anyone up to it?

-Joe, KD8ATU

714. Season's First Fish Fry

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-17 12:24:44 UTC
From: Bill Fries
Topic: 705 Message: 714

All:

The first club Fish Fry is coming on Saturday. We'll enjoy our first communal dinner at 5:00 pm at the clubhouse. Cost is less than the value in the meal and the conversation, eyeball QSOs (are those the same thing?!), and fun.

Drop by and enjoy the event. By the way, the only excuse for not being there is that you are in DAYTON! So get out to 2888 Scenic Drive.

Want to help? Jon, AB8RD is soliciting assistance.

Bill, AB8SC
Pres of radio club

> K5BIQ, Andrew Parker, KC5ZYF, Jay Miller, WA5WHN, and Don Scott,

> N5UJT, all from the Sandoval County ARES, went to assist Mora County
> Red Cross shelters and the New Mexico State Police Mobile Command
> Center. All traffic was handled via voice through the 147.30 MHz Elk
> Mountain Repeater, allowing direct communications with Santa Fe and
> Rio Rancho, or VHF simplex. -- Charlie Christmann, K5CEC, ARRL PIO,
> New Mexico Section
>
> April 13, Iowa City, Iowa -- Tornadoes struck and hams from the Iowa
> City Amateur Radio Club's HamRad group provided communications
> between the Johnson County Emergency Management Agency (JCEMA) EOC
> and Red Cross shelters set up in the area. HamRad is organized to
> work with Johnson County in emergencies.
>
> HamRad teams stayed on the job until the next day, when National
> Guard units could take over command, ensuring that shelter management
> and the EOC could communicate and serve victims.
>
> Rhode Island - SEC Se?n Brennan, KE1AB, <ke1ab@...> was invited
> to speak on behalf of ARES to the RI Emergency Management Agency's
> Emergency Planning Seminar to promote Amateur Radio use in the local
> community EMA for backup communications. The presentation addressed
> ARES abilities and incorporation of the organization into community
> entities.
>
> Alachua County, Florida -- ARES operators provided 120 hours of
> public service communications, supporting the March of Dimes
> WalkAmerica in Gainesville. The event is the largest walk in Florida
> at 8.6 miles and $750,000 was raised. Hams provided logistics
> communications for 14 stations along the walk route, provided mobile
> communications, EMS and law enforcement communications support, and
> ran the net from the Sheriff's Mobile Communications Vehicle. -- Jeff
> Capehart, W4UFL, Alachua County EC
>
> + PERSPECTIVE: KATRINA OPS OBSERVATIONS
>
> [On the eve of hurricane season here in Dixie, the following are the
> timely observations of Daisy Crepeau, KT4KW, and Ray Crepeau, K1HG,
> who were deployed to Hancock County, Mississippi following Hurricane
> Katrina, and to Palm Beach County, Florida, in the wake of Hurricane
> Wilma last season. - ed.]
>
> Training: No longer is the ham with an HT adequately able to respond.
> Nor is the ham with mobile equipment or even a radio equipped "jump
> kit." Amateur operators need to be adequately trained. The ARRL ARECC
> courses should be required, period. FEMA training, consisting of
> courses ICS 700, 800, 100, and 200 also should be required. Hams need
> to understand and be able to operate under the Incident Command
> System (ICS) and the National Incident Management System (NIMS).
> Training to operate under extreme stress is needed.
>

> We saw a new ham arrive who didn't understand that two-way radio
> communication required releasing the PTT button to hear the other
> party. This individual also needed a crash course in the phonetic
> alphabet. An extreme case perhaps, but such operators were
> liabilities, not assets. Proper training and credentialing would
> prevent this.
>
> Credentialing: FEMA, most state Emergency Management departments, law
> enforcement agencies, and even the Red Cross do not recognize hams
> with a local badge. The ARRL supports the local EC as the point
> person for Amateur Radio emergency operations, but the reality is
> that most disasters are going to encompass more than the local area.
> ARESMAT [ARES Mutual Assistance agreements] is the right idea but few
> ECs have built the necessary relationships with others outside their
> locales.
>
> Resource Typing: We need a system of Amateur Radio "resource types"
> that FEMA (or anyone needing communications support) can request when
> needed. See the work of the World Radio Relay League and their idea
> of "Amateur Radio Communications Teams" (ARCT)
> <http://www.emcomm.org> and <http://www.wrrl.org>. FEMA is in the
> process of specifying "resources." We need to be in that system.
>
> Deployment Tasking: Pre-departure briefings covering assignments,
> duties and responsibilities in the deployed area, and conditions
> there, should be plainly explained and understood. When we went to
> Mississippi we were sent to the wrong place and spent half a day
> finding where we were to go.
>
> Message Handling: Passing messages from point A to point B is the
> primary mission during emergency responses. Hams are the worst at
> relaying messages. Butchering of messages passed to the EOC or to
> action personnel occurred in Mississippi. So, message handling
> training is absolutely necessary: The radiogram format gets the job
> done.
>
> Recognition: The Red Cross is mandated by the federal government to
> manage shelter care and mass feeding of disaster casualties. The ARRL
> has many MOUs with a number of different agencies both federal and
> private. But in the real world they don't mean a thing. The Red Cross
> prefers to use persons who have been through their training
> sequences. FEMA couldn't care less about hams in spite of an MOU. And
> the list goes on and on. The ARRL needs to become recognized as a
> "Non Government Organization" (NGO), which will be called upon. When
> it hits the fan, FEMA will call for Amateur Radio resources to
> establish communication links, and not commercial entities. -- Ray
> Crepeau, K1HG, and Daisy Crepeau, KT4KW
>
> + LETTERS: USE "HAM" INSTEAD
>

> Re last month's item on "Amateur" as a stigma: We "amateurs" have to
> some degree brought it upon ourselves by using the formal term -
> Amateur - in our dealings with the public and public officials. We
> have a tendency to use the terminology of the FCC and ARRL in
> referring to ourselves in a public setting. When you mention to
> someone that you are an "amateur radio operator," they often don't
> know what you are talking about. But when you tell them you are a
> "ham," they immediately know what you do and have a good impression
> from the many favorable news stories about our work, services and
> rescues. Dropping the regulatory terminology and referring to
> ourselves instead as "hams" will go a long way to avoiding the stigma
> of the word "amateur." -- Rabe Marsh, W3TNU <w3tnu@...>
>
> + OPINION: HARDENED 800 MHz SYSTEMS AND AMATEUR REPEATERS
>
> [The following is a response from a Palm Beach County, Florida public
> safety official and RACES Radio Officer to our periodic discussion of
> the merits and detractions of 800 MHz trunking systems viz a viz
> amateur and other systems. -- ed.]
>
> A well designed and maintained 800 MHz trunked radio system remained
> on the air while a majority of key amateur repeaters went off the air
> during Hurricane Wilma in South Florida last year.
>
> As the RACES Radio Officer and the Radio System Manager for Palm
> Beach County's Trunked/Simulcast 800 MHz radio system that provides
> interoperable communications for the County Law Enforcement, Fire,
> EMS, EOC/Public Works, and all of the municipalities in the County
> (5000+ users), I'm reporting that all of the Public Safety 800 MHz
> trunked systems in Palm Beach County withstood Wilma flawlessly while
> the majority of amateur repeaters that were club and privately owned
> in both Broward and Palm Beach County went off the air. The repeater
> failures reported to us at the EOC were initially reported as power
> related and later updated to say most took major antenna and/or
> transmission line damage. What we can deduct from this is that a
> majority of amateur repeater owners in this area did not have
> adequate placement, design, and/or maintenance of their machines.
>
> To coach the local amateur repeater owners in Palm Beach that want to
> continue to participate in the County's RACES program, I developed a
> "best practices guide" of what we would like to see implemented. It
> closely resembles the design practices of the five County-maintained
> amateur repeaters that did not sustain any damage. These amateur
> repeaters, like the current trunked system for which I was the County
> project engineer, survived the storm because they used the same
> designs of our other Public Safety communication systems.
>
> In closing, Public Safety trunking radio systems can be reliable.
> After two wild hurricane seasons, we have all learned a lot about how
> our radio systems react at crunch time. As a result, I have installed

> concrete barriers around key generators, added additional automatic
> redundancies, and improved transmission line placement. It's now time
> to consider these types of changes to the Amateur Radio
> infrastructure as well. Comments welcome. -- Mark Filla, KS4VT, Palm
> Beach County 800 MHz System Administrator; Palm Beach County RACES
> Radio Officer; Florida Repeater Council District #2 Director

716. Safety first

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-17 12:47:31 UTC
From: K8MHZ
Topic: 716 Message: 716

Sad news about an Oregon ham.

http://www.redding.com/redd/nw_local/article/0,2232,REDD_17533_4701995,00.html

I have never been a big fan of tower climbing. After reading the article, I found the value of bucket trucks and cranes has increased drastically. If I can't afford one or the other, I can't afford a tower. That is just the way it's gonna be for this ham.

73,

Mark K8MHZ

717. RE: [WestMichiganHams] Safety first

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-17 13:04:58 UTC
From: Bill Fries
Topic: 716 Message: 717

Yes, tower work is dangerous. It seemed that W7IX was doing everything right. Right up the point where the antenna slipped from his control. Scary.

This story is also featured on the ARRL www site. Terrible news and a real sad story.

This summer I expect to construct a tower. It will be far shorter and I'll use a bucket truck to put on the antenna. Gosh this is dangerous stuff.

I climbed the six meter's antenna tower at the clubhouse. That was to reattach the G5RV ladder line stand offs. And the ones I "fixed" were not all the way up. Scary, and exhilarating simultaneously.

I'm with Mark and think a crane or other independent assistance is in order.

Bill, AB8SC

718. Flyer for HIAD June 10th, sorry wrong flyer on the previous email!

Yahoo group: WestMichiganHams (2006 — 2008)

Please, pass this along to anyone interested

Get Your Amateur Radio License In One Day!
Saturday June 10th 2006
10:00 AM - 6:00 PM
No Morse Code
No previous knowledge or study needed
All study guides, etc. provided
A Non-profit contribution/registration of $30 required (this covers your
FCC
testing fee)
Testing: 3:00 PM (open to public, technician exam only)
Only 40 participants allowed - Register early!
Even if you know absolutely nothing about ham radio, you'll receive your
Technician Class license in ONLY ONE DAY. Similar programs have had over an
85% success rate, in more than 100 sessions with the non-technical public,
ages 15-95.

Under 16 must be accompanied by an adult!

What can you do with your license? Make new friends; serve your community
as
a Weather spotter, Join Search and Rescue Teams.

No monthly fees like your cell phone!

Amateur radio works when everything else fails!!

For Registration information or questions please contact
Jeff @ 616-889-7101 or jnawrot@...
Location information will be given at time of registration.

Checks can be made payable to KCEST

Small print warning: Everyone's learning ability varies; this class is not
a
guarantee in getting your license. Test may be taken a second time if
needed
for 14.00 more the day of the class.

719. The Cover of the QST - courtesy of K8MHZ

From: Linda Rosenthal
Topic: 719 Message: 719

Hey, Mark, K8MHZ:

As has been recently mentioned, I'd like to add my kudos to you for the photograph containing the MAARC's callsign, W8ZHO,which was included in the Field Day collage of the recent QST magazine cover. I'm hopeful that someone will frame that cover for placement on the MAARC clubhouse wall. Nice job, dude. 250,000+ circulation magazine! You should be very proud.

Thanks Linda,

Yeah, getting 'published' is always a thrill for a photographer. The picture means alot to me. Koley was next to me when I took it, I was exactly where I wanted to be at the time and the weather was great! It has been my desktop photo since I took it. I think that if any picture is worth 1000 words, it is that one.

My plans are to scan the cover and have Tom W8AMZ print it out on Epson Luster E paper. I have some frames around here to put it in and Tom and I want to present it to the club. I would be very honored to have the cover adorn the clubhouse, maybe for years to come.

Kind of a neat coincedence, right now I am working on getting some welders running for a company called Security Steelcraft. It is now owned by Stan Horness. Stan is the son of Warren Horness, founder of Security Steelcraft and past president of the MAARC. I could not resist the temptation to show Stan the cover. He said his dad would have been proud.

I came, I saw, I clicked. The picture will be seen by the multitudes. I have gotten congrats from as far away as Hawaii where they are using another of my creations, break tags.

Life's simple pleasures are the best and ham radio is the greatest!

Thanks again and perhaps I will make it to the 'fry.

73,

Mark K8MHZ

Subject: [WestMichiganHams] The Cover of the QST - courtesy of K8MHZ

Hey, Mark, K8MHZ:

As has been recently mentioned, I'd like to add my kudos to you for the photograph containing the MAARC's callsign, W8ZHO,which was included in the Field Day collage of the recent QST magazine cover. I'm hopeful that someone will frame that cover for placement on the MAARC clubhouse wall. Nice job, dude. 250,000+ circulation magazine! You should be very proud.

73,
Linda, AB8QH

Mark:

This is Tom Behler: KB8TYJ. I am the EC/RO for Mecosta County Michigan, and I'm one of the guys that was talking with you and Jean (KC8WSE) earlier today about the problems she's having with her HF rig, particularly on 20 meter SSB.

First of all, I want to say that, as a blind ham myself, I really appreciate all that you and the Muskegon club have been doing for Jean. It does the heart good when we hear of supportive situations and encouragement such as that which you are providing.

If you ever want to discuss anything with me about Jean's situation, and how we can help her, feel free to e-mail me at my private e-mail:

kb8tyj@...

One thing that you might check on is how Jean is using the auto-tuner on the rig. Most auto-tuners that I'm familiar with, especially those internal to the rig, give an audible beep when tuning, and you can tell by the length of the beep whether tuning has been successful or not. I told her to be sure she pushes down the "tune" button long enough to engage the tuner first.

This may all be a shot in the dark, and I think your hunches about SWR issues are probably closer to the problem, but I thought it would be worth a try. I just have to believe that the G5RV should have no trouble tuning on 20 meters, since that's the band it was originally designed for.

Anyway, thanks for helping Jean out, and please ask if you think I can be of any assistance with anything.

Also, thanks to the folks on this list for putting up with the rather personal nature of this message.

Vy best 73 from Tom Behler: KB8TYJ, Big Rapids, MI

725. BIG Club Meeting June 1

All:

The Muskegon Area Amateur Radio Council requests that you and a guest visit our upcoming meeting on the occasion of a visit from a prominent ARRL Board of Directors member, Jim Weaver, K8JE. We are encouraging ALL hams and their friends to totally PACK the clubhouse on this occasion. We will have fun, lots of stale donuts, fresh coffee, soft drinks, fun, and lots and lots of local "talent." That "talent" includes YOU!

Please stop by for this MAJOR meeting and fun occasion to talk radio and hear what is happening in our hobby on a national and local level. This will be the DON'T miss meeting of the year! At totally radical and awesome fun time for all, I promise! Be there and prove me wrong.

Please take a moment and CALL someone, another ham, friend, Elmer, or whatever and invite them for the fun. Do it today so they have lots and lots of time to work on their lame excuse for missing this GREAT meeting.

No pressure, just GREAT fun.

Bill, AB8SC
Pres of radio club

Thanks, but a few days ago I tested it out and determined the problem:
the SWR on my antenna was extremely high, causing the rig to shut itself
down. I have since put up a new antenna (a J-pole to be specific).
However, I need an antenna analyzer capable of 6 meters to tune it.
Anyone have one?

As forms of communication:
Smoke signals (whiteman army come in pass) like bell tower lights (one
of by land - two if by sea) were limited to less than the whole
alphabet...
But they got the message across.
Semaphore flags helped that but were really useless in fog or smoke.
Transmitters communicated to the owner with really bad smells when they
could not shut them selves down, followed later by a really big invoice.

Hopefully the analyzer will talk to Joe and help find an open or shorted
match...

Joe,

An analyzer works very nicely, but you can adjust your antenna with an swr meter. It takes a little more trial and error, but gets the job done.

Joe Veldhuis <kd8atu@...> wrote:

We already have both of you on our list. Sorry about not responding. If you get lost, you can get directions on the repeater. Columbus is one way, so you may want to use Washington to get far enough into town before turning North to get to Columbus.

Andrew

Well folks, now I know why I don't remember sending QRZ the pic I took of the W8ZHO MCV.

It seems that about a year ago the picture was sent in by Jon AB8RD. I have to thank him on a couple different levels. First, thanks for doing it. What a thrill to see my work on the cover of QRZ, the Rolling Stone of ham radio operation. But secondly I would like to say thanks for appreciating the picture which to me sums up what makes us say 'life is good'.

With the blue sky as a backdrop the breeze said 'cheese' and positioned the flag just perfectly. Getting the flag, the MCV and the W8ZHO in the same shot, positioned just right....and the weather co-operating at the same time was pretty lucky.

Thanks, Jon, for liking the picture enough to share it with so many people.

73,

Mark K8MHZ

Hello Everyone ? I want to thank the hams that came out to help with the Girls on the Run Event this past Saturday .. Everything went great and we had a good time helping them.
This coming Saturday we have the YMCA Kick of to Summer Snug Harbor Run which is a 5K run and a fun run. The 5K starts at 8:30 and will be over bye 10:00. The fun run will start a little later then the 5K but should be over by 10:00 also.
We will be meeting in the Grand Haven Public Safety lot by 7:45 and use the 145.49 repeater to communicate on. If you can help please send me a email @ kb8odb@... or call me at 616-846-7307 and leave a message ? As I get a lot of emails and have to make the maps and get the planning done I may not be able to reply back to you so If I see a email that you have volunteered I will count you in.

760. eHam hacked again?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-25 11:32:33 UTC
From: K8MHZ
Topic: 760 Message: 760

From the ARRL in 1999:

eHam.net is hacked: The new eHam.net Amateur Radio site (http://www.eham.net) reports that it was the victim of hackers the weekend of September 10-12. eHam.net's Bill Fisher, W4AN, says hackers apparently from Southeast Asia were using the eHam.net server in an effort to break into government agency sites in the US. As a result, eHam.net began receiving phone calls from the US Defense Department, NASA, and other government agencies on September 10. "A quick look at our server revealed that we had indeed been hacked and that someone was running a process on our machine that was trying to gain information about computers in a lot of different government and university computer systems," Fisher said. He said eHam.net removed the program and attempted to close loopholes, but September 11, the intruders deleted all of the files on the eHam.net system. eHam.net says it has beefed up security, and expects no further problems.--eHam.net

761. Help needed for this weekend events

Yahoo group: WestMichiganHams (2006 — 2008)

From: Don Meyer
Topic: 749 Message: 761

Hello Everyone .... We are still looking for help for this weekend events. Both will only last the morning and are short events. If you can help please call me or send me a email at kb8odb@... or phone 616-846-7307

Events at:
This Saturday
YMCA Kick Off to summer 5k Run in Grand Haven Meet at GHPS parking lot
@ 7:30am

This Monday
Spring Lake Parade in Spring Lake Meet at Sping Lake EOC @ 9:15

Please come out and help .... Thanks and 73 Don

Donald Meyer - KB8ODB

Assistant Emergency Coordinator for Amateur Radio in Ottawa County

I tried contesting.com and got a similar error message as the one revealed when trying to access eham. The two sites are closely related. Do they share a server?

Bill, AB8SC

They have the same technical contact of Dave Pascoe. I am not sure if they are on the same server but it looks like they are associated with each other.

From: Dennis Harriss
Topic: 760 Message: 764

Both sites are still there. At least they can be pinged this morning. Last night I tried to ping eham and it did not respond.

Both contesting.com and eham.net have an IP of 69.36.242.130. Still get 404'd when trying the IP.

For those that want to try pinging these or any other site using Microsoft OSs.

Click on Start.
Click on Run.
Type in "cmd" (without the quotes)
Type in "ping eham.net" (without the quotes) www is not required. Substitute the website you want for eham.net.

The ping will return the IP, for eham.net 69.36.242.130, of the website and either a no response or the amount of time in Milliseconds that it takes for the ping to make a round trip.

765. Big Meeting, High Gas Prices, help?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-26 13:40:23 UTC
From: Bill Fries
Topic: 760 Message: 765

All:

The next radio club meeting is expected to be HUGE and FUN. But gas prices are through the roof! What can we do?

Car Pool.

Yes, the simple act of taking a bus load of hams to the club meeting will relieve the individual pressure at the gas pump for all the occupants. Also this will relieve the parking pressure at the tiny clubhouse property. Can we get the Muskegon Trolley to make a special run? Imagine. Hey, a wonderful idea.

So call a car load of friends and share the fun of attending the club meeting in the company of the finest individuals in our area. They will appreciate the fact that you took some time to invite, encourage, and enjoy their company.

Jim Weaver, K8JE is our speaker. We will learn tons on the subject of the ARRL and your piece of the huge puzzle. Bring your questions and comments. He takes notes and things later happen and often times the changes trace their roots to your comment. You can make a difference. Am I wrong?

I'm looking forward to seeing all of you there! Now, I wonder just how many hams can sit on that tree when we hold the meeting outside . . . ?

767. Hamgate status

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-05-26 23:56:50 UTC
From: George (Skip) VerDuin
Topic: 767 Message: 767

At the moment a Grand Haven hamgate seems stable - and is up when I'm not chatting.

K8RRA offers a prototype hamgate on 145.070 much of the time.
AX.25 packet with a digipeater on K8RRA, a BBS on K8RRA-1, are tested and wortking.
The digi alias GHWEST is not reliable yet, we are troubleshooting the alias.
Telnet services to Internet on K8RRA-1, and NET/ROM on K8RRA-2 are working.
WB8I is the only neighbor found at the moment so net/rom is a bit hobbled however.

At this time I'm looking for a 2-meter antenna in order to make the rig into 24/7 operation.
My objective is to mount equipment at the base of my tower and top-mount the antenna.

If anyone runs into trouble using this gate, please email me at k8rra@... with the news.

Topic: 768 Message: 769

Absolutely. You can always send it (them) into a repair center, either certified by the manufacturer or a good one via word of mouth. Today?s rigs are pretty reliable, but it sure can?t hurt to have the alignment checked, particularly on a HF rig.

Paul,

What type of radio is it?

If it is a solid state rig and works OK I would not do anything but check the TX and RX frequencies. If they are OK or very close it is best not to fix what ain't broke.

Now if it is a tube type HT that may be different ;)

Do you have an owner's manual for the radio? What suggestions are made there?

Film camera and HT maintanence are not easily compared. Your camera relied on many moving parts with very close tolerances and (Oh the Humanity!) springs. It needed to be checked and tweaked on a regular basis. Not so for a solid state radio. If the radio is working well chances are 'fixing' it may cause it not to anymore. Also, for 99 bucks you can get a brand new 2 meter HT from Icom. 99 bucks usually gets an hour of bench time and a cup of coffee. And you still end up with an old radio.

One of the best HTs I have ever used was the RS HTX 202 'brick'. We have one here that has outlasted dozens of batteries (take THAT Energizer Bunny!) so old is not necessarily bad.

Have fun!

73,

Mark K8MHZ

> Reporters for two newspapers and four TV outlets were on hand to cover the
> ARISS event. Peter Kofler, IN3GHZ, served as the ARISS mentor for the QSO.
>
> ARISS is a nine-nation international educational outreach with US
> participation by ARRL, AMSAT and NASA.
>
> ==>TWO RADIO AMATEURS DIE DURING MOBILE HIDDEN TRANSMITTER HUNT
>
> Two ARRL members from California are dead after the vehicle in which they
> were riding during a mobile hidden transmitter hunt May 27 went over a
> cliff
> in rugged terrain near Lake Isabella in Kern County. They were identified
> as
> Michael G. Obermeier, K6SNE, of Anaheim, and David A. Gordon-Ross, N6IDF,
> of
> Yucaipa. Obermeier, an ARRL Official Observer in Orange County, was 46.
> Gordon-Ross was 35.
>
> "Mike and Dave were some of the best T-hunters in the biz," said Scott
> Press, N6SAP, calling both "true assets to this hobby." In his role as an
> OO, Obermeier reportedly had participated in the infamous Jack Gerritsen
> radio jamming case in the Los Angeles area.
>
> According to media accounts, a Kern County Sheriff's Department
> search-and-rescue team located the victims early Monday, May 29. Obermeier
> was driving the 1991 4-wheel-drive Jeep Cherokee that apparently went out
> of
> control on Cook Peak Road while the pair was proceeding to the next hidden
> transmitter site. After caroming off a rock wall, the vehicle crossed the
> road and plunged down a 900-foot cliff. They were reported missing after
> failing to check in with T-hunt organizers.
>

> Greg Pitta, KF6DBJ, reports Obermeier and Gordon-Ross were on a half-day
> multiple-transmitter T-hunt. "Both K6SNE and N6IDF were expert transmitter
> hunters, each with hundreds of hunts completed, ranking with top scores in
> most," he said.
>
> ARRL Amateur Radio Direction Finding (ARDF) Coordinator Joe Moell, K0OV,
> knew both men. He notes that Obermeier had suffered a sports-related
> spinal
> cord injury that left him a paraplegic. "He did all the adaptive work on
> his
> vehicles, of which he had quite a few that he used over time for RDF,"
> Moell
> said. Despite his physical limitations, Obermeier also enjoyed foxhunting
> from his wheel chair.
>
> Moell says Gordon-Ross had been a proficient mobile T-hunter for many
> years.
> He took a brief hiatus after his first child was born in April 2005 (his
> wife, Melanie, is KF6GWV), but he recently became active again.
>
> According to Moell, the mobile transmitter hunts take place on the fourth
> Saturday of each month on 2-meter FM simplex, starting out from a hilltop
> in
> Rancho Palos Verdes. He says it's not uncommon for the main hidden
> transmitter to be hundreds of miles away--175 highway miles in this
> instance.
>
> The 147.435 Amateur Radio Repeater System is collecting donations to help
> Melanie Gordon-Ross, a stay-at-home mom. It also will donate all proceeds
> from its 16th annual 435 Chili Cook-off June 10. Visit the 147.435 Web
> site
> <http://www.435online.com> for additional information.
>
> ==>2006 NORTH ATLANTIC HURRICANE SEASON OFFICIALLY UNDER WAY
>
> Scientists within the National Oceanic and Atmospheric Administration
> (NOAA)
> predict an 80-percent chance of an above-normal 2006 north Atlantic
> hurricane/tropical storm season, which runs from June 1 through November
> 30.
> A repeat performance of the devastating 2005 season is unlikely, however.
> Weather experts at NOAA's Climate Prediction Center, National Hurricane
> Center and Climate Prediction Center produced this year's outlook
> <http://www.cpc.noaa.gov/products/outlooks/hurricane.shtml>.
>
> "For the 2006 north Atlantic hurricane season NOAA is predicting 13 to 16
> named storms, with eight to 10 becoming hurricanes, of which four to six
> could become 'major' hurricanes of Category 3 strength or higher," says
> NOAA
> Administrator Conrad Lautenbacher.

>
> The Hurricane Watch Net (HWN) <http://www.hwn.org> activates on 14.325 MHz
> when major tropical storms threaten the US. It works in concert with
> WX4NHC
> <http://www.wx4nhc.org> at the National Hurricane Center to relay
> real-time
> ground-level weather data to forecasters.
>
> On average, the north Atlantic hurricane season produces 11 named storms,
> with six becoming hurricanes, including two major hurricanes. In 2005, the
> Atlantic hurricane season experienced a record 28 storms, including 15
> hurricanes. Seven were "major," and a record four hurricanes hit the US.
>
> While NOAA is not forecasting a rerun of last year's season, the potential
> for hurricanes to strike the US is "high," Lautenbacher said.
>
> The first named storm of the 2006 season will be "Alberto." The name
> "Katrina" has been removed from the list of storm names.
>
> ==>KARL BULLOCK, WA5TMC, APPOINTED DELTA DIVISION VICE DIRECTOR
>
> ARRL President Joel Harrison, W5ZN, has appointed Karl W. Bullock, WA5TMC,
> to be Delta Division Vice Director. Bullock, of Ripley, Mississippi, will
> complete the term of Henry Leggette, WD4Q, who took over as Delta Division
> Director in January after the ARRL Board of Directors elevated past
> Director
> Rick Roderick, K5UR, to be an ARRL Vice President.
>
> "I'm honored to have been chosen by President Harrison," Bullock said,
> "and
> I look forward to serving the fine folks in the Delta Division and
> representing Amateur Radio in general."
>
> First licensed at age 14 as WN5TMC in 1967, Bullock, 53, has remained an
> active radio amateur ever since. He now holds an Amateur Extra class
> license
> as well as an FCC commercial license. He's active on all bands and modes
> from 160 meters through 70 cm.
>
> His ham radio career has included starting up the Mississippi Training and
> Traffic net--later the Mississippi Slow Net. He's also a member of the
> Brass
> Pounder's League, the recipient of several public service awards, a past
> officer of the Northeast Mississippi Amateur Radio Club and, most
> recently,
> ARRL District Emergency Coordinator for North Mississippi as well as
> Emergency Coordinator for Tippah County.
>
> He's a Life Member of the ARRL, a charter member of the Tippah Amateur
> Radio

> Association and a control operator for a local 2-meter repeater. He also
> enjoys telling others about his Christian faith and about Amateur Radio.
>
> On the professional side, Bullock has operated his own telecommunications
> consulting company, Bullock & Associates, since 2001 and is involved in a
> startup dedicated to residential fiber connectivity. His consulting
> activity
> focuses on competitive local exchange carriers--CLECs.
>
> His wife Amy is N5TBB, the ARRL Public Information Coordinator for the
> Mississippi Section and current president of the Tippah Amateur Radio
> Association.
>
> "We both love DX, contests, and going to hamfests," Bullock says. "Amy
> fell
> in love with hamfests after the first one I carried her to, and soon
> afterward passed her exam. We still like to make the Dayton trip whenever
> we
> can."
>
> Bullock's current term as Vice Director will end January 1, 2009.
>
> ==>SKYWARN VOLUNTEERS RECEIVE NOAA ENVIRONMENTAL HERO AWARD
>
> South Florida SKYWARN Coordinator Don Morris, KG4JHH, of Miami, and his
> South Florida SKYWARN team have received a 2006 NOAA Environmental Hero
> Award for outstanding volunteer service during the 2005 hurricane season.
> Morris and his SKYWARN team volunteered more than 100 hours to staff
> Amateur
> Radio station WX4MIA, located at the NOAA National Weather Service (NWS)
> Weather Forecast Office in Miami. The volunteers gathered real-time
> hurricane damage and weather reports, disseminated NWS information and
> warnings and verified NWS warnings with on-the-spot information.
>
> "The intent of the award is to recognize all of us who have worked on
> SKYWARN and/or WX4MIA," said Morris, who accepted the plaque during a May
> 22
> presentation. "Local Amateur Radio is the main infrastructure we depend on
> for SKYWARN. It is way cool to be part of it." Morris also credited those
> who filed reports by telephone, Internet or fax or who have "just been
> ready
> if needed."
>
> Along with other SKYWARN volunteers and even family members, Morris kept
> the
> WX4MIA severe weather net in constant operation as Hurricane Katrina moved
> ashore near Hallandale Beach and then southwest across Miami-Dade County.
> He
> did the same thing for Hurricane Wilma, staying all night right through
> landfall around 6 AM in Collier County and through noon when Wilma finally

> moved off the Palm Beach County coastline near Jupiter.
>
> Over the years, NOAA said, Morris has volunteered hundreds of hours as
> "the
> voice" of WX4MIA, soliciting storm reports and disseminating the latest
> warnings and statements for hurricanes and severe storms.
>
> Established in 1995 and given annually in conjunction with Earth Day, the
> Environmental Hero Award is presented to individuals and organizations
> volunteering their time and energy to help NOAA carry out its
> mission.--NOAA; Evelyn Gauzens, W4WYR
>
> ==>ISS ASTRONAUT HONORED FOR WORKING ALL STATES, INSPIRING OTHERS FROM
> SPACE
>
> International Space Station Expedition 12 Commander Bill McArthur, KC5ACR,
> has been honored as the first astronaut to work all states from space and
> for inspiring others through his ham radio activities from NA1SS.
> McArthur,
> who returned to Earth in April, received an ARRL Worked All States (WAS)
> plaque during a May 25 ceremony at Johnson Space Center in Houston. During
> his six-month duty tour, McArthur became the most active radio amateur
> ever
> to serve aboard the ISS. His track record from NA1SS is impressive: In
> addition to WAS, he handled a record 37 Amateur Radio on the International
> Space Station (ARISS) school contacts, worked all continents, including
> Antarctica, on both VHF and UHF--and racked up QSOs with some 130 DXCC
> entities.
>
> "The Amateur Radio on the ISS program was developed to inspire
> students--our
> next generation of explorers--through Amateur Radio communications with
> the
> ISS crew," remarked ARISS International Chairman Frank Bauer, KA3HDO, who
> presented the WAS plaque to McArthur. "Using Amateur Radio, the Expedition
> 12 crew took the worldwide community of radio amateurs, the school
> students
> and the general public to unprecedented heights."
>
> The last QSL McArthur needed to confirm WAS--from Wyoming--arrived at ARRL
> Headquarters not long before the end of his ISS duty tour. McArthur also
> logged a phenomenal number of casual contacts with earthbound radio
> amateurs--more than 1800 in all. Bauer noted that McArthur "was very
> approachable" with students during the ARISS school contacts. "He inspired
> them with his vision, quick wit and sense of humor."
>
> Bauer said McArthur motivated hams and non-hams alike through his
> on-the-air
> activity. He told of hearing from a teacher in Orlando who said one of his
> students added Advanced Placement Physics to her course schedule after

> participating in an ARISS school contact. In another inspirational
> instance:
> When a prospective licensee learned he could speak to the ISS via ham
> radio,
> he studied and passed his Amateur Radio examination and made a contact
> with
> McArthur at NA1SS in March, Bauer said.
>
> "Throughout this expedition, Bill McArthur's enthusiasm for the ham radio
> hobby kept bubbling to the surface," Bauer said, calling McArthur's ham
> radio accomplishments from NA1SS "a testament of success."
>
> "All who have been touched by your efforts will remember their special ISS
> connection for the rest of their lives," Bauer concluded.
>
> ==>SOLAR UPDATE
>
> Ra the Sun god Tad "I Saw the Sun" Cook, K7RA, Seattle, Washington,
> reports:
> Solar activity continues to be low as we head toward the bottom of the
> sunspot cycle. With fewer sunspots, the higher frequencies aren't as
> useful.
> There is a direct correlation between the maximum usable frequency (MUF)
> and
> the number of sunspots. That's why 10 meters is much more usable at the
> peak
> of a solar cycle than at the bottom. We received several e-mails this week
> about sporadic E (Es) propagation.
>
> For the next few days, it looks like solar wind from coronal holes could
> be
> mildly disruptive. The planetary A index forecast for June 2-3 is 20, then
> settling down to quiet conditions a couple of days later. Average daily
> sunspot numbers were up this week over last and are expected to rise
> slightly over the next few days.
>
> Sunspot numbers for May 25 through 31 were 33, 51, 69, 78, 54, 51 and 44,
> with a mean of 54.3. 10.7 cm flux was 83.7, 81.6, 83, 84.7, 81.1, 80, and
> 78.4, with a mean of 81.8. Estimated planetary A indices were 5, 5, 3, 7,
> 3,
> 9 and 6, with a mean of 5.4. Estimated mid-latitude A indices were 4, 1,
> 1,
> 5, 1, 7 and 4, with a mean of 3.3.
>
> For more information concerning propagation and an explanation of the
> numbers used in this bulletin see the ARRL Technical Information Service
> Propagation page <http://www.arrl.org/tis/info/propagation.html>.
> ~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
>
> ==>IN BRIEF:

>
> * This weekend on the radio: The SEANET Contest, RSGB National Field Day,
> IARU Region 1 Field Day (CW) and the QRP TAC Sprint are the weekend of
> June
> 3-4. The RSGB 80-Meter Club Championship (Data) is June 5, the ARS Spartan
> Sprint is June 6, and the Thursday NCCC Sprint Ladder is Jun 9. JUST
> AHEAD:
> The ARRL June VHF QSO Party, the ANARTS World Wide RTTY Contest, the
> Portugal Day Contest, the Asia-Pacific Sprint (SSB), the GACW WWSA CW DX
> Contest and the REF DDFM 6-Meter Contest are the weekend of June 10-11.
> The
> NAQCC Straight Key/Bug Sprint and the RSGB 80-Meter Club Championship (CW)
> are June 14. The Thursday NCCC Sprint Ladder and SARL Youth Day are June
> 16.
> See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the
> WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html>
> for more info.
>
> * ARRL Certification and Continuing Education course registration:
> Registration remains open through Sunday, June 25, for these ARRL
> Certification and Continuing Education (CCE). Program on-line courses:
> Amateur Radio Emergency Communications Level 1 (EC-001), Radio Frequency
> Interference (EC-006), Antenna Design and Construction (EC-009), Analog
> Electronics (EC-012) and Digital Electronics (EC-013). Classes begin
> Friday,
> July 7. To learn more, visit the CCE Course Listing page
> <http://www.arrl.org/cce/courses.html> or contact the CCE Department
> <cce@...>.
>
> * US Power Squadrons, ARRL join forces for W1AW operating event:
> Representatives of the United States Power Squadrons (USPS)
> <http://www.usps.org/> are joining ARRL Headquarters staffers this weekend
> for a special W1AW operating event to mark National Safe Boating Week.
> Operation commenced Friday and will continue Saturday, June 3, starting at
> 1200 UTC. Look for W1AW on HF plus 6 meters as well as on satellites and
> digital modes. A special QSL card will be available. All contacts will be
> uploaded to Logbook of the World (LoTW) <http://www.arrl.org/lotw> after
> the
> event. At a W1AW reception prior to the on-air activities. ARRL CEO David
> Sumner, K1ZZ, presented Don Stark, N3HOW of the USPS with a welcoming
> letter
> from ARRL President Joel Harrison, W5ZN.
>
> * Ham-Com 2006 set for June 9-10 in Plano, Texas: ARRL President Joel
> Harrison, W5ZN, will address the ARRL West Gulf Division forum during
> Ham-Com 2006 <http://www.hamcom.org>, Friday and Saturday, June 9-10, at
> the
> Plano Centre in Plano, Texas. In addition, ARRL Chief Development Officer
> Mary Hobart, K1MMH, will discuss the importance of the League's
> development

> activities to Amateur Radio, while HQ Staffer Chuck Skolaut, K0BOG, will
> talk about ARRL Headquarters' response to Hurricane Katrina. The doors
> will
> be open from 7 AM until 6 PM both days. Talk-in is on the 147.18 MHz
> repeater (CTCSS 107.2 Hz), and parking is free. In conjunction with
> Ham-Com
> 2006, the Lone Star DX Association will host W5DXCC 2006, which features a
> banquet Friday, June 9, at the Southfork Hotel. Featured speaker will be
> Bob
> Allphin, K4UEE, co-leader of the recent 3Y0X DXpedition to Peter I Island.
> Complete details are in the "Ham-Com Flyer"
> <http://www.hamcom.org/ccp51/media/PDFs/HamComFlyer2006.pdf>.--Barry
> Goldblatt, WA5KXX
>
> * Staten Island ARES participates in storm rehearsal: Lessons learned
> during
> last year's devastating hurricanes on the US Gulf Coast have not been lost
> on the New York City emergency response community. In preparation for the
> upcoming storm season, Staten Island and New York County Amateur Radio
> Emergency Service (ARES) members participated May 21 in an American Red
> Cross drill dubbed "The Staten Island Storm Rehearsal." The exercise was
> designed to prepare volunteers by providing a hands-on experience in
> emergency shelter operations. "ARES is relied upon by our clients, like
> the
> Red Cross, to be able to quickly, adequately and professionally set up and
> run a portable communications system to help those affected by a
> disaster,"
> said ARRL New York City District Emergency Coordinator Mike Lisenco,
> N2YBB.
> "ARES members participate in drills such as this to hone our skills." ARES
> participants served as primary communicators for most of the drill, for
> which the scenario included outages of both cell phone service and
> electrical power. During the "blackout" scenario, ham radio volunteers
> were
> able to provide a seamless transition to battery power to maintain
> critical
> communication with the Red Cross EOC in Manhattan. Ten ARES volunteers
> took
> part in the exercise. ARRL Staten Island Emergency Coordinator Joe Nieves,
> N2TEE, said, "We need to be prepared at all times should we be called upon
> to support our community."
>
> * Radio amateurs take part in National Communications System training:
> ARRL
> members Gary Sessums, KC5QCN, Dale Stauffer, W4DS, and Jim La Follette,
> WB4WBL, last week demonstrated digital and voice capabilities of a Shared
> Resources (SHARES) Transportable Auxiliary Radio Station (STAR) at a
> National Communications Systems (NCS) training session. The week-long
> Emergency Support Function 2 (ESF-2) training session at Homestead Air
> Reserve Base in Florida was developed in the aftermath of Hurricane

> Katrina.
> It was specifically designed to prepare ESF-2 responders at the federal
> level to function effectively when called into action to support the
> National Response Plan. SHARES stations are NCS assets that deploy with
> "fly-away" HF radio packages to disaster scenes to provide communication
> support to the federal government. Sessums, Stauffer and La Follette are
> SHARES stations through their involvement with the Military Affiliate
> Radio
> System (MARS) and the Civil Air Patrol (CAP). They set up portable HF
> SHARES
> stations operating on generator power, erected near-vertical incidence
> skywave (NVIS) wire antennas and made voice and digital HF radio contacts
> around the US as part of the program. Sessums and La Follette are members
> of
> the Hillsborough County, Florida, ARES/RACES team that deployed to Hancock
> County, Mississippi, last August to support Hurricane Katrina recovery
> operations. Sessums is Hillborough County ARRL Emergency Coordinator.
>
> * Revised DXCC awards fee schedule becomes effective July 1: The ARRL DXCC
> Desk has announced DXCC program fees will rise slightly when a new awards
> fee schedule
> <http://www.arrl.org/news/stories/2006/05/23/3/fees-06Jul.html>
> goes into effect July 1. The fee for a basic DXCC application (including
> certificate and pin for initial applications only, 120 QSO maximum) and
> for
> first endorsement applications within a year will increase to $12 for ARRL
> members and to $22 for foreign nonmembers. Second and subsequent
> endorsements (120 QSO maximum) within a year will be $22 for ARRL members
> and $32 for foreign nonmembers. The $10 fee for a basic DXCC application
> (120-credit maximum) was established in 1990, and the current overall fee
> schedule has been in effect since 1998. "It costs us to provide this
> service," explains ARRL Membership Services Manager Wayne Mills, N7NG. "We
> don't make any money from DXCC." The cost of other DXCC-related items such
> as plaques and pins also will go up July 1. Mills advised that DXCC fees
> will increase further in the years ahead--possibly at two-year
> intervals--at
> least to catch up with the Consumer Price Index, which has risen 49
> percent
> since 1990. He estimates the active population of DXCC members at between
> 15,000 and 18,000.

> - ARRL Members Forum at Hamvention
> - DFing
> - Scholarship Winners
> - Question No. 2 -- You asked. Here is the answer.
> - My Travel Plans
>
> BPL -- GOOD NEWS CONTINUES
>
> I continue to be optimistic about the future of BPL. As you may
> recall, we have been successful at getting a favorable amendment
> inserted into HB 5252, the US House of Representatives version of the
> Communications Act rewrite. This amendment would require the FCC to
> ensure any BPL system they allow to operate will not interfere with the
> operation of any licensed telecommunications service. This means the
> FCC must ensure BPL does not interfere with safety services
> communications systems . . . and Amateur Radio. There is nothing for
> us to do at this time on this bill, but you will be asked at the proper
> time to write your Congressman to support the bill.
>
> We also have received word that a high-ranking US Senator has come out
> in support of including similar wording in the US Senate version of the
> Communications Act rewrite. Again, you will be requested to write in
> support of Senate action when the proper time comes.
>
> In each case, our success came largely as the result of letters written
> by our members in key Congressional Districts regarding HB 5252 and in
> a key state regarding the Senate rewrite wrote to their Congressman and
> their Senator, respectfully.
>
> Grassroots action works! Grassroots action is legal! Grassroots
> action is honorable! Grassroots action is smart! Grassroots action is
> the only way you, the member, can help ensure your Amateur Radio
> survives and remains healthy.
>
> If you'd like to learn what you can do to become more involved in our
> grassroots Legislative Action Program, send me an E-mail request. I'll
> be happy to be certain you receive information.
>
> Final thought: The news about BPL may be pretty good on several fronts
> these days, but there is still a lot of work to be done. We need your
> help to ensure victory. Please help when the time comes.

>
> DAYTON HAMVENTION
>
> My observation is that the Hamvention was a tremendous success for the
> Hamvention Committee, the Dayton ARA and the vendors -- ARRL included.
> We don't know, yet, what the profit/loss statement for ARRL's EXPO will
> be for this year, but EXPO was an unquestionable success. Once again,
> it brought thousands of amateurs and many of the Directors, officers
> and staff of ARRL to meet face to face. The members were able to put
> faces on the people they elected and the people who in turn were hired
> to serve the League by the elected officials. The elected and hired
> people were able to put faces to members whom they serve. When this
> occurs, it is more difficult for anyone to consider an elected
> official, employee or a member as being uncaring or unintelligent.
> This brings us all a better appreciation of each other so that we can,
> together, work toward resolving the problems we all as radio amateurs
> face.
>
> You may not have known it, but the man who sold you a new Handbook at
> EXPO might just have been Bob Vallio, W6GRG, Director from the Pacific
> Division. The fellow who handed you your PASSPORT might just have been
> Director Jay Bellows, K0QB of the Dakota Division. Also available in
> EXPO as well as at several of the forums, were President Joel Harrison,
> W5ZN, Vice President Kay Craigie, K3KN, Central Division Director Dick
> Isely, W9GIG, Southwestern Division Director Dick Norton, N6AA,
> Atlantic Division Director Bill Edgar, N3LLR, Northwestern Division
> Director Jim Fenstermaker, K9JF, Southeastern Division Director Frank
> Butler, W4RH, Midwest Division Director Wade Walstrom, W0EJ, and nearly
> each member of our senior staff from Newington . . . and more.
>
> Me? I was either in the two forums I moderated or at the Grassroots
> Legislative Action booth nearly throughout the Hamvention. I'm sorry
> that I missed seeing a number of you who stopped by to say hello, but I
> was very happy to get to see many others who came by.
>
> ARRL MEMBERS FORUM AT HAMVENTION
>
> No one had hard questions to ask ARRL President Joel Harrison, W5ZN,
> Vice President Kay Craigie, K3KN, Ohio Section Manager Joe Phillips,
> K8QOE, CEO Dave Sumner, K1ZZ, COO Harold Kramer, WJ1P, Development
> Officer Mary Hobart, K1MMH or Membership Manager Katie Breen, W1KRB . .
> . or me. At least no one with a hard question asked it during the

From: Tom VanderMel
Topic: 778 Message: 778

Hello everyone. The Oceana ARES group has a event this coming up this weekend
that we are going to need help with. It's a 5k marathon in Silver Lake. It starts at 8:30 AM in the little plaza in front of the yogi bear campground. The marathon is for the annual asparagus festival. Any help will be greatly appreciated. If you can make it and help out try to be there around 8:00AM. Thanks a ton, Rob H KC8ZSU e mail kc8zsu@...

779. MS-150

From: John Wehmer
Topic: 779 Message: 779

We still need a few more people for the MS-150 Bike Run on June 10th and 11th. Saturday we will start at Byron Center High School in Kent County and end at Hope College in Holland meandering mostly through Allegan County. Sunday will go from Hope back to Byron Center HS meandering mostly through Ottawa County.

Note that each day is a long one. We will meat in Byron Center at 6am and be done mid to late afternoon.

Please contact me if you can help and let me know if you can do Saturday, Sunday or both.

Thanks and 73

784. Muskegon now transmitting SAME radio alerts via 147.485

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-06-07 01:09:20 UTC
From: K8MHZ
Topic: 784 Message: 784

Jim K8COP has installed a Specific Area Message Encoding receiver which re-transmits via 147.485.

Area encoding allows weather radios to be manufactured in a way that they can be set up to only transmit when a specific county is affected by the nature of the transmission. Specific Area Message Encoding, or SAME, requires special radios to filter out NOAA transmissions that are continuously ongoing and passing only traffic relevant to a specific county. Monitoring 147.585 does not. For SAME alerts for Muskegon County simply programming 147.485 into a scanner will work with no transmissions until Muskegon County is affected. SAME is not just for weather alerts but for other emergencies such as evacuations or large scale emergencies. The CTCSS tone of 141.3 will assure that other signals beside the NOAA re-transmission will be ignored by radios with the capability of doing so. Radios such as scanners will still receive the SAME broadcasts but are susceptible to signals such as stations operating on the same frequency.

To that effect it would be good operating procedure to not use 147.585 for communications if there are other frequencies available.

Please read his post to the MCARES group, below, for more information.

I think Jim deserves some thanks for the addition of this cool feature to the area.

73,

Mark K8MHZ

Subject: [MCARES] NOAA Alert Radio System

For both groups information a NOAA Alert Receiver/Transmitter has been installed in Muskegon. The radio trips a transmitter that is on 147.585 Mhz (141.3 Hz CTCSS), and retransmits the audio from the NOAA Weather transmitter on 162.475 Mhz in Hesperia.

The only time you will hear radio traffic from this frequency is when their is a weather alert for Muskegon County, or the weekly radio test on Wed between 11:00 AM-12 Noon.

I would suggest that if you plan on monitoring this frequency to program up your scanner or HT on that frequency and monitor the test on Wed to see what your reception quality is before the next Skywarn event.
The greater Muskegon area should have no problem with receiving it, my concern is the outlying areas of the county.

To all Amateur Radio Operators

The National 24 Hour Challenge (N24HC) http://www.n24hc.org is a 126 1/2 mile bicycle route through Barry County that takes place on the Saturday before Fathers Day that attracts about
500 riders plus their support crews. Amateur Radio communications is an important part of the logistics of this annual event taking place this year on June 17.
As I type this, the following communications positions are in need of volunteers:
LEAD CAR (Vehicle and driver supplied) 7:30AM to 1:45PM - Reports to net control location of
lead vehicle and rider.
BROOM 2 (Vehicle and driver supplied) 11AM to 6PM - Reports to net control location of vehicle following last riders, picking up riders and bikes of those unable to complete the course, and other information.
OTHER ASSIGNMENTS

The event coordinators provide shirts, limited refreshments, and Friday evening spaghetti dinner. Please contact the Ham Radio Communications Director if you are willing to help.

791. New "Local" (GR) Ham/Electronics Store

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-06-07 22:45:27 UTC
From: Dennis Harriss
Topic: 791 Message: 791

Yesterday I checked out The new ham/electronics store that opened recently just south of Grand Rapids on 76th St., just west of US-131 on the south side of the road.

While the place is not very large they have fair amount of stuff in the store for just getting started. I talked with the owner Ken Handley KB8PSG and he said they have items in the back room they have yet to get out front. They also have more stuff coming in everyday.

I know some of us have been wishing that there was a local "Ham" store. He is hoping to be able to generate enough business to stay open in this area. It would be especially nice if ComDec goes into complete retirement within a few years.

They also have a website up and are putting a list of items that are for sale on it. They expect it might take a couple more weeks to get the full list online.

http://www.cesham.com

I would recommend checking they out for yourself. They are planning a Grand Opening for July 1, 2006.

Hello Everyone . I hope everyone is enjoying the West Michigan Hams Reflector and that you are not hesitating on posting your comments or asking questions you have about ham radio. And I thank you for your participation in making this a great place for hams to meet.

In the last couple of days I as moderator of another reflector have seen a new ham from a county turned away from that reflector because he was not a member of that group and when I started West Michigan Hams I was hoping that the individual county's would still bring new hams that were from there respective county's onto there reflectors so they would see what involvement there is with hams in there community. This is in no way intended to start a debate here on this website, but I am asking each one of the county websites to review it within there own members to make sure we are not missing out on the new hams. Sometimes we need to show what we are doing so we can get them involved and get them to Join in.

Thanks again for participating here at West Michigan Hams

I need some Idea's for an HF antenna to put on my 21' Power boat. I would like somthing that I could make myself and not have to spend a lot of money. The boat is fiberglass except for the railing around the front. I would like to be able to work 20 and 40 meters, more if possible.Any ideas?

Jim:

Thanks for reminding me...I had intended to send you an article some time ago on that very subject. It's very concise, written by Jim Weidner, K2JXW, who founded The Amateur Lighthouse Society. I think that you will find it very helpful. If anyone else is interested, please contact me directly and I will e-mail a copy to you, also.

73,
Linda, AB8QH

Hi Jim ... Skip K8RRA with Jonh N8YQD will be working on the Satilite connection and Mark KC8DEI will be working on VHF and I think they are both on WMH here so hopefully they will email you and get togather with you on that. Also it would be nice to get the fieldday sites linked togather on packet and pass some information between sites with that and for the Holland club members watching WMH it would be nice to get you connected too ..... Hope this helped you out ...73 Don Meyer KB8ODB

From: Linda Rosenthal
Topic: 799 Message: 799

Hello, all:

The W8ZHO/MAARC Field Day co-chairs, Jon, AB8RD, and myself, AB8QH, decided on June 17th at 1 p.m. for a pre-Field Day meeting at Fruitland Township Park 4545 Nestrom Road, Whitehall , rain or shine. If any of you can't make it and would like to be kept informed, contact us and we'll see to it that you get the information that you need. Feedback is welcome. The excitement is building towards a great Field Day, with satellite, packet, and amateur television demos, as well as a mighty GOTA station and some skillfull operators. We definitely encourage visitors and we have some very friendly and helpful hams waiting to show you what amateur radio is all about, so come on down!

73,
Linda, AB8QH

> ==>US HOUSE OKAYS TELECOMS BILL WITH BPL STUDY LANGUAGE INTACT
>
```

> On a 321 to 101 vote, the US House of Representatives on June 8 passed the
> Communications Opportunity, Promotion and Enhancement (COPE) Act of 2006.
> The House-passed bill, HR 5252, leaves intact language that would require
> the FCC to study the interference potential of BPL systems. US Rep Mike
> Ross, WD5DVR (D-AR), one of two radio amateurs in Congress, sponsored the
> BPL study requirement, "Study of Interference Potential of Broadband over
> Power Line Systems," contained in Title V, Section 502 of the complex
> bill.
> HR 5252 now goes to the US Senate, where a separate--and very
> different--telecoms bill, the Communications, Consumer's Choice, and
> Broadband Deployment Act of 2006 (S 2686) is still in committee.
>
> "We were concerned that a representative might be persuaded by BPL
> interests
> to introduce an amendment to delete or dilute Section 502," said ARRL CEO
> David Sumner, K1ZZ. "As it turns out that didn't happen, although we had
> taken steps to counter it if it had. So for now our focus returns to the
> Senate Commerce, Science and Transportation Committee." Sumner says that
> if
> similar language were introduced on the Senate side, it would be more
> likely
> to remain when and if the House and Senate versions go to a conference
> committee.
>
> Section 502 calls on the FCC to "conduct, and submit to the Committee on
> Energy and Commerce of the House of Representatives and the Committee on
> Commerce, Science, and Transportation of the Senate, a study of the
> interference potential of broadband over power line systems," within 90
> days
> of the bill's enactment.
>
> Ross proposed including the study wording while the bill was still in the
> Energy and Commerce Committee. With the support of Committee Chairman Joe
> Barton (R-TX), the panel agreed by voice vote to include it when it
> reported
> the bill out.
>
> The BPL study requirement reportedly has received significant opposition
> from electric utilities. The United Telecom Council (UTC), a bulwark of
> BPL
> support and administrator of the Interference Resolution Web site, last
> month referred to the study requirement as a threat and urged its members
> to
> contact their members of Congress regarding its inclusion in the House
> measure.
>
> A year ago, Ross sponsored House Resolution 230 (H Res 230), which calls
> on
> the FCC to "reconsider and revise rules governing broadband over power
> line

> systems based on a comprehensive evaluation of the interference potential
> of
> those systems to public safety services and other licensed radio
> services."
> That non-binding resolution has eight cosponsors.
>
> In an April 27 statement, Ross said including the FCC study requirement in
> the House bill "would guarantee that valuable public safety communications
> and Amateur Radio operators are not subject to interference." He said
> infrastructure-free Amateur Radio, "often overlooked in favor of flashier
> means of communication," can maintain communication in disasters that
> bring
> more vulnerable technology to its knees. Ham radio operators "are often
> the
> only means of communication attainable in a devastated area," Ross said.
>
> "I believe it is imperative that the interference potential [of BPL] is
> thoroughly examined and comprehensively evaluated to ensure that
> deployment
> of BPL, which I do support, does not cause radio interference for Amateur
> Radio operators and first responders who serve our communities," Ross
> added.
>
>
> The Senate Commerce, Science and Transportation Committee will consider S
> 2686 in a markup session later this month. The ARRL has e-mailed members
> in
> the 22 states with Senators on the committee, urging them to write seeking
> support to include similar BPL study language in the Senate bill.
>
> ==>FCC CITES FLORIDA UTILITY FOR INTERFERENCE TO RADIO AMATEUR
>
> The FCC has issued a Citation to Lakeland Electric, a municipally owned
> utility in Lakeland, Florida, for violating Part 15 rules by interfering
> with a local radio amateur. ?15.5(c) of the FCC rules requires that the
> operator of an "incidental radiator" must cease operating the device after
> an FCC representative notifies the operator that the device is causing
> harmful interference. The "incidental radiator" in this case is overhead
> power lines. Under an agreement, the ARRL and the FCC cooperate in
> resolving
> cases of line noise interference to Amateur Radio licensees.
>
> "Power line noise continues to generate the bulk of interference
> complaints
> that ARRL receives," says ARRL Electromagnetic Compatibility Engineer Mike
> Gruber, W1MG, who says the League reviews hundreds of such complaints each
> year. About half of them are resolved promptly by the utilities, in some
> instances with assistance from the ARRL Laboratory. Gruber says he
> believes
> this is the first time the FCC has issued a Citation to a utility in a

> case
> involving power line interference to ham radio.
>
> The radio amateur involved, J. C. Flynn, W4FGC, told ARRL that Lakeland
> Electric has been good about fixing routine problems, but he doesn't think
> the utility personnel know how to resolve cases of power line noise. "I
> have
> been 10 years trying to get something done," he said, adding that the
> noise
> affects all HF bands. "It is terrible!"
>
> Flynn first noticed the power line noise around 1995. Subsequent
> complaints,
> assurances from the utility that it was addressing the problem--or that it
> couldn't find one--and even some FCC warnings followed before the FCC
> issued
> its Citation to Lakeland Electric on May 16. Flynn, who's now 84, told the
> League that as of June 7, nothing had been done to fix the severe line
> noise
> at his location, which he demonstrated over the telephone on several
> bands.
> He said he especially enjoys getting on 40 meter SSB with a large
> roundtable
> of friends.
>
> Commented Gruber: "There has been no activity by the utility in resolving
> this problem in over a year, and Mr Flynn's noise case now appears to be
> at
> a standstill." The League's involvement in the case goes back to January
> 2001, when Flynn requested the League's assistance. Gruber says the
> League's
> role is to provide technical information and guidance to utilities "to
> keep
> a complaint from reaching the point of a Citation."
>
> In late 2005, Gruber had a chance to check the line noise at Flynn's QTH
> firsthand. He had taken RFI gear to a Florida ham radio convention for a
> talk and demonstration. Afterward, on his own time, Gruber--with help from
> ARRL West Central Florida Section Manager Dee Turner, N4GD--took some
> noise
> measurements of his own.
>
> Gruber submitted the results of his on-site inspection to the FCC.
> Personnel
> from the Commission's Tampa field office followed up with their own
> inspection before issuing the Citation, which lays the groundwork for a
> possible Notice of Apparent Liability proposing to fine the utility if the
> interference problem is not resolved.
>
> "I hope this case serves as a precedent for FCC enforcement, where

> appropriate, in power line noise cases," said Gruber, who's compiled
> various
> reports and correspondence relating to the Lakeland Electric power line
> interference case into a booklet of approximately 60 pages. "While the
> League will work with amateurs in such cases for as long as it takes," he
> added, "we hope the FCC Citation will serve as a warning to electric
> utilities that it's not acceptable to take months or years to fix the
> problem causing the interference."
>
> ==>HUGE CUBESAT LAUNCH SET FOR JUNE 28
>
> In what AMSAT-NA is calling the largest deployment ever of Amateur Radio
> satellites, 13 "CubeSats" carrying ham radio payloads are set for launch
> June 28. If all goes according to plan, a Dnepr-1LV rocket will carry the
> CubeSats into space from the Baikonur Cosmodrome in Kazakhstan. A
> fourteenth
> satellite in the package will not carry an Amateur Radio payload.
>
> The CubeSat project is a collaboration between California Polytechnic
> State
> University-San Luis Obispo and Stanford University's Space Systems
> Development Laboratory. All of the CubeSats set to launch this month were
> designed and built by students at various universities in the US and
> elsewhere in the world.
>
> Cornell University, Cal Poly, and the University of Arizona each will send
> two CubeSats into space. Other US schools participating in the mass
> CubeSat
> launch are the University of Illinois, the University of Kansas, Montana
> State University and the University of Hawaii. In addition, schools in
> Norway, S Korea and Japan have built CubeSats for this month's launch.
>
> One of the CubeSats, known as SEEDS, was built by students at the Nihon
> University in Japan. It contains a CW beacon, Digi-Talker and other
> experiments. The CW beacon will be on 437.485 MHz and use the call sign
> JQ1YGU. The Digi-Talker experiment will be activated later. All 13
> CubeSats
> will identify using Amateur Radio call signs.
>

> ==>VERMONT GOVERNOR SIGNS AMATEUR RADIO ANTENNA BILL
>
> Vermont Gov Jim Douglas has signed Amateur Radio antenna legislation that
> puts the language of the limited federal preemption known as PRB-1 into
> the
> Green Mountain State's statutes. Vermont is the 23rd state to adopt an
> Amateur Radio antenna law.
>
> "Today we reached a milestone in Vermont Amateur Radio history," exulted
> David Cain, W1DEC, on May 30. "PRB-1 is now officially codified into
> Vermont's statutes." Cain chaired the PRB-1 Committee and serves as
> Vermont
> ARRL State Government Liaison. "To all of you who worked so hard on this a
> hearty 'thank you' and 'well done!'"
>
> ARRL New England Division Vice Director Mike Raisbeck, K1TWF, offered his
> congratulations to all involved in seeing the bill through. "This is a
> major
> achievement for Vermont, the New England Division and the hobby," he said.
> The legislation, H.12, cleared Vermont's General Assembly on May 10.
>
> The new law requires local ordinances to comply with ?97.15(b) "by
> allowing
> for the erection of an Amateur Radio antenna or an Amateur Radio antenna
> support structure at a height and dimension sufficient to accommodate
> Amateur Radio Service communications."
>
> Cain notes that a PRB-1 bill has been in the General Assembly hopper in
> Vermont for more than three years. "Hard work and persistence paid off,"
> he
> said, noting that lawmakers "recognized the value of ham radio and the
> need
> for reasonable accommodation."
>
> Section 1 of the bill declares it Vermont policy "that Amateur Radio use
> and

> Amateur Radio antennas and support structures protect and promote the
> public
> interest by providing important communications support to both government
> and the public during times of emergency when other communications
> infrastructure is disabled or overburdened and by presenting the public
> with
> an opportunity for public service, self-training, communications and
> technical investigation."
>
> Language in the original Vermont antenna bill outlined a schedule of
> minimum
> regulatory heights, below which localities could not impose restrictions.
> That language did not survive the legislative process, however.
>
> The legislation that did pass also provides for the Department of Housing
> and Community Affairs (DHCA) to report to the House and Senate committees
> on
> government operations "concerning municipal permitting and siting of
> Amateur
> Radio antennas and Amateur Radio antenna structures and municipal
> compliance
> with state statutes."
>
> In developing its report, DHCA "shall consult with representatives" of
> Vermont's Amateur Radio community and include their recommendations and
> input in its report to the General Assembly.
>
> ==>SECOND GLOBAL AMATEUR RADIO EMERGENCY COMMUNICATIONS CONFERENCE SET
>
> ARRL First Vice President Kay Craigie, N3KN, will represent the League at
> the second Global Amateur Radio Emergency Communications (GAREC)
> Conference.
> GAREC 2006 will take place June 19-20 in Tampere, Finland, in parallel
> with
> the International Conference on Emergency Communications (ICEC 2006).
>
> "Many new experiences resulted from dramatic events over the past 12
> months,
> new lessons have been learned, and new concepts have been developed," said
> IARU International Coordinator for Emergency Communications Hans
> Zimmermann,
> F5VKP/HB9AQS.
>
> Continuing the work begun during GAREC 2005, this year's conference will
> consider the latest developments in the application of Amateur Radio to
> emergency communication and cooperation with institutional partners in
> emergency response and disaster relief, Zimmerman said. It will also
> review
> progress made on concepts developed during last year's conference and
> formulate additional proposals.

>
> Zimmerman noted that the concurrent ICEC 2006 will review the application
> and implementation of the Tampere Convention on the Provision of
> Telecommunication Resources for Disaster Mitigation and Relief Operations.
> "Holding the two events at the same time in the same location allows us to
> give high visibility to the important role of Amateur Radio in emergency
> communications," he said.
>
> ==>MONTENEGRO POISED TO BECOME NEWEST DXCC ENTITY
>
> The Republic of Montenegro, which declared its independence June 3, has
> applied for United Nations membership, according to The Daily DX
> <http://www.dailydx.com>. The move paves the way for the tiny Balkan
> nation
> to join the ARRL DXCC list.
>
> "Once Montenegro is accepted into the UN or obtains a call sign prefix
> block, DXers will have a new DXCC entity," says ARRL Membership Services
> Manager Wayne Mills, N7NG.
>
> The division of Serbia and Montenegro eliminates what remained of
> Yugoslavia. Serbia's parliament this week declared Serbia a sovereign
> nation
> as heir to the former Serbia-Montenegro union. Assuming that Serbia
> continues to hold its current seat in the UN, it will remain on the DXCC
> list as a pre-existing and continuing DXCC entity, Mills explained.
>
> A decision on whether to admit Montenegro into the UN must go before the
> UN
> Security Council and then to the UN General Assembly. A UN spokesperson
> could not say how long the process might take, The Daily DX said.
>
> ==>POTENTIAL THREAT TO AMATEUR BANDS IN UK CITED
>
> AMSAT-UK warns that proposals under consideration in the UK to provide
> wireless broadband in rural areas could pose a threat to Amateur Radio and
> Amateur-Satellite services there. A recently published report from
> telecoms
> regulator Ofcom
> <http://www.ofcom.org.uk/research/technology/overview/ese/exempt/>
> explores
> various options to bring broadband to countryside communities. One option
> calls for the use of wireless broadband. The systems would require high
> power to cover the large geographical areas involved, however. The Ofcom
> report proposes power levels of up to 80 W EIRP in the 2.4 GHz band and
> 200
> W EIRP in the 5 GHz band.
>
> "It is hard to see how amateurs would be able to continue using these
> frequencies when faced by the high levels of interference from the high

> power applications envisaged by this report," an AMSAT-UK spokesperson
> said.
>
> Ofcom notes that unlicensed broadband operators now may run 100 mW on 2.4
> GHz and 2 W EIRP on 5.8 GHz. Both bands have Amateur Radio allocations,
> and
> AMSAT-UK worries that the high power levels outlined in the report could
> cause serious interference to radio amateurs operating in those bands. The
> problem could be particularly severe on the 2400 to 2450 MHz band, used by
> "weak-signal" amateur satellites and amateur TV repeaters. The report
> makes
> no mention of Amateur Radio operation on the 2.4 GHz band.

Hello ... This is to all orginizations that will have fieldday operations I would like you to post on here were when what times and what stations you will have on air. The Bands you will be on and like packet were it will be vhf/uhf and the frq. you will be on ....Lets see if we can connect all the fieldday events togather via radio...

I plan on sending something to the TV Radio stations to get more people out to the events ..... 73 Don Meyer KB8ODB

Don,
In addition to the information on the web site I will be attempting to do a Packet Radio demonstration. Right now I am trying to figure out just what that means. The rules state:

7.3.10.2 A complete portable packet system may be included as one of the demonstration modes. This system must include a temporary, portable node and must be completely seperate from the existing packet infrastructure of your area......

The question I have is, "Does this mean that the station needs to be running JNOS, or MYSYS or something like that"? I'm not knowledgeable enough to know. I thought I would send a note to ARRL with my question, but perhaps someone on this relector has the answer and would be willing to share it with us.

"The only rule change in 2006 involves the GOTA ('Get On The Air') station bonus-point structure," says ARRL Contest Branch Manager Dan Henderson, N1ND. "An individual operator may earn a 50-point bonus for completing 50 QSOs at the GOTA station. They may earn an additional 50 bonus points when they reach 100 QSOs."

Henderson notes there's a 100-QSO cap for bonus points per individual GOTA operator, but additional GOTA operators may earn the bonuses for the club, up to a maximum of 500 GOTA bonus points.

"Additionally, Field Day operations can double their GOTA bonus points by having a designated GOTA Coach/Mentor supervise the station whenever it's on the air," Henderson notes. "The GOTA Coach/Mentor may talk the participants through the QSOs and serve as control operator, but GOTA participants must make and log all QSOs themselves."

This means that if a Field Day group has a GOTA Coach/Mentor, the 50 and 100-point bonuses GOTA operators earn will double to 100 and 200 points respectively, while the maximum GOTA bonus increases to 1000 points.

ARRL Field Day 2006 will be Saturday and Sunday, June 24-25.

"The existing packet infrastructure" may mean connections to permanent APRS stations or Digi station networks, but then what would you be demonstrating? I did a Google search and didn't find anything more descriptive.

I think it means it can't be connected to a phone line, wireless internet, or an ethernet port.

That statement is what we might need to define a little better, because it is somewhat unclear. Does anyone else have an interperetation?

Andrew

Tom,
I'm not as familiar with packet as most - I've never set up or configured a station. The way I was reading it, though, I was under the impression that it just needed to be named differently from your everyday station - like w8zho-fd06, or something along those lines. I was guessing that re-naming the station would demonstrate the ability to have traffic routed to/from a station that's not normally on the local packet "network" (if that's the right term). Just my considerably un-educated thoughts.

"The existing packet infrastructure" may mean connections to permanent APRS stations or Digi station networks, but then what would you be demonstrating? I did a Google search and didn't find anything more descriptive.

I think it means it can't be connected to a phone line, wireless internet, or an ethernet port.

That statement is what we might need to define a little better, because it is somewhat unclear. Does anyone else have an interperetation?

Andrew

Don,
In addition to the information on the web site I will be attempting to do a Packet Radio demonstration. Right now I am trying to figure out just what that means. The rules state:

7.3.10.2 A complete portable packet system may be included as one of
the demonstration modes. This system must include a temporary, portable node
and must be completely seperate from the existing packet infrastructure of
your area......

The question I have is, "Does this mean that the station needs to be
running JNOS, or MYSYS or something like that"? I'm not knowledgeable enough
to know. I thought I would send a note to ARRL with my question, but perhaps
someone on this relector has the answer and would be willing to share it
with us.

In the name of all of those that have Multiple Sclerosis (MS) and the National Multiple Sclerosis Society volunteers, I would like to thank all of the hams that participated in the Grand Rapids MS 150 Bike Tour. It was two long days and our work was very much appreciated by all. The HAMS put in over 400 hours of volunteer service. There were over 700 riders.

The following volunteers participated:

K8WLK, Bill, Holland

N8KAL, Kim, Georgetown

K8JIM, Jim, Allendale

W8TML, Tom, Rothbury

KC8TKH Dick, Grand Rapids

K8TVZ, Laryn, Holland

K8MHZ, Mark, Muskegon

N8CTT, Denny, Muskegon

KC8KML, Fitz, Grand Haven

NV8A, Alan, Zeeland

KC8ZCO, Jon, Zeeland

WB9JSR, John, Port Sheldon

There were also 3 or 4 other hams from out of the area that helped out. I did not catch their calls or names.

A very good effort was put in by hams from at least 6 counties.

73

John WB9JSR

813. Hams STILL needed for National 24 Hour Challenge, Saturday, June 17

Come on those of you that truly believe in the public service aspect of Amateur Radio.
Time is getting way too close, I need to hear from you.
Ham radio has been the method of communications for this event for over 20 years. Let's not let them down now!
Still need communications for the course follow vehicule 11AM-6PM. (vehicule and driver supplied)
And a second communications person for check point 3, Delton Library. 12Noon-3:35PM

```````````````

To all Amateur Radio Operators

The National 24 Hour Challenge (N24HC) http://www.n24hc.org is a 126 1/2 mile bicycle route through Barry County that takes place on the Saturday before Fathers Day that attracts about
500 riders plus their support crews. Amateur Radio communications is an important part of the logistics of this annual event taking place this year on June 17.
As I type this, the following communications positions are in need of volunteers:
Still need communications for the course follow vehicule 11AM-6PM. (vehicule and driver supplied)
And a second communications person for check point 3, Delton Library. 12Noon-3:35PM

The event coordinators provide shirts, limited refreshments, and Friday evening spaghetti dinner. Please contact the Ham Radio Communications Director if you are willing to help.
Jack Amelar NY8D
mailto:jamelar@...?subject=N24HC
Phone evening (616)897-6885, days (616)493-8736

HMMM - I (we?) have some preparation to do in the next week...
I'd like to coffee with YQD, DEI, YJT, and PCJ, (maybe others?) together in the next few days to set a mini-plan.

The satellite hunt sounds good, should I bring the FT-847 for the attempt?
Don tells me he has some great bird-hunting software to demo.

The packet (digital) sounds good, does this mean linking the neighborhood on a fresh frequency for the event?
If it makes sense, should I perhaps set up a cross-port node into a hamgate?

How about coffee Monday evening 7:30 at Coffee Grounds (downtown GH)?

Hello Everyone ?.. The police chief for Ferrysburg/Spring Lake contacted me that he is concerned with traffic leaving the fireworks tonight . This being the first time for fireworks for the Heritage Festival he asked if we would have hams available in case there was a need. So with this in mind we have set Ferry Park on Pine St by the ramp to Grand Haven as a place to meet and watch the fireworks from and be available if needed for traffic control. If you are in Spring Lake for the fireworks let me or John know on the 145.49 repeater or want to join us to watch the fireworks incase there is a need it would be appreciated.
There is no need to respond by email please just come and show up ?.. 73 Don Meyer KB8ODB

(http://www.contesting.com/forums/post/Articles/L701)
While you are making reservations at the Crowne Plaza in Dayton check out:

http://www.contestuniversity.com

We are getting enough interest that it looks like we will be 100% ready to go for a full day of ConTest University ("CTU") 2007 to be held the Thursday of Dayton week at the Crowne Plaza. The CTU fee is all inclusive of all materials as well as breakfast and lunch, so everything is provided for. If we are able to cut a better deal on food prices with the hotel or obtain additional corporate sponsors, we will reduce the final cost. This is a break-even not-for-profit program.

If you are planning on coming to CTU, please fill out the interest form on the web site as soon as possible and then make your Crowne Plaza reservation for Wednesday night as well. This will be a very good event with coordination help from PVRC and their very successful 2005 Contest Seminar. Watch the website for continued updates about the instructors, course content and the schedule/outline.

Please pass this email to club reflectors, newsletters, etc.

Thanks to KA9FOX and QTH.com for hosting our website!

826. Countdown to Field Day!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-06-18 16:29:45 UTC
From: Linda Rosenthal
Topic: 826 Message: 826

Hello, hams:

The radio marathon known as Field Day is getting closer by every tick of the clock!

Come to lovely Fruitland Township park near Duck Lake and join us on Friday as we set up. We'll have a small potluck on Friday evening as we create our Field Day community in the park. We have batted around the idea of a very informal mini-swap on this day, so if you have something to bring out and you like the idea, maybe you'll sell something.

Return to the park on Saturday beginning at 2 p.m. local time and help our shack managers operate in the most anticipated annual event of the amateur radio calendar. OR, show up with a friend, young or elder, and Get on the Air at our GOTA station. Have a look at our packet, satellite, and amateur television demonstrations. Friendly folks will heartily welcome your visits to our site.

Saturday evening will find our group communing for another potluck, but don't bring an entree, we will have grilled chicken for you.

Look forward to seeing everyone,
Linda, AB8QH
Co-Chair, MAARC Field Day Committee
Go W8ZHO!

830. Would I be out of line ... ?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-06-19 00:49:51 UTC
From: Don Meyer - KB8ODB
Topic: 830 Message: 830

Hello Everyone . I have a question for the hams here on the reflector and that is do you think it would be wrong for me to ask for help (as friends not organizations)on a personal benefit my family is putting on to help out my nephew who is 30 years old fighting leukemia. This event is going to be in the near future and there will be a need for security in just eyes and ears not enforcing just people to watch over "the what I hope will be a crowd" and I will have someone to call to handle problems.
On this same note I would like to let everyone know at this time my family is going through some trying times and if sometimes I seem short with you I normally am not that way and I still try not to be, but I do have a lot on my mind at this time and I hope everyone will stick with me through this ..

I think asking for help from fellow hams is not an issue. From the sounds of the event, I think it is up to each ham to decide if they would be willing to help. Please get ahold of me as I would like a little more detail which would be better said in personal contact rather then on the reflector.

I like the idea of a mini swap. What time are we meeting Friday?
----- Original Message -----

Subject: [WestMichiganHams] Countdown to Field Day!

Hello, hams:

The radio marathon known as Field Day is getting closer by every tick of the clock!

Come to lovely Fruitland Township park near Duck Lake and join us on Friday as we set up. We'll have a small potluck on Friday evening as we create our Field Day community in the park. We have batted around the idea of a very informal mini-swap on this day, so if you have something to bring out and you like the idea, maybe you'll sell something.

Return to the park on Saturday beginning at 2 p.m. local time and help our shack managers operate in the most anticipated annual event of the amateur radio calendar. OR, show up with a friend, young or elder, and Get on the Air at our GOTA station. Have a look at our packet, satellite, and amateur television demonstrations. Friendly folks will heartily welcome your visits to our site.

Saturday evening will find our group communing for another potluck, but don't bring an entree, we will have grilled chicken for you.

Look forward to seeing everyone,
Linda, AB8QH
Co-Chair, MAARC Field Day Committee
Go W8ZHO!

Per ARRL rules, we can't start set up until 1800 UTC on Friday. There is no specific time for folks to gather on Friday. (The potluck will likely start between 5 p.m. and 6 p.m.. Jean, KC8WSE, is giving a mini-seminar on the NTS system, including how to write those important radiograms for Field Day points, after the evening meal.) The Friday mini-swap would be very, very casual and probably ongoing from the time that we begin set up until folks wander off for the evening. I'm picturing the swap happening as a tailgate sort of thing and limited to Friday afternoon/evening. It's first time for this, so we'll see how it goes...

73,
Linda

From: Hank Greeb
Topic: 837 Message: 837

Sorry if this is a repeat of a previous announcement. I just found out about this reflector a few daze ago. I don't see the announcement of the Grand Rapids ARA Field Day operation.

Anyway, W8DC (Grand Rapids ARA) will be operating Field Day this coming weekend at the farm owned by John, K8IHY, 1840 Byron Rd, Hudsonville, MI 49426. Setup will begin about 10 a.m. Saturday. All are welcome to visit, and we'll make room for visitors to operate. We hope to have 3 rigs plus a GOTA station.

There will be an ATV station on premise - see you on the Grand Rapids ATV repeater!

Per ARRL rules, we can't start set up until 1800 UTC on Friday. There is no specific time for folks to gather on Friday. (The potluck will likely start between 5 p.m. and 6 p.m.. Jean, KC8WSE, is giving a mini-seminar on the NTS system, including how to write those important radiograms for Field Day points, after the evening meal.) The Friday mini-swap would be very, very casual and probably ongoing from the time that we begin set up until folks wander off for the evening. I'm picturing the swap happening as a tailgate sort of thing and limited to Friday afternoon/evening. It's first time for this, so we'll see how it goes...

73,
Linda

Hello, hams:

The radio marathon known as Field Day is getting closer by every tick of the
clock!

Come to lovely Fruitland Township park near Duck Lake and join us on Friday
as we set up. We'll have a small potluck on Friday evening as we create our
Field Day community in the park. We have batted around the idea of a very

informal mini-swap on this day, so if you have something to bring out and
you like the idea, maybe you'll sell something.

Return to the park on Saturday beginning at 2 p.m. local time and help our
shack managers operate in the most anticipated annual event of the amateur
radio calendar. OR, show up with a friend, young or elder, and Get on the
Air at our GOTA station. Have a look at our packet, satellite, and amateur
television demonstrations. Friendly folks will heartily welcome your visits
to our site.

Saturday evening will find our group communing for another potluck, but
don't bring an entree, we will have grilled chicken for you.

Look forward to seeing everyone,
Linda, AB8QH
Co-Chair, MAARC Field Day Committee
Go W8ZHO!

You are always welcome to join us, Andrew. However, being Field Day, we may need to hold you there to protect our "strategy." Not a total loss - we'll keep you as a "hostage" at one of our stations. Already being acclimated to the 3rd shift hours, you and I should have an operating edge for the early morning operations. :-)

All,
I need help. I am mystified by the different types of packet operations and esoteric terminology that I have encountered recently. I have put together the attached spreadsheet in an attempt to get a picture in my mind as to the various types of operations and the kinds of services that are being offered in the Muskegon area. I am currently working with an abreviated copy of the JNOS Operator's Manual (thanks to K8RRA) but still need some clarification. If you are the operator of one or more of the attached stations please provide feedback to fill in spaces or to provide suggestions for additions (for example, I recently added a column to seperate out the KA and Net/Rom Nodes as different kinds of operations). If you have any such additions please let me know.

Hi Don,

Glad you have your packet station on line.

I have the hamgate.ottawa.ampr.org on line (wa8rsa-1) and able to pass ampr.org and callsign.#swmi.mi.usa.noam messages.

I'm not passing internet email because of all the spam.

Don, I have you setup in the users file but if you know of any club that's wants to pass messages his field would you let me know their call and name and I'll add them. I also have my station setup on HF packet 14.105 and do not run an open system because of the HF.

Catch you on packet.

Here something for the 20m shack on field day from ARRL

Antarctica's KC4AAA to be on the air for Field Day (Jun 16, 2006) -- KC4AAA at Amundsen-Scott South Pole Station, Antarctica, has announced plans to participate in ARRL Field Day 2006. The station's Satellite Communications Technician Robert Reynolds, N0QFQ, will head up the effort. Operations from KC4AAA will commence at 1800 UTC on June 24 and continue through 2100 UTC on June 25. Experience has shown that best opportunity for North and South American stations to contact KC4AAA appears around 2300 UTC on the Eastern Seaboard, moving westward with time until the window closes around 0400 UTC. Given South Pole's location right under the auroral oval, propagation can make South Pole intercontinental HF radio communications a challenge, so listen carefully! The primary operating frequency will be on or about 14.243 MHz. KC4AAA operators will monitor and exploit other bands, but 20 meter SSB will be the primary operating mode. South Pole will operate as a "home" station with supplied power (Class 1D). Reynolds plans to have a team of up to 10 operators staffing the station, most of whom are in a ham radio licensing class at the station. KC4AAA will be running 1 kW and will mainly use a pair of log-periodic antennas aimed toward the US. KC4AAA plans to upload its Field Day log to Logbook of The World (LoTW). QSL cards will be sent later in the year. For more information, contact Nick Powell, NH6ON

Interesting Don,

I'm out there...
See the AX.25 beacon for k8rra.
Also: k8rra is not listed in HOSTS.NET yet.

I'm interested in whatever you find that does NOT work here on k8rra
node.
Be prepared that SMTP does not support internet interconnect yet - soon
though.

A few minutes ago when I tried your station seems to:

* beacon.
* support AX.25 "connect" to kb8odb-4.
* be a NOS version (I don't recognize)

But when I tried your station seems not to:

* respond to ping 44.102.132.21.
* respond after connect (session went into limbo?)
* be heard by my TCP/IP and be listed in the "IHeard" table.

Are you doing any IP activity or just AX.25 stuff?

Activity in general seems to be picking up in this area.
My "Jheard" list after 3 days is larger than one screen full (and it
does not paginate - boo).

sounds like you guys are ahead of me a bit. Nos box here allows rf
connects (will move it over to a taller antenna soon)
but I am still having getting the internet part working. (maybe tommorow.)

I see that my public IP can be pinged, and I can ping other boxes from here. However the ampr IP address does not want to respond.

I was hoping to have things up and running by FD, but am not sure that will happen.

I will look forward to seeing RSA and RRA at the DRG meeting.

Tom can you put this out to everyone.

Please pass this along to anyone who may be interested or post at your place of work.

Ham in a day!

Get your Amateur Radio License in just one day!

Sponsored by the:

Kent County Radio Amateur Civil Emergency Service

No Techno-Babble needed, this class is for anyone who wants their amateur radio license

Date: Sunday July 23rd 2006

Cost: 30.00 Includes the 14.00 FCC license Fee

Location: Red Cross 1050 Fuller Ave NE

Pre-Registration is required to reserve a spot in the class

Time: 1:00 PM - 7:00 PM

Testing will start at 6:00 PM

To register e-mail jeffnawrot@... or call 616-889-7101

Under 16 must be accompanied by an adult!

Bring either drivers license or 2 pieces of identification

Coffee and Treats will be provided! Dress comfortably!

From: Deater, Tim
Topic: 860 Message: 860

I want to connect both a VHF omni and a VHF yagi antenna to my radio at home. Can I just use a splitter and connect both antennas, or do I need to use a switch or something and select the antenna?

You will need a switch. being one will more than would be out of phase, ,just for starters, you will lose what you are trying to gain. You can get a switch for about $13.00 and up. Would be well worth the investment. I am using 4 positions on a 6 position switch I have. I am switching between a , yagi, j-pole, indoor ground plane and dummy load. When I get the cross yagi in the air I will use another position on the switch.

Hope this helps.

Thank you for your encouraging comments. We enjoy having the visitors - questions and all. We all (regardless of which club) look forward to FD each year when we can spend time together doing one of the things we like best (besides eating): "playing" radio! From HF voice and CW, to satellite and packet, to TTY and ATV - and don't forget W8CSO's Sterba Curtain! (Thanks for the "seminar" at breakfast, Lou!)... there's always something of interest for everyone. My thanks to all for sharing your expertise, experimentation, and enthusiasm - another year of wonderful Field Day memories.

Paul,

Isn't Field Day amazing? You will find similar experiences at just about any Field Day site that you would visit accross the United States and Canada. Two clubs you can visit next year is NOARC (North Ottawa ARC) in the Grand Haven area and HARC (Holland ARC). Both put in good efforts.

There was a major problem with Field Day this year. The weather was perfect - no sweltering heat, enough wind to discourage most biting insects, but not too much to blow down temporary antennae, just the tiniest amount of light sprinkles toward the end of the event on Sunday. :)

And, band conditions were great! 40 stayed open all night, 20 was open most of the time, QRN was moderate, even on 80/75.... Tropo was even up on 440 - a contact was made on ATV across Lake Michigan, using a moderate antenna at the Field Day site! 6 metres had a few sporadic E openings!

Oh, well, in spite of all the great conditions, we @ W8DC still managed to have a great time, and went away tired but happy!

874. Contesting Seminar?

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-06-27 13:33:51 UTC
From: Bill
Topic: 874 Message: 874

All:

Field Day is such a great event with so many facets. There is the fun, food, friends, radio, computers, experimenting, new modes, and the like.

A real big part is the contesting aspect. I am wondering if there is any interest in having some type of instruction in contesting in general and maybe contesting in the Field Day contest. I saw and heard lots of great operators and we enjoyed QSOs in varying success. Does anyone want to learn a bit more?

There is the option of a pre Field Day lesson in the exchange, search & pounce, logging, running a frequency, logging, staying on the radio, and similar subjects. There is also the possibility that a core of folks could begin a contesting group to enjoy the many contests throughout the year. These folks could work on their contesting skills and make some suggestions throughout the year.

Contesting is an interesting part of ham radio. I use contests to fill the log with interesting DX. You might find the furious pace interesting and even consider this form of entertainment as the original multi player game. Everyone can participate with a station of any configuration. It is fun!

So, what say you?

Bill, AB8SC

A contesting seminar would be fine. But, instead of Field Day, which is designed more as an emergency operation, how about setting it up a few months prior to a contest, for example, the November Sweepstakes, or the Michigan QSO Party in April?

I just loved it on Field day when folks would use locations as their phonetics, like when one station ended in NNY. He used "Northern New York" as his phonetics. Confusing. We decided we could start using "Washington 8 California Saskatchewan Oregon" but decided it might be too frustrating and cause someone's head to explode.

Subject: Re: [WestMichiganHams] Contesting Seminar?

Bill,

The idea of some training for contesting is great! The first lesson we need to teach is that 59 is NOT a signal report. It is an ARRL numbered radiogram for "Congratulations on your new arrival, hope mother and child are well". ;)

Lesson 2: Listen, listen, listen.

Lesson 3: Use standard phonetics. While I thought "Zipper Half Open" was hilarious, others may not and still others may not be able to understand it, especially if English is their second language. Spending some time working DX should make my point a bit better, as the use of creative phonetics by others makes for some very hard to understand call signs. For instance a popular phonetic for the letter 'A' is 'Hahmoddica'. For 'Z' it is 'Sohnseebah'.

Seriously, I think a session for contest training is a super idea.

I disagree that the signal report is NOT 59(9) in a contest nor remote or exotic DX.

Those guys seriously contesting or working the world want to pass the exchange as fast as possible and to as many stations as possible. They don't want to mess around with an "honest" 43 or 38. It just does not happen. Contrary to some opinion, the QSO is complete when each station agrees on the band, mode, call sign, date, and time. The signal report is not in the equation. You might have just spent some big bucks calibrating your S meter but when you mess around with some of the features on the rig the S meter begins to return funny data. In a contest (and FD is not a good example because the exchange does not include a signal report) the exchange is always 59(9) and often times the DX will fake in the other parts of the exchange, for example the CQ or ITU zone. They just don't have the time.

So, save the honest S meter readings for a rag chew and eschew the dramatics when contesting.

All
Pass this on to all. Thanks Tom

After a short break due to conflicts with other nearby swaps, Holland Amateur Radio Club's next **FREE** mini-swap takes place this coming Saturday. Each month our mini-swap just keeps getting better and better!

Bring all your surplus items, come join us at our new Technology and Training building in downtown Holland. Family and friends always welcome to join in for a fun day of fellowship.

Parking available.

Start / set up times. (Friday night prior a limited opportunity exists between 19h00 - 20h30.)

DATE: SAT JULY 1st 2006 (Talk in : 147.060 94.8pl)

SET UP TIME: SAT 09H30 - 10h00

SWAP TIME: SAT 10h00 to 2.00pm

VENUE: 280 East 8th Street, Holland.

ENTRY FEE : **FREE**!

TABLE COST : **FREE**

HARC will provide once again....

* FREE table space
* FREE trunk swap parking space (weather permitting)
* FREE parking
* FREE entry
* FREE coffee
* 50/50 Draw

(To offset our new buildings upkeep, donations from sellers /visitors would however be very much appreciated!)

Bring what ever surplus radio / computer equipment to sell / swap. Last months a LOT of equipment changed hands!

We look forward to seeing everyone there.

ANY QUESTIONS:
Please contact Ken ZR5AAD/W8
Cell Ph: (616)726-3929

888. Packet Radio Parameter Settings

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-06-29 03:10:16 UTC
From: jtporritt@netscape.com
Topic: 888 Message: 888

All,
Recently I have been doing some reading about the timing for controlling packet radio when a frequency is being used by multiple stations. I have found several articles with varing recommendations for various assumptions about the operating environment. The considerations are different for APRS, being connected through a node, or digi operation. I have seen the recommendation to do "what the local people do." It seems that to get most efficient throughput there needs to be cooperation among local users. The following parameters are set to control the timing of packet radio communications. I have also listed the defaults for my KPC9612.

Frack - Increment retry with a default of 4
Dwait - Wait from last packet heard with a default of 0
Maxframes - Maximum unacknowledged packets default of 4
Persist - Described as probablity of accessing frequency with a default of 63
Slottime - Sets the time between successive tries of the persist algorithm with a default of 10

My understanding is that persist and slottime are most applicable in the digi mode. The most recent recommendation in the material I have read indicates that persist should be set to 255 and slottime to 0.

Here are two Referecnce in addition to my TNC's manual:
1. Developed by the Ventura County ARES AREA 6 Training Group HTML Version Last Revised Wednesday, October 27th, 1999 by K6NE

2. INTRODUCTION TO PACKET RADIO - by Larry Kenney, WB9LOZ

The question is "what is being used locally (West Michigan) for these parameters?" And "are there any other considerations?"

Tom, N8YJT

For instance a popular phonetic for the letter 'A' is 'Hahmoddica'. For 'Z' it is 'Sohnseebah'.

It is three o'clock, local, in the morning and you are running a frequency. Things are a little slow this morning and the stations calling are getting fewer and fewer. It is Field Day so the folks in your "audience" are domestic radio stations. You are literally begging for contacts so you get a little silly and use the Zipper Half Open phonetics.

Where is the harm? If you can get just one more person to reply to your plaintiff call for anyone to respond then the ploy worked. I would not try this trick in a DX contest as it will surely be misunderstood by folks who only know a little English.

In a pile-up on a DX station I will sometimes try to substitute the "DX phonetics" for the standard ones. For example, the pile-up is huge on Easter Island. Tons of Ws and Ks are in there. My call, AB8 Sierra Charlie is just another call. But I substitute Canada for the last letter. Now the DX "hears" another country. Does it work? I've got the QSL in my collection. Probably it was more luck, but hey, superstitions are really difficult to disprove and mom's little tips and hints are equally magical.

My purpose is not to be difficult but to present an alternative. Lots of wife's (that doesn't "look" right) (should it be wives?) tales with little fact. The pile-up problem is so fluid and difficult. And after an hour of calling you get to the point of trying Anything. Or you begin plotting for that hundred feet of tower and monster beam. Hi

I'm also using a kpc9612 in KISS mode and driven by jnos2.0d at this
time.
What I don't know are those parameters that are set in "terminal" mode
and remain effective in "KISS" mode, vs. those which are over-ridden by
jnos.
I hope to find out...

Taking your leadership - I have created a spreadsheet to show yours and
mine - it is attached.
In the future I will add any other station data that responds to your
posting and re-post the modified spreadsheet.

>

I have run with persist = 255 and slottime = 1 until recently (prior to
Field day).
I can not say these two parms caused "recovery" mode quite often, but I
am looking for a configuration to avoid "recovery" on 145.070.

>

As part of this work you are doing, I would really like any feedback
relative to my node's ability to have long QSO's without glitches.
If I need to change the configuration to improve usage, I will need to
discover what works better...

Thanks for taking the lead Tom.
Have you found a good way to measure "reliability" or "effectiveness"?

Skip,
Thank you for getting into the spirit of my inquiry.
Tom

Netscape. Just the Net You Need.

896. Field Day is a pleasant memory - check out ARRL's soapbox

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-06-27 12:54:34 UTC
From: Linda Rosenthal
Topic: 896 Message: 896

Thanks, all, for making Field Day a great success. Our hard work paid off and we appreciate each and every one of you for your efforts! If you want to see how others did it, too, check out this link to ARRL's soapbox:

http://www.arrl.org/contests/soapbox/?con_id=106

I believe that K8MHZ's photo from 2005 Field Day wound up on the cover of the QST magazine because of a submission to the soapbox. I haven't looked at every single page yet for this year, but I'm sure some of our great moments from 2006 will be posted there sooner or later.

73 and thanks again for a wonderful memory,
Linda, AB8QH, 2006 MAARC Field Day chair

897. ARES E-Letter for June 21, 2006

Subject: [WestMichiganHams] Great CW Emergency Comm Story!

This is a cool story about a hiking accident and a CW aided 'rescue'.

> ==>AMATEUR RADIO VOLUNTEERS READY IN WESTERN STATES AS FIRE THREAT
> CONTINUES
>
> Fire season is in full swing in several states in the Western US, and
> Amateur Radio volunteers have been helping to provide communication for

> the
> American Red Cross and The Salvation Army. Fires have forced evacuations
> in
> several areas.
>
> At week's end, Arizona ARRL Section Emergency Coordinator Rick Aldom,
> W7STS,
> said ARES teams were gearing up to activate in case the Brins Fire,
> burning
> in timber two miles northeast of Sedona, got out of hand over the weekend.
> Given the heavy HF activity expected for Field Day, Aldom requested that
> radio amateurs steer clear of the ARES net frequencies of 7248 kHz and
> 3992
> kHz and The Salvation Army Team Emergency Radio Network (SATERN) frequency
> of 3977.7 kHz, on the outside chance they'll be needed for fire-related
> emergency traffic. Aldom anticipates that most emergency communication
> would
> take place on VHF and UHF repeaters, however.
>
> "The American Red Cross invited ARES volunteers to provide back-up for
> their
> communication systems," Aldom told ARRL June 23. "Emergency Coordinators
> in
> Flagstaff and Yavapai County report ham radio volunteers are supporting
> two
> evacuation centers." He said ARES also is available to provide
> communication
> between the state emergency operations center and the two shelters, as
> needed.
>
> Additional ARES involvement depends on how the fire behaves, Aldom said,
> noting that firefighters made "significant progress" in battling the blaze
> June 23, and "things are looking very good." The weather also cooperated.
>
> "Two things happened," Aldom said. "We had an influx of moisture last
> night
> in the middle levels, which I think helped on the ground, and the winds
> were
> much calmer than they might have been."
>
> Should additional evacuations become necessary, ARES volunteers may be
> called in to help livestock rescue crews. As of June 23, about a dozen
> ARES
> volunteers were assisting in the Arizona wildfire response. Aldom also has
> two portable repeaters on standby in case they're needed.
>
> By late June 22, the Brins Fire had burned some 3260 acres and was 15
> percent contained. Evacuation orders remained for Oak Creek Canyon and two
> subdivisions north of Sedona. State Route 89A was closed, and power to the
> region was cut. The fire also was generating considerable smoke in the

> region, causing a health and visibility hazard.
>
> A statewide fire emergency continues throughout New Mexico. On June 19,
> the
> Bear Fire in the Bearwallow Mountain area of Catron County prompted
> authorities to evacuate residents and campers in the vicinity to two Red
> Cross shelters. New Mexico ARRL Section Emergency Coordinator Rick Sohl,
> K5RIC, has been coordinating Amateur Radio volunteer assistance for Grant
> and Catron counties. Russell Stanley, KD5RWX, and Grant County ARRL
> Emergency Coordinator Tom Meyer, N4CYV, were reported active on UHF to
> provide any needed communication support.
>
> "This looks to be a very active fire season," Sohl observed. "ARES groups
> need to be ready in the event of a major fire." ARES volunteers have been
> working overtime in June to support local emergency managers after several
> wildfires broke out across the state -- some of them ignited by lightning.
>
> As of June 23, the Bear Fire had spread over more than 44,800 acres and
> was
> only 5 percent contained. Sixty structures along Willow Creek were said to
> be imminently threatened. The fire has crossed into the wilderness, and
> accumulations of extremely dry fuels in the southern and western portions
> of
> the fire are hampering containment.
>
> Over the June 17-18 weekend, the Skates Fire prompted precautionary
> evacuations in the Lake Roberts area, and ARES volunteers provided
> communication for a shelter. Residents have since been allowed to return
> home. No homes were lost.
>
> ARES volunteers assisted the Red Cross after two fires broke out earlier
> this month in the Bosque south of Albuquerque.
>
> Colorado SEC Rob Roller, N7LV, reports the Colorado Disaster Response Team
> (DRT) stood down this week after providing communication support for The
> Salvation Army in the wake of the Mato Vega fire near Fort Garland. DRT
> Emergency Coordinator Wes Wilson, K0HBZ, provided communication support
> for
> The Salvation Army back to its Denver Headquarters using Winlink for
> digital
> e-mail communication.
>
> At more than 13,100 acres and 35 percent contained as of June 23, the
> fire,
> 12 miles northeast of Fort Garland, prompted the evacuation of 280 homes
> in
> three communities. US Route 160 remained closed.
>
> So far in 2006, wildfires have burned more than 3.1 million acres
> nationwide. Long-range forecasts offer little hope for relief from the

> extreme fire danger in the Southwest and the Amateur Radio operators who
> volunteer when called. -- NM PIO Charlie Christman, K5CEC, contributed
> information for this report
>
> ==>FCC TO SEEK COMMENTS ON KATRINA PANEL RECOMMENDATIONS
>
> The FCC will invite public comments in response to recommendations
> presented
> this month by the Independent Panel Reviewing the Impact of Hurricane
> Katrina on Communications Networks. A Notice of Proposed Rule Making
> (NPRM)
> <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-06-83A1.pdf> in EB
> Docket 06-119, released this week, contains wide-ranging proposals and
> considerations that could involve FCC rule or administrative changes, a
> few
> of which deal with the Amateur Service.
>
> "The devastation of Hurricane Katrina highlighted the importance of
> telecommunications and media to our daily lives, and our dependency on our
> national communications infrastructure," remarked FCC Chairman Kevin J.
> Martin. "With this Notice of Proposed Rulemaking, we are asking for
> comments
> and suggestions from the public on how to best address and implement the
> Independent Panel's recommendations."
>
> The Independent Panel's report points out that Amateur Radio stations were
> among those segments of the communications infrastructure adversely
> affected
> by Hurricane Katrina.
>
> "Equipment was damaged or lost due to the storm, and trained amateurs were
> difficult to find in the immediate aftermath," the report said. "However,
> once called into help, Amateur Radio operators volunteered to support many
> agencies, such as FEMA, the National Weather Service, Hurricane Watch
> [Net]
> and the American Red Cross."
>
> The Independent Panel report said Amateur Radio volunteers provided
> communication in many locations where no other means of communicating
> existed. Hams also provided other technical aid to communities affected by
> Hurricane Katrina, the report added. The panel recommended adopting "a
> proactive (rather than reactive) program for network reliability and
> resiliency."
>
> ARRL Alabama Section Manager Greg Sarratt, W4OZK, addressed the
> Independent
> Panel on March 7 to note that Amateur Radio volunteers "were part of the
> solution" in supplementing normal emergency communication systems taken
> out
> by the storm. For 37 days following Hurricane Katrina, Sarratt headed the

> volunteer effort to process Amateur Radio volunteers headed to the Gulf
> Coast to assist recovery operations.
>
> In its NPRM, the FCC asked if should explore amending its rules to permit
> automatic grants of certain types of waivers or special temporary
> authority
> (STA) in declared disaster areas. "As a condition of the waiver or STA,
> the
> FCC could require verbal or written notification to the Commission staff
> contemporaneously with activation or promptly after the fact," the NPRM
> suggested. Following last year's devastating hurricanes, the FCC issued a
> handful of STAs to permit licensees lacking HF privileges to operate on HF
> for emergency purposes. The NPRM offered these specific areas for
> consideration.
>
> * Waiver of Amateur Radio and license-exempt rules, permitting
> transmissions
> necessary to meet essential communications needs.
>
> * Waiver of application filing deadlines, something the FCC did last fall
> for amateurs who lived in hurricane-stricken states.
>
> * Streamlined STA process, so parties in the affected area may simply
> notify
> the FCC in writing or orally of a need to operate in order to restore
> service.
>
> Comments will be due 30 days from the date the NPRM is published in the
> Federal Register and may be filed via the FCC's Electronic Comment Filing
> System (ECFS) <http://www.fcc.gov/cgb/ecfs/>.
>
> ==>NEW JERSEY, MICHIGAN KIDS GET A TURN AT HAM RADIO'S "MICROPHONE TO
> SPACE"
>
> Youngsters in New Jersey and Michigan recently had a chance to learn
> firsthand about life in space when they spoke via ham radio with astronaut
> Jeff Williams, KD5TVQ, aboard the International Space Station. Both
> contacts
> were arranged by the Amateur Radio on the International Space Station
> (ARISS) program. Using the ARISS station NA1SS, Williams chatted June 5
> with
> pupils at Salt Brook Elementary School in New Providence, New Jersey, and
> June 6 with students at Scarlett Middle School in Ann Arbor, Michigan.
>
> All of the Salt Brook students who participated in the contact between
> N2XJ
> and NA1SS are members of the Salt Brook Statics, a ham radio club at the
> school mentored by the New Providence Amateur Radio Club. One sixth grader
> wanted to know if Williams felt as if he were moving in space during his
> recent spacewalk. Williams answered that when he looked around and saw

> Earth
> far below him, it did indeed feel like he was moving.
>
> The New Providence Amateur Radio Club set up and operated the ground
> station
> at the school for the approximately 10-minute contact, originally
> scheduled
> for May 31 but postponed due to technical difficulties. Nick Esposito,
> KC2ONP, a seventh grader at New Providence Middle School, served as the
> control operator.
>
> An audience of some 600 fellow students, parents, faculty, dignitaries and
> news media packed the school's auditorium for the contact. Another 300
> students at Liberty Middle School in W Orange listened in. ARRL Northern
> New
> Jersey Section Manager Bill Hudzik, W2UDT, represented ARRL.
>
> The following day, students at Scarlett Middle School in Ann Arbor,
> Michigan, had their chance to speak with Williams via ham radio.
> Responding
> to one youngster's question, "Why did you decide to go into space?" the
> astronaut said he wanted to serve his country and humankind.
>
> "Really, the history of humankind is the history of exploration," Williams
> told the middle schoolers. "And that's what we're doing here: Exploring
> the
> unknown."
>
> Replying to another question about the risks involved with space travel,
> Williams said, "There's quite a bit of risk involved with going into space
> and being in space - and returning home." Understanding the risks and how
> to
> minimize them is part of an astronaut's training, he explained.
>
> His two favorite things about living aboard the ISS are weightlessness
> "and
> all the things weightlessness allows you to do" as well as looking at
> Earth
> from 220 miles above.
>
> Wearing T-shirts illustrating the space station and commemorating the
> ARISS
> contact, 21 youngsters from science teacher Jon Strempek's class prepared
> and asked the questions. Ignacy Justyna, N0EFT, served as the control
> operator.
>
> In the audience was a staff member from US Rep John Dingell's office as
> well
> as NASA Aerospace Education Specialist Jim Fitzgerald, a reporter and a
> photographer from the Ann Arbor News, administration, faculty and parents.

>
> ARISS is a nine-nation educational outreach with US participation by ARRL,
> AMSAT and NASA.
>
> ==>LEAGUE ASKS FCC TO PROTECT 902-928 MHZ OPERATIONS
>
> The ARRL has asked the FCC to avoid making any changes within the 902-928
> MHz allocation -- including further deployment of unlicensed Part 15
> devices
> -- that might increase the noise floor or otherwise adversely affect
> Amateur
> Radio operations there. The League filed comments recently in a Notice of
> Proposed Rule Making (NPRM) in WT Docket 06-49, which seeks input on
> encouraging the little-used Multilateration Location Monitoring Service
> (M-LMS) -- a terrestrial service for location of objects and tracking --
> while continuing to accommodate licensed and unlicensed uses of the
> 902-928
> MHz band. Amateur Radio is secondary in the band to federal radiolocation
> systems, industrial, scientific and medical devices, federal fixed and
> mobile systems and the M-LMS.
>
> "This 'kitchen sink' of allocations is acceptable from ARRL's perspective,
> provided that the noise floor is regulated, in terms of aggregate noise
> levels from unlicensed devices," the ARRL said in its comments, filed May
> 30. "The high power levels permitted in this band in particular bear
> careful
> watching, lest the allocated radio services, including federal systems,
> suffer decreased utility of the band."
>
> Given that only two M-LMS licensees operate these systems that exist only
> in
> six major US cities and in parts of Florida, the League asked whether
> present FCC rules are the obstacle to M-LMS or whether it's been overtaken
> by time and GPS technology.
>
> The League urged the FCC to examine the 902-928 MHz band in its entirety.
> "Specifically, the needs of the Amateur Service in this proceeding are
> increased protection of weak-signal operations in the 902-903 MHz
> segment,"
> the ARRL noted, specifying the 902.0-902.2 MHz and 903.0-903.2
> "weak-signal"
> segments.
>
> "The Amateur Service also requires the continued use of the 903.2-928 MHz
> band for amateur voice, television and digital communications, coexisting
> with other licensed and unlicensed users of this spectrum," the League
> concluded.
>
> In its comments, the ARRL pointed out that the NPRM does not propose to
> adopt, modify or delete any rules but only seeks information "looking

> toward
> modifications in the licensing and use" of the 902-928 MHz band. The
> League
> described the band as "a patchwork of overlays" and one that has "orphan
> allocation status" in ITU Region 2, precluding amateur use of the band for
> communication outside the region.
>
> ==>HAM-COM 2006 A HUGE SUCCESS AT NEW LOCATION, ORGANIZERS SAY
>
> Organizers of Ham-Com are calling the Texas hamfest's first year at its
> new
> location in Plano "an unqualified success." The show moved this year from
> Arlington. More than 3500 attended Ham-Com June 9-10 at the Plano Centre,
> its sponsors report. Ham-Com has secured the new venue at least through
> the
> 2011 event. ARRL President Joel Harrison, W5ZN, addressed the ARRL West
> Gulf
> Division forum during the show. Representing ARRL Headquarters were Chief
> Development Officer Mary Hobart, K1MMH, who discussed the importance of
> the
> League's development activities to Amateur Radio, and Field and Regulatory
> Correspondent Chuck Skolaut, K0BOG, who talked about the Headquarters'
> response to Hurricane Katrina.
>
> "An enthusiastic crowd visited the ARRL booth, which was staffed by a
> multitude of League officials," Skolaut reported. Those attending managed
> to
> retain an upbeat mood despite unseasonably hot weather, he added. In
> addition to President Harrison, other League volunteers attending included
> West Gulf Division Director Coy Day, N5OK, Vice Director Dr David
> Woolweaver, K5RAV, Oklahoma ARRL Section Manager John Thomason, WB5SYT,
> Arkansas SM David Norris, K5UZ, and North Texas ASM Bill Byrom, N5BB.
>
> Past ARRL President Jim Haynie, W5JBP, from Dallas also turned out for
> Ham-Com 2006, which is billed as "the biggest hamfest in Texas."
>
> Ham-Com 2006 offered more than 100 hours of programs featuring 52 speakers
> and 78 individual forum sessions. Amateur Radio examination session
> resulted
> in 38 license upgrades as well as 19 new Technician, 9 new General and 10
> new Amateur Extra Class tickets. Ham-Com volunteers also helped 57 Boy
> Scouts receive their Radio merit badges.
>
> Ham-Com 2006 was a commercial success as well, with more than three dozen
> commercial vendors filling all 60 booths. All 48 available tables in the
> indoor flea market were sold, while tailgaters filled 61 spaces on Friday
> and 88 spaces on Saturday -- the largest turnout in several years, Ham-Com
> sponsors said.
>
> The ARRL West Gulf Division forum featured a discussion on BPL. Addressing

> the concerns of radio amateurs during his presentation was Jory McIntosh,
> KJ5RM, an ARRL West Gulf Assistant Director and chair of the West Gulf BPL
> Task Force. A representative of Texas utility TXU discussed his company's
> plans to deploy BPL in Texas.
>
> TXU's initial foray into BPL in Irving, Texas, resulted in interference
> complaints, including one from McIntosh. The company has changed BPL
> vendors
> and will use Current Technologies equipment in its future systems. Current
> Technologies' gear has shown to be Amateur Radio friendly.
>
> In conjunction with Ham-Com 2006, the Lone Star DX Association hosted
> W5DXCC
> 2006, which featured a Friday banquet. Featured speaker Bob Allphin,
> K4UEE,
> spoke about his experiences as co-leader of the recent 3Y0X DXpedition to
> Peter I Island. A sellout crowd of more than 150 attended the DX
> gathering.
>
> ==>KNIGHT DISTINGUISHED SERVICE AWARD NOMINATIONS WELCOME
>
> The ARRL invites nominations for the Joe Knight Distinguished Service
> Award.
> The award recognizes "exceptionally notable contributions by a Section
> Manager to the health and vitality of the League." The ARRL Board of
> Directors created the award in 2003 to honor former ARRL New Mexico SM Joe
> Knight, W5PDY, who was its first recipient. He died in December of that
> year. Until ill health forced him to step down as SM in July 2003, Knight
> had guided the New Mexico Section for nearly 27 years -- longer than any
> of
> his peers.
>
> Knight was honored not only for his more than a quarter-century of service
> as an SM but for repeatedly volunteering to share his leadership knowledge
> and skills each year to help orient new SMs. Knight also headed a section
> that values public service and emergency preparedness, and he helped to
> maintain the WA5IHL Megalink Repeater System that opened up statewide
> communication to anyone with a handheld.
>
> The ARRL Board of Directors may from time to time designate a recipient of
> the Knight Distinguished Service Award to an individual who distinguishes
> himself or herself in accordance with these ideals:
>
> * Exceptionally notable contributions over an extended period of time
> within
> his or her Section and beyond.
>
> * Efforts contributing to the health and vitality of the ARRL and its
> Field
> Organization.

>
> * Actions in the spirit of the unselfish contributions of Joe Knight,
> W5PDY.
>
> Recipients of the Knight Distinguished Service Award will be presented
> with
> a plaque commemorating the award.
>
> Any ARRL member may nominate a Section Manager -- past or present -- for
> the
> Knight Distinguished Service Award. A narrative of the nominee's
> accomplishments identifying the individual's long-term contributions to
> the
> ARRL and its Field Organization should accompany the nomination.
>
> Submit nominations to ARRL Field and Educational Services Manager Dave
> Patton, NN1N, ARRL, 225 Main St, Newington, CT 06111 or via e-mail
> <dpatton@...>.
>
> ==>ASTRONAUT STILL SEEKS QSLS FOR DXCC FROM SPACE
>
> International Space Station Expedition 12 Commander Bill McArthur, KC5ACR,
> reports logging 130 DXCC entities from NA1SS while on orbit, but the DX
> QSLs
> have been slow in coming. To date McArthur has only about one-third of the
> entities confirmed for a special DXCC from space.
>
> DX stations that worked McArthur at NA1SS during Expedition 12 are urged
> to
> send QSL cards to ARRL, ARISS QSL -- Exp 12, 225 Main St, Newington, CT
> 06111-1494 USA. DX stations may also QSL via the routes on the Amateur
> Radio
> on the International Space Station (ARISS) Web site
> <http://www.rac.ca/ariss/oindex.htm#QSL's>, but they will take longer to
> be
> counted. If you've already sent a card "via the buro," ARISS asks that you
> send another to the ARRL ARISS QSL address.
>
> As of June 20, McArthur has these entities confirmed from NA1SS: Alaska,
> Antarctica, Argentina, Australia, Belgium, Brazil, Chile, Colombia,
> England,
> France, Gibraltar, Hawaii, India, Israel, Japan, Mariana Is, Mexico, the
> Netherlands, New Zealand, Panama, Puerto Rico, South Cook Is, South
> Africa,
> Spain, Switzerland, Thailand, Turkey, United States, Uruguay and
> Venezuela.
>
> ==>SOLAR UPDATE
>
> Sun gazer Tad "Staring at the Sun" Cook, K7RA, Seattle, Washington,

> reports:
> One thing nice about the bottom of the solar cycle is that disruptive
> radio
> blackouts or sudden ionospheric events are very unlikely, compared with
> periods when the solar cycle is active.
>
> Very low geomagnetic activity is predicted this time around, with the
> planetary A index forecast around five. Sunspot counts for the past five
> days have been 23, 21, 20, 19 and 0. No substantial increase is predicted.
> Geophysical Institute Prague predicts quiet conditions June 23, 24 and 27,
> quiet to unsettled June 25 and 29, and unsettled June 26 and 28.
>
> I've received many messages asking for advice on which HF bands to
> concentrate on during Field Day. Your best bets are going to be 40 and 20
> meters. Be alert for sporadic E openings on 15 and 10 meters too. Forty
> meters will open to many areas of North America throughout the day and
> night, and 80 meters should give good results from a couple of hours
> before
> local sunset on Saturday night until a couple of hours past local sunrise
> on
> Sunday morning.
>
> For more information concerning propagation and an explanation of the
> numbers used in this bulletin see the ARRL Technical Information Service
> Propagation page <http://www.arrl.org/tis/info/propagation.html>.
>
> Sunspot numbers for June 15 through 21 were 11, 0, 42, 23, 21, 20 and 19,
> with a mean of 19.4. 10.7 cm flux was 76.4, 75.3, 73.2, 73.3, 73.3, 72.9,
> and 72.7, with a mean of 73.9. Estimated planetary A indices were 28, 10,
> 10, 8, 5, 4 and 4, with a mean of 9.9. Estimated mid-latitude A indices
> were
> 17, 7, 7, 6, 4, 2 and 2, with a mean of 6.4.
>

> <cce@...>.
>
> * Minnesota student-ham presented with 2006 ARRL Goldwater scholarship:
> Acting in his role as vice president of the ARRL Foundation, ARRL Dakota
> Division Director Jay Bellows, K0QB, recently presented the 2006 ARRL
> Scholarship to Honor Senator Barry Goldwater, K7UGA, to Melissa Johnson,
> K1MJ, of Bemidji, Minnesota. The $5000 scholarship grant recognizes her
> outstanding academic achievement and her dedication to the ideals of
> public
> service that Senator Goldwater exemplified. Melissa, 21, just completed
> her
> first year at the University of Minnesota School of Veterinary Medicine.
> Bellows presented a Certificate of Award to Melissa on May 26. She is the
> daughter of 2004 ARRL International Humanitarian Award winner Glenn
> Johnson,
> W0GJ.
>
> * Three radio amateurs aboard Discovery for July 1 launch: NASA has
> tentatively cleared the shuttle Discovery for a July 1 flight to the
> International Space Station. Three radio amateurs will be among the seven
> crew members. One of them, European Space Agency (ESA) astronaut and
> Mission
> Specialist Thomas Reiter, DF4TR, will remain on the ISS as part of the
> Expedition 13 and 14 crews, marking the first three-person crew since NASA
> grounded the shuttle fleet in 2003. Discovery will carry no Amateur Radio
> equipment. Commander Steve Lindsey will head the 12-day STS-121 mission.
> Others on the flight include Pilot Mark Kelly, Mission Specialists Michael
> Fossum, Lisa Nowak, KC5ZTB, Stephanie Wilson, KD5DZE, and Piers Sellers.
> The
> Discovery crew will test new hardware and techniques to improve shuttle
> safety, as well as deliver supplies to the ISS and make repairs. Now
> aboard
> the ISS are Expedition 13 Commander and cosmonaut Pavel Vinogradov, RV3BS,
> and Flight Engineer and NASA Station Science Officer Jeff Williams,
> KD5TVQ.
>
> * Special WRTC 2006 call signs announced: WRTC 2006 Steering Committee
> Chairman Atilano de Oms, PY5EG, has announced that ANATEL (Ag?ncia
> Nacional

> De Telecomunica??es), Brazil's national telecommunication authority, has
> okayed the allocation of special call signs for use by World Radiosport
> Team
> Championship 2006 teams Saturday and Sunday, July 8-9. The call signs
> approved are from PW5A to PW5Z and from PT5A to PT5Z -- a total of 52 call
> signs, although 47 stations will be competing. Call signs will be assigned
> by lottery prior to the contest. WRTC 2006 will take place concurrently
> with
> the IARU HF World Championship, although WRTC rules differ in some
> respects
> from those of the IARU event, and scoring is separate. More information is
> on the WRTC 2006 Web site <http://www.wrtc2006.com/site/home.asp>.
>
> * Spain, the Netherlands report Amateur Radio regulatory changes: New
> Amateur Radio regulations
> <http://www.ure.es/ureinforma/Reglamento_Radioaficionados.pdf> became
> effective in Spain on June 10. The new licensing regime essentially
> eliminates the former Novice, General and Restricted license classes and
> extends the same privileges to all radio amateurs. Jose D?az, EA4BPJ,
> general secretary of the Union de Radioaficionados Espa?oles (URE),
> Spain's
> IARU member-society, says the change means EB and EC-prefix call signs
> will
> be showing up on all bands now, in addition to the familiar EA prefix. All
> amateurs in Spain also now may use the 50-51 MHz band, although D?az notes
> there are some geographical restrictions on 6-meter operation. In the
> Netherlands, Hans Blondeel Timmerman, PB2T, the IARU liaison officer of
> IARU
> member-society the Vereniging voor Experimenteel Radio Onderzoek in
> Nederland (VERON), reports that as of June 10, radio amateurs in the
> Netherlands may use the band 7.100-7.200 MHz on a secondary basis with a
> maximum power output of of 250 W. Telecommunication authorities in
> Thailand
> reportedly have granted temporary permission for radio amateurs to operate
> on the 30, 17 and 12-meter bands upon application. The temporary
> allocation
> is valid until the end of the year.
>
> * Yukon Territory radio amateur exploring LF spectrum: J Allen, VY1JA, of
> Whitehorse, Yukon Territory, recently became the first radio amateur to
> put
> the Yukon on LF. Allen has joined the half-dozen or so Canadian hams
> authorized to experiment on low frequencies. Perhaps best known as the ham
> who most often hands out the hard-to-work Northern Territories multiplier,
> Allen now is beaconing nightly on 137.574 kHz. On May 25, Allen completed
> the first LF QSO from the Yukon by working LF aficionado Steve McDonald,
> VE7SL, in British Columbia. "Running just 30 W into a loaded inverted L,
> J's
> ERP was likely well below 100 mW," McDonald estimated. He reports Allen's
> very slow-speed CW signal was 100-percent copy using ARGO software on the

> receiving end. In Whitehorse, Allen reported that VE7SL's signal was
> strong
> enough to copy by ear at normal speeds. Observed McDonald: "At 1000 miles
> distance, the initial QSO demonstrates that amateurs can enjoy
> inter-provincial or out-of-state CW ragchews on 2200 meters using simple
> stations and backyard antenna systems." There's more information on 2200
> meter activity in "The VE7SL Radio Notebook"
> <http://www.imagenisp.ca/jsm>.

900. Items for sale.

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-06-30 22:20:34 UTC
From: Tom VanderMel
Topic: 900 Message: 900

All
Some more items For Sale from Shawn KB8UFI e mail him direct at kb8ufi@comcast.net

Tom
I have a monoband 440 base station antenna ground plane and I have a double stack of a449-11s 440 beams for sale. Could you please get this information out for me.

Thanks Shawn KB8UFI

901. ARRL Letter

==>ARES/RACES TEAMS HANDLE FLOOD DUTY IN MIDDLE ATLANTIC STATES

Amateur Radio volunteers this week supported communication or remained on alert to assist relief organizations and local emergency managers in flood-stricken regions of the Eastern US. Widespread flooding in several states claimed at least a dozen lives. ARRL Eastern Pennsylvania PIO Bob Josuweit, WA3PZO, says ham radio volunteers in 10 counties in his Section actively aided local law enforcement, emergency management agencies and the Red Cross, which set up about a dozen evacuation centers.

"Hams in some areas may be on duty for several days as river levels slowly drop below flood stage," Josuweit told ARRL June 29. The Delaware River -- which separates New Jersey and Pennsylvania -- crested June 29, and the Susquehanna River a day earlier.

A mandatory evacuation order affecting some 200,000 residents of the Wilkes Barre area in Luzerne County was lifted June 29. Josuweit reports that the Susquehanna crested at nearly 34 feet, 12 feet above flood stage for that area. "In areas where the water has already receded, many utilities are still out of service and local officials are advising residents to stay away from the their homes until at least Saturday [July 1]," Josuweit said.

Despite flooding in the area, Josuweit says the Wilkes Barre hamfest <http://www.qsl.net/k3ytl> sponsored by the Murgas Amateur Radio Club will go on as scheduled Sunday, July 2, at the Luzerne County Fairgrounds, Route 118, Lake Lehman.

ARRL Eastern Pennsylvania Section Emergency Coordinator Al Rabenau, W3AHR, reported the Schuylkill River receding as of June 29. He said Bucks County ARES had been on alert status since June 28. Members established a VHF repeater net and have been staffing several EOCs and shelters. Bucks County EC Harris Stein, NY3H, says ARES/RACES was trimming down some

operations at
week's end but will continue Red Cross support through the holiday
weekend.
He anticipates needing operators to assist with damage assessment
July 1 and
to replace shelter operators.

Due to topography, flooding along the Delaware typically is worst in
Bucks
County and in Hunterdon County, New Jersey. ARRL Hunterdon County
District
Emergency Coordinator David Kanitra, WB2AZE, this week placed
Hunterdon ARES
on a Level 1 alert for possible deployment to assist RACES.

In Mercer County, New Jersey, Emergency Coordinator Kip Burnett,
KB2EGI,
reported his ARES/RACES team was on standby and no longer staffing
the EOC,
which remains active. "We may be needed later to assist with water
deployment or some other situation," he said. ARES/RACES personnel
at the
EOC this week monitored river levels.

Burnett called the flooding "basically a repeat of the October 2004
and
April 2005 floods," and said officials evacuated the same locations -
- an
area called "The Island" -- in Trenton as well as parts of
Titusville.
Conventional communication systems remained intact.

In Binghamton, New York, and surrounding Broome County authorities
ordered
the evacuation of some 15,000 residents as the Susquehanna and
Chenango
rivers overflowed their banks, putting some neighborhoods under
several feet
of water. Parts of Interstates 81 and 88 as well as State Route 17
were
closed.

In Delaware last weekend, Justin Kates, KB3JUV, says ARES volunteers
diverted their attention from Field Day and prepared to support
communication in the wake of flooding in Sussex County, which
received 15
inches of rain in some areas. "Emergency management had a difficult
time
providing road and medical crews to the affected areas due to the
high
water," Kates told ARRL. The weather event also disrupted

conventional
communication systems.

While formal activation was unnecessary, Amateur Radio volunteers remained
poised to supply any needed communication assistance. A SKYWARN activated,
however, and volunteers relayed rainfall reports as well as road and highway
reports.

==>UN MAKES IT OFFICIAL: MONTENEGRO NOW NUMBER 336 ON THE CURRENT DXCC LIST

A new ARRL DXCC entity came into being this week! As expected, the United
Nations admitted the Republic of Montenegro as its 192nd member June 28, and
that action automatically makes the tiny Balkan nation the 336th current
DXCC entity.

"According to the ARRL DXCC List criteria, entities on the UN list of
member-states qualify as political entities," said ARRL Membership Services
Manager Wayne Mills, N7NG. "Therefore, effective June 28, 2006 (UTC), ARRL
has added The Republic of Montenegro to the DXCC List. Claims for DXCC
credit will be accepted immediately."

The Daily DX <http://www.dailydx.com> this week quoted Ranko Boca, YT6A,
that current Montengrin radio amateurs may use their current
Serbia-Montenegro call signs until the International Telecommunication Union
(ITU) designates a call sign block for the new country.

In anticipation of Montengro's new nation status, International DX Festival
Montenegro <http://www.yu6scg.cg.yu/international-dx-festival.html> has been
set for July 20 until August 12. That's when several international operators
- with Boca as DXpedition leader and well-known DXer Martti Laine, OH2BH, as
radio operations leader - will join forces with Montenegrin Amateur Radio
operators from at least three different stations using a common call sign in
an effort to meet the DX community's need to work the newest DXCC Entity.

Festival organizers have set the ambitious goal of 200,000 contacts for the
event, which will use all HF bands.

The event also will include several basic courses on ham radio operating and
CEPT license examinations aimed at new and less-experienced radio amateurs.
Another goal is to establish an Amateur Radio Club of Montenegro

Others scheduled to take part in the DX Festival include ARRL CEO David
Sumner, K1ZZ, and XYL Linda, KA1ZD; 3Y0X team member Bob Grimmick, N6OX;
IARU Region 1 Executive Committee member Hans Blondeel Timmerman, PB2T;
Carsten Esch, DL6LAU, and Vladan Kecman, YT3T/YU1AO.

Montenegro declared its independence on June 3 following a national referendum May 21.--The Daily DX; ARRL DXCC Desk

==>EUROPEAN SPACE CAMPERS QUIZ ASTRONAUT ON SPACE LIFE, RESEARCH

A group of British space campers at the Euro Space Center (ESC) in Belgium
went right to the source via ham radio and teleconference to get answers to
their questions about life and work aboard the International Space Station.
The Amateur Radio on the International Space Station (ARISS) program
arranged the June 13 contact with US Astronaut Jeff Williams, KD5TVQ, at
NA1SS. One camper wanted to know whether a human space flight to Mars would
be possible by 2020, as has been projected.

"Oh, I think it's realistic," Williams replied. "It depends upon the countries that are involved and how committed they are to the programs to
make them happen by 2020."

Answering another space camper, Williams outlined some potentially practical
benefits of the scientific research occurring onboard the ISS.

"You never know when you're doing research what the benefits are going to be
until way off in the future," Williams qualified. "We are working on research to prevent kidney stones -- renal stones. That's very important for
us in a weightless environment, and that will have direct application to

those on the ground."

Williams said he and Expedition 13 Commander Pavel Vinogradov, RV3BS, also
are conducting studies on bone density. Experience has shown that the weightless environment appears to affect bone density of astronauts and
cosmonauts on long-term duty in space.

As other ISS crew members before him have said, viewing Earth from the ISS
is awe inspiring. "It definitely changes your vision of the world. It's a
very humbling experience to see the earth from this vantage point," Williams
responded. "The earth is a beautiful planet from above, and it definitely
makes you more aware of what we've been given in our world and that we need
to be good stewards of it."

One questioner wanted to know if Williams saw the flashes of light in his
eyes -- believed due to cosmic rays -- that other space travelers have
reported. Williams said he does see them, especially when he closes his eyes
to sleep, but they're not very bothersome. "It's just a very quick flash out
of the corner of your eye," he explained.

Serving as the Earth station for the contact with NA1SS was W6SRJ at Santa
Rosa Junior College in California. Verizon Conferencing donated a teleconference link to handle two-way audio between the ESC and California.
Contact audio was distributed worldwide via EchoLink and IRLP.

Some 60 teenaged students and their teachers from Gillingham School, Dorset,
England, were at the ESC Space Camp the week the contact took place. According to ARISS-Europe's Gaston Bertels, ON4WF, youngsters from many
European countries visit the space camp, which includes a permanent Space
Expo and an Amateur Radio club station, ON4ESC.

Twenty questions were asked and answered, and there was time left over for
Bertels to express thanks on behalf of the students, and the youngsters gave
a resounding applause. Williams signed off by encouraging the

students to
make the most of their space camp experience and suggested that some
of them
might contribute to space exploration in the future.

Also visiting on the day of the event were 50 French schoolchildren.
A
teacher translated the questions and the answers into French for
their
benefit.

After the contact, an ARISS member conducted a half-hour question-
and-answer
session with the students. Six of their questions focused on ARISS
activities.

ARISS <http://www.rac.ca/ariss> is a nine-nation international
educational
outreach, with US participation by ARRL, AMSAT and NASA.

==>FCC AFFIRMS FINE FOR MARKETING NON-CERTIFICATED CBs AS HAM
TRANSCEIVERS

The FCC has affirmed a $7000 fine it proposed to levy on
TravelCenters of
America in Troutdale, Oregon, for marketing uncertificated Citizens
Band
(CB) transceivers as 10-meter Amateur Radio transceivers. In a
Forfeiture
Order (NoF) released June 29
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-06-
1334A1.pdf>, the
FCC turned away TravelCenters' argument that the transceivers in
question
were not CB transceivers, which require FCC certification, but
Amateur Radio
transceivers, which do not. The Commission says its Office of
Engineering
and Technology (OET) determined that the radios in question --
manufactured
by Galaxy -- could be easily modified to operate on CB channels.

"TravelCenters provides no evidence to show that the Galaxy models it
offered for sale were not easily modified," the FCC said in its NoF.
"Therefore, we find that the subject Galaxy models were CB
transmitters
pursuant to Section 95.603(c), regardless of the signs TravelCenters
placed
near the point of purchase." The signs advised that the units were
Amateur
Radio transceivers, not CB radios, and a license was required.

In May, an FCC Order concluded a similar case in which the Commission had imposed $125,000 in fines on Pilot Travel Centers LLC for continuing to market CB transceivers labeled as Amateur Radio gear but intended for use on both CB and amateur frequencies. Under the terms of a consent decree, Pilot agreed to make "a voluntary contribution" of $90,000 to the US Treasury "without further protest or recourse," but did not admit to any wrongdoing. Pilot further agreed to refrain from marketing as "Amateur Radio" gear any transmitting devices with built-in features to facilitate CB operation.

The FCC required Pilot to remove from sale Galaxy transceiver models DX33HML, DX66V and DX99V. Those units also were among the radios the FCC cited in the TravelCenters proceeding. Some of the Galaxy transceivers at issue in the TravelCenters' case have only CB-like channel knobs and indicators for tuning, although the more expensive models sport a digital frequency readout. Most of the units transmit only in AM and FM mode.

In affirming the $7000 fine, the FCC cited a 1999 letter from the FCC's Office of General Counsel (OGC) on the importation and marketing of ham radio transceivers. The OGC's letter clarified that transmitters having "a built-in capacity to operate on CB frequencies and can easily be altered to activate that capacity, such as by moving or removing a jumper plug or cutting a single wire" fall within the definition of a CB transmitter and must obtain FCC certification prior to importation or marketing.

The FCC also turned away TravelCenters' argument that Commission efforts 10 years ago to clarify the definition of a CB transceiver in an OET Public Notice violated the Administrative Procedures Act. The FCC countered that it had relied on the OGC's letter and its interpretation of §95.603(c) as well as the OET's recent determination regarding the specific transceiver models in question. The Commission further noted that §95.655(a) of its

rules
states that no transmitter will be certificated for CB use
if "equipped with
a frequency capability" not listed in Part 95 as CB transmitter
channel
frequencies.

The TravelCenters case dates back to the fall of 2001, when an FCC
agent
visited the TravelCenters' retail store in Troutdale and observed
six models
of "CB transceivers" that had not received FCC certification. The
FCC's
Portland, Oregon, Field Office issued a Citation to TravelCenters'
Troutdale
store later that fall for selling non-certificated CB transceivers.
It
warned TravelCenters that future violations could lead to fines and
seizure
of equipment.

In July 2005 the FCC's Enforcement Bureau issued a Notice of Apparent
Liability (NAL) proposing the $7000 fine for "apparently willfully
and
repeatedly" violating §302(b) of the Communications Act and §2.803(a)
(1) of
its rules "by offering for sale a non-certified CB transceiver."

==>ARIZONA, NEW MEXICO ARES TEAMS KEEP CLOSE EYE ON WILDFIRES

As firefighters gained the upper hand with the Brins Fire near
Sedona,
Arizona, and some evacuation orders have been lifted, Amateur Radio
Emergency Service (ARES) volunteers were in a holding pattern at
week's end.
The fire burned more than 4300 acres and was 90 percent contained by
midweek.

"We are essentially just in a standby mode if something should
change," ARRL
Arizona SEC Rick Aldom, W7STS, told ARRL Headquarters. Two Red Cross
evacuation centers closed over the June 24-25 weekend.

Evacuations for some Oak Creek Canyon residents remained in effect at
midweek, impacting nearly 600 homes and 40 businesses. State Rte 89A
remained closed to the general public, but authorities reopened the
highway
to residents, business owners, service providers and emergency
vehicles June
27. Individuals entering the area must provide identification.

Officials believe the Brins Fire, some two miles north of Sedona in the
Coconino National Forest, resulted from an escaped campfire. "The
firefighters who responded to this fire have done an incredible job of
saving not only one of the more scenic areas of Arizona, but nearly 500
structures that were threatened," Aldom commented. "Had this fire jumped the
fire lines, it would have become really ugly, really fast."

In New Mexico, Sandoval County Amateur Radio Emergency Service (SCARES) was
well into its Field Day exercise on Saturday, June 24, when Sandoval
County's emergency manager notified District Emergency Coordinator Mike
Scales, K5SCA, of a forest fire north of Cuba, near Gallina, in the Santa Fe
National Forest. The SCARES Field Day ended abruptly, and members went on
standby until Scales could assess the needs at the Bear Paw fire scene.

By 7 PM, Scales and Vance Loen, WV5L, were in Sandoval County's Emergency
Communication Vehicle - "Command 7" - en route to assist with any
evacuations and to coordinate communication among Sandoval and Rio Arriba
counties and the US Forest Service. Until then Command 7 had been used for
Field Day.

By June 28, the Bear Paw Fire had consumed 3200 acres in sage and ponderosa
and full containment was expected by June 29. A downed power line apparently
caused the fire, but the circumstances remain under investigation. At one
point, the fire threatened the communities of Gallina Plaza and Bear Paw,
prompting a mandatory evacuation order for Gallina Plaza and a voluntary
evacuation advisory for Bear Paw. State Road 96 was closed, and an
evacuation shelter was set up in Cuba.

SCARES members remained on stand-by at the scene in Command 7, while Bill
Kauffman, W5YEJ, and Marlin Allison, K5MHA, kept an ear on the SCARES
repeater on Pajarito Peak from Rio Rancho.

At week's end, no ARES/RACES personnel were on active fire duty in New

Mexico. "Fire season is not over," New Mexico SEC Rick Sohl, K5RIC, has
reminded all ARES members nonetheless. Although several of the state's
forest and range fires have been doused with rains over the past week, new
ones continue to break out.-Charlie Christman, K5CEC; National Fire Information Center

==>POST YOUR FIELD DAY 2006 PHOTOS AND EXPERIENCES ON THE CONTEST SOAPBOX

ARRL invites participants in ARRL Field Day 2006 to post photos and narratives to its Contest Soapbox
<http://www.arrl.org/contests/soapbox/>
for all to see. It's not only fun and easy, but your photos and writeup
could become part of the annual Field Day summary that appears in December
QST.

Several participants have already taken the opportunity to tell their Field
Day tales on the ARRL Contest Soapbox, which is open to ARRL members and
non-members alike. Narratives should focus on your or your club's or group's
involvement in Field Day.

The League reserves the right to edit or even to decline postings it considers inappropriate for this forum. The potential audience for your post
is broad, so good taste is a must. Responsibility for all posted material
rests solely with the author, and the ARRL staff assumes no responsibility
for errors, omissions or accuracy of items appearing in the Contest Soapbox.

Direct any questions and comments on to the author of the post. If you have
questions or comments about using Contest Soapbox, contact the ARRL Contest
Branch <contests@arrl.org>.

==>FOLLOW WRTC-2006 VIA THE NCJ WEB SITE BLOGS

The year's premier global contesting event, World Radiosport Team Championship 2006 (WRTC-2006)
<http://www.wrtc2006.com/site/home.asp>, takes
place July 8-9 in conjunction with the IARU HF World Championship
<http://www.iaru.org/contest.html>.

Via Web logs (blogs), the National Contest Journal (NCJ) is giving you a
front-row seat as top-notch contesters in two-person teams from around the
world compete on HF from Brazil on as level a playing field as possible. The
contest period is 1200 UTC Saturday, July 8, until 1200 UTC Sunday, July 9.
Winners will be announced Monday, July 10, at the awards dinner.

The NCJ WRTC-2006 blogs will include the musings and general comments of
WRTC-2006 competitors, referees and log checkers. We invite NCJ readers to
post their comments as well.

Access the blogs from the NCJ home page <http://www.ncjweb.com/> or from the
WRTC-2006 coverage section <http://www.ncjweb.com/wrtc2006blogs.php>.
Postings have already begun and will continue -- on a time-available basis,
since the contributors do have WRTC-2006 responsibilities -- until WRTC-2006
wraps up.

Blog contributors are: Doug Grant, K1DG; Randy Thompson, K5ZD; Jeff Briggs,
K1ZM; Ann Santos, WA1S; Tim Duffy, K3LR; Eric Scace, K3NA; Glenn Johnson,
W0GJ; Ward Silver, N0AX; Dean Straw, N6BV; Tree Tyree, N6TR; Rusty Epps,
W6OAT, and Dale Green, VE7SV.

The National Contest Journal thanks these contributors for being willing to
share their personal WRTC-2006 experiences with the Amateur Radio community.
Also, thanks to Bruce Horn, WA7BNM, for suggesting this blog and putting it
on the NCJ Web site, and to the ARRL for shipping 300 copies of the special
WRTC-2006 July/August NCJ issue to Brazil.

==>SOLAR UPDATE

Solar swami "You Are My Sunshine" Tad Cook, K7RA, Seattle, Washington,
reports: There were no sunspots for Field Day weekend, but a big new sunspot
(897) rotated into view this week. Followed by sunspot 898, it looks like a
moderately rising solar flux and sunspot number will be with us through July

6.

A solar wind stream caused elevated geomagnetic numbers on June 28 and 29,
and this may happen again around July 3-5. Geophysical Institute Prague
predicts quiet conditions over June 30 to July 3, quiet to unsettled on July
4, unsettled to active on July 5, and unsettled on July 6.

For more information concerning propagation and an explanation of the
numbers used in this bulletin see the ARRL Technical Information Service
Propagation page <http://www.arrl.org/tis/info/propagation.html>.

Sunspot numbers for June 22 through 28 were 0, 0, 0, 13, 14, 33 and 38, with
a mean of 14. The 10.7 cm flux was 72.1, 71.8, 73.6, 74, 76.4, 78.5, and
83.5, with a mean of 75.7. Estimated planetary A indices were 6, 2, 4, 5, 3,
6 and 18, with a mean of 6.3. Estimated mid-latitude A indices were 6, 1, 2,
3, 1, 7 and 12, with a mean of 4.6.

==>IN BRIEF:

* This weekend on the radio: The RAC Canada Day Contest is July 1. The
Venezuelan Independence Day Contest, the DL-DX RTTY Contest, the Original
QRP Contest, the DARC 10-Meter Digital Contest are the weekend of July 1-2.
The RSGB 80-Meter Club Championship (CW) is July 3. The ARS Spartan Sprint
is July 4. The MI QRP July 4th CW Sprint is July 4-5. JUST AHEAD: The
VK/Trans-Tasman 160-Meter Contest (phone) is July 8. The IARU HF World
Championship, the FISTS Summer Sprint, the Six Club Contest and the ARCI
Summer Homebrew Sprint are the weekend of July 8-9. The RSGB 80-Meter Club
Championship (SSB) is July 12. The Thursday NCCC Sprint Ladder is July 14.
See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the
WA7BNM Contest Calendar
<http://www.hornucopia.com/contestcal/index.html>
for more info.

* ARRL Certification and Continuing Education course registration:
Registration remains open through Friday July 7, for these ARRL
Certification and Continuing Education (CCE) program on-line courses:
Amateur Radio Emergency Communications Level 2 (EC-002) Amateur Radio
Emergency Communications Level 3 (EC-003R2) Antenna Modeling (EC-
004) HF
Digital Communications (EC-005) VHF/UHF -- Life Beyond the Repeater
(EC-008)
and Radio Frequency Propagation (EC-011) Classes begin Friday, July
21. To
learn more, visit the CCE Course Listing page
<http://www.arrl.org/cce/courses.html> or contact the CCE Department
<cce@...>.

* ARRL, IARU HQ mults will be on the air for IARU HF World
Championship:
During the International Amateur Radio Union (IARU) HF World
Championship
Contest July 8-9, W1AW/4 will provide the ARRL Headquarters
multiplier from
Tennessee, with the Tennessee Contest Group hosting the operation.
Supplying
the International Amateur Radio Union (IARU) HQ multiplier will be
NU1AW/8,
operating from sites in Michigan and Ohio, hosted by Dave Pruett,
K8CC, and
friends from the Mad River Radio Club and the North Coast
Contesters. The
World Radiosport Team Championship 2006 (WRTC 2006) in Brazil takes
place
concurrently with the IARU HF World Championship, although WRTC
rules differ
in some respects from those of the IARU event, and scoring is
separate. IARU
HF World Championship Contest rules are on the ARRL Web site
<http://www.arrl.org/contests/rules/2006/iaru.html>.

* WRTC-2006 requests IARU HF World Championship logs: World
Radiosport Team
Championship 2006 (WRTC-2006) <http://www.wrtc2006.com/> officials
want as
many logs as possible from IARU HF World Championship
<http://www.iaru.org/contest.html> participants within six hours of
the
event's end. The WRTC-2006 competition among 47 top contesting teams
from
around the globe takes place in Brazil July 8-9, coinciding with the
IARU HF
World Championship event. Because WRTC-2006 winners will be
announced on
July 10, event organizers want IARU contest logs enhance the
accuracy of

WRTC-2006 log checking. WRTC-2006 is especially interested in logs from HQ stations, since these serve as multipliers for both events. E-mail complete IARU HF World Championship logs in Cabrillo format by 1800 UTC Sunday, July 9, to <logs@...>. WRTC-2006 has announced a lottery and prizes for early receipt of IARU contest logs <http://www.wrtc2006.com/release52.html>. Note that submission of IARU contest logs does not constitute an official entry for the IARU HF World Championship. That is an entirely separate entry, and the usual deadline and submission requirements apply. [WRTC-2006-logo.jpg]

* ARRL "DXCC Dialog" blog debuts: The ARRL DXCC Desk has inaugurated the "DXCC Dialog Weblog" <http://www.arrl.org/blog/DXCC%20Dialog> - containing news and notes about the ARRL DXCC program. "This page will have up-to-date information about the DXCC program," says ARRL Membership Services Manager Wayne Mills, N7NG. "It does not provide for users to post responses, but authors and e-mail addresses are listed." The blog will be updated as needed to inform and update the DXing community regarding news of interest.

* Field Day at W1AW slide show available: A slide show, "Field Day at W1AW," now is available on the ARRL Web site <http://www.arrl.org/contests/FD2006-W1AW/>. Photographed and produced during Field Day 2006 by ARRL Web/Software Development Manager Jon Bloom, KE3Z, the 4-1/2 minute presentation "was created to give members a feel for what happens at W1AW on Field Day," he says. It also provides a peek inside W1AW for those who have never visited. "The slide show is presented using Adobe Flash format. Adobe Flash Player 7 or later and a compatible Web browser are needed to play the slide show," he notes, adding that most computers already have a copy of Flash Player installed. If not, Flash Player is a free for download from Adobe

<http://www.adobe.com/go/gntray_dl_getflashplayer>. The show can be played
directly from the Web site in either a large format - suitable for broadband
Web users - or in a smaller format more attuned to dial-up Internet connections.

* Educator astronaut gets on the air for Kids Day: NASA Educator Astronaut
Dottie Metcalf-Lindenburger, KE5DAT, spent an hour or so on the air June 17
talking to youngsters around the US during ARRL Kids Day. She spoke with
about a dozen kids and ham radio operators from W5RRR at the Johnson Space
Center in Houston. Assisting her at the microphone was Kent Castle, W5OJ,
who spent several hours on 20 meters before and after KE5DAT's visit,
chatting with youngsters taking part in the twice-a-year activity.
Metcalf-Lindenburger joined the NASA Astronaut Corps in 2004.--Kenneth
Ransom, N5VHO

* New IRC available July 1: The Universal Postal Union (UPU) has announced
that a new International Reply Coupon (IRC) design
<http://www.dailydx.com/2007irc.jpg> has been selected. Radio amateurs often
enclose IRCs when QSLing DX stations directly to cover the cost of return
postage. The new design, known as "Beijing Model No. 2," was submitted by
Volodymyr Taran, a graphic artist from Ukraine. Chosen by a jury of 40 UPU
member countries, the coupon design was inspired by Michelangelo's painting
on the ceiling of the Sistine Chapel -- two fingers about to touch framed in
a postage stamp, representing the notions of communication and exchange. The
new IRC will be valid until December 31, 2009. The current IRC is valid
through December 31, 2006. For more information on IRCs, see the June 1999
issue of QST (page 83).--The Daily DX <http://www.dailydx.com>

Correction regarding Director/Vice Director eligibility: The July QST "It
Seems to Us . . ." editorial misstates the eligibility requirements to run
for ARRL Director and Vice Director. The membership/licensing

requirements
are four years of continuous full membership and four years of
continuous
holding of a valid authorization as a radio amateur in accordance
with the
applicable laws and regulations of the United States immediately
preceding
nomination.

==========
The ARRL Letter is published Fridays, 50 times each year, by the
American
Radio Relay League--The National Association For Amateur Radio--225
Main St,
Newington, CT 06111; tel 860-594-0200; fax 860-594-0259;
<http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential news of
interest
to active amateurs. The ARRL Letter strives to be timely, accurate,
concise,
and readable. Visit ARRLWeb <http://www.arrl.org> for the latest
news,
updated as it happens. The ARRL Web site <http://www.arrl.org/>
offers
access to news, informative features and columns. ARRL Audio News
<http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio
newscast"
compiled from The ARRL Letter.

Material from The ARRL Letter may be republished or reproduced in
whole or
in part in any form without additional permission. Credit must be
given to

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly
from
ARRL HQ. To subscribe, unsubscribe or change your address for e-mail
delivery:
ARRL members first must register on the Members Only Web Site
<http://www.arrl.org/members/>. You'll have an opportunity during

registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member
Data Page" link (in the Members Only box). Click on "Modify membership
data," check or uncheck the appropriate boxes and/or change your e-mail
address if necessary. (Check "Temporarily disable all automatically sent
email" to temporarily stop all e-mail deliveries.) Then, click on "Submit
modification" to make selections effective. (NOTE: HQ staff members cannot
change your e-mail delivery address. You must do this yourself via the
Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be
posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio
Club: Visit Mailing Lists@QTH.Net
<http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL
cannot assist subscribers who receive The ARRL Letter via this listserver.)

902. Phonetics in a Contest

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-07-01 12:53:10 UTC
From: Bill Fries
Topic: 900 Message: 902

All:

There has been a little behind the scenes chatter on the use of phonetics in a contest. Specifically the question of the questionable use of Zipper Half Open at club radio events. While I recognize that everyone has a certain tolerance we also must cooperate and help everyone enjoy the hobby.

The first time I heard this phonetic butchering of the club's call sign I was just saddened. There are many zippers in our world but the sorry ones immediately and tragically come to mind when this phrase is uttered. It may reflect poorly on the club and the operator using this phrase.

Imagine a twist on the scenario where the GOTA shack is soliciting contacts in the Field Day setting. The call sign is Alpha Bravo Eight Sugar Charlie. It is changed to America Baker Eight Sex Change. This brought the problems home to roost in a personal way. Funny? Stupid? Sad? A good image? I'm wondering.

My two cents.

Bill
AB8 Slow Code

By the way, I use Slow Code with pride and with the fond memory of Bob, K8IUI SK who first suggested, in jest, these phonetics. RIP friend

>
> ==>ARES/RACES TEAMS HANDLE FLOOD DUTY IN MIDDLE ATLANTIC STATES
>
> Amateur Radio volunteers this week supported communication or remained on
> alert to assist relief organizations and local emergency managers in

> flood-stricken regions of the Eastern US. Widespread flooding in several
> states claimed at least a dozen lives. ARRL Eastern Pennsylvania PIO Bob
> Josuweit, WA3PZO, says ham radio volunteers in 10 counties in his Section
> actively aided local law enforcement, emergency management agencies and
> the
> Red Cross, which set up about a dozen evacuation centers.
>
> "Hams in some areas may be on duty for several days as river levels slowly
> drop below flood stage," Josuweit told ARRL June 29. The Delaware River --
> which separates New Jersey and Pennsylvania -- crested June 29, and the
> Susquehanna River a day earlier.
>
> A mandatory evacuation order affecting some 200,000 residents of the
> Wilkes
> Barre area in Luzerne County was lifted June 29. Josuweit reports that the
> Susquehanna crested at nearly 34 feet, 12 feet above flood stage for that
> area. "In areas where the water has already receded, many utilities are
> still out of service and local officials are advising residents to stay
> away
> from the their homes until at least Saturday [July 1]," Josuweit said.
>
> Despite flooding in the area, Josuweit says the Wilkes Barre hamfest
> <http://www.qsl.net/k3ytl> sponsored by the Murgas Amateur Radio Club will
> go on as scheduled Sunday, July 2, at the Luzerne County Fairgrounds,
> Route
> 118, Lake Lehman.
>
> ARRL Eastern Pennsylvania Section Emergency Coordinator Al Rabenau, W3AHR,
> reported the Schuylkill River receding as of June 29. He said Bucks County
> ARES had been on alert status since June 28. Members established a VHF
> repeater net and have been staffing several EOCs and shelters. Bucks
> County
> EC Harris Stein, NY3H, says ARES/RACES was trimming down some operations
> at
> week's end but will continue Red Cross support through the holiday
> weekend.
> He anticipates needing operators to assist with damage assessment July 1
> and
> to replace shelter operators.
>
> Due to topography, flooding along the Delaware typically is worst in Bucks
> County and in Hunterdon County, New Jersey. ARRL Hunterdon County District
> Emergency Coordinator David Kanitra, WB2AZE, this week placed Hunterdon
> ARES
> on a Level 1 alert for possible deployment to assist RACES.
>
> In Mercer County, New Jersey, Emergency Coordinator Kip Burnett, KB2EGI,
> reported his ARES/RACES team was on standby and no longer staffing the
> EOC,
> which remains active. "We may be needed later to assist with water

> deployment or some other situation," he said. ARES/RACES personnel at the
> EOC this week monitored river levels.
>
> Burnett called the flooding "basically a repeat of the October 2004 and
> April 2005 floods," and said officials evacuated the same locations -- an
> area called "The Island" -- in Trenton as well as parts of Titusville.
> Conventional communication systems remained intact.
>
> In Binghamton, New York, and surrounding Broome County authorities ordered
> the evacuation of some 15,000 residents as the Susquehanna and Chenango
> rivers overflowed their banks, putting some neighborhoods under several
> feet
> of water. Parts of Interstates 81 and 88 as well as State Route 17 were
> closed.
>
> In Delaware last weekend, Justin Kates, KB3JUV, says ARES volunteers
> diverted their attention from Field Day and prepared to support
> communication in the wake of flooding in Sussex County, which received 15
> inches of rain in some areas. "Emergency management had a difficult time
> providing road and medical crews to the affected areas due to the high
> water," Kates told ARRL. The weather event also disrupted conventional
> communication systems.
>
> While formal activation was unnecessary, Amateur Radio volunteers remained
> poised to supply any needed communication assistance. A SKYWARN activated,
> however, and volunteers relayed rainfall reports as well as road and
> highway
> reports.
>
> ==>UN MAKES IT OFFICIAL: MONTENEGRO NOW NUMBER 336 ON THE CURRENT DXCC
> LIST
>
> A new ARRL DXCC entity came into being this week! As expected, the United
> Nations admitted the Republic of Montenegro as its 192nd member June 28,
> and
> that action automatically makes the tiny Balkan nation the 336th current
> DXCC entity.
>
> "According to the ARRL DXCC List criteria, entities on the UN list of
> member-states qualify as political entities," said ARRL Membership
> Services
> Manager Wayne Mills, N7NG. "Therefore, effective June 28, 2006 (UTC), ARRL
> has added The Republic of Montenegro to the DXCC List. Claims for DXCC
> credit will be accepted immediately."
>
> The Daily DX <http://www.dailydx.com> this week quoted Ranko Boca, YT6A,
> that current Montengrin radio amateurs may use their current
> Serbia-Montenegro call signs until the International Telecommunication
> Union
> (ITU) designates a call sign block for the new country.

>
> In anticipation of Montengro's new nation status, International DX
> Festival
> Montenegro <http://www.yu6scg.cg.yu/international-dx-festival.html> has
> been
> set for July 20 until August 12. That's when several international
> operators
> - with Boca as DXpedition leader and well-known DXer Martti Laine, OH2BH,
> as
> radio operations leader - will join forces with Montenegrin Amateur Radio
> operators from at least three different stations using a common call sign
> in
> an effort to meet the DX community's need to work the newest DXCC Entity.
> Festival organizers have set the ambitious goal of 200,000 contacts for
> the
> event, which will use all HF bands.
>
> The event also will include several basic courses on ham radio operating
> and
> CEPT license examinations aimed at new and less-experienced radio
> amateurs.
> Another goal is to establish an Amateur Radio Club of Montenegro
>
> Others scheduled to take part in the DX Festival include ARRL CEO David
> Sumner, K1ZZ, and XYL Linda, KA1ZD; 3Y0X team member Bob Grimmick, N6OX;
> IARU Region 1 Executive Committee member Hans Blondeel Timmerman, PB2T;
> Carsten Esch, DL6LAU, and Vladan Kecman, YT3T/YU1AO.
>
> Montenegro declared its independence on June 3 following a national
> referendum May 21.--The Daily DX; ARRL DXCC Desk
>
> ==>EUROPEAN SPACE CAMPERS QUIZ ASTRONAUT ON SPACE LIFE, RESEARCH
>
> A group of British space campers at the Euro Space Center (ESC) in Belgium
> went right to the source via ham radio and teleconference to get answers
> to
> their questions about life and work aboard the International Space
> Station.
> The Amateur Radio on the International Space Station (ARISS) program
> arranged the June 13 contact with US Astronaut Jeff Williams, KD5TVQ, at
> NA1SS. One camper wanted to know whether a human space flight to Mars
> would
> be possible by 2020, as has been projected.
>
> "Oh, I think it's realistic," Williams replied. "It depends upon the
> countries that are involved and how committed they are to the programs to
> make them happen by 2020."
>
> Answering another space camper, Williams outlined some potentially
> practical

> benefits of the scientific research occurring onboard the ISS.
>
> "You never know when you're doing research what the benefits are going to
> be
> until way off in the future," Williams qualified. "We are working on
> research to prevent kidney stones -- renal stones. That's very important
> for
> us in a weightless environment, and that will have direct application to
> those on the ground."
>
> Williams said he and Expedition 13 Commander Pavel Vinogradov, RV3BS, also
> are conducting studies on bone density. Experience has shown that the
> weightless environment appears to affect bone density of astronauts and
> cosmonauts on long-term duty in space.
>
> As other ISS crew members before him have said, viewing Earth from the ISS
> is awe inspiring. "It definitely changes your vision of the world. It's a
> very humbling experience to see the earth from this vantage point,"
> Williams
> responded. "The earth is a beautiful planet from above, and it definitely
> makes you more aware of what we've been given in our world and that we
> need
> to be good stewards of it."
>
> One questioner wanted to know if Williams saw the flashes of light in his
> eyes -- believed due to cosmic rays -- that other space travelers have
> reported. Williams said he does see them, especially when he closes his
> eyes
> to sleep, but they're not very bothersome. "It's just a very quick flash
> out
> of the corner of your eye," he explained.
>
> Serving as the Earth station for the contact with NA1SS was W6SRJ at Santa
> Rosa Junior College in California. Verizon Conferencing donated a
> teleconference link to handle two-way audio between the ESC and
> California.
> Contact audio was distributed worldwide via EchoLink and IRLP.
>
> Some 60 teenaged students and their teachers from Gillingham School,
> Dorset,
> England, were at the ESC Space Camp the week the contact took place.
> According to ARISS-Europe's Gaston Bertels, ON4WF, youngsters from many
> European countries visit the space camp, which includes a permanent Space
> Expo and an Amateur Radio club station, ON4ESC.
>
> Twenty questions were asked and answered, and there was time left over for
> Bertels to express thanks on behalf of the students, and the youngsters
> gave
> a resounding applause. Williams signed off by encouraging the students to
> make the most of their space camp experience and suggested that some of

> them
> might contribute to space exploration in the future.
>
> Also visiting on the day of the event were 50 French schoolchildren. A
> teacher translated the questions and the answers into French for their
> benefit.
>
> After the contact, an ARISS member conducted a half-hour
> question-and-answer
> session with the students. Six of their questions focused on ARISS
> activities.
>
> ARISS <http://www.rac.ca/ariss> is a nine-nation international educational
> outreach, with US participation by ARRL, AMSAT and NASA.
>
> ==>FCC AFFIRMS FINE FOR MARKETING NON-CERTIFICATED CBs AS HAM TRANSCEIVERS
>
> The FCC has affirmed a $7000 fine it proposed to levy on TravelCenters of
> America in Troutdale, Oregon, for marketing uncertificated Citizens Band
> (CB) transceivers as 10-meter Amateur Radio transceivers. In a Forfeiture
> Order (NoF) released June 29
> <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-06-1334A1.pdf>, the
> FCC turned away TravelCenters' argument that the transceivers in question
> were not CB transceivers, which require FCC certification, but Amateur
> Radio
> transceivers, which do not. The Commission says its Office of Engineering
> and Technology (OET) determined that the radios in question --
> manufactured
> by Galaxy -- could be easily modified to operate on CB channels.
>
> "TravelCenters provides no evidence to show that the Galaxy models it
> offered for sale were not easily modified," the FCC said in its NoF.
> "Therefore, we find that the subject Galaxy models were CB transmitters
> pursuant to Section 95.603(c), regardless of the signs TravelCenters
> placed
> near the point of purchase." The signs advised that the units were Amateur
> Radio transceivers, not CB radios, and a license was required.
>
> In May, an FCC Order concluded a similar case in which the Commission had
> imposed $125,000 in fines on Pilot Travel Centers LLC for continuing to
> market CB transceivers labeled as Amateur Radio gear but intended for use
> on
> both CB and amateur frequencies. Under the terms of a consent decree,
> Pilot
> agreed to make "a voluntary contribution" of $90,000 to the US Treasury
> "without further protest or recourse," but did not admit to any
> wrongdoing.
> Pilot further agreed to refrain from marketing as "Amateur Radio" gear any
> transmitting devices with built-in features to facilitate CB operation.
>

> The FCC required Pilot to remove from sale Galaxy transceiver models
> DX33HML, DX66V and DX99V. Those units also were among the radios the FCC
> cited in the TravelCenters proceeding. Some of the Galaxy transceivers at
> issue in the TravelCenters' case have only CB-like channel knobs and
> indicators for tuning, although the more expensive models sport a digital
> frequency readout. Most of the units transmit only in AM and FM mode.
>
> In affirming the $7000 fine, the FCC cited a 1999 letter from the FCC's
> Office of General Counsel (OGC) on the importation and marketing of ham
> radio transceivers. The OGC's letter clarified that transmitters having "a
> built-in capacity to operate on CB frequencies and can easily be altered
> to
> activate that capacity, such as by moving or removing a jumper plug or
> cutting a single wire" fall within the definition of a CB transmitter and
> must obtain FCC certification prior to importation or marketing.
>
> The FCC also turned away TravelCenters' argument that Commission efforts
> 10
> years ago to clarify the definition of a CB transceiver in an OET Public
> Notice violated the Administrative Procedures Act. The FCC countered that
> it
> had relied on the OGC's letter and its interpretation of ?95.603(c) as
> well
> as the OET's recent determination regarding the specific transceiver
> models
> in question. The Commission further noted that ?95.655(a) of its rules
> states that no transmitter will be certificated for CB use if "equipped
> with
> a frequency capability" not listed in Part 95 as CB transmitter channel
> frequencies.
>
> The TravelCenters case dates back to the fall of 2001, when an FCC agent
> visited the TravelCenters' retail store in Troutdale and observed six
> models
> of "CB transceivers" that had not received FCC certification. The FCC's
> Portland, Oregon, Field Office issued a Citation to TravelCenters'
> Troutdale
> store later that fall for selling non-certificated CB transceivers. It
> warned TravelCenters that future violations could lead to fines and
> seizure
> of equipment.
>
> In July 2005 the FCC's Enforcement Bureau issued a Notice of Apparent
> Liability (NAL) proposing the $7000 fine for "apparently willfully and
> repeatedly" violating ?302(b) of the Communications Act and ?2.803(a)(1)
> of
> its rules "by offering for sale a non-certified CB transceiver."
>
> ==>ARIZONA, NEW MEXICO ARES TEAMS KEEP CLOSE EYE ON WILDFIRES
>

> As firefighters gained the upper hand with the Brins Fire near Sedona,
> Arizona, and some evacuation orders have been lifted, Amateur Radio
> Emergency Service (ARES) volunteers were in a holding pattern at week's
> end.
> The fire burned more than 4300 acres and was 90 percent contained by
> midweek.
>
> "We are essentially just in a standby mode if something should change,"
> ARRL
> Arizona SEC Rick Aldom, W7STS, told ARRL Headquarters. Two Red Cross
> evacuation centers closed over the June 24-25 weekend.
>
> Evacuations for some Oak Creek Canyon residents remained in effect at
> midweek, impacting nearly 600 homes and 40 businesses. State Rte 89A
> remained closed to the general public, but authorities reopened the
> highway
> to residents, business owners, service providers and emergency vehicles
> June
> 27. Individuals entering the area must provide identification.
>
> Officials believe the Brins Fire, some two miles north of Sedona in the
> Coconino National Forest, resulted from an escaped campfire. "The
> firefighters who responded to this fire have done an incredible job of
> saving not only one of the more scenic areas of Arizona, but nearly 500
> structures that were threatened," Aldom commented. "Had this fire jumped
> the

905. Phonetics - lighten up

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-07-01 20:16:54 UTC
From: ke8fo
Topic: 905 Message: 905

Guys....
Lighten up.

What are you thinking when you hear "Zipper Half Open"? Could be a jacket. Even if you're thinking pants...so what?

On the other hand, standard - or at least close to standard - phonetics are most useful in a contest, chasing DX, etc. But sometimes a "butchered" phonetic set is clearer and more memorable....therefore, easier understood.

Wanna butcher my call sign?.... Kilo Echo 8 Efff Off? No thank you.

And a note to Tom: Posting the ARRL letter ONCE is OK. Three times is a pain in the zipper. Being an ARRL member, I get it e-mailed to me. Is it really necessary to post it on here? Just asking!

Mark
KE8FO

908. Raffle!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-07-01 21:32:56 UTC
From: Bill Fries
Topic: 905 Message: 908

All:

The president of the W8ZHO radio council is doing a raffle! The prize is a gift certificate good at Com Dac and likely that new ham shack south of Grand Rapids, too.

This event is entirely under the radar and off the approved list. He has not secured permission to raffle anything from the council nor the council's board. No problem, all profit will be donated entirely to the council's general fund.

So, break out your wallets and buy a chance. $5 each ticket or $45 for ten. We'll pull the winning ticket at the club's Founders Day Picnic August 19. I cannot imagine that you would miss the event but you will not have to be present to win the prize.

Get your tickets at the next club function including the meeting, Teenage Picnic, Fox Hunt, and, of course, the final day at the picnic.

And, oh, don't tell anyone in any position of authority. This is strictly a not for general notification. The fewer tickets we sell the less likely we are to get into trouble and the better your chances. Really, keep this under your hat.

If you want to help sell a few chances then let me know. I'm the club pres.

Bill, AB8SC

Subject: [WestMichiganHams] Spam Filtering

All,

I have turned off a feature in the group that was supposed to filter spam. All it did was hold up legitimate messages. If we have a problem with spam getting through it will have to be dealt with through the conventional filters. So far we have not. Assuring that all members of the group are licensed hams works very well, and only members can post here.

73,

Mark K8MHZ
WestMichiganHams Group Moderator

911. Regarding recent posts...

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-07-01 23:49:05 UTC
From: Linda Rosenthal
Topic: 911 Message: 911

Recent posts on this reflector and some conversations with Bill, AB8SC, reminded me to this powerful statement, particularly the FRIENDLY part:

The Radio Amateur is:

CONSIDERATE...never knowingly operates in such a way as to lessen the pleasure of others.

LOYAL...offers loyalty, encouragement and support to other amateurs, local clubs, and the American Radio Relay League, through which Amateur Radio in the United States is represented nationally and internationally.

PROGRESSIVE...with knowledge abreast of science, a well-built and efficient station and operation above reproach.

FRIENDLY...slow and patient operating when requested; friendly advice and counsel to the beginner; kindly assistance, cooperation and consideration for the interests of others. These are the hallmarks of the amateur spirit.

BALANCED...radio is an avocation, never interfering with duties owed to family, job, school or community.

PATRIOTIC...station and skill always ready for service to country and community.

--The original Amateur's Code was written by Paul M. Segal, W9EEA, in 1928.

73, Linda, AB8QH

Phonetics - More insight-
In my very humble opinion the ITU standard alphabet should be used at all times without variation-Everyone and those outside of the ham bands we might encounter in disaster work will be using standard phonetics-using something else could confuse them or old hands used to using correct procedures might have a problem! Standardization is called for here no matter what you are doing- DE WD8USA ...-.-

I would keep it full length in case you ever re-arrange again. I may be wrong, but 3 extra feet should not make a difference, as long as you have a good way to coil it. Adding a barrel coupler to lengthen it in the future will add loss.

When I was at the University of Denver, we ran into several cases where Spanish speaking folks had trouble with Whiskey Zero Alpha Novemeber Alpha. We solved that problem by using W0 "ANNA". (pronounced "AH NA" This was one of the few times when "special phonetics" worked.

From: George (Skip) VerDuin
Topic: 905 Message: 919

Sorry Hank, Mark, (et al) who prefer to put Tom to work forwarding the newsletter.
Great concept Tom has to whet our whistle for the material,
BUT
I agree with Tom [perhaps for a different reason]...

Tom has duplicated the letter in my mailbox - therefore it is SPAM from a trusted source.
No filter works for that circumstance - so far.
Tom works hard to get it to me - I work hard finding the delete button.
My life, Tom's, and potentially many others, would be simpler if Tom retired the practice of forwarding.
Unless of course he has editorial comment - then cut-and-paste works like a dream.

For those who want to see the letter like I do - do like I do / subscribe directly.
It gets here earlier, the service is free, and it promotes ham radio.
It comes from: ARRL Letter Mailing List <letter-dlvy@...>
And the good news - you only get it once...
There is no down side.

Not a member? Join.
To promote ham radio by reading the letter while not a member of the publishing group is an oxymoron.
When you find an ARRL issue to bitch about, you get heard just a little better as a member...

Don't you hate it when there is this dissenting voice out there?

From: John Wehmer (WB9JSR)
Topic: 907 Message: 923

Tom, I feel that what you are doing is a service to other HAMs. I for one appreciate the work that you are doing as Michigan's sixth district "ARRL District Emergency Coordinator" in keeping our fellow HAMs up-to-date as to many of the happenings in the hobby. It certainly is easy to simply click the delete button if one does not wish to read the reports.

All,

I have turned off a feature in the group that was supposed to filter spam. All it did was hold up legitimate messages. If we have a problem with spam getting through it will have to be dealt with through the conventional filters. So far we have not. Assuring that all members of the group are licensed hams works very well, and only members can post here.

Thanks John, that worked better. Is this the same vehicle that is on display the last several years at the Dayton Hamvention? It is impressive.

The ECRV is a awesome vehicle. I had the pleasure of attending a Red Cross class on the vehicle. Late this fall I will be attending a one week (40+ hours) course that will certify me to drive and operate all the neat gadgets on the ECRV. Just one of the perks of being part of the Red Cross Communications Response team.

By the way, there is a HUGE need for more amateur radio operators to help in the Red Cross Communications Response teams. Contact your local chapter and ask about being part of the RTT-RCM.

I wish I could say yes - but I need to say no.
In my case, I presumed I had the wrong driving software and maybe the
wrong electrical interface detail.
But I gave up before being successful.

Yes - true - perhaps it is because it was an early application and later
ones are essentially better.
I still have a 735 in a box, but if you want to partner on getting this
done perhaps I could drag it out?

Mark:

My logging program, from N3FJP, is supposed to interface with my Icom 735. I tried it (I have the cable, com port to rig) without success. I have had some joy with a computer interface program that works pretty well. But the logging program is really cool as it should log the mode, frequency, or tune the rig to the frequency of the spot. Really great stuff. I asked the software guy about this and he told me that the 735 is just enough different, there are not enough of us to make it pay, and the process is a little too tedious for my logging programmer to figure.

So, it has promise but I have not gotten it to work as I would like. I more or less gave up. That, plus the complication that my notebook computer has only one com port and I could really use two or three.

If you work it our let me know of your success!

Bill, AB8SC

940. 2006 IARU HF Championship Contest - NU1AW/8

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-07-08 02:18:01 UTC
From: Hank Greeb
Topic: 940 Message: 940

This coming weekend is the IARU HF Championship Contest. The contest period starts at 8:00 a.m. EDT (1200 Z) Saturday morning and runs for 24 hours straight to 8:00 a.m. EDT (1200 Z) Sunday morning.

What makes this contest special is that the host station(s) for NU1AW/8 are located in Michigan and Ohio - which is a BIG plus for these ARRL Sections, and a boost to Amateur Radio Contesting in the region. The stations are setup and ready to go. This effort is a joint venture between Mad River Radio Club and North Coast Contesting Club, with consist of 2 host stations operating from Ohio, and 2 host stations operating from MI. All host stations will be linked together via the Internet for actual logging content to be seen by all the host operators throughout the contest period.

The host stations for NU1AW/8 are:

K8CC Ypsilanti, MI
K8AZ Cumberland, OH
KW8N Ridgeville, OH
N8CC Nashville, MI

They will all be using the call NU1AW/8, and operate on all bands, 160 thru 10 Metres, except for the WARC bands. These host stations are looking forward to working as many Ohio and Michigan stations as possible this weekend. The host stations can be worked on both modes SSB, and CW for a total of 12 contacts.

Whether your doing a full time or part time effort, please get on, have some fun, and good luck to all operators this weekend.

73 de n8xx Hg

Note: Rules for the IARU championship are at

I agree the 735 has a great rcvr - It's why I hold on to it after
getting my 756.
>

No and No - the owners manual is notoriously quite on the subject. Just
enough info to get started...
>
> I have read that you can see if the 735 is transmitting out the remote

Not ohms -- as I recall the circuit it is driven and I looked at
volts... I don't remember results actually.
>

The RS-232 interface spec is not OK as I recall - it is a 12+/- volt (24
nominal...) protocol / the 735 seems to be TTL or 5 volt.
You can knock down 20, but you can not build up 5 without an interface
circuit - something that did not work for me.
I even had a Icom rep tell me an interface circuit was not needed...
Again my recollection is that none of the other Icoms need interface
circuitry - just the 735...

I was looking for the digital protocol but never got past the interface.
>

IIRC from the last time I played around with CI-V on my (newer) Icom,
the interface is 5V open-collector. For an interface, I used a MAX202
RS-232 <==> TTL level convertor with (IIRC) a 300 Ohm pull-up resistor.

You might want to check out this site for CI-V details:

http://www.plicht.de/ekki/civ/civtoc.html

>
> Either of you guys try this test?
>
> Mark

You didn't say whether you had an interface circuit connected or not. I doubt you'll see 5V when the bus is idle, unless you have an interface circuit of some sort connected. Although the output should decrease towards zero when rapidly spinning the VFO knob.

Here is what I get with a 706MkII, measured right at the connector with no interface circuit:

Bus idle: 4.7V
Bus busy (spinning the VFO knob): 4.2V

If I put any sort of a load on the data lines, the idle voltage drops. Simply touching both the tip and shield at the same time with my finger drops the idle voltage to 3.2V, and the busy voltage to 3.1V.

The cable TV sniffer frequency is just a hair above the 2m band/vhf the signal generator used, has to be calibrated on regular basis for output level and frequency, It's mandated by the FCC, and they do adhere to it closely. They have a test point on there property that each driver has to pull up to every morning to calibrate the monitor in their trucks. When I was still they used to watch us closely to see if we calibrated in the morning.

Methinks thee needeth to check things out before passing on urban legends.

When I did a search with Google for quixstar, I got at least three anti-amway/quixtar sites on the first page. Similar results when using Yahoo.

> In 2005, multi-level marketing giant Quixtar began a "Quixtar Web Initiative" to manipulate Google results. The project was considered by many to be a clear and flagrant violation of Google's Quality Guidelines.
>
> According to a web article called Quixtar Admits Google Bombing, a high-level ("diamond") member said that the company had "hired geekoids who were spending their time Google bombing positive info about Quixtar so that the negative sites would be buried way down at the bottom of the Google list when a prospect types in Quixtar [in a search engine]. Nobody will even be able to find the negative sites anymore."
>
> The goal presented was to smother anti-Quixtar sites, such as a consumer protection group, an eBook about Amway and Quixtar, and grassroots movements from ex-Quixtar members that claim Amway and Quixtar are Pyramid schemes, cults, and use deceptive business practices.
>

> Quixtar's attempt to lower the ranking of such negative web sites backfired, and, for a few months, Quixtar's Google results suffered for its attempted Google bombing.
>
> As of May 2006, a search on Google for "Quixtar " reveals that Quixtar.com is again the number one result.
>
> The organized effort to manipulate search engine results was first brought to light by bloggers which detailed the evidence in an article "So Busted".
>
> Ironically, the site that reported Quixtar's attempt to Google bomb once occupied the first search position under "Quixtar". Often, in fact, a majority of the top ten results for the term "Quixtar" are sites critical of the Quixtar business opportunity and its lines of sponsorship. This is mixed in with real positive results, however, and helps to show both sides of the arguments.
>
> Quixtar's initiative included at least 54 Quixtar Blogs and numerous other company-related sites, character assassination blogs, adoration blogs, and various other pages. Immediately after the exposure many of the blogs shut down or reduced their content.
>
> Some of Quixtar's independent lines of sponsorship have also been among the largest abusers of Google bombing. These independent lines of sponsorship are led by high-level Independent Business Owners, or IBOs, called Diamonds, Crowns, and Crown Ambassadors.

Typically, unless the battery is in an enclosed space, with no ventilation, the amount of hydrogen generated will dissipate in the atmospher with no ill effects. If you put it in a closed closet, with no ventilation, and then switch on a light after it has been charging for several weeks, you might get an explosion.

BTW, if the storage batteries were being charged from AC Mains the operation was NOT considered battery powered per Field Day rules.

Hello Everyone .. I want to thank the hams that helped out in Grand Haven this past Saturday, I heard from both Jim Tanis and John Fisher that the event went really good.
I will be looking for volunteers for the Coast Guard events coming up the end of this month .. First there is the YMCA Coast Guard Runs .. 5K, 10K, and fun run on July 29th which will be followed the same morning with the Family Parade which keeps getting bigger every year. Both events take place in the morning one after the other and we are done by 12:00. Then the following weekend we have the Grand Parade which last year we helped with both parade lineup and parade safety and the date on that is August 5th. Please keep these dates in mind and if you can help out please drop me a email or let John Fisher or myself know you will help out ?..
Thanks again for all your help with these events ?
..73 Don Meyer - KB8ODB -- kb8odb@...

I would appreciate it if moderators from the other reflectors in the area would post a copy of this information on there reflectors .. Thank you Don

968. VHF digital net: Fridays at 7 PM!

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-07-12 14:41:31 UTC
From: Joe Veldhuis
Topic: 968 Message: 968

Well, I've decided to resume the VHF digital net. It will be held on Fridays at 7 PM eastern/6 PM central on a center frequency of 144.1515 MHz. This means that if you tune your rig to 144.150 MHz USB, the net will be centered on an audio frequency of 1500 Hz.

You will need a 2m sideband capable rig and a horizontally polarized antenna, as well as some kind of soundcard interface. If your rig has VOX you could just couple the mic to your headphones with a rubber band, but it would be better to get a mic plug compatible with your rig and solder an audio cable to its audio pins. If your rig is VOX-less, you'll need to make a keying circuit:

http://www.electroblog.com:8090/radio/ptt.html

Or, bypass all that and get your hands on a Rigblaster, Rascal or similar device.

The mode I'll be using for the net is MFSK16, since it is quite robust and supported my most software. It is also worth noting that this mode supports sending images. Because of the hybrid image/data nature of that function, US hams aren't allowed to use it on HF, but there is no such restriction on VHF so we're free to experiment with that. If you don't already have suitable software installed, here are my recommendations:

Windows:
MultiPSK (free): http://f6cte.free.fr
MixW (nicer, but costs $50): http://www.mixw.net

Linux:
gMFSK (free, open source!): http://www.w1hkj.com

The net control station (i.e. me) is in western Robinson township, grid EN62wx. I'll be running 50 watts into a 13 element beam up roughly 25 feet. I will begin facing east (towards Grand Rapids, and perhaps Saginaw and London), then turn clockwise as the net progresses.

Hope to see a lot of you there!
-Joe, KD8ATU

We (NOARC) ran a variety of batteries that were charged strictly with solar panels. We did use the AC grid for some of our computers because connecting them to the same power supply (battery and inverter) was causing noise in our rigs.

We did not run QRP and had plenty of power for all weekend.

Who was the unfortunate ham that got sliced? I hope he/she is recovering OK.

I am pretty sure the generator was powering the chargers. I couldn't make it but I helped W8AMZ with some of the generator and power drop planning. It's pretty likely that the only battery being charged off the AC mains at the park was for the cordless electric knife used for slicing the....ham. :)

Here is the link to Communication Electronics Supply's website. They have an online store which at this time is down for maintenance.
The home page also allows you to subscribe to their mailing list.

http://www.cesham.com/index.html

While I have no objections to inviting them to become part of the list. I have a problem with them advertising merchandise on the list, except on a rare occasion. Remember we complained when other advertisment showed up on the other lists we are on.
I have no problem with them throwing the website address out on the list every so often to remind us they are there.

As moderator I think we should invite Communications Electronics Supply to be a part of the reflector and advertise on it.

I think the area has needed a local store for a long time and any help we can give them, or any local ham venture for that matter, would benefit the local amateur community.

Any one against the idea??

Alan, nice prices on the rigs, a couple hundred bucks less than suggested retail it looks like.

Thanks and 73,

Mark K8MHZ

-------- Original Message --------
Subject: Monthly Michigan Section News Summary
Date: Mon, 17 Jul 2006 14:26:25 -0400
From: ARRL Web site <memberlist@...>

Greetings to everyone in this mid-summer season.

Congratulations to the Adrian Amateur Radio Club for being selected as the Michigan Gateway Station for 2006-2007. The AARC and its club station W8TQE will serve in the capacity of being the first contact point for NTS radiogram traffic for the State of Michigan during a major disaster. This position is offered each year to qualified groups or individuals who volunteer to serve in this public service capacity.

The Michigan Summer Campout reports another success this year, with good attendance, excellent workshops, our first Campout Foxhunt and campfire fun-extraordinaire. We all extend our sincere thanks to the team that puts this together every year, Debbie KA8YKK, Roger WB8WJV and John N8ZE. They each go well beyond expectations to make this annual event a spectacular success. Special Guest included Denny VE3EUI From Sault Ste Marie, Ontario, ARRL Vice Director Gary KI4LA and Ohio Section Manager Joe K8QOE. KY SM John NB4K sent his greetings and regrets that he was unable to visit with us this year. Make your plans early, the next Campout is set for July 12-15, 2007.

From the The Auto State Young Ladies' TASYLS Newsletter, a recognition for several outstanding achievements:

Happy 97th birthday to Inez Pearson on July 5, 2006. Inez got her ham license June 6, 1978, when she was 69 years old and she quickly advanced to the Extra Class. It was through her brother that she got into ham radio. He had been a ham for a long time and talked to her about getting her license. With her brother's and nephew's help she learned morse code. Inez has been a TASYL member for 25 years. Several years ago Art Wainwright interviewed her for Lansing magazine. She is a member of the Quarter Century Wireless Association and a lifetime member of the Central Michigan Amateur Radio Club. It was through the CMARC club that she was presented the Ziegenbein award. She has been a VE (Volunteer Examiner) for CMARC for several years.

One of the ways that Inez has helped people on the radio happened several years ago. Relatives of a woman from Colorado were attempting to locate her because of illness in the family. Inez was able to track the lady down through her radio and the woman was able to fly back home

in time to be with her dying mother.

We are honored to offer this recognition to Inez, not only on the occasion of her 97th birthday, but also for her serving as an outstanding example for us all.

A reminder, MiTN, the Michigan Traffic Net needs a few volunteers for open NCS time slots. This net meets daily at 1900 local time on 3952 to handle NTS traffic. All comers are welcome, regardless of experience. Net regulars will always take the time to assist a newcomer to the process of traffic handling.

Our New Michigan Section web page has been introduced through the efforts of Dan KB6NU, our Affiliated Club Coordinator. This replaces the page formerly hosted at the League's server. The new site address is http://www.arrl-mi.org/ . There is a link to this new page on the former page. By using an independent host we are able to offer the ability to include pictures without some of the constraints we faced in the past. You will see these phased in over the next couple of weeks. All of the material from the old site had been relocated to the new one. All links have been moved to the new page and you will see more features added on a frequent basis. Articles of note from Michigan club newsletters are already a feature of the new page. This is part of our goal to share ideas and "what works" with one another.

Net reports? Is your local net reporting its activity? Your net need not be a "traffic" net to report, but can be any type of net. We are interested in hearing from all local nets, what you are doing, how often you meet, and how many folks participate. We will be pleased to list your activities at http://www.mi-nts.org/netinfo.php , all you need to do is report what is happening to John WB8RCR wb8rcr@... to be included. Let's show the rest of the world how many active nets Michigan has.

Station Activity Reports for June, 2006: K8KV 325, K8LJG 171, KC8MLD 128, WB8RCR 121, K8ZJU 110, WD8USA 106, K8AMR 96, K8AE 84, KD8AMR 62, WB8TKL 46, WI8K 42, W8RNQ 36, KD8BGQ 26, KV8Z 22, WA8OOH 4, AB8CB 4, KD8BMV 4, NX8S 3, KC8ZGB 2.

Public Service Honor Roll Reports for June, 2006: KD8BGQ 230, K8AE 210, K8KHZ 204, WB8RCR 135, K8ZJU 125, K8AMR 120, K8KV 110, KV8Z 103, K8VFZ 63.

June Official Emergency Station reports came in from K8COP, KC8ULE and N8HA. PSHRs and SARs should be filed monthly with WB8RCR and your OES reports with WA8EFK.

73, Dale

Somebody responded on another list where I posted this information that he had checked with Icom America, who informed him that this business is *not* an authorized Icom dealer. (And I do not find them listed as an authorized dealer for Kenwood or Yaesu either, although they had rigs of all three brands on the shelf).

Perhaps they are in fact selling "gray market" goods and getting warranty service could be a problem.

So check them out before parting with any money.

Communications Electronic Supply is associated with COMDAC. They are not selling grey market, warranty service is valid as with any other retailer.
It was explained to me most of the big manufacturers are not issuing new franchices, and if they were, a new retailer would be required to purchase an enoumous stock off the bat. (Can you say working capital?)

I'm glad to see someone in the Grand Rapids market. Its been like 20 years, except for Radio Shack, any ham gear has been available from a GR area retailer.
Begin personal rant: I was at one ham meeting where the leaders were recommending don't bother with CES, just order from COMDAC. I couldn't dissagree more. That kind of attitude will make CES drop the ham market and it could be another 20 years, if ever, anything comes to Grand Rapids again. If you have to wait a couple extra days, if it cost an extra ten bucks to support a local dealer as opposed to ordering from some out of state mass marketer, to me, and IMO the area ham community, it's worth it.

From: Gary Lauff
Topic: 649 Message: 990

Hi, Just read your email, RE: QSL Cards. I am curious, you said you design your own QSL cards, and have a half a dozen versions. What computer program are you using to design the QSL cards with, and how do you like it? Would you use different software if you could? which program would that be? Why? How do you print out the finished version, QSL cards? Are they on thick, stiff glossy stock? Please expound.

K8MHZ <k8mhz@...> wrote:
The following article was from 2003 but it mentions something I never heard of. An exhibit at an art gallery featuring QSL cards. There is also mention of a book we should be seeking out, "Hello World: A Life in Ham Radio".

I have only been collecting cards for a few months now. I have about 90 cards from 24 countries and 24 states. In the process of collecting them I have made some friends on the air from many different countries. Just more than a signal report, we talked about each other's lives and families, what it is like where we live and have even went on to exchange e-mails. The highlight of my collection came yesterday. A short time ago I made friends with the QSL manager for 4A7L. She was also the QSL manager for The Kingdom of Jordan's King Hussein 1, JY1, now SK. She has un-used QSL cards from him and sets of un-used postage stamps from 1952. She has sent me two sets of stamps (one for my father) and one of the QSL cards. The card is made from very heavy stock, like a matte board, with gold on the edges. The call JY1 is made of embossed gold foil. On the card is a picture of King Hussein, not printed on the card but cut from a photo and glued there. His signature,
from a rubber stamp, is on the card. Someone spent a great deal of time designing that card. It will reside in a picture frame along with the stamps and the note explaining them.

I started designing cards as soon as I had to send one out. I now have about 1/2 dozen designs for my own call and have done a few others as well. I never thought about the cards as exhibit worthy art until I read the article, below.

Something I picked out of the article that I kind of liked....the author coined hams as being part of an "elite sub-culture". I like that.

Radio Ga-Ga
At Spur, One Man's Career in Ham Radio Reveals a Lifetime of Curious Connections
Hello World: A Life in Ham Radio
the Spur Propaganda Gallery through Dec. 22

By J. Bowers
To the uninitiated, sitting in a dank basement with humming receiver components and

antennae might seem even geekier than playing Everquest for 40 hours straight. But before there were online gaming communities, cellular phones, international relay chats, and instant messaging, ham radio was the best way for a civilian to reach out and touch the world. With a basic, often homemade setup consisting of a transceiver, a power source, an antenna, a speaker, and a microphone, amateur radiophiles everywhere transformed themselves into international communication hubs, using their know-how to establish contact with fellow hams in distant lands. Once connected, a ham operating out of Baltimore might enjoy a "QSO," or contact, with Erik Biorck at Radio S21ZG in Bangladesh, or Darcy Bens at Radio VEGCK/A7 in Doha, Qatar. After exchanging station addresses and friendly conversation, both hams mail "QSLs" to each other--tangible verification that their "QSOs" occurred, complete
with equipment specifications, time of contact, and other information, all printed and/or handwritten on a 3 1/2-by-5 1/2-inch card. Geeky? Sure. Interesting? More than you'd think. Hello World, on display at Hampden's Spur Propaganda Gallery, plays host to hundreds of QSL cards. Sealed in plastic sandwich bags and neatly tacked to strips of wood along the gallery walls, the more than 300 QSL cards represent the personal collection of one Hackensack, N.J., ham--namely, Jerry Powell, call number WO2JW, or "Whiskey Two Oscar Juliet Whiskey," in the ham-favored International Telecommunication Union phonetic alphabet. An avid follower of the news, Powell often used his radio to contact ham operators in international hot spots, amassing a QSL collection that includes communiqu?s from post-bomb Japan, Vietnam, Iran, Korea, and other locales where civilian contact was discouraged or restricted. By passing government-sanctioned licensing exams, amateur radio enthusiasts become
part of an elite subculture, able to wirelessly transmit information around the world--an ability that carries weight even today, when a hurricane or other disaster can knock out phone and power lines in seconds. Even though Powell, who held a license from 1928 until his "key went silent" in 2001, was just an average American hobbyist, his 67-year ham-radio career caught the attention of author/ham Danny Gregory and graphic designer/ham Paul Sahre. Gregory and Sahre used Powell's formidable QSL collection as the backbone for their book Hello World: A Life in Ham Radio (Princeton Architectural Press, 2003). Peppered with diagrams that look like they could have been plucked from a 1950s science textbook, Hello World is at once an educational text and a picture book of Powell's radio lifestyle. It makes sense, then, that Spur's Hello World exhibit is best viewed as a companion piece to the eponymous book. Without the context of ham-radio culture, the colorful QSL cards lining the walls would never transcend their license plate/picture postcard/calling card hybrid appearance. But with a little help from Gregory and Sahre's impeccably researched, pleasantly lighthearted book, the full historical resonance of the ham-radio phenomenon turns Hello World into one of the year's most successful sociocultural exhibits. Most of the ham operators in Powell's collection designed and printed their own QSL cards, using amateur typography, icon, layout, and paper-quality knowledge to identify and advertise their home stations. As a result, the cards' styles and subjects vary as wildly as their creators' nationalities. Some hams, like L.R. Goetz, operating as W9MHM out of Indianapolis, used QSL cards to advertise their businesses--a sly way to evade laws forbidding on-air commercial enterprise. Others, including Joseph H. Miller of PJ9AB, in the Netherlands Antilles, use their QSLs as a forum for Christian witnessing. Miller's card converts the name
of his homemade station, Trans World Radio, into an acronym for "Telling the World of Redemption Through our Lord and Saviour Jesus Christ." The bulk of Powell's collection consists of QSLs from hams who used the postcard-sized format as a way to display pictures of their families (often posed in front of the home ham station), or to offer insights about their locations. In 1959, Glenn E. Murphy, aka K4TLN out of Athens, Ala., sent Powell

a photo collage QSL. In addition to depicting Murphy himself, hamming away in front of a homemade map that denounces everyone north of the Mason-Dixon line as "damn Yankees," K4TLN's QSL card shows his son Mack brandishing toy six-guns, his daughter Karen, and his wife, identified only as XYL--shorthand for "ex-young lady," a slang term used to refer to any male ham's wife. Of course, some XYLs ran their own stations, including Maude Phillips, of Alberta, Canada, whose 1944 QSL shows a sexy cartoon version of herself, sending out "CQ"
calls on her transceiver while her boxer-shorted husband, Glen, mends his pants. The caption reads: "While Maude QSOs, the old man sews!!" Phillips added a second handwritten caption beneath her equipment specs, claiming that the cartoon "ab[ou]t covers the situation here!" The concept behind Gregory and Sahre's book may seem unassuming at first, but the QSLs on display at Spur provide a fascinating gateway into ham-radio subculture. The cumulative effect of seeing Powell's collection all at once should intrigue any history or pop-culture buff. Even those who don't know a ham radio from a ham sandwich.

Hey Mark ,
I went to school with a guy whose name is Euguna . Matter of fact he lives 3 blocks away from me . We use to pick on his name growing up . His name is Indian Dis-ant and I think it meant something about rocks and water .
I see him often ,I will ask .
As far as the other spelling there is an Japanese actor named Yuguana Nue Lie , or something like that . Was an actor back in the early 80's according to my wife .
she's a movie hobbiest or whatever .
Mark

I heard the following on 20 meters with a not to hard to understand accent:

Victor Echo 6 Victoria Norway Ugwana

Or was it Euguana?

Nope, when the stateside station said the call it turned out to be VE6VNY.

Yuguana????

What the heck's a Yuguana? A cross between a Yugo and an Iguana?

My apologies to the station to the north but it took me more than half a dozen tries to figure out what the last letter in the call sign was.

While on the subject of phonetics, I think sometimes they are over-used, especially on FM, where it is usually easy to hear letters. Occasionally I'm confronted with a group of 4 or 5 words with a number in the middle of them, and I ask my self-- "What was that? All I wanted was his call!" In my opinion, just say the letters unless asked for a repeat...

All:

Please visit your calender Right Now and add August 19 for the Founders' Picnic at the MAARC clubhouse. We will feature a pig roast, lots of old photographs and video, a special presentation, a Special Event station putting W8ZHO on the air, a raffle and 50/50 drawing, lots of fun games, ants, meet a charter member of the club, and have a great time.

We'll eat around noon but the fun starts before then and runs later, too.

Our MAARC is over seventy years old, has been affiliated with the ARRL for sixty-five years, has been incorporated for fifty years, and has Elmered tons of hams, operated tons of hours, has welcomed lots of neighborhood hams, and has been active and involved in amateur radio in our community for quite a few years.

YOU are invited to attend, enjoy, and celebrate this accomplishment.

1010. Teenage Picnic is Saturday

Subject: Re: [WestMichiganHams] NOARC Fox HUnt is tonite at 7 PM Starting at WHite Pine Middle SChool

If there are folks participating who don't live in Grand Haven, it might be a good idea to hold off on specific hints that could be used identify the fox's position for a few rounds to give them a chance. For example, a specific landmark that is not well known. I don't want Mark to post another article about my foxhunt methods on hamsexy.com if I win.

Hi:

The NOARC 2 Meter Fox Hunt begins tonite at 7 PM
at the WHite Pine Middle School which is on Griffin ST
in Grand Haven. Fox Hunt instructions
are on the W8CSO reflector--or we will have handouts.

COme join the fun!

Ever wonder how companies get involved in Indian call centers?

http://www.callcentersindia.com/

You can express your views to the fine people that promote this travesty
here:

http://www.callcentersindia.com/call_center_india_contact.php

1035. Re: ....

Yahoo group: WestMichiganHams (2006 — 2008)
Date: 2006-07-28 20:35:25 UTC
From: Hank Greeb
Topic: 1026 Message: 1035

This reminds me of one Field Day operation back in the late 60's or early 70's. We made our "renewable resources" contacts by hooking two bicycle generators (used normally for headlights) together in series, putting a very large capacitor across the output, and then powering a QRP transceiver with the Rube Goldberg power source. I recall that we only needed to make one contact that year, but it took a while because the amount of energy we could store in the capacitor was very limited, and we couldn't run the QRP rig for more than a few minutes at a time.

In later years we realized the folly of the setup, and put a "dead" wet cell across the output of the generators. After 30 minutes or so of cranking the generators we had enough power to make enough contacts, and we didn't even need a voltage regulator.

Even later, one fellow converted a lawn mower engine to run on ethanol, hooked it to a generator. We bought a quart of 180 proof drinking ethanol (gasp! what a waste) to power the thing, and had more than enough power for the 5 or 10 contacts that were required in subsequent years.

Hank Greeb

Is it down with the program? Maybe we just have to get down to use it.

I have to fix the N8ARY/W8CSO link. It's down for some reason.

Andrew

If you saw me w/o a shirt, you'd think so.

I'll work on it this week. I think the last storm messed up the computer.

The node is 73469. I'll keep the group posted.

Andrew
N8ARY (AKA the missing link).

Subject: [WestMichiganHams] Hams monitored distress calls?

From Mlive:

"Wannamaker said there have been no reports of a boat missing or being late at any area marina. She said the distress call was made on a marine radio channel typically used and monitored by ham radio operators, not the usual channel 16 distress frequency, so the Coast Guard did not receive the call directly."

So....can anyone tell me just what channel Ms. Wannamaker is talking about?

This whole thing smells....fishy.

Does anyone else have any info on this???

Sometimes hams get lumped together with CBers by the uninformed.

Maybe a boater who had a amateur rig and thought it was a marine radio.
I know that 2 years ago a friend of mine came down from Charlevoix in his 32' foot boat for the Coast Guard Fest. He had made the trip along with several others from the Traverse City area. My thoughts is maybe the allege boater maybe from somewhere other than the local area.
73's
KD8BIG

-------------- Original message --------------
From: <k8mhz@...>
That would mean the boater was ham...or had an illegal rig on board. If the boater was a ham, he would have had a call sign. It would be interesting to know where the so called hams that monitored the call were. 20 is pretty tough in the morning right now.

Things just don't add up.
